2012 20th IEEE International Requirements Engineering Conference

(RE 2012)

Chicago, Illinois, USA
24-28 September 2012

IEEE Catalog Number: **CFP12022-PRT**
ISBN: **978-1-4673-2783-1**

Contents

Preface

Message from the Chairs . . . iii
Committees . . . v
Additional Reviewers . . . viii
Sponsors . . . ix

Main Research Track

Handling Uncertainty

Managing Requirements Uncertainty with Partial Models
Rick Salay, Marsha Chechik, and Jennifer Horkoff — *University of Toronto, Canada* . . . 1

Speculative Requirements: Automatic Detection of Uncertainty in Natural Language Requirements
Hui Yang, Anne De Roeck, Vincenzo Gervasi, Alistair Willis, and Bashar Nuseibeh — *Open University, UK; University of Pisa, Italy; Lero, Ireland* . . . 11

Resolving Uncertainty in Automotive Feature Interactions
Silky Arora, Prahladavaradan Sampath, and Ramesh S — *General Motors, India* . . . 21

Requirements Processes

Process Improvement for Traceability: A Study of Human Fallibility
Wei-Keat Kong, Jane Huffman Hayes, Alex Dekhtyar, and Olga Dekhtyar — *University of Kentucky, USA; Cal Poly, USA* 31

How do Software Architects Consider Non-functional Requirements: An Exploratory Study
David Ameller, Claudia Ayala, Jordi Cabot, and Xavier Franch — *Universitat Politècnica de Catalunya, Spain; INRIA, France* 41

Evaluating the Software Product Management Maturity Matrix
Willem Bekkers, Sjaak Brinkkemper, Lucas van den Bemd, Frederik Mijnhardt, Christoph Wagner, and Inge van de Weerd — *Utrecht University, Netherlands; VU University Amsterdam, Netherlands* . . . 51

Requirements Management and Tracing 1

Identifying Outdated Requirements Based on Source Code Changes
Eya Ben Charrada, Anne Koziolek, and Martin Glinz — *University of Zurich, Switzerland* . . . 61

The Quest for Ubiquity: A Roadmap for Software and Systems Traceability Research
Orlena C. Z. Gotel, Jane Cleland-Huang, Jane Huffman Hayes, Andrea Zisman, Alexander Egyed, Paul Grünbacher, and Giuliano Antoniol — *DePaul University, USA; University of Kentucky, USA; City University London, UK; JKU Linz, Austria; École Polytechnique de Montréal, Canada* . . . 71

Enhancing Candidate Link Generation for Requirements Tracing: The Cluster Hypothesis Revisited
Nan Niu and Anas Mahmoud — *Mississippi State University, USA* . . . 81

Legal and Regulatory Requirements

Reconciling Multi-jurisdictional Legal Requirements: A Case Study in Requirements Water Marking
David G. Gordon and Travis D. Breaux — *CMU, USA* . . . 91

Managing Changing Compliance Requirements by Predicting Regulatory Evolution: An Adaptability Framework
Jeremy C. Maxwell, Annie I. Antón, and Peter Swire — *North Carolina State University, USA; Allscripts Healthcare Solutions, USA; Georgia Tech, USA; Ohio State University, USA* . . . 101

RE@Runtime

Requirements-Driven Adaptive Security: Protecting Variable Assets at Runtime
Mazeiar Salehie, Liliana Pasquale, Inah Omoronyia, Raian Ali, and Bashar Nuseibeh — *Lero, Ireland; Bournemouth University, UK; Open University, UK* . . . 111

Stateful Requirements Monitoring for Self-Repairing Socio-Technical Systems
Lingxiao Fu, Xin Peng, Yijun Yu, John Mylopoulos, and Wenyun Zhao — *Fudan University, China; Open University, UK; University of Trento, Italy* . . . 121

