PROCEEDINGS OF SPIE

# *International Conference on Optics, Electronics, and Communication Engineering (OECE 2025)*

**Yang Yue**
*Editor*

**22–24 August 2025**
**Wuhan, China**

*Organized by*
Nanchang Institute of Technology (China)
Hubei Zhongke Institute of Geology and Environment Technology (China)

*Published by*
SPIE

**Volume 13965**

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13965

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Optics, Electronics, and Communication Engineering (OECE 2025)*, edited by Yang Yue, Proc. of SPIE 13965, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

xv *Conference Committee*

## Part One

**COMMUNICATION ENGINEERING**

13965 02 **Multisensor combined navigation filter design under launch inertial reference frame** [13965-34]

13965 03 **Construction of emergency rescue communication system with multi-UAV collaboration** [13965-235]

13965 04 **Research on profile of knowledge sharing user in online innovation community** [13965-33]

13965 05 **Energy-efficient communication network for mobile edge computing based on IRS-UAV** [13965-63]

13965 06 **Joint optimization design of OTFS integrated communication-radar system based on spectrum sensing and precoding** [13965-70]

13965 07 **One nonlinear filtering algorithm for multisensor combined navigation system** [13965-37]

13965 08 **Adaptive control system of sensorless permanent magnet synchronous motors** [13965-59]

13965 09 **Intelligent production decision of automobile closed-loop supply chains under remanufacturing cost disruptions** [13965-112]

13965 0A **Technological innovation and application of intelligent sensors in environmental monitoring** [13965-38]

13965 0B **Research on SLAM algorithm based on multisensor fusion** [13965-61]

13965 0C **Multipoint abscission layer sensor based on fiber Bragg grating** [13965-24]

13965 0D **The butterfly antenna enhances perovskite luminescence** [13965-13]

13965 0E **Aerosol characterization of Taizhou area based on satellite-borne LiDAR CALIOP** [13965-83]

13965 0F **The research on decoupling techniques for MIMO antennas** [13965-5]

13965 0G **An electronical beam-scanning antenna based on phase modulation unit** [13965-131]

13965 0H **A broadband differential-fed microstrip antenna with high gain** [13965-75]

13965 0I **Research on cigarette packaging strategy based on Kansei engineering and decision tree** [13965-247]

13965 0J **Research on the accuracy and professionalism of medical English machine translation** [13965-248]

## ELECTRONIC AND COMPUTER ENGINEERING

13965 0K **Automatic pattern recognition of design elements using computer vision and deep learning** [13965-168]

13965 0L **Mechanical analysis of multiphysical field coupling in structural health monitoring of civil buildings** [13965-169]

13965 0M **Trend forecasting in the pet industry based on prophet multiple time series regression models and Lotka-Volterra models** [13965-170]

13965 0N **Exploration of crop planting strategies based on ARIMA model and Monte Carlo simulation** [13965-171]

13965 0O **Motion optimization of curvilinear architectures based on recursive method and whale optimization algorithm** [13965-172]

13965 0P **Optimisation of production strategies based on Markov decision process and Bellman equation** [13965-173]

13965 0Q **Research on big data analysis and prediction models for adolescent physical health** [13965-174]

13965 0R **Analysis of Chinese brand optimization strategies based on LSTM model and BERT model** [13965-175]

13965 0S **Research on improving the display effect of red culture in Jilin province by using computer vision technology** [13965-176]

13965 0T **Motion optimization of curved architectures based on SAT algorithm and OBB wraparound boxes** [13965-177]

13965 0U **An exploration of production optimization based on sequential sampling and dynamic planning models** [13965-178]

13965 0V **Numerical simulation study of multistage slope excavation process** [13965-179]

13965 0W **Motion optimization of spiral structures based on Runge-Kutta and genetic algorithm** [13965-180]

13965 0X **BIM data-based quality issue assessment and claim mechanism** [13965-181]

