2024 15th International Conference on Reliability, Maintenance and Safety (ICRMS)

ICRMS 2024

Table of Contents

Message from the General Chairs ..... **xxxiii**
Organizing Committee ..... **xxxv**
Reviewers ..... **xlii**

Quality Engineering

Automatic Monitoring of Customer Satisfaction Based on Text Mining and Control Chart Methods 1
Texian Zhang (Aerospace Science and Industry Defense Technology Research Testing Center, China), Xilong Han (Aerospace Science and Industry Defense Technology Research Testing Center, China), Beina Du (Aerospace Science and Industry Defense Technology Research Testing Center, China), Yuangui Tang (ChangFeng Electromechanical Technology Design Academy of China, China), and Xiangyu Liu (China Insurance Security Fund Company Limited, China)

Research on Improvement of Nuclear Island Valve Reliability Management 8
Shuang Zhang (Suzhou Nuclear Power Research Institute, China; National Engineering Research Center for Nuclear Power Plant Safety & Reliability, China), Fan Bai (Suzhou Nuclear Power Research Institute, China), Shuaifei Guo (Suzhou Nuclear Power Research Institute, China), and Wenwen Zhao (Suzhou Nuclear Power Research Institute, China)

Interactive Electronic Technical Manual-Based Technical Documentation Management of Complicated Product 14
Xinpeng Wang (No.92942 Unit of PLA, China), Jine Huang (No.92942 Unit of PLA, China), Bo Meng (Logistic Department of PLA Northern Combat Area Navy, China), and Jie Jiang (No.92942 Unit of PLA, China)

Producibility Analysis of Manufacturing Tasks Based on Functional Resonance Analysis Method 19
Chuxin Peng (Beihang University, China), Haibin Cao (China Shenhua Energy Company Limited, China), Wei Dai (Beihang University, China), and Yu Zhao (Beihang University, China)

Analysis of Factors Influencing Acquisition Quality of Subjective Experience Data in Regards to the Equipment General Quality Characteristics 26
Lili Liu (Beihang University, China; China Institute of Marine Technology and Economy, China), Shulin Liu (China Institute of Marine Technology and Economy, China), Boping Xiao (Beihang University, China), and Chenli Deng (China Institute of Marine Technology and Economy, China)

Globally Adjustable Test Case Prioritization with Dynamic Coverage and Output 33
Can Cui (North China Institute of Computing Technology, China), Yuechuan Peng (North China Institute of Computing Technology, China), Zhi Wang (North China Institute of Computing Technology, China), Shihai Wang (Beihang University, China), and Bin Liu (Beihang University, China)

An Improved Adaptive Randomized Test Case Selection Approach 38
Fang Liu (Beijing Key Laboratory of Research and System Evaluation of Power Dispatching Automation Technology (China Electric Power Research Institute), China; China Electric Power Research Institute, China), Fuping Zeng (Beihang University, China), Zeyu Wang (Beihang University, China), YuJia Li (China Electric Power Research Institute, China), and LingLin Gong (China Electric Power Research Institute, China)

Research on the Optimization of the Technology Maturity Evaluation Method of Aerospace Products 44
Qian Shang (China Institute of Space Standardization and Product Assurance, China), Zhang Rui (China Institute of Space Standardization and Product Assurance, China), Tian Xueying (China Institute of Space Standardization and Product Assurance, China), Pang Chenyi (China Institute of Space Standardization and Product Assurance, China), and Cui Jia (China Institute of Space Standardization and Product Assurance, China)

A Refined Management Method of Critical Characteristics on Telecommunication Satellite Products 49
Ke Zhang (Institute of Telecommunication and Navigation Satellite, CAST, Beijing), Yi Zhang (Institute of Telecommunication and Navigation Satellite, CAST, Beijing), Shanmin Wang (Institute of Telecommunication and Navigation Satellite, CAST, Beijing), Xu Zhang (Institute of Telecommunication and Navigation Satellite, CAST, Beijing), and Tong Yang (Institute of Telecommunication and Navigation Satellite, CAST, Beijing)

Reliability and Safety Engineering

Application Research of FIB Technology Using in the Interconnect Reliability Failure Analysis 54
Jianghua Shen (China Electronic Product Reliability and Environmental Testing Institute(CEPREI), China) and Zhenhai Chen (China Electronic Product Reliability and Environmental Testing Institute(CEPREI), China)

Effect of Terminal Oxide Charge of P-Channel VDMOS on Device Reliability 59
Dandan Wang (Beijing Zhongke Newmicro Technology Co., LTD, China), Yanfei Zhang (Beijing Zhongke Newmicro Technology Co., LTD, China), Haizhou Wu (Beijing Zhongke Newmicro Technology Co., LTD, China), Mengxin Liu (Beijing Zhongke Newmicro Technology Co., LTD, China), and Xiaoxia Wen (Beijing Zhongke Newmicro Technology Co., LTD, China)

Research on Causes for not Engaging Normally of the Isolation Butterfly Valve Clutch in the Containment of Nuclear Power Plant 66
Shuaifei Guo (Suzhou Nuclear Power Research Institute, China; National Engineering Research Center for Nuclear Power Plant Safety&Reliability, China), Fan Bai (Suzhou Nuclear Power Research Institute, China), and Shuang Zhang (Suzhou Nuclear Power Research Institute, China)

Generalization Method of Physics of Failure Model Based on Extreme Learning Machine 72
Mengying Li (Beihang University, China), Ying Chen (Beihang University, China), and Yuan Yao (Beihang University, China)

Failure Mechanism Analysis of Terahertz Schottky Diode Under High Temperature Reverse Bias Stress 78
Yuebo Liu (China Electronic Product Reliability and Environmental Testing Research Institute, China), Xinlong Huang (China Electronic Product Reliability and Environmental Testing Research Institute, China), Jiahui Yan (South China University of Technology, China), Xi Luo (Changchun University of Science and Technology, China), Hongyue Wang (China Electronic Product Reliability and Environmental Testing Research Institute, China), and Teng Ma (China Electronic Product Reliability and Environmental Testing Research Institute, China)

Failure Mechanism of Elecro Static Discharge on The Electrostatic Driven MEMS Device 85
Xianshan Dong (South China University of Technology, China; China Electronic Product Reliability and Environmental Testing Research Institute, China), Xinlong Huang (China Electronic Product Reliability and Environmental Testing Research Institute, China), Wei Su (China Electronic Product Reliability and Environmental Testing Research Institute, China), Qinwen Huang (China Electronic Product Reliability and Environmental Testing Research Institute, China), and Changjian Zhou (South China University of Technology, China)

Research on Failure Mechanism of High Temperature Reverse Bias Test for Power VDMOS 90
Danyang Zhang (Beijing Zhongke Newmicro Technology Co., LTD, China), Yanfei Zhang (Beijing Zhongke Newmicro Technology Co., LTD, China), Mengxin Liu (Beijing Zhongke Newmicro Technology Co., LTD, China), Xiaoxia Wen (Beijing Zhongke Newmicro Technology Co., LTD, China), and Ge Zhao (Beijing Zhongke Newmicro Technology Co., LTD, China)

Failure Mechanism Analysis and Assessment Based on PoF with Avalanche Test of VDMOS 96
Qing Li (Beijing Zhongke Newmicro Technology Co., LTD, China), Yanfei Zhang (Beijing Zhongke Newmicro Technology Co., LTD, China), Mengxin Liu (Beijing Zhongke Newmicro Technology Co., LTD, China), and Xiaoxia Wen (Beijing Zhongke Newmicro Technology Co., LTD, China)

Application of Hierarchical Directed Graph Model Based on State Decomposition in Unmanned Vehicles 102
Rui Xing (Beihang University, China), Xinghui Zhang (China North Artificial Intelligence & Innovation Research Institute, China; Collective Intelligence & Collaboration Laboratory, China), and Wei Zhang (Beihang University, China)

Reliability Analysis of Competitive Failure Processes with Dual Time Scales 110
Zhihong Chen (Northwestern Polytechnical University, China), Xinchen Zhuang (Northwestern Polytechnical University, China), Zhi Bian (AVIC China Aero-Polytechnology Establishment, China), and Tianxiang Yu (Northwestern Polytechnical University, China)

Modeling Study and Reliability Analysis of Kinematic Output of the Drag Chute Lock Mechanism Considering Wear and Tear 117
Zhixuan Gao (Northwestern Polytechnical University, China), Yajie Han (Chinese Flight Test Establishment, China), and Weimin Cui (Northwestern Polytechnical University, China)

Thermal Safety Management and Thermal Runaway Diffusion Test Cases Analysis of Lithium-Ion Power Battery Systems 125
Jun Tian (China North Vehicle Research Institute, China), Chunchang Xu (China North Vehicle Research Institute, China), Hongbo Gao (China North Vehicle Research Institute, China), Haiju Wang (China North Vehicle Research Institute, China), Baosen Cao (China North Vehicle Research Institute, China), Yanwei Wei (China North Vehicle Research Institute, China), Huipeng Tang (China North Vehicle Research Institute, China), Haochen Wang (China North Vehicle Research Institute, China), Qi Wan (China North Vehicle Research Institute, China), and Xiaoqiang Liang (China North Vehicle Research Institute, China)

MEMS Transient Dynamics Simulation and Electro-Mechanical Shock Test 130
Yihao Wang (CSSC Systems Engineering Research Institute, China), Fang Liu (CSSC Systems Engineering Research Institute, China), Kangshuo Wang (CSSC Systems Engineering Research Institute, China), Delong Mao (CSSC Systems Engineering Research Institute, China), Xu Li (CSSC Systems Engineering Research Institute, China), and Xiyu Liu (CSSC Systems Engineering Research Institute, China)