Privacy Arguments: Analysing Selective Disclosure Requirements for Mobile Applications
Thein Than Tun, Arosha K. Bandara, Blaine A. Price, Yijun Yu, Charles Haley, Inah Omoronyia, and Bashar Nuseibeh — *Open University, UK; Frogfish Technologies, UK; Lero, Ireland* . . . 131

Feature Models

Mining Binary Constraints in the Construction of Feature Models
Li Yi, Wei Zhang, Haiyan Zhao, Zhi Jin, and Hong Mei — *Peking University, China* . . . 141

A Feature-Oriented Requirements Modelling Language
Pourya Shaker, Joanne M. Atlee, and Shige Wang — *University of Waterloo, Canada; General Motors, USA* . . . 151

Efficient Consistency Checking of Scenario-Based Product-Line Specifications
Joel Greenyer, Amir Molzam Sharifloo, Maxime Cordy, and Patrick Heymans — *Politecnico di Milano, Italy; University of Namur, Belgium* . . . 161

Requirements Communication

What You Need Is What You Get! The Vision of View-Based Requirements Specifications
Anne Gross and Joerg Doerr — *Fraunhofer IESE, Germany* . . . 171

The Impact of Domain Knowledge on the Effectiveness of Requirements Idea Generation during Requirements Elicitation
Ali Niknafs and Daniel M. Berry — *University of Waterloo, Canada* . . . 181

Using Collective Intelligence to Detect Pragmatic Ambiguities
Alessio Ferrari and Stefania Gnesi — *ISTI-CNR, Italy* . . . 191

Goal Modeling

A Probabilistic Framework for Goal-Oriented Risk Analysis
Antoine Cailliau and Axel van Lamsweerde — *Université Catholique de Louvain, Belgium* . . . 201

Requirements Analysis for a Product Family of DNA Nanodevices
Robyn R. Lutz, Jack H. Lutz, James I. Lathrop, Titus H. Klinge, Divita Mathur, D. M. Stull, Taylor G. Bergquist, and Eric R. Henderson — *Iowa State University, USA; Jet Propulsion Laboratory, USA* . . . 211

On Eliciting Contribution Measures in Goal Models
Sotirios Liaskos, Rina Jalman, and Jorge Aranda — *York University, Canada; University of Victoria, Canada* . . . 221

Requirements Management and Tracing 2

Breaking the Big-Bang Practice of Traceability: Pushing Timely Trace Recommendations to Project Stakeholders
Jane Cleland-Huang, Patrick Mäder, Mehdi Mirakhorli, and Sorawit Amornborvornwong — *DePaul University, USA; JKU Linz, Austria* . . . 231

Characterization of Functional Software Requirements Space: The Law of Requirements Taxonomic Growth
Arbi Ghazarian — *Arizona State University, USA* . . . 241

Detecting and Classifying Patterns of Requirements Clarifications
Eric Knauss, Daniela Damian, Germán Poo-Caamaño, and Jane Cleland-Huang — *University of Victoria, Canada; DePaul University, USA* . . . 251

Industrial Track

Product Management Concerns

What Do Practitioners Mean When They Talk about Product Management?
Andrey Maglyas, Uolevi Nikula, and Kari Smolander — *Lappeenranta University of Technology, Finland* 261

Towards Outcome-Based Regulatory Compliance in Aviation Security
Rasha Tawhid, Edna Braun, Nick Cartwright, Mohammad Alhaj, Gunter Mussbacher, Azalia Shamsaei, Daniel Amyot, Saeed Ahmadi Behnam, and Greg Richards — *Transport Canada, Canada; Carleton University, Canada; University of Ottawa, Canada* 267

Aspect Oriented RE

Requirements Composition Table Explained
Yuri Chernak — *Valley Forge Consulting, USA* 273

Categorizing Requirements for a Contract-Based System Integration Project
Xiping Song and Beatrice Hwong — *Siemens, USA* 279

Natural Language vs. Formalized Specification

The Use of a Requirements Modeling Language for Industrial Applications
Brian Berenbach, Florian Schneider, and Helmut Naughton — *Siemens, USA; TU Munich, Germany* 285