13965 0Y **Research on learning effect prediction model of hybrid learning platform integrating artificial intelligence and big data analysis** [13965-139]

13965 0Z **The research on the construction of virtual simulation platform and optimization of intelligent evaluation algorithm in road and bridge engineering education** [13965-141]

13965 10 **Research on intelligent algorithm of project cost audit under multidimensional data fusion** [13965-142]

13965 11 **Performance evaluation and algorithm optimization of foreign language translation software based on big data** [13965-143]

13965 12 **Exploration of intelligent algorithms and applications for art design creation driven by machine vision** [13965-144]

13965 13 **Application and model optimization of computational fluid dynamics in chemical engineering** [13965-154]

13965 14 **Design of artificial intelligence prediction and big data analytics system for human resource management** [13965-155]

13965 15 **The application of CCZ-equivalence in the research of APN functions** [13965-161]

13965 16 **The application of artificial intelligence technology in legal consultation: improving the accuracy of legal Q&A robots through algorithm optimization** [13965-138]

13965 17 **Environmental monitoring and biodiversity promotion strategy of green infrastructure integrating sensor and artificial intelligence technology** [13965-156]

13965 18 **Fine description of weak alkali ASP flooding reservoir and intelligent identification algorithm of displacement process based on multisource data** [13965-157]

13965 19 **Modeling and prediction of cultural consumption behavior preferences based on multimodal perception and graph neural networks** [13965-158]

13965 1A **Multidimensional analysis of big data and integrated application of intelligent algorithms in economic management field** [13965-159]

13965 1B **The application of intelligent algorithms in enhancing the efficiency of computerized management in institutional libraries** [13965-160]

13965 1C **Health assessment model for civil aviation application systems based on network traffic monitoring** [13965-135]

13965 1D **Monitoring design for the embankment of the Beijing-Hangzhou Grand Canal based on DTS** [13965-80]

13965 1E **Application of middleware technology in the localization of databases** [13965-162]

13965 1F **Markov-ACN: malicious traffic detection method based on Markov feature matrix and adaptive clustering network** [13965-134]

13965 1G **Emotion recognition based on 3D-EEGU-Net and differential entropy features for small sample EEG and embedded applications** [13965-165]

13965 1H **Exploration of the comparison of potato epidermis classification using KNN, BP, and SVM based on multifeature fusion** [13965-49]

13965 1I **The design of facial expression recognition system based on YOLO** [13965-200]

13965 1J **Research on the design and autonomous navigation of medical intelligent agent systems based on multimodal perception** [13965-167]

13965 1K **One adaptive nonlinear information fusion method for GNSS/SINS combined navigation system** [13965-46]

13965 1L **Research on digital information security based on improved poker shuffling and bit-level three-dimensional space replacement** [13965-92]

13965 1M **Research on EEG signal acquisition and control peripheral based on TGAM module** [13965-105]

13965 1N **Patch-based weakly supervised high-resolution crack detection** [13965-65]

13965 1O **Light-YOLOv8n: a lightweight real-time monitoring system for abnormal driving behavior based on multimodal fusion and cloud edge collaborative optimization** [13965-119]

13965 1P **An attitude angle estimation algorithm based on the hidden Markov model** [13965-153]

13965 1Q **Few-shot Li brocade pattern detection based on RetinaNet with attention** [13965-66]

13965 1R **Strategic study on joint intelligent interpretation of multimodal remote sensing images** [13965-36]

13965 1S **Adaptive pruning and SVD-enhanced acoustic modeling for low-resource Thai speech recognition** [13965-106]

13965 1T **Research on mass calculation of rocket rod interstage based on BP neural network** [13965-103]

13965 1U **Effectiveness evaluation of anti-missile early warning operation based on fuzzy comprehensive method** [13965-147]

13965 1V **A machine learning-based approach for blood glucose level classification analysis** [13965-102]

13965 1W **Research on energy-saving measurement method for retrofitting central air conditioning systems** [13965-32]