An Improved SFTA Method for Military Software Fault Analysis 135
Xiaojuan Meng (China Aerospace Academy of Systems Science and Engineering, China), Yonghua Cui (Science and Technology on Complex Aviation Systems Simulation Laboratory, China), Xiaoqi Shen (Science and Technology on Complex Aviation Systems Simulation Laboratory, China), and Di Zhao (China Aerospace Academy of Systems Science and Engineering, China)

The Study of Reliability Evaluation Method of AuAl Bonding 141
Xiaowen Zhang (Science and Technology on Reliability Physics and Application of Electronic Component Laboratory, China), Xiaoling Lin (Science and Technology on Reliability Physics and Application of Electronic Component Laboratory, China), and Long Wei (Science and Technology on Reliability Physics and Application of Electronic Component Laboratory, China)

Research on Reliability Evaluation and Optimal Design Method of Liquid Rocket Engine Turbo-Pump Considering Uncertainties 147
Zhao Ruiyong (Xi'an Aerospace propulsion institute, China; Department Of Energy And Power Engineering Tsinghua University, China), Liu Shuhong (Department Of Energy And Power Engineering Tsinghua University, China), Zuo Zhigang (Department Of Energy And Power Engineering Tsinghua University, China), Chen Hui (Xi'an Aerospace propulsion institute, China), and Yuan Hongbin (Xi'an Aerospace propulsion institute, China)

Reliability Analysis and Research on Motion Accuracy of Humanoid Robot 155
Dewei Cui (Shenyang Aircraft Design and Research Institute, China), Dong Liu (Shenyang Aircraft Design and Research Institute, China), Baoshi Yin (Shenyang Aircraft Design and Research Institute, China), and Mingze Wang (Shenyang Aircraft Design and Research Institute, China)

Life-Cycle Maintenance Scheduling of Aviation Engines with Kernel Reinforcement Learning 163
Dingyang Zhang (Zhejiang University, China), Yiming Zhang (Zhejiang University, China), and Shuyou Zhang (Zhejiang University, China)

Synchronous Electromagnetic Fault Injection Method for ECC Mechanism Safety Verification 170
Zhongkai Huang (China Electronic Product Reliability and Environmental Testing Research Institute, P. R. China), Yongzhen Luo (China Electronic Product Reliability and Environmental Testing Research Institute, P. R. China), Chenbing Qu (China Electronic Product Reliability and Environmental Testing Research Institute, P. R. China), Bo Hou (China Electronic Product Reliability and Environmental Testing Research Institute, P. R. China), Liwei Wang (China Electronic Product Reliability and Environmental Testing Research Institute, P. R. China), Ziyang Wang (China Electronic Product Reliability and Environmental Testing Research Institute, P. R. China), and Yiqiang Chen (China Electronic Product Reliability and Environmental Testing Research Institute, P. R. China)

Preliminary Study on Integrated Safety Analysis Method for Nuclear Ships 177
Yingbin Gu (CNNP Oceanic Nuclear Power Development Co., Ltd., China), Jun Zhao (Tsinghua University, China), Hongchun Ding (Harbin Institue of Technology, China), and Yi Lin (CNNP Oceanic Nuclear Power Development Co., Ltd., Shanghai, China)

A Model-Based Approach to Aircraft Safety Requirements Analysis 183
Wenzheng Xu (China Aero-polytechnology Establishment, China), Yang Wu (China Aero-polytechnology Establishment, China), Hong Wei (China Aero-polytechnology Establishment, China), Xiaojie Xu (China Aero-polytechnology Establishment, China), and Jiang Shao (China Aero-polytechnology Establishment, China)

Research on the Reliability Design of the Least Risk Bomb Location Structure for Aircraft 188
Xinming Yang (AVIC SHENYANG AIRCRAFT DESIGN & RESEARCH INSTITUTE, China), Shuai Zhu (AVIC SHENYANG AIRCRAFT DESIGN & RESEARCH INSTITUTE, China), and Xishuang Zhang (AVIC SHENYANG AIRCRAFT DESIGN & RESEARCH INSTITUTE, China)

Research on Automatic Analysis Method of Embedded Software Interface Failure 196
Feng Erqiang (China Aero-Polytechnology Establishment, China) and Wu Chuncheng (China Aero-Polytechnology Establishment, China)

Reliability Modeling and Analysis of the Pemanent Magnet Synchronous Motor Considering Ambient Pressure 202
Yang Miao (Beihang University, China), Tianpei Zu (Beihang University, China), Chen Shishun (Beihang University, China), and Xiaoyang Li (Beihang University, China)

A Control Strategy Based on Variable bus Voltage to Reduce Losses in Hydrogen Electric Propulsion Systems 210
Jiawei Dai (Xi'an Technological University, China), Chaobo Chen (Xi'an Technological University, China), Tianyu Sun (Xi'an Technological University, China), Song Gao (Xi'an Technological University, China), and Hongpeng Zhang (Xi'an Technological University, China)

On-Chip Security Sensors for Clock Glitches and Clock Skew 218
Xun Yang (Guangdong University of Technology Institute of Integrated Circuits, China), DengYun Lei (Guangdong University of Technology Institute of Integrated Circuits, China), YongQuan Chen (Guangdong University of Technology Institute of Integrated Circuits, China), DanPeng Liao (Guangdong University of Technology Institute of Integrated Circuits, China), Bo Hou (Ministry of Industry and Information Technology Institute No. 5, China), and LiWei Wang (Ministry of Industry and Information Technology Institute No. 5, China)

Safety Analysis of Multi-Cabin Manned Spacecraft System 223
Wei Li (Institute of Spacecraft System Engineering, China) and Qiaoli Xia (Institute of Spacecraft System Engineering, China)

Safety Analysis Method of Airborne Structural Health Monitoring System Based on STAMP-SOTIF 228
Jiahui Lin (Beihang University, China), Guangyan Zhao (Beihang University, China), and Zihuan Ding (Beihang University, China)

Thermal Reliability Analysis of Wire Bonding for Typical Large Current LDO 235
Yu Jianjie (CHINA ACADEMY OF RAILWAY SCIENCES CORPORATION LIMITED, China), Wang Xilong (Beihang University, China), Guo Hongli (CHINA ACADEMY OF RAILWAY SCIENCES CORPORATION LIMITED, China), Wu Yuan (CHINA ACADEMY OF RAILWAY SCIENCES CORPORATION LIMITED, China), and Wang Xiangfen (Beihang University, China)

A Continuous Optimization Model for Movement-Based Connectivity Restoration of 2D Communication Networks 242
Bo Li (Beihang University, China), Xinhao Cui (Beihang University, China), Shitao Wang (Beihang University, China), Siyue Zhang (Beihang University, China), Xue Yang (Beihang University, China), and Yiyong Xiao (Beihang University, China)

Study on Electromagnetic Absorption Reliability of Reed Biomass 249
Ruiyi Yang (The 24th Research Institute of China Electronics Technology Group Corporation, P. R.China), Maolin Zhao (The 24th Research Institute of China Electronics Technology Group Corporation, P. R.China), Zheng Cen (The 24th Research Institute of China Electronics Technology Group Corporation, P. R.China), Sinan Ye (The 24th Research Institute of China Electronics Technology Group Corporation, P. R.China), and Shengyu Li (The 24th Research Institute of China Electronics Technology Group Corporation, P. R.China)

Reliability Simulation of Satellite Constellation Networks Under Non-Full Grid-Mesh Topology 257
Kai Qiao (Beijing Institute of Tracking and Telecommunications Technology, China), Jinzhi Ning (Aerospace Dongfanghong Satellite Ltd, China), Jianming Shi (Chinese Academy of Sciences, China), Wei Wang (Chinese Academy of Sciences, China), Chao Zhang (Aerospace Dongfanghong Satellite, Ltd, China), and Yonghe Zhang (Beijing Institute of Tracking and Telecommunications Technology, China)

Reliability Evaluation of Double-Chain Network System Based on Monte Carlo Method 264
Bo Shen (Beijing Institute of Astronautical Systems Engineering, China), Ming Zhang (Beijing Institute of Astronautical Systems Engineering, China), Zimeng Yin (Beijing Institute of Astronautical Systems Engineering, China), Rui Xiu (Beijing Institude of Aerospace Control Devicies, China), and Liang Chu (Beijing Institute of Astronautical Systems Engineering, China)

Weapon System of Systems Robustness Assessment Method Based on Information Entropy and Complex Network Theory 269
Xiaowei Quan (China Aerospace Academy of Systems Science and Engineering, China), Ruifeng Liu (China Aerospace Academy of Systems Science and Engineering, China), Haolong Zhang (China Aerospace Academy of Systems Science and Engineering, China), Kaiyan Li (China Aerospace Academy of Systems Science and Engineering, China), Jie Liang (China Aerospace Academy of Systems Science and Engineering, China), and Maohua Gong (China Aerospace Academy of Systems Science and Engineering, China)

