PROCEEDINGS OF SPIE

Ninth International Conference on Traffic Engineering and Transportation System (ICTETS 2025)

Kai Liu
Xiantao Xiao
Jia Yao
Editors

26–28 September 2025
Dalian, China

Organized by
Dalian University of Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 14011

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14011

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Ninth International Conference on Traffic Engineering and Transportation System (ICTETS 2025)*, edited by Kai Liu, Xiantao Xiao, Jia Yao, Proc. of SPIE 14011, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

Part One

INTELLIGENT TRAFFIC SYSTEM OPTIMIZATION

14011 02 **Cable force optimization and research of buckle cables during construction of a steel box arch bridge based on particle swarm algorithm** [14011-15]

14011 03 **The study of regional collision risk model based on dynamic ship domain overlap index** [14011-96]

14011 04 **Multiobjective optimization of subway vehicle parts distribution based on PSO algorithm** [14011-27]

14011 05 **Distributed model predictive control of virtual coupled trains based on NDOB & APF** [14011-157]

14011 06 **A multiobjective maintenance and rehabilitation decision-making method for highway networks** [14011-70]

14011 07 **Research on optimization of standardized transportation unit pooling and sharing operation mode based on big data technology** [14011-53]

14011 08 **Emergency bus bridging dispatch planning for unexpected rail transit interruptions** [14011-12]

14011 09 **Collaborative flight plan scheduling for urban low-altitude UAV** [14011-29]

14011 0A **Study on the adjustment of train operation delay in urban rail transit based on the remaining time of timetable** [14011-35]

14011 0B **Research on cooperative distribution path optimization of drone vehicle based on LODBO-metropolis improved genetic algorithm in flood scenario** [14011-28]

14011 0C **Considering the emergency resource distribution strategy of zoning and grading under urban emergencies** [14011-69]

14011 0D **Optimization method for modular bus systems combining cross-line scheduling, dynamic formation, and timetabling** [14011-13]

14011 0E **Hybrid model predictive control for flexible platoon lane change with mixed logic dynamics model** [14011-173]

14011 0F **Multiobjective optimization of vehicle multimodal transport paths considering carbon emissions: a hybrid genetic-tabu search approach** [14011-97]

14011 0G **Optimization of delivery and pickup operations at hybrid freight handling points in intermediate railway station** [14011-22]

14011 0H **Multiobjective optimization strategies and methods for variable speed limits on expressways in snowy weather** [14011-103]

14011 0I **Optimization of emergency material delivery based on truck-drone collaboration** [14011-30]

14011 0J **Two-stage order picking algorithm under scattered storage mode** [14011-92]

14011 0K **Research on optimization of direct train organization at loading place of heavy load line based on traffic fluctuation** [14011-146]

14011 0L **Path following of dual propelled unmanned surface vehicle based on lie group model predictive control** [14011-65]

14011 0M **Re-planning method for unmanned surface vehicle path based on improved A* algorithm under dynamic sea conditions** [14011-91]

14011 0N **Optimization model for maxband arterial coordination based on fitted vehicle speed distribution** [14011-55]

14011 0O **Intelligent charging station layout and vehicle routing collaborative planning based on an improved fata morgana algorithm in the context of sustainable urban freight** [14011-178]

14011 0P **Multiobjective vehicle routing optimization via deep reinforcement learning for coordinated energy efficiency and emission control in urban road networks** [14011-177]

14011 0Q **Intelligent optimization model for mountain highway alignment design: a deep reinforcement learning approach** [14011-117]

14011 0R **Research on the path of channel intelligence** [14011-54]

14011 0S **Influence of PID controlled CAV platoon on mixed traffic flow** [14011-74]

14011 0T **Research on last-mile logistics route optimization based on an improved ant colony algorithm** [14011-118]

14011 0U **Study on digital design methods for traffic organization in expressway reconstruction and expansion** [14011-61]

14011 0V **Research on serial integration of traffic organization design schemes for expressway reconstruction and expansion** [14011-63]

14011 0W **Exploration of a multi-information fusion model for intelligent vehicle suspension systems** [14011-10]

14011 0X **Last-mile delivery vehicle routing optimization for high-speed rail express under the distribution center elimination mode** [14011-159]

14011 0Y **Research on lane change trajectory planning model for autonomous vehicles considering U-turns** [14011-25]

14011 0Z **Experimental study on autonomous driving control algorithm based on deep learning** [14011-140]

14011 10 **Research on resource scheduling and load balancing algorithm for traffic centralized controller based on command priority** [14011-89]

14011 11 **Optimal deployment of roadside units with SUMO simulation in urban V2V and V2I communication networks** [14011-40]

14011 12 **Based on AIS data ship path optimization algorithm considering wind speed and ocean current environmental factors to reduce carbon emissions** [14011-11]