13965 1X **Smart technologies for quality control and traceability in agri-food chains: a systematic review** [13965-20]

13965 1Y **Selection of the best candidates for surgery in patients with cervical cancer: a SEER-based study** [13965-56]

13965 1Z **Fast calibration algorithm for spatial augmented reality based on HSV processing** [13965-236]

13965 20 **A pose validation method with prior masks for 6D object pose estimation** [13965-29]

13965 21 **Grouping combination snow geese algorithm for gene expression data feature selection** [13965-58]

13965 22 **Detection of overload evasion behavior in traffic enforcement using YOLOv8-based segmentation and DeepSORt tracking** [13965-152]

13965 23 **One modified Sage-Husa adaptive Kalman filter in GNSS/SINS combined navigation system** [13965-22]

13965 24 **Measurement of sea cucumber size using machine vision techniques** [13965-113]

13965 25 **Research on digital assessment methods for ship tests** [13965-21]

13965 26 **A BMC video processing subsystem based on V4L2 framework** [13965-73]

13965 27 **Fractional Fourier transform delay estimation application analysis** [13965-187]

13965 28 **ShapeletMIL: a multi-instance learning framework for interpretable multivariate time series classification** [13965-77]

13965 29 **Cell nucleus segmentation based on SPCNN-CapsUnet for biological adhesion** [13965-79]

13965 2A **Prediction of pneumonia-like virus transmission based on machine learning algorithms** [13965-145]

13965 2B **Research on dynamic DNA image encryption algorithm based on six-dimensional chaos and logistic map** [13965-31]

13965 2C **Application of multiagent systems in power systems: from fault diagnosis to centralized meter reading** [13965-130]

## Part Two

13965 2D **DGNN: dynamic graph learning for electricity load forecasting** [13965-132]

13965 2E **A hyperspectral image recognition model for tomato early blight based on attention guidance and spectral fusion** [13965-114]

13965 2F **Based on Baidu cloud's test paper answer sheet correction system** [13965-93]

13965 2G **Research on risk assessment technology of intelligent home appliances based on RPN** [13965-137]

13965 2H **Simulation of AIS virtual instrument based on LabVIEW** [13965-60]

13965 2I **Research on an AI-based benchmarking learning method for improving college students' job competence** [13965-234]

13965 2J **Design and implementation of a multisource data integration charging station reservation system based on Vue, UniCloud, and WebGIS** [13965-124]

13965 2K **Finite time adaptive control algorithm and analysis for waterwheel handling robot with parameter estimation errors** [13965-64]

13965 2L **A review of research on the behavioral characteristics of older drivers in human-machine co-driving** [13965-81]

13965 2M **Particle swarm optimization with level-based elite learning and competition mechanism** [13965-54]

13965 2N **Vehicle type detection algorithm based on improved RT-DETR model** [13965-121]

13965 2O **Computational 3D finite element analysis on stress distribution differences for Ti vs. Ti-Cu alloy dental implants at the bone-implant interface** [13965-94]

13965 2P **The dataset of bronze vessel patterns from the Shang and Zhou dynasties and artificial intelligence recognition** [13965-90]

13965 2Q **YOLO-BCD: an efficient and accurate approach for building crack detection** [13965-23]

13965 2R **An improved particle filtering algorithm for BeiDou/SINS combined navigation system** [13965-43]

13965 2S **Multidimensional evaluation and scenario-adaptive application of sentiment analysis algorithms** [13965-101]

13965 2T **Multicategory load stratification response model and optimization control strategy for demand-side resource aggregation** [13965-72]

13965 2U **Multiperceptual fusion synergy: an enhancement scheme for remote sensing image detection** [13965-51]

13965 2V **TrOCR-based single/double Chinese license plates recognition** [13965-88]

13965 2W **PTN: a recognition-driven perspective transformation network for Chinese license plates** [13965-87]