Comparison of Electrical Characteristics between Through Glass Via and Through Silicon Via Interposer Based on Three-Dimensional Full-Wave Simulation 275
Xiangxiang Zhong (China Electronic Produce Reliability and Environmental Testing Research Institute, China; Harbin Institute of Technology, China), Yangyang Zhou (China Electronic Produce Reliability and Environmental Testing Research Institute, China), Ping Lai (China Electronic Produce Reliability and Environmental Testing Research Institute, China), Haozhong Wang (China Electronic Produce Reliability and Environmental Testing Research Institute, China; Harbin Institute of Technology, China), Bingxu Ma (China Electronic Produce Reliability and Environmental Testing Research Institute, China), Hongtao Chen (Harbin Institute of Technology, China), and Xiaofeng Yang (China Electronic Produce Reliability and Environmental Testing Research Institute, China)

Numerical Analysis and Experimental Verification of Temperature Cycling Test of Electrically Conductive Adhesive Interconnections 283
Weiyi Zhou (Guilin University of Electronic Technology, China), Zhuangchao Zhan (Guilin University of Electronic Technology, China), Fangxian He (Guilin University of Electronic Technology, China), Jian Huang (Guilin University of Electronic Technology, China), Zejiong Yu (Guilin University of Electronic Technology, China), Daoguo Yang (Guilin University of Electronic Technology, China), and Hongbo Qin (Guilin University of Electronic Technology, China)

Dynamic Reliability Allocation of Ship Electronic Information System Based on CF Model and BWO Algorithm 289
Jingli Yang (Harbin Institute of Technology, China; Technological Innovation Center of Littoral Test, China), Ying Wang (Harbin Institute of Technology, China), and Wenmin Wang (Beijing Institude of Control and Electronic Technology, China)

Proactive Optimization Design of Power Supplies Based on Belief Reliability Theory 296
Yaohui Guo (Beihang University, China), Ying Chen (Beihang University, China), Jianan Zhang (Beihang University, China), Ze Wang (Beihang University, China), and Rui Kang (Beihang University, China)

Fatigue Life Analysis and Optimization of key Components of Certain Drag Parachute Lock System 302
Keke Wang (Northwestern Polytechnical University, China; National Key Laboratory of Aircraft Configuration Design, China), Shuhai Jiang (Avic Xi'an Aircraft Industry Group Co., Ltd., China), and Weimin Cui (Northwestern Polytechnical University, China; National Key Laboratory of Aircraft Configuration Design, China)

Performance and Reliability Simulation Analysis of MEMS Piezoelectric Cantilever Beams 310
Yuanyuan Liu (China Electronics Technology Group Corporation, China) and Taichun Qin (Beijing Institute of Spacecraft Environment Engineering, China)

Simulation Analysis of Collision Damage in Load Handling Device Under Multiple Operating Conditions 316
Shuo Li (Beijing Sunwise Intelligent Technology Ltd., China), Yang Chang (Beijing Sunwise Intelligent Technology Ltd., China), Shengxing Wei (Beihang University, China), Zongzhe Yu (Beihang University, China), and Cheng Qian (Beihang University, China)

Structural Response Analysis Considering Structural-Acoustic Coupling Effect Based on Stochastic Perturbation Modal Energy Analysis 323
Shijia Yu (AVIC China Aero-Polytechnology Establishment, China) and Zefeng Liu (AVIC China Aero-Polytechnology Establishment, China)

A Modified Maximum Likelihood Estimation Method for Weibull Distribution Based Accelerated Life Testing 331
Jingxiao Yao (Xi'an Microelectronic Technology Institute, China), Ling Li (Xi'an Microelectronic Technology Institute, China), Zengqiang Zhong (Xi'an Microelectronic Technology Institute, China), Huan Wang (Xi'an Microelectronic Technology Institute, China), and Yanli Wang (Xi'an Microelectronic Technology Institute, China)

Wear Optimization of UAV Involute Spline Based on non-Uniform Surface Strengthening Method 337
Kaihong Hou (National University of Defense Technology, China), Zhengwei Fan (National University of Defense Technology, China; Science and Technology on Reliability Physics and Application Technology of Electronic Component Laboratory, China), and Xun Chen (National University of Defense Technology, China)

Belief Reliability Evaluation of Thermal Performance of Electronic Products 343
Cui Ye (CRSC Research & Design Institute Group Co., Ltd., China), Weidong Zou (CRSC Research & Design Institute Group Co., Ltd., China), and Ying Chen (Beihang University, China)

Reliability Assessment of Copper Wire Bonding Under Temperature Cycling Based on Kernel Density Estimation 349
Jiaoying Huang (Beihang University, China), Kai Li (Beihang University, China), Cheng Gao (Beihang University, China), Changlin Li (China Academy of Launch Vehicle Technology, China), and Wei Li (Beihang University, China)

Reliability Analysis of a Small Form-Factor Pluggable+ Optical Transceiver 355
Wei Li (Beihang University, China), Cheng Gao (Beihang University, China), Jiaoying Huang (Beihang University, China), and Ziqing Ma (Beihang University, China)

Fatigue Life Assessment Based on Material Defects 362
Zhenli Su (Guizhou Aerospace Institute of Measuring and Testing Technology, China) and Sibo Liu (Guizhou Aerospace Institute of Measuring and Testing Technology, China)

Research on Engine Reliability Evaluation and Verification Method of Variable Thrust 367
Shuren Liu (Beijing Institute of Astronautical Systems Engineering, China), Caixia Li (Beijing Institute of Astronautical Systems Engineering, China), and Lele Gao (Xi'an Aerospace Propulsion Institute, China)

Reliability Evaluation of Bearing Production System Based on GO-Bayesian Method 372
Jiahao Li (Henan University of Science and Technology, China), Junxing Li (Henan University of Science and Technology, China; Advanced manufacturing of Machinery and Equipment Collaborative Innovation Center, China; High-end Bearing Collaborative Innovation Center of Henan Province, China), Jiahui Fan (Henan University of Science and Technology, China), Yajie Xu (Henan University of Science and Technology, China), and Xiangdian Shang (Henan University of Science and Technology, China)

Reliability Assessment of Multi-State System Based on Competing Failures 379
Guangyu Zhu (Guizhou Institute of Aerospace Metrology and Testing Technology, China), Dandan Ding (Guizhou Institute of Aerospace Metrology and Testing Technology, China), and Mengbing Shi (Guizhou Institute of Aerospace Metrology and Testing Technology, China)

Evaluation on Storage Life of a RAT Spring Based on a Random Effects Wiener Process Model 386
Yujie Huang (Beihang University, China), Shunong Zhang (Beihang University, China), Zikang Yu (Beihang University, China), Lixu Wang (Aviation Industry Corpration of China, China), Jian Wang (Aviation Industry Corpration of China, China), Zuocheng Li (Aviation Industry Corpration of China, China), Yueliang Lu (Aviation Industry Corpration of China, China), and Zitong Yang (The Third Representative office of the Air Force Equipment Department in Nanjing area, China)

Bayes Plan of Reliability Qualification Test Based on Posterior Risk 393
Bo Wang (National University of Defense Technology, China), Ping Jiang (National University of Defense Technology, China), Qian Zhao (National University of Defense Technology, China), and Dian Zhang (National University of Defense Technology, China)

Segment Prediction Method of Wear Life for Revolute Joint Using LSTM Network 398
Tianhua Wang (National University of Defense Technology, Changsha, China), Li Zhang (National University of Defense Technology, Wuhan, China), and Junyong Tao (National University of Defense Technology, Changsha, China)

A Key Equipment for GEO Satellite Power Supply on Orbit Refined Monitoring Method 403
Zhang Wenshuang (China Academy of Space Technology, China), Jin Di (Beijing Institute of Spacecraft System Engineering, China), Hu Di (China Academy of Space Technology, China), Wang Jian (China Academy of Space Technology, China), Zhu Xiaoting (China Satellite Network System Company, China), Duan Yi (Shenzhen Polytechnic University, China), and Li Kang (China Academy of Space Technology, China)

Multi-Stage Reliability Test Evaluation of Mechanical Products Based on Bayes Theory 408
Yi Qian (Tianjin Institute of Physical and Chemical Engineering, China)

Life Prediction Method of Aerospace Electromagnetic Relay Based on CNN-BIGRU Neural Network 412
Shaofei Li (Jiangsu University of Science and Technology, China), Zhaobin Wang (Jiangsu University of Science and Technology, China), Wenhang Zhang (Jiangsu University of Science and Technology, China), Dongkun Ma (Jiangsu University of Science and Technology, China), and Tianyang He (Jiangsu University of Science and Technology, China)

Remaining Useful Life Prediction Method of Electromagnetic Relay Based on Bi-LSTM-Dropout ... 419
Wenhang Zhang (Jiangsu University of Science and Technology, China), Zhaobin Wang (Jiangsu University of Science and Technology, China), Shaofei Li (Jiangsu University of Science and Technology, China), Dongkun Ma (Jiangsu University of Science and Technology, China), and Tianyang He (Jiangsu University of Science and Technology, China)

Reliability Evaluation of Servo Valves Considering Degradation Dependence by Integrating Multi-Component Data 425
Feiran Li (Northwestern Polytechnical University, China; National Key Laboratory of Aircraft Configuration Design, China), Xinchen Zhuang (Northwestern Polytechnical University, China; National Key Laboratory of Aircraft Configuration Design, China), and Tianxiang Yu (n/a)

Research on Competitive Failure Reliability Modeling of CNC with Multi-Distribution Fusion..... 433
Guosheng Xu (Zhejiang Sci-Tech University, China; Zhangzhou Institute of Technology, China), Wenhua Chen (Zhejiang Sci-Tech University, China), and Jun Pan (Zhejiang Sci-Tech University, China)