14011 13 **Equity-based link capacity optimization model for multimodal transportation networks** [14011-110]

14011 14 **Dynamic multiobjective route planning for arctic shipping** [14011-43]

14011 15 **Modeling and operation optimization of train operation plan for intercity railway frequent timetabling** [14011-139]

14011 16 **Multiobjective optimization of stand allocation in cul-de-sac area of terminal based on pressure-relief stand design** [14011-41]

14011 17 **Integrated schedule and container flow strategy for disrupted liner shipping: a time-space network approach** [14011-180]

14011 18 **Truck–UAV dynamic collaborative delivery route optimization** [14011-165]

14011 19 **Design of intelligent transportation system based on embedded system** [14011-128]

TRAFFIC SENSING AND MONITOR

14011 1A **Research on text classification method for metro train control onboard equipment logs based on Capsule network** [14011-162]

14011 1B **Comparative analysis and research on the technical performance of modular double (semi-trailer) road train** [14011-58]

14011 1C **Research on state assessment method of automated fare collection equipment driven by multidimensional data** [14011-171]

14011 1D **A macroscopic traffic data fusion method and practice based on highway roadside perception** [14011-56]

14011 1E **Multimodal perception and asynchronous pipeline collaboration for intelligent intra-logistics: a fusion-driven approach** [14011-3]

14011 1F **YOLOv8 with SPD-conv and PPA integration for small-target ship detection in cluttered maritime environments** [14011-72]

14011 1G **High-speed railway communication tower monitoring and intelligent prediction system based on iTransformer** [14011-33]

14011 1H **Investigation on the impact of visual guidance facilities in the middle section of expressway tunnels on drivers' visual characteristics** [14011-158]

14011 1I **Inspections on the expansion joints of straddle-type monorail from acoustic signal** [14011-66]

14011 1J **Study on the influence mechanism and numerical simulation of hull geometric characteristics on ship sinkage and resistance performance** [14011-76]

14011 1K **Rail joints damage detection in railway application** [14011-19]

14011 1L **AK-YOLO: a lightweight scale-adaptive model for traffic sign detection** [14011-16]

14011 1M **Vehicle tracking and trajectory extraction based on deep learning** [14011-6]

14011 1N **Photoclimatological modelling of adaptation luminance (L20) dynamics at tunnel entrances under clear skies** [14011-149]

14011 1O **Research on the calculation method of head forward tilt of rear passengers in vehicle frontal collision test** [14011-119]

14011 1P **Deep learning-based bridge crack detection and damage evolution numerical simulation under water pollution environment** [14011-148]

14011 1Q **YOLO-MSPA: a multiscale polarized attention network for high-precision pavement crack segmentation** [14011-105]

14011 1R **Urban road traffic state recognition based on traffic video** [14011-36]

14011 1S **Measurement of geometric parameters of LiDAR catenary** [14011-31]

14011 1T **Research on track inspection instruments based on ultrasonic technology and their applications** [14011-175]

Part Two

14011 1U **Real-time monitoring of railway construction personnel at the edge based on YOLOv12-MobileViTv1** [14011-174]

14011 1V **Research on fatigue driving detection network based on improved YOLO11 in infrared monitoring** [14011-104]

14011 1W **A VGG16 transfer learning model integrating attention mechanism for road sign recognition** [14011-73]

14011 1X **Video transmission technologies for unmanned surface vehicles based on cognitive sensing** [14011-49]

14011 1Y **Intelligent real-time monitoring of tunnels and fire early warning based on multisensors** [14011-94]

14011 1Z **GALMono: ambiguity-aware lightweight monocular depth estimation with graph convolution** [14011-4]

14011 20 **Horizontal pipeline transportation of coarse particles: experimental investigation on flow patterns and velocity distribution** [14011-9]

14011 21 **Batch modeling method for traffic simulation interacting with digital twin systems** [14011-142]

14011 22 **Simulation-based method research on dynamic hard shoulder running at highway diverging and merging areas** [14011-145]

14011 23 **Research on dangerous goods sign recognition based on multimodal feature fusion** [14011-150]

14011 24 **Research on evaluation of expressway operation status based on vehicle trajectory traceability** [14011-161]

14011 25 **Research on the optimization of YOLO track fastener damage detection accuracy based on mean filtering** [14011-172]

14011 26 **Efficient image stitching for railway freight roof surveillance via regional feature matching** [14011-98]

14011 27 **Analysis of dynamic characteristics and vibration response prediction in the catenary system** [14011-108]

TRAFFIC PREDICTION AND EVALUATION

14011 28 **Research on cable force optimization of long span hingeless handle-basket arch bridge suspension rod based on particle swarm optimization algorithm** [14011-184]