13965 2X **Transit deserts, equity, and disadvantaged groups: a case study in Beijing's central districts** [13965-133]

13965 2Y **Comparison of the performance of illegal tobacco transport vehicle type detection and multimodel based on deep learning** [13965-117]

13965 2Z **Construction of multidimensional collaborative protection system for information security: technical practice and management optimization** [13965-76]

13965 30 **Research on authenticity requirement identification method based on HDEF architecture** [13965-96]

13965 31 **Research on multidimensional strategies and practices for resilient city construction: a computer science-driven perspective** [13965-125]

13965 32 **A lightweight model-based method for remote sensing urban-rural water body segmentation** [13965-2]

13965 33 **Python language deep learning combined with dynamic features on software defect prediction** [13965-219]

13965 34 **Research on optimization of weight allocation algorithm for federated learning driven by multiagent game theory** [13965-237]

13965 35 **Research on code defect detection system based on differential privacy enhanced federated learning** [13965-238]

13965 36 **Artificial intelligence empowering the education of left-behind children in rural areas: a study on implementation pathways** [13965-239]

13965 37 **Intelligent system structure of folk art inheritance matrix** [13965-240]

13965 38 **The application of time series and cointegration test in the field of economics** [13965-241]

13965 39 **The specific application of gravity model in economics** [13965-242]

13965 3A **Research on cross-domain recommendation system based on heterogeneous knowledge graph** [13965-243]

13965 3B **Application of the Markov chain Monte Carlo method based on Bayesian inference** [13965-244]

13965 3C **Study on dynamics of hydraulic support under different base plate conditions** [13965-245]

13965 3D **Analysis and research on domestic substitution of transportation reducers for shuttle car in mining** [13965-246]

13965 3E **Research on the impact of carbon price on the carbon emission intensity of enterprises** [13965-256]

13965 3F **Design and effectiveness verification of cross-border e-commerce tariff avoidance algorithm based on federal reinforcement learning and digital twin: an empirical study on China-US tariff game** [13965-252]

13965 3G **From restoration to inheritance: the value of BIM technology in the whole life cycle of ancient building protection** [13965-253]

13965 3H **Research on the effectiveness of tourism information management platform in the new era** [13965-254]

13965 3I **Weather forecast in Xiamen based on numerical analysis** [13965-257]

13965 3J **Research on synchronous ring surface defect detection system based on Halcon deep learning** [13965-258]

**MECHANICAL AND AUTOMATION CONTROL**

13965 3K **Vibration test and analysis of a large ultra-high head pumped storage power station** [13965-182]

13965 3L **Foundation type selection for ultra-high voltage transmission line projects in mountainous areas with rock foundation** [13965-183]

13965 3M **Research on structural response of a typical target under the action of impact in water** [13965-184]

13965 3N **Kinematic and mechanical models of internal combustion engines and their characteristics** [13965-261]

13965 3O **Investigation on the optimization of safe thickness of horizontal isolation pillars in the east mining region of Hongniu Copper Mine** [13965-262]

**OPTICAL ENGINEERING**

13965 3P **Preparation of diatomic catalysts and their electrochemical properties** [13965-185]

13965 3Q **Experimental study of the effect of fluid parameters on the thermal mass transfer characteristics of fuel cell humidifiers** [13965-186]

13965 3R **Research on improving the accuracy of carbon stock estimation in rocky desertification plantations based on LiDAR technology** [13965-188]

13965 3S **Construction of lithium battery failure mechanism and safety warning model based on in situ characterization technology** [13965-189]

13965 3T **Comparative study on fluoride removal efficiency under the synergistic effect of capacitive deionization and static adsorption** [13965-190]

13965 3U **Experimental study on a liquid-phase impregnation method for the preparation of silicon-carbon anode materials for lithium-ion battery** [13965-191]

13965 3V **The influence of transition metal catalysts on the electrochemical properties of the needle coke** [13965-192]