Reliability Analysis of Turbine Disk based on AJS-PSO-Kriging 441
Huizhi Qi (Quality Data Management and Analysis Center, AVIC China Aero-Polytechnology Establishment, China) and Chenguang Hou (Quality Data Management and Analysis Center, AVIC China Aero-Polytechnology Establishment, China)

Research on Strain Threshold Method for Automotive Grade Power Module Components 448
Wanchun Tian (China Electronic Product Reliability and Environmental Testing Research Institute, China), Qiang Qin (China Electronic Product Reliability and Environmental Testing Research Institute, China), Yingxu Hong (China Electronic Product Reliability and Environmental Testing Research Institute, China), and Xiaofeng Yang (China Electronic Product Reliability and Environmental Testing Research Institute, China; National University of Defense Technology, China)

Reliability Evaluation of Intelligent Pressure Transmitters with Dual Failures 453
Hexiang Wang (Beihang University, China), Cheng Qian (Beihang University, China), Bo Sun (Beihang University, China), Yi Ren (Beihang University, China), and He Li (Universidade de Lisboa, Portugal)

Short-Term Probabilistic Wear Prediction in Shaft-Misaligned Spline Pairs Using Simulation and Bayesian Neural Networks 463
Shengxing Wei (Beihang University, China), Zongzhe Yu (Beihang University, China), Cheng Qian (Beihang University, China), Bo Sun (Beihang University, China), and Yi Ren (Beihang University, China)

State of Charge Estimation Method of Lithium Manganese Battery Based on Deep Learning 472
YingLu Liu (Beihang University, China), XiaoJie Zhang (China Institute of Marine Technology and Economy, China), ZhiQiang Li (Beihang University, China), Lu Guo (Beihang University, China), and Hao Wang (China Institute of Marine Technology and Economy, China)

Multi-State Reliability Prediction for Casing Hangers at Ultra-High Pressure Wellheads 479
Wang C. (R & D Center for Ultra-Deep Complex Reservoir Exploration and Development, CNPC, China; Engineering Research Center for Ultra-deep Complex Reservoir Exploration and Development, China; Key Laboratory for Ultra-Deep Oil and Gas, China; China National Petroleum Corporation, China), Feng S. (R & D Center for Ultra-Deep Complex Reservoir Exploration and Development, CNPC, China; Engineering Research Center for Ultra-deep Complex Reservoir Exploration and Development, China; Key Laboratory for Ultra-Deep Oil and Gas, China; China National Petroleum Corporation, China), Cheng B. (China University of Petroleum (Beijing), China; 6Key Laboratory of Oil and Gas Production Safety and Emergency Technology, China), Wu S. (China University of Petroleum (Beijing), China; 6Key Laboratory of Oil and Gas Production Safety and Emergency Technology, China), Zhang Y. (R & D Center for Ultra-Deep Complex Reservoir Exploration and Development, CNPC, China; Engineering Research Center for Ultra-deep Complex Reservoir Exploration and Development, China; Key Laboratory for Ultra-Deep Oil and Gas, China; China National Petroleum Corporation, China), Wei J. (R & D Center for Ultra-Deep Complex Reservoir Exploration and Development, CNPC, China; Engineering Research Center for Ultra-deep Complex Reservoir Exploration and Development, China; Key Laboratory for Ultra-Deep Oil and Gas, China; China National Petroleum Corporation, China; China University of Petroleum (Beijing), China; 6Key Laboratory of Oil and Gas Production Safety and Emergency Technology, China), Zhao M. (R & D Center for Ultra-Deep Complex Reservoir Exploration and Development, CNPC, China; Engineering Research Center for Ultra-deep Complex Reservoir Exploration and Development, China; Key Laboratory for Ultra-Deep Oil and Gas, China; China National Petroleum Corporation, China), and Yan Y. (China University of Petroleum (Beijing), China; 6Key Laboratory of Oil and Gas Production Safety and Emergency Technology, China)

Effect of Gas Hole in Laser Deep Penetration Welding of Superalloy on Welding Strength 487
Le Xiao (Nanchang University, China; Advanced Corporation for Materials & Equipment Co., Ltd., China), Wang Haiyun (Jiangnan Industrial Group Co., Ltd., China), Yao Chunchen (Advanced Corporation for Materials & Equipment Co., Ltd., China; Jiangnan Industrial Group Co., Ltd., China), Chen Xiongzi (Nanchang University, China; Advanced Corporation for Materials & Equipment Co., Ltd., China), Mei Haoqian (Advanced Corporation for Materials & Equipment Co., Ltd., China), and Dai Yu (Nanchang University, China; Advanced Corporation for Materials & Equipment Co., Ltd., China)

An Aircraft High-Risk Subject Test Flight Risk Warning Model Based on Multi-Source Transfer Learning. 493
Haobin Ma (Beihang University, China) and Xing Pan (Beihang University, China)

DBN-Based Reliability Evaluation for Lifeline Pipe Networks Considering Multi-Factor Coupling 499
Zhou Y. (China University of Petroleum (Beijing), China; Key Laboratory of Oil and Gas Production Safety and Emergency Technology, China; Beijing Academy of Science and Technology, China), Wu S. (China University of Petroleum (Beijing), China; Key Laboratory of Oil and Gas Production Safety and Emergency Technology, China), Cheng B. (China University of Petroleum (Beijing), China; Key Laboratory of Oil and Gas Production Safety and Emergency Technology, China), and Xu Y. (Beijing Academy of Science and Technology, China)

Uncertainty Analysis of Aircraft Flight Performance Parameters Based on Non-Intrusive Polynomial Chaos Expansion 506
Jinchao Zhang (China Astronautics Standards Institute, China), Yanru Zhang (China Astronautics Standards Institute, China), Zhaochong Wu (China Astronautics Standards Institute, China), Xiaojun Zhang (China Astronautics Standards Institute, China), and WeiZhu WeiZhu (China Astronautics Standards Institute, China)

Research On Decision Making Based On Information Processing Under Time Pressure 512
Tiantian Li (Beihang University, China) and Xing Pan (Beihang University, China)

PHM and Smart Maintenance

Research on Intelligent Fault Positioning Method and System for Civil Aircraft 520
Yongle Zheng (Shanghai Aircraft Design and Research Institute, China), Haiwei Li (Shanghai Aircraft Design and Research Institute, China), and Shilei Shen (Shanghai Aircraft Design and Research Institute, China)

Intelligent Fault Diagnosis Method for Complex Equipment Based on Knowledge Graph 525
Ning Hu (The 5th Electronics Research Institute, MIIT, China; Key Laboratory of Industrial Equipment Quality Big Data, MIIT, China), Quan Qiu (The 5th Electronics Research Institute, MIIT, China; Key Laboratory of Industrial Equipment Quality Big Data, MIIT, China), and Bingquan Chen (The 5th Electronics Research Institute, MIIT, China; Key Laboratory of Industrial Equipment Quality Big Data, MIIT, China)

OW-NISTA: Bridging Orthogonal Wavelets and Algorithm Unrolling in an Interpretable Way 532
Yujie Zhao (Xi'an Jiaotong University, China), Shibin Wang (Xi'an Jiaotong University, China), and Zhibin Zhao (Xi'an Jiaotong University, China)

Multi-Type Fault Detection of Satellite Momentum Wheel Based on Slow Feature Analysis 540
Hongtu Li (Tianjin University, China), Sirui Du (Tianjin University, China), and Shumei Zhang (Tianjin University, China)

Intelligent Centrifugal-Pump Fault Identification Technology Based on Vibration Signals Combined with Noise Reduction and Signature Analysis 547
Tong-xi Li (Institute of Reactor Power Engineering, Nuclear Power Institute of China, China), Zhen Zeng (Institute of Reactor Power Engineering, Nuclear Power Institute of China, China), Zhilong Liu (Institute of Reactor Power Engineering, Nuclear Power Institute of China, China; University of Electronic Science and Technology of China, China), Qian Luo (Institute of Reactor Power Engineering, Nuclear Power Institute of China, China), Qing-chao Wang (Institute of Reactor Power Engineering, Nuclear Power Institute of China, China), and Chang-hua Nie (Institute of Reactor Power Engineering, Nuclear Power Institute of China, China)

CFM-VSS-JITL: An Open Circuit Fault Diagnosis Method for Traction Inverter 555
Chao Yang (Central South University, China), Yanghe Liu (Central South University, China), Tao Peng (Central South University, China), Yansong Xu (Central South University, China), Jing Liao (Central South University, China), and Chunhua Yang (Central South University, China)

Research on Gear Fault Diagnosis Based on Stress Wave Signals 563
Tianmin Shan (AVIC Shanghai Aero Measurement-Controlling Research Institute, China; Nanjing University of Aeronautics and Astronautics, China; Aviation Key Laboratory of Science and Technology on Fault Diagnosis and Health Management, China; AVIC United Technology Center for Basic Research on Aircraft System Fault Diagnosis and Health Management, China), Hongli Ji (Nanjing University of Aeronautics and Astronautics, China), and Shangtian Zhang (AVIC Shanghai Aero Measurement-Controlling Research Institute, China; Aviation Key Laboratory of Science and Technology on Fault Diagnosis and Health Management, China)

The Evolutionary Approach Research of Diagnostic Bayesian Model Based on Field Data 568
Zixuan Pei (Shenyang Aircraft Design and Research Institute, Shenyang), Yujian Wang (Shenyang Aircraft Design and Research Institute, Shenyang), Guoqiang Zhou (Shenyang Aircraft Design and Research Institute, Shenyang), and Dong Liu (Shenyang Aircraft Design and Research Institute, Shenyang)