Defects in Natural Language Requirement Specifications at Mercedes-Benz: An Investigation Using a Combination of Legacy Data and Expert Opinion
Daniel Ott — *Daimler, Germany* 291

Prioritization

Log-Based Approach for Performance Requirements Elicitation and Prioritization
Odorico Machado Mendizabal, Martin Spier, and Rodrigo Saad — *FURG, Brazil; Expedia, USA; Dell, Brazil* 297

Selecting an Appropriate Framework for Value-Based Requirements Prioritization: A Case Study
Nupul Kukreja, Sheetal Swaroop Payyavula, Barry Boehm, and Srinivas Padmanabhuni — *University of Southern California, USA; Infosys Technologies, India* 303

Requirements Reuse at Danfoss
Dagny Hauksdottir, Arne Vermehren, and Juha Savolainen — *Danfoss Power Electronics, Denmark* 309

Posters and Tool Demonstrations

ArchiTech: Tool Support for NFR-Guided Architectural Decision-Making
David Ameller, Oriol Collell, and Xavier Franch — *Universitat Politècnica de Catalunya, Spain* 315

CoFM: An Environment for Collaborative Feature Modeling
Li Yi, Haiyan Zhao, Wei Zhang, and Zhi Jin — *Peking University, China* 317

Concern-Driven Development with jUCMNav
Daniel Amyot, Stéphane Leblanc, Jason Kealey, and Jörg Kienzle — *University of Ottawa, Canada; JUCM Software, Canada; McGill University, Canada* 319

Facilitating Transition from Requirements to Code with the ReDSeeDS Tool
Michał Śmiałek and Tomasz Straszak — *Warsaw University of Technology, Poland* 321

Flexible, Lightweight Requirements Modeling with FlexiSketch
Dustin Wüest, Norbert Seyff, and Martin Glinz — *University of Zurich, Switzerland* 323

MbFM: A Matrix-Based Tool for Modeling and Configuring Feature Models
Long Li, Haiyan Zhao, and Wei Zhang — *Peking University, China* 325

ReCVisu: A Tool for Clustering-Based Visual Exploration of Requirements
Sandeep Reddivari, Zhangji Chen, and Nan Niu — *Mississippi State University, USA* 327

Run-Time Model Evaluation for Requirements Model-Driven Self-Adaptation
Kristopher Welsh and Nelly Bencomo — *University of Kent, UK; INRIA, France* 329

STS-Tool: Socio-technical Security Requirements through Social Commitments
Elda Paja, Fabiano Dalpiaz, Mauro Poggianella, Pierluigi Roberti, and Paolo Giorgini — *University of Trento, Italy* . . 331
The RE-Tools: A Multi-notational Requirements Modeling Toolkit
Sam Supakkul and Lawrence Chung — *Sabre, USA; University of Texas at Dallas, USA* 333
Tool Support for Combined Rule-Based and Goal-Based Reasoning in Context-Aware Systems
Mira Vrbaski, Dorina Petriu, and Daniel Amyot — *Carleton University, Canada; University of Ottawa, Canada* 335

Doctoral Symposium

Business Requirements Analysis and Development for Legacy System Replacement Projects in Government Organizations
Assia Alexandrova — *Open University, UK* 337
A Pattern-Based Approach for Analysing Requirements in Socio-technical Systems Engineering
Axel Hoffmann — *University of Kassel, Germany* 341
On the Usage of Context for Requirements Elicitation: End-User Involvement in IT Ecosystems
Alessia Knauss — *University of Victoria, Canada* 345
Model-Based Prioritization in Business-Process-Driven Software Development
Norman Riegel — *Fraunhofer IESE, Germany* 349
StakeCloud: Stakeholder Requirements Communication and Resource Identification in the Cloud
Irina Todoran — *University of Zurich, Switzerland* 353