13965 3W **Analysis of thermal transport and optical absorption in $XBi_2$ monolayers based on first-principles calculations** [13965-193]

13965 3X **Observation of microparticle motion under optical tweezers** [13965-194]

13965 3Y **Fabrication of PDMS (Dimethylsiloxane) microlens array for virtual reality by dose-modulated maskless lithography** [13965-136]

13965 3Z **Positive and negative photoresponse in Cu:ZnInGaSe colloidal quantum dots-graphene-based phototransistors** [13965-4]

13965 40 **Research and simulation on extended spatial modulation with achieving transmit diversity** [13965-16]

13965 41 **Trajectory-based intelligent energy-efficient handover in heterogeneous ultra-dense networks** [13965-150]

13965 42 **Research on virtual testing of REEV VCUs** [13965-17]

13965 43 **Research on the transmission characteristics of terahertz waves in the plasma sheath of hypersonic vehicles under turbulent flow** [13965-82]

13965 44 **Failure analysis of insulating paper for commercial transformers adopting correlating characterization of SEM and infrared microscopy on the same micro-region** [13965-68]

13965 45 **Bifurcation and hyperchaos in a tri-ring Er-doped fiber laser** [13965-8]

13965 46 **Lyapunov exponents and fractal dimension analysis in a three-ring Er-doped fiber laser system** [13965-9]

13965 47 **Advances in improving electrochemical performance of AFP for sodium-ion battery cathode** [13965-149]

13965 48 **Tabletop pulsed x-ray ghost imaging based on an adjustable mechanical shutter** [13965-10]

13965 49 **A generalized uncertainty principle of the fractional Fourier transforms** [13965-11]

13965 4A **An uncertainty principle for fractional differentiation** [13965-19]

13965 4B **Research on active control methods for large-scale optical phased arrays** [13965-48]

13965 4C **Rapid EDXRF analysis of Fe and Co impurities in high-grade Ni leaching solution from hydrometallurgical processes** [13965-118]

13965 4D **Study on spectral processing methods for ground gamma spectrum measurement** [13965-111]

13965 4E **Direct determination of nickel content in high-salt liquids by EDXRF** [13965-120]

13965 4F **Development of a digital high-stability high-voltage power supply based on STM32** [13965-109]

13965 4G **Digital energy spectrum measurement system based on dual-baseline recovery technique** [13965-7]

13965 4H **Development of a γ-ray detection system with automatic temperature drift correction-based STM32** [13965-84]

13965 4I **Study on the dynamic effects of thermal-induced spherical aberration and spot size on laser beam quality factor** [13965-18]

13965 4J **Simulation study on correction of titanium alloy adaptive deformable mirror based on random phase method** [13965-3]

13965 4K **Research on fire extinguishing agents for lithium-ion battery fires** [13965-71]

13965 4L **Enhanced ionic mobility and cycling performance of $LiBF_4$-based inorganic solid-state electrolyte for solid state lithium metal batteries** [13965-122]

13965 4M **Research on key technologies and inspection methods for intelligent guided vehicle** [13965-74]

13965 4N **Research on voltage sag compensation method for intelligent device** [13965-128]

13965 4O **A scalable FPGA-based counter system for dark count characterization** [13965-14]

13965 4P **Predicting photonic crystal fiber optical properties using a stacking machine learning model** [13965-12]

13965 4Q **Overview of hyperspectral imaging principle and its application in criminal science and technology** [13965-129]

13965 4R **Linear optical sampling system based on self-developed fiber laser** [13965-62]

13965 4S **Spatial-semantic sparse attention feature extraction for high-performance visual recognition** [13965-249]

13965 4T **Upgrading and optimization of mine endless rope winch** [13965-250]

13965 4U **Comparative analysis of legacy and updated international standards on the photometer of vehicle LED lighting systems** [13965-255]

13965 4V **Small fitting defect detection algorithm for transmission lines based on cascaded YOLO11** [13965-251]