Connotation Technique for Experimental Validation of PHM Systems Under Complex Operating Conditions 576
Dongjiang Xie (Beihang University, China), Zhenbang Lv (Aeronautics Computing Technique Research Institute), Jian Ma (Beihang University, China), Zhixing Wei (Beihang University, China), and Tianhao Li (AVIC Xi'an Flight Automatic Control Research Institute)

Analysis of Structural Defect Transmission X-ray Image Mapping Behavior Driven by Simulation Data 581
Dong Yao (Key Laboratory of Ultra-fast Photoelectric Diagnostics Technology, Xi'an Institute of Optics and Precision Mechanics (XIOPM), Chinese Academy of Sciences (CAS), China), Kai He (Key Laboratory of Ultra-fast Photoelectric Diagnostics Technology, Xi'an Institute of Optics and Precision Mechanics (XIOPM), Chinese Academy of Sciences (CAS), China), Jie Zhang (Key Laboratory of Ultra-fast Photoelectric Diagnostics Technology, Xi'an Institute of Optics and Precision Mechanics (XIOPM), Chinese Academy of Sciences (CAS), China), and Xin Yan (Key Laboratory of Ultra-fast Photoelectric Diagnostics Technology, Xi'an Institute of Optics and Precision Mechanics (XIOPM), Chinese Academy of Sciences (CAS), China)

Control Valve Fault Diagnosis Based on Transfer Factor Analysis Under Various Working Condition 589
Kai Wang (China University of Petroleum-Beijing, China; Instrumentation Technology and Economy Institute, China), Chengcheng Wang (China University of Petroleum-Beijing, China; Instrumentation Technology and Economy Institute, China), and Yuhang Du (China University of Petroleum-Beijing, China)

Statistics-Informed Deep Learning Method for Parameter Drift Diagnosis in Fused Deposition Modeling 595
Qian Li (Beihang University, China), Tingting Huang (Beihang University, China), and Shanggang Wang (Beihang University, China)

Digital Twin Enhanced Multitask Learning Framework for Fault Diagnosis of Electromechanical Coupling System 600
Xuanyuan Su (Beihang University, China), Jiayue Fang (Beijing Institute of Control and Electronic Technology, China), Kaixin Jin (Beihang University, China), Shangyu Li (Beihang University, China), Jian Han (Beijing institute of control and electronic technology, China), Zhengduo Zhao (Beihang University, China), Qixuan Huang (Beihang University, China), and Laifa Tao (Beihang University, China)

Research on Storage Period Elements of Unmanned Aerial Vehicle Swarm Based on Knowledge Graph 606
Mengfei Yao (Beihang University, China), Xiaohong Wang (Beihang University, China), Lizhi Wang (Beihang University, China), and Yushan Teng (Beihang University, China)

Quantitative Model of Cracks Generated at Hole Edge Corrosion on Aluminum Alloy Plate Based on Lamb Wave 614
Duo Xu (CETC Chips Technology Inc, China), Xiaohong Tan (CETC Chips Technology Inc, China), Jia Jiang (CETC Chips Technology Inc, China), Jun Luo (CETC Chips Technology Inc, China), and Weifang Zhang (Beihang University, China)

Research on Performance Trend Analysis Technology of Aircraft PHM System 621
Yang Wangfeng (Northwestern Polytechnical University, China) and Zhao Yingjian (First aircraft institute of AVIC, China)

Requirements Analysis and Key Technologies of High-Performance Unmanned Aerial Vehicle Health Management System 630
Zeng Fan (ChengDu Aircraft Design and Resrarch Institude, China; Beihang University, China), GuanCheng Fang (ChengDu Aircraft Design and Resrarch Institude, China), DaPeng Jia (ChengDu Aircraft Design and Resrarch Institude, China), Tao Jiang (ChengDu Aircraft Design and Resrarch Institude, China), and Yi Ren (Beihang University, China)

A Study On The Temperature Simulation And Monitoring Methodology Of On-Orbit Satellite 638
Kezhen Song (Southeast University, China; Institute of Telecommunication and Navigation Satellites, CAST, China), Zhixin Liu (Institute of Systems Engineering, Academy of Military Sciences, PLA, China), Pu Yang (Institute of Telecommunication and Navigation Satellites, CAST, China), Chongwei Han (Beijing Institute of Spacecraft System Engineering, China), Zhiwei Zhou (APT Mobile Satcon Limited, China), and Di Jin (Beijing Institute of Spacecraft System Engineering, China)

Multi-Scale Fusion Prediction of Time Series of Device Performance Degradation Based on Generative Adversarial Networks and Transfer Learning 645
Junjie Huang (Beihang University, China), Bingrun Chen (Beihang University, China), Xiang Ma (Beihang University, China), Yiting Zhou (Beihang University, China), Minghui Zhang (Beihang University, China), and Jian Ma (Beihang University, China)

Radar Software Performance Evaluation Index for Actual Combat Application 653
Lei Liu (Nanjing Research Institute of Electronics Technology, China), Yongle Lu (Nanjing Research Institute of Electronics Technology, China), and Xu Ma (Nanjing Research Institute of Electronics Technology, China)

Evaluation System of Health Management Performance Indicators for Electromechanical Equipment 661
Yiting Zhou (Beihang University, China), Minghui Zhang (Beihang University, China), Zhenbang Lv (Beihang University, China), Junjie Huang (n/a), and Jian Ma (Beihang University, China)

Aircraft Skin Damage Detection System Based on Image Quality Data 669
Mengmeng Zhou (Aviation Industry Comprehensive Technology Research Institute, China), Changlin Qian (China Academy of Launch Vehicle Technology, China), Chenguang Hou (Aviation Industry Comprehensive Technology Research Institute, China), and Lidong Yin (Beijing Geling Shentong Information Technology Co., Ltd, China)

Pyramidal Cascaded Merging Attention Network for Lithium-ion Batteries SOH Estimation 675
Min Wang (University of Electronic Science and Technology of China, China), Yitian Chen (University of Electronic Science and Technology of China, China), Jingyuan Wang (University of Electronic Science and Technology of China, China), Shao Bo (China South Industrires Assets Management Co., Ltd.), Dongming Fan (Beihang University, China), and Zhen Liu (University of Electronic Science and Technology of China, China)

Key Technologies of Predictive Maintenance for Intelligent Industrial Instrumentation 681
Chengcheng Wang (China University of Petroleum-Beijing, China; Instrumentation Technology and Economy Institute, China), Kai Wang (China University of Petroleum-Beijing, China; Instrumentation Technology and Economy Institute, China), and Yuhang Du (China University of Petroleum-Beijing, China)

An Equipment-Level Predictive Maintenance Support System Based on Multi-Dimensional Analysis 689
Daqing Meng (Beijing University of Posts and Telecommunications, China), Qiuyan Yao (Beijing University of Posts and Telecommunications, China), Hui Yang (Beijing University of Posts and Telecommunications, China), Xiaoliang Luo (National Innovation Institute of Defense Technology, China), Xiaojing Wang (National Innovation Institute of Defense Technology, China), and Lin Li (National Innovation Institute of Defense Technology, China)

Research on Product Health Level Evaluation Technology Based on Fuzzy Membership Degree 695
DeJuan Chen (Marine Design & Research Institute of China, China), Lei Peng (Marine Design & Research Institute of China, China), and Jiahe Liu (China Academy of Aerospace Standardization and Product Assurance, China)

A Method Combining Causal Analysis and LSTM to Predict the RUL of Aircraft Engines 699
Yi Zechen (Beihang University, China), Sun Bo (Beihang University, China), Wu Zeyu (Beihang University, China), Pan Junlin (Beihang University, China), Zhou Leyang (Beihang University, China), and Lin Tongshu (Beihang University, China)

Precise SOC Estimation for Li-ion Batteries Based on Dual-Channel Neural Network 705
Haosheng Tan (Northwestern Polytechnical University, China), Zhaoyong Mao (Northwestern Polytechnical University, China), Yichen Wang (Northwestern Polytechnical University, China), Zhiwei Chen (Northwestern Polytechnical University, China), and Junge Shen (Northwestern Polytechnical University, China)

Simulation Method for Task Success Rate Based on Component State Evolution in Multi-Task Processes 711
Miao Zhang (Beihang University, China), Chuan Lv (Beihang University, China), Weixuan Zhou (China Academy of Electronics and Information Technology, China), Yuxue Jin (Beihang University, China), and Wan Lan (Beihang University, China)

Analysis and Optimization of Technical Support Process for Complex Equipment 719
Ning Ma (Air Force Engineering University, China), Zhanduo Jie (Air Force Engineering University, China), Meng Meng (Air Force Engineering University, China), and Xianzhen Zhang (NO.93088 Troops of PLA, China)

The Overall Design and Application of Mission-Oriented Aviation Equipment Support Simulation 726
Kun Jiang (Aviation Maintenance NCO School of Air Force Engineering University, China), Liangliang Zhao (Aviation Maintenance NCO School of Air Force Engineering University, China), Hui Zhao (Aviation Maintenance NCO School of Air Force Engineering University, China), and Renchuan Li (Aviation Maintenance NCO School of Air Force Engineering University, China)

Research on Maintenance Decision for Complex Equipment Based on Selective Maintenance Strategy 732
Huanzhen Fan (Beijing Institute of Electronic System Engineering, China), Xiaochuang Tao (Beijing Institute of Electronic System Engineering, China), Yanbin Yuan (Beijing Institute of Electronic System Engineering, China), and Bowen Cui (Beijing Institute of Electronic System Engineering, China)

Method for Simulation Verification and Evaluation of Military Equipment Maintenance Based on Motion Capture Technology 738
Qianyi Du (Shenyang Aircraft Design & Research Institute, China), Bin Wang (Shenyang Aircraft Design & Research Institute, China), and Henan Sun (Shenyang Aircraft Design & Research Institute, China)

Model-Driven Maintenance Task-Personnel Matching Scheduling Method 746
Xingzheng Wei (Beihang University, China), Wenjing Zhang (Beihang University, China), Dong Zhou (Beihang University, China), Mengqi Wu (Beihang University, China), Qidi Zhou (Beihang University, China), and Ziyue Guo (Beihang University, China)

Research on Maintainability Analysis and Optimization Technology for Aviation Equipment Based on Knowledge Engineering 754
Gao Fu (Institute of Army Aviation, China) and Sun Lei (Institute of Army Aviation, China)

A Visualization Verification Method of Maintainability by Using Parametric Model 760
Mengqi Wu (Beihang University, China), Tun Liu (Wuhan Second Ship Design and Research Institute, China), Shengjun Zhou (Wuhan Second Ship Design and Research Institute, China), Qidi Zhou (Beihang University, China), Dong Zhou (Beihang University, China), and Ziyue Guo (Beihang University, China)

Research on Optimization of Aircraft Preventive Maintenance Strategy 768
Yujian Wang (Shenyang Aircraft Design and Research Institute, China), Guoqiang Zhou (Shenyang Aircraft Design and Research Institute, China), Yunpeng Wang (Beihang University, China), and Zihan Zhou (Shenyang Aircraft Design and Research Institute, China)

On-Orbit Maintenance Mode for Manned Spacecraft 776
Wei Zhang (Beijing Institute of Spacecraft System Engineering, China), Yongqing Hou (Beijing Institute of Spacecraft System Engineering, China), Xingqian Li (Beijing Institute of Spacecraft System Engineering, China), and Zhihai Li (Beijing Institute of Spacecraft System Engineering, China)

Maintenance-Safety-Based Facility Layout Optimum Design of Aircraft Cabin 781
Li Shuo (China Electronic Product Reliability and Environmental Testing Research Institute, China), Hou ZhongZhi (China Electronic Product Reliability and Environmental Testing Research Institute, China), and Hao YuYang (China Electronic Product Reliability and Environmental Testing Research Institute, China)

Research on Design and Analysis Method of Maintenance Operation Space Based on Hand Operations 787
Jinlong Zhao (China North Vehicle Research Institute, PR China), Yan Wang (Beihang University, PR China), Zicheng Song (Beihang University, PR China), Qidi Zhou (Beihang University, PR China), and Ziyue Guo (Beihang University, PR China)

High-Voltage Circuit Breakers Maintenance Decision Based on Opportunistic Maintenance Theory 794
Jiliang Feng (Xian XK Electric Power Equipment Intelligent Service Co., Ltd., China), Dong Jia (Northwestern Polytechnical University, China), Chaohui Song (Northwest Branch of State Grid Corporation of China, China), Yanbin Zheng (Xian XK Electric Power Equipment Intelligent Service Co., Ltd., China), Cheng Guo (Xian XK Electric Power Equipment Intelligent Service Co., Ltd., China), Yuanyuan Wang (Xian XD Switchgear Electric Co., Ltd., China), Shubin Si (Northwestern Polytechnical University, China), and Zhiqiang Cai (Northwestern Polytechnical University, China)

Research on Static Verification Technology of Maintenance Space in Virtual Environment 800
Tun Liu (Wuhan Second Ship Design and Research Institute, PR China), Shengjun Zhou (Wuhan Second Ship Design and Research Institute, PR China), Zicheng Song (Beihang University, PR China), Weijia Sheng (Wuhan Second Ship Design and Research Institute, PR China), and Jie Chen (Wuhan Second Ship Design and Research Institute, PR China)

Optimization of non-Ergodic Maintenance Resource Allocation Driven by System Resilience 807
Xinhao Cui (Beihang University, China), Bo Li (Beihang University, China), Shitao Wang (Beihang University, China), Xue Yang (Beihang University, China), Siyue Zhang (Beihang University, China), and Yiyong Xiao (Beihang University, China)

A Multistate Network Approach for Resilience Analysis of Logistic System Based on Disjoint Minimal Path Vectors 813
Yanxuan Hong (National University of Defense Technology, China), Tao Liu (Xihua University, China), Shuai Zhang (National University of Defense Technology, China), Guanghan Bai (National University of Defense Technology, China), and Junyong Tao (National University of Defense Technology, China)

A Reconfiguration Capability Evaluation Method For System-Of-Systems 821
Hengte Du (Beihang University, China), Xing Pan (Beihang University, China), and Zimeng Yin (China Academy of Launch Vehicle Technology, China)

Priority Location and Enhancement in the p-Median Problem: A Modified Hybrid Binary PSO Approach 829
Chenghuan Li (Beihang University, China), Qiang Feng (Beihang University, China), Yue Zhang (Beihang University, China), Yi Ren (Beihang University, China), Yanjie Song (Beihang University, China), Qianming Zhang (Beihang University, China), and Zili Wang (Beihang University, China)

Reliability Systems Engineering

Research on Reliability Growth of Ship Information and Control Systems 836
Fang Liu (China Shipbuilding Corporation System Engineering Research Institute, China), Canzhi Gui (China Shipbuilding Corporation System Engineering Research Institute, China), Xiaonan Song (Government Affairs Service Center of Beijing Municipal Commission of Transportation, China), Chaos Ma (China Shipbuilding Corporation System Engineering Research Institute, China), and Yihao Wang (China Shipbuilding Corporation System Engineering Research Institute, China)

Research on the Assessment Strategy of General Quality Characteristics Index of Equipment Appraisal Under the New System 841
Lili Chang (Beijing Great Wall Electronic Equipment Co., LTD, China), Tongyu Zhang (Beijing Great Wall Electronic Equipment Co., LTD, China), and Yinping Ren (Beijing Great Wall Electronic Equipment Co., LTD, China)

Model Based Demonstration Method of General Quality Characteristics 846
Yan Zhou (China Aero-Polytechnology Establishment, China), Zhou Yang (China Aero-Polytechnology Establishment, China), Dong Dongni (China Aero-Polytechnology Establishment, China), and Wang Keyi (China Aero-Polytechnology Establishment, China)

A Review of The Mechanical Properties and Fabrication Techniques of Co40NiCrMo Elastic Alloy 851
Chen Yang (National University of Defense Technology, China), Yashun Wang (National University of Defense Technology, China), Shufeng Zhang (National University of Defense Technology, China), and Jingwen Hu (National University of Defense Technology, China)

Research on Difficulties and Countermeasures of Comprehensive Demonstration of General Quality Characteristics of Optoelectronic Equipment 859
Fengzhu Zheng (Xi'an Institute of Applied Optics, China), Fei Ning (Xi'an Institute of Applied Optics, China), Huilin Wang (Xi'an Institute of Applied Optics, China), Yanlu Du (Xi'an Institute of Applied Optics, China), Yuan Qi (Xi'an Institute of Applied Optics, China), and Gang Cheng (Xi'an Institute of Applied Optics, China)

Analysis of the Aviation Network Cascading Failure Invulnerability Based on Complex Network Theory 866
Xiao Liu (AVIC SHENYANG AIRCRAFT DESIGN & RESEARCH INSTITUTE, China), JiaLun Li (AVIC SHENYANG AIRCRAFT DESIGN & RESEARCH INSTITUTE, China), and Jihe Gao (Beihang University, China)

A Comprehensive Analysis Method of Four Efforts in Reliability Engineering for Helicopter Development 871
Shang Kun (China Helicopter Research and Development Institute, China), Chen Shengbin (China Helicopter Research and Development Institute, China), Hao Zongmin (China Helicopter Research and Development Institute, China), and Wang Wenzhi (China Helicopter Research and Development Institute, China)

Research on Modeling Methods for Equipment Utilization Tasks Incorporating Environment 878
Lingze Liu (Beihang University, China), Guoqing Zha (Beihang University, China), Xing Pan (Beihang University, China), Ke Wang (Beijing Rainfe Technology Co., Ltd, China), and Yan Sun (Beijing Rainfe Technology Co., Ltd, China)

Reliability Simulation Modeling Techniques Under Multiple Degradation Mechanisms 886
Wan Lan (Beihang University, China), Chuan Lv (Beihang University, China), Weixuan Zhou (China Academy of Electronics and Information Technology), Miao Zhang (n/a), and Yuxue Jin (n/a)

Research of Life-Cycle Usage and Support Cost for UCAVs Based on the Design of General Quality Characteristics 894
Siqi Wang (Shenyang Aircraft Design and Research Institute, Shenyang), Yi Pan (Shenyang Aircraft Design and Research Institute, Shenyang), Baoshi Yin (Shenyang Aircraft Design and Research Institute, Shenyang), Guoqiang Zhou (Shenyang Aircraft Design and Research Institute, Shenyang), and Dong Liu (Shenyang Aircraft Design and Research Institute, Shenyang)

Renewal Scheme Optimization of Ground Equipment System Based on Reliability, Maintainability and Economy 900
Yang Yongchuan (Beihang University, China), Xue Yuqing (Beihang University, China), Du Kai (Beihang University, China), Zhang Zhining (Beihang University, China), and Sun Yufeng (Beihang University, China)

Research on the Role of MOSA in Reducing the Cost of Developing Helicopter 906
Sizhe Su (AVIC China Aero-Polytechnology Establishment, China), Jia Zhiyu (AVIC China Aero-Polytechnology Establishment, China), and Zhou Yan (AVIC China Aero-Polytechnology Establishment, China)

Joint Optimization of Truck-Drone Logistics Network and Distribution Plan in Alpine Region..... 912
Shitao Wang (Beihang University, China), Qiuhong Zhao (Beihang University, China), Xinhao Cui (Beihang University, China), Bo Li (Beihang University, China), Siyue Zhang (Beihang University, China), and Yiyong Xiao (Beihang University, China)

Research on the Application of Intelligent Technologies in Aviation Equipment Maintenance Support Technical Data 919
Zhang Ruyi (China Aero-polytechnology Establishment (CAPE), China) and Ma Tianran (China Aero-polytechnology Establishment (CAPE), China)

Multi-Objective Vehicle Routing Problem with Unpaired Pickup and Delivery Demands Using NSGA-II Algorithm 926
Fengqi Huang (Beihang University, China), Boping Xiao (Beihang University, China), and Yanyan Jin (Beihang University, China)

Research on Comprehensive Evaluation Method for LRU Partition of Complex Equipment with Deviation Analysis 932
Yuchang Liu (China Academy of Launch Vehicle Technology, China), Haoyue Ma (CHINAROCKET Co., Ltd, China), Yiming Zhao (China Academy of Launch Vehicle Technology, China), Kai Wu (China Academy of Launch Vehicle Technology, China), and Wenshu Xie (China Academy of Launch Vehicle Technology, China)

A Functional Requirements Analysis Method for Supportability Baseline Comparative System Based on DoDAF 938
Dongni Dong (AVIC China Aero-Polytechnology Establishment, China), Zhiyu Jia (AVIC China Aero-Polytechnology Establishment, China), Yan Zhou (AVIC China Aero-Polytechnology Establishment, China), and Bo Shao (China South Industrires Assets Management Co., Ltd., China)

Research on Architecture of Intelligent Support System for Aviation Equipment 945
Zhou Yang (AVIC China Aero-Polytechnology Establishment (CAPE), China), Zeng Zhaoyang (AVIC China Aero-Polytechnology Establishment (CAPE), China), Zhou Yan (AVIC China Aero-Polytechnology Establishment (CAPE), China), and Lin Cong (AVIC China Aero-Polytechnology Establishment (CAPE), China)

Derivation and Analysis of Fill Rate and Utilization Rate for Spare Parts 951
Ruiyang Li (Beihang University, China), Lilai Zhou (Beihang University, China), Xiangfeng Ma (CSSC systems engineering research Institute, China), and Linhan Guo (Beihang University, China)

A Scenario-Oriented Multi-Agent Aviation Equipment Operational Support Modeling Method 956
Yuheng Yang (Beihang University, China), Xing Guo (Beihang University, China), Qiang Feng (Beihang University, China), Dongming Fan (Beihang University, China), Jihe Gao (Beihang University, China), Meng Liu (Beihang University, China), and Wenliang Zhang (Beihang University, China)

A Collapse Strategy for Multiple Supply-Dependency Coupled Networks Based on a Comprehensive Importance 962
Jiaren Wu (Shenyang Aircraft Design & Research Institute, China), Lin Mu (Shenyang Aircraft Design & Research Institute, China), Dong Liu (Shenyang Aircraft Design & Research Institute, China), Chenghuan Li (Beihang University, China), and Jihe Gao (Beihang University, China)

Environmental Engineering and Tests

Environmental Sensitivity Analysis of Silicone Rubber Aging in Marine Atmospheric Environment 967
Rui-Yuan Wang (Beihang University, China), Zhao-Feng Dou (Beihang University, China), Zhao-Hong Liu (Beihang University, China), and Wei-Fang Zhang (Beihang University, China)

Characterization of Sand Particle Morphology in Typical Areas and the Influence on Erosion..... 975
Xuehe Yang (China Electronic Product Reliability and Environmental Testing Research Institute, China; Guangdong Provincial Key Laboratory of Electronic Information Products Reliability Technology, China), Kenlun Chen (China Electronic Product Reliability and Environmental Testing Research Institute, China; The Ministry of Industry and Information Technology Key Laboratory of Quality and Reliability Engineering Technology of Civil Aircraft and Aero-Engine, China), and Jiawei Zhu (China Electronic Product Reliability and Environmental Testing Research Institute, China; The Ministry of Industry and Information Technology Key Laboratory of Quality and Reliability Engineering Technology of Civil Aircraft and Aero-Engine, China; Guangdong Provincial Key Laboratory of Electronic Information Products Reliability Technology, China)

Digital Simulation Method for Electromagnetic-Thermal-Mechanical Environment of Aerospace Products 983
Yan Zhang (Beihang University, China), Hongduo Wu (Beihang University, China), Penghui Wang (Northwestern Polytechnical University, China; Beijing Institute of Structure and Environment Engineering, China), Dong Zhou (Beihang University, China), Guangya Ge (Beijing Institute of Structure and Environment Engineering, China), Zixu Kang (Beihang University, China), and Ziyue Guo (Beihang University, China)

Research on Corrosion Behavior and Mechanism of 2A12 Aluminum Alloy in the Marine Atmospheric Environment 991
Zhiyuan Wang (Beihang University, China), Shuanglong Rong (Aerospace Science and Technology Defense Technology Research and Experimental Center, China), Xiaogang Li (Beihang University, China), and Weiwei Hu (Beihang University, China)

Simulation Analysis of Temperature Effects on Plate-Structure Modal Behavior 997
Pengcheng Lv (Beihang University, China), Xiaogang Li (Beihang University, China), Zhongda Su (Beihang University, China), and Weiwei Hu (Beihang University, China)

Reliability Assessment of Extravehicular Electric Tool Switch Buttons via the Integration of K-Means++ and Uncertain Random Accelerated Degradation Algorithms 1005
Beichen He (Beihang University, China; Beijing Institute of Spacecraft Environment Engineering, China; Science and Technology on Reliability and Environmental Engineering Laboratory, China), Xiaoyang Li (Beihang University, China; Science and Technology on Reliability and Environmental Engineering Laboratory, China), Rui Kang (Beihang University, China; Science and Technology on Reliability and Environmental Engineering Laboratory, China), Shouqing Huang (Beijing Institute of Spacecraft Environment Engineering, China; Science and Technology on Reliability and Environmental Engineering Laboratory, China), Zhaolin Zhang (Beijing Institute of Spacecraft Environment Engineering, China; Science and Technology on Reliability and Environmental Engineering Laboratory, China), Hao Wang (Beijing Institute of Spacecraft Environment Engineering, China; Science and Technology on Reliability and Environmental Engineering Laboratory, China), and Jing Wang (China Aerospace Science and Technology Corporation, China)

A Humidity Stress Test Method for Reliability Enhancement Test 1011
Li-ye Gao (Avic China Aero-polytechnology Establishment, China), Min-wei Li (Avic China Aero-polytechnology Establishment, China), and Peng-bin Cheng (Avic China Aero-polytechnology Establishment, China)

Research on the Application of Reliability Enhancement Test Technology for a Certain Type of Avionics Product 1016
Lei Qian (Luoyang Institute of Electro-Optic Equipment, China), Yuan Kai Gao (Beijing University of Aeronautics and Astronautics, China), and Geng Yan (Luoyang Institute of Electro-Optic Equipment, China)

Research on Pin Combination Optimization Technology of ESD Human Body Model Test Based on Pseudo-Random Number 1024
Yue Ding (Beihang University, China), Guicui Fu (Beihang University, China), Mengxiang Long (Beihang University, China), and Bo Wan (Beihang University, China)

Reliability Verification Requirement Allocation Method of Complex System Based on L-M Method 1031
Li Wenzhao (Beijing institute of aerospace system engineering, China), Liu Qingqi (Beijing institute of aerospace system engineering, China), and Liu Qi (Beijing institute of space launch technology, China)

Reliability of Autonomous Systems

Research on Cluster Task Reliability of UAVs for Ground Strike Scenarios 1035
Yi Pan (Shenyang Aircraft Design and Research Institute, Shenyang), Siqi Wang (Shenyang Aircraft Design and Research Institute, Shenyang), Yutong Sun (Shenyang Aircraft Design and Research Institute, Shenyang), Lin Mu (Shenyang Aircraft Design and Research Institute, Shenyang), Baoshi Yin (Shenyang Aircraft Design and Research Institute, Shenyang), Guoqiang Zhou (Shenyang Aircraft Design and Research Institute, Shenyang), and Dong Liu (AVIC Shenyang Aircraft Design and Research Institute, Shenyang)

Vulnerability Analysis of Intelligent Connected Vehicle Platoons Based on Topological Structure and Node Trust Values 1042
Yanning Wang (Anhui University, China), Yuhong Na (Anhui University, China), and Darong Huang (Anhui University, China; Chongqing Jiaotong University, China)

An External Shocks Modeling Approach for Unmanned Swarm System Based on Multiagent 1049
Xing Guo (Beihang University, PR China), Yuheng Yang (Beihang University, PR China), Qiang Feng (Beihang University, PR China), Dongming Fan (Beihang University, PR China), Jihe Gao (Beihang University, PR China), Meng Liu (Beihang University, PR China), and Zili Wang (Beihang University, PR China)

Reconfigurable Heterogeneous Multi-Agent Network Modeling and Resilience Analysis 1054
Yuheng Dang (Beihang University, China), Zimeng Yin (China Academy of Launch Vehicle Technology, China), and Pan Xing (Beihang University, China)

Face Detection and Recognition System Based on ResNet Residual Network 1062
Yaliqing Alimasi (Xinjiang University, China) and Qiao Tang (Xinjiang University, China)

A Method for Robustness Testing of Intelligent Classification Models: Adversarial Sample Generation Under Score-Based Gray-box Single-Pixel Attacks 1067
Yeyang Liu (Beihang University, China), Yangyang Sun (Beijing Institute of Control and Electronic Technology, China), Yiwei Wang (Beihang University, China), Changjian Wu (Beihang University, China), Changdi Zhao (Beijing Institute of Control and Electronic Technology, China), Feng Jiang (Beijing Institute of Control and Electronic Technology, China), Liang Ni (Beijing Institute of Control and Electronic Technology, China), Xiaobin Li (Beijing Institute of Control and Electronic Technology, China), and Dezhen Yang (Beihang University, China)

A Method for Generating Adversarial Examples Based on Interpretable Information 1074
Yuntian Gao (Beihang University), Jinlun Li (Beihang University), Chang Liu (Beijing Institute of Control and Electronic Technology, China), Ce Yang (Beijing Institute of Control and Electronic Technology, China), Yuxuan Run (Beihang University), Changdi Zhao (Beijing Institute of Control and Electronic Technology, China), Yangyang Sun (Beijing Institute of Control and Electronic Technology, China), Xiaobin Li (Beihang Unversity), and Dezhen Yang (Beihang Unversity)

Aviation AI System Reliability: Technical System Review 1081
Ming Xu (China Aero-Polytechnology Establishment, China), Jiao Li (China Aero-Polytechnology Establishment, China), Wensheng Peng (China Aero-Polytechnology Establishment, China), Zhaoyang Zeng (n/a), and Zhikai He (n/a)

A Multi-Views Network for Anomalous UAV Agent Trajectory Detection 1090
Dong Liu (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Zhikai Liu (School of computing Shenyang Aerospace University), Xuefei Wang (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Keli Zhang (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Bin Guo (School of computing Shenyang Aerospace University), Yingduo Yang (School of computing Shenyang Aerospace University), Chunlong Fan (School of computing Shenyang Aerospace University), and Qiaoli Zhou (School of computing Shenyang Aerospace University)

Attitude Correction of UAV Agents Under Anomalous States Based on Deep Reinforcement Learning 1098
Keli Zhang (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Yingduo Yang (School of computing Shenyang Aerospace University), Xuefei Wang (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Dong Liu (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Bin Guo (School of computing Shenyang Aerospace University), Tao Hong (School of computing Shenyang Aerospace University), Chunlong Fan (School of computing Shenyang Aerospace University), and Qiaoli Zhou (School of computing Shenyang Aerospace University)

Multi-Dimensional Time-Series GAN Based Data Augmentation for UAV Agent Behavior Prediction 1105
Dong Liu (Shenyang Aircraft Design & Research Institute, China), Tao Hong (Shenyang Aerospace University), Xuefei Wang (Shenyang Aircraft Design & Research Institute, China), Keli Zhang (Shenyang Aircraft Design & Research Institute, China), Yingduo Yang (Shenyang Aerospace University), Zhiqiang Chang (Shenyang Aerospace University), Na Ye (Shenyang Aerospace University), Chunlong Fan (Shenyang Aerospace University), and Qiaoli Zhou (Shenyang Aerospace University)

Health Conditions Monitoring of UAV Forecast Systems Using Uncertainty Estimation and SHAP Explainability 1111
Zhiqiang Chang (School of computing Shenyang Aerospace University), Qiaoli Zhou (School of computing Shenyang Aerospace University), Dong Liu (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Xuefei Wang (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Keli Zhang (Professional Engineering Department Shenyang Aircraft Design &Research Institute), Tao Hong (School of computing Shenyang Aerospace University), Bin Guo (School of computing Shenyang Aerospace University), Li Xu (School of computing Shenyang Aerospace University), and Chunlong Fan (School of computing Shenyang Aerospace University)

General Quality Characteristic Technology Based on AI/digitalization

Exploration of Complex System Reliability Test Methods Based on Integration of Digital and Physical Approaches 1119
Zhaochong Wu (China Astronautics Standards Institute, China), Jinchao Zhang (China Astronautics Standards Institute, China), Xiaojun Zhang (China Astronautics Standards Institute, China), Wei Zhu (China Astronautics Standards Institute, China), Yanrong Liu (China Astronautics Standards Institute, China), and Wei Wang (China Astronautics Standards Institute, China)

The Designation of Life Test rig for Aviation Electromechanical Products Based on Digital Twin Technology 1124
Ruping Wang (Avic China Aero-Polytechnology Establishment, China), Lihua Meng (Avic China Aero-Polytechnology Establishment, China), Xin Wang (Avic China Aero-Polytechnology Establishment, China), and Jiuqin Liu (Avic China Aero-Polytechnology Establishment, China; Dalian University of Technology, China)

Work Comfort Evaluation in Virtual Reality Environment Based on Multimodal Signals 1130
Henan Sun (Shenyang Aircraft Design & Research Institute, China), Bin Wang (Shenyang Aircraft Design & Research Institute, China), and Qianyi Du (Shenyang Aircraft Design & Research Institute, China)

Exploration on the Digitalization of Helicopters General Quality Characteristics 1137
Hongbin Zhang (Army Aviation Institute, China), Guojun Lai (Army Aviation Institute, China), and Hailang Bie (Army Aviation Institute, China)

Other/Frontier Technology Researches

An Ergonomics Enhancement and Verification Strategy of Measuring Equipment Interface 1142
Yu Yangze (AVIC Shenyang Aircraft Design & Research Institute, China), Zhou Guoqiang (AVIC Shenyang Aircraft Design & Research Institute, China), Jin Lei (AVIC Shenyang Aircraft Design & Research Institute, China), and Wang Mingze (AVIC Shenyang Aircraft Design & Research Institute, China)

Multi-Disciplinary Optimization Design and Analysis of High Reliability and Efficient Electric Pitch Propeller 1148
Yu Jingbo (China Academy of Aerospace Aerodynamics, China), Zhang Zijun (China Academy of Aerospace Aerodynamics, China), Xia Ran (China Academy of Aerospace Aerodynamics, China), Lei Qianqian (China Academy of Aerospace Aerodynamics, China), Liu Zhongbao (China Academy of Aerospace Aerodynamics, China), Kang Guojian (China Academy of Aerospace Aerodynamics, China), and Cong Qing (China Academy of Aerospace Aerodynamics, China)

A Comprehensive Support Method for Complex Equipment Based on Small Sample Knowledge Graph..... 1156
Wenjia Zuo (China Academy of Launch Vehicle Technology, China), Lixiang Gu (China Academy of Launch Vehicle Technology, China), Li Jia (China Academy of Launch Vehicle Technology, China), and Wenshu Xie (China Academy of Launch Vehicle Technology, China)

Identifying Key Nodes in Complex Networks by CNN-BiLSTM 1162
Xinrui Ma (CSSC System Engineering Research Institute, China), Zhongyun Xiong (CSSC System Engineering Research Institute, China), Sidong Liu (CSSC System Engineering Research Institute, China), Jiming Wang (CSSC System Engineering Research Institute, China), Yuan Yuan (Beihang University, China), and Zhiwei Chen (Northwestern Polytechnical University, China)

Research on Rapid Evaluation of Overdue Use of Active Medical Devices in Use 1167
Zimin Fang (Scientific Verification & Testing Engineering Technology Co., Ltd., China), Yupeng Cui (Scientific Verification & Testing Engineering Technology Co., Ltd., China), Weihua Gong (Scientific Verification & Testing Engineering Technology Co., Ltd., China), Gongjian Jiang (Scientific Verification & Testing Engineering Technology Co., Ltd., China), and Zuoxia Wu (Anshun High tech Zone Testing Center Co., Ltd., China)

Current Situation and Inspiration of Risk Management in Foreign Aerospace Systems 1174
Dongliang Liu (China Aerospace Standardization Institute, China), Zixia Zheng (China Aerospace Standardization Institute, China), Yalong Wang (China Aerospace Standardization Institute, China), and Yang Gao (China Aerospace Standardization Institute, China)

A Study of Prognostics and Health Management Standards and Technical Elements for Spacecraft 1180
Zhaobin Hu (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Peng Li (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China; Reliability Assurance Center, Chinese Academy of Scicences, China), and Wei Dang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Reliability Assurance Center, Chinese Academy of Scicences, China)

Research on Bulletproof Safety Standards for the Cockpit Door of Commercial Aircraft Suitable for China 1187
Jiashan Song (China Aero-Poly technology Establishment, China), Hu Tao (China Aero-Poly technology Establishment, China), Zhang Zhuguo (Shanghai Aviation Airworthiness Certification Center, Civil Aviation Administration of China, China), Zhang Yingchun (Shanghai Aviation Airworthiness Certification Center, Civil Aviation Administration of China, China), and Chen Ting (Shanghai Aviation Airworthiness Certification Center, Civil Aviation Administration of China, China)