14011 29 **Research on the identification and construction of key nodes of grain logistics network in northeast China** [14011-115]

14011 2A **Multiship collision risk assessment based on velocity obstacle method** [14011-38]

14011 2B **Research on the characteristics of Xinjiang logistics based on complex networks** [14011-45]

14011 2C **Taxi travel patterns and spatiotemporal heterogeneity: a POI data-based analysis** [14011-8]

14011 2D **FG-TFP: a fine-grained traffic flow prediction framework with cross-modal fusion and dynamic upsampling** [14011-2]

14011 2E **Research on PCTC accident causal analysis based on association rules and Bayesian network** [14011-34]

14011 2F **Research on demand distribution for electric taxi power switching using wireless charging lane configuration** [14011-42]

14011 2G **Calculating the contribution of integrated freight hub to hub economy** [14011-122]

14011 2H **Research on supply chain finance decision-making for spare parts of auto manufacturers** [14011-124]

14011 2I **Research on highway traffic blocking prediction based on hypergraph neural networks** [14011-67]

14011 2J **Traffic flow prediction method based on EWT-XLSTM network** [14011-7]

14011 2K **A vessel trajectory prediction method based on an improved transformer architecture** [14011-14]

14011 2L **Research on key technologies of tripartite privacy computing system for sea-rail intermodal transport** [14011-111]

14011 2M **Vehicle model characteristic analysis based on simulation method** [14011-137]

14011 2N **Travel time analysis of mixed traffic scenario based on simulation method** [14011-95]

14011 2O **Modeling recovery-enhanced propagation of expressway disruptions in the greater bay area: a network-based SIR framework** [14011-51]

14011 2P **Research on electric bicycle-motor vehicle conflict severity prediction model for multiple conflict-type scenarios** [14011-116]

14011 2Q **Research on the economics of ship crossing the dam based on the agent queuing model** [14011-57]

14011 2R **Research on risk prediction of ship-borne container falling accident in inner branch line** [14011-144]

14011 2S **Comparison of machine learning-based models for predicting non-motorized vehicle speeds within signal-controlled intersections** [14011-5]

14011 2T **Research on the construction of a data-driven platform for ground-air collaborative out-of-gauge cargo transportation** [14011-44]

14011 2U **Analysis of the container shipping network (CSN): a maximum flow disruption perspective** [14011-101]

14011 2V **Visualization analysis of the current status and hot topics of tracking foreign object detection based on VOSviewer** [14011-176]

14011 2W **Topology evolution and robustness analysis of urban rail transit network: a case study of Xi'an metro** [14011-123]

14011 2X **Research on the interactive relationship between ride hailing and cruise taxi development** [14011-99]

14011 2Y **Simulation analysis of accidents in ship fuel bunkering operations** [14011-26]

14011 2Z **A method for analyzing the influence of large-scale emergencies on highway traffic** [14011-59]

14011 30 **Study on the prediction of the number of ships waiting for lock in inland river hub lock** [14011-71]

14011 31 **Lane-change trajectory prediction of vehicles based on multivehicle spatio-temporal interaction** [14011-46]

14011 32 **Section grouping method and result analysis in maintenance decision-making of seasonal frozen region highways** [14011-23]

14011 33 **Evaluating node importance in metro-bus networks using network attack experiments** [14011-62]

14011 34 **Comparative analysis of traffic accident severity predicted by ordinal decision trees and unordered decision tree** [14011-120]

14011 35 **The impact of high-speed rail network on urbanization** [14011-112]

14011 36 **Comparative study on free modal simulation analysis of frame based on Ansys Workbench and Altair Hyperworks** [14011-50]

14011 37 **Overview of air traffic congestion situation identification methods** [14011-84]

14011 38 **Analysis of high-risk group identification in highway accidents based on ordinal logistic regression** [14011-48]

14011 39 **A data-driven prediction model for vehicle travel risks in tunnels** [14011-60]

14011 3A **Short-term OD passenger flow prediction in urban rail transit networks based on classification** [14011-77]

14011 3B **Ship trajectory prediction based on CNN-Transformer-BiLSTM model** [14011-24]

14011 3C **A study on drivers' visual search strategies during takeover scenarios** [14011-130]

14011 3D **Analysis of ship roll prediction and application value based on neural network** [14011-100]

14011 3E **Resilience analysis of China's expressway network based on community detection in the context of urban agglomerations** [14011-181]

14011 3F **Ship-wave coupling simulation method based on a simple dynamics model in a navigation simulator** [14011-163]

14011 3G **A passenger flow prediction method for new urban rail transit lines based on feature profiling** [14011-75]

14011 3H **Short-term traffic flow prediction of expressways based on VMD-XGBoost** [14011-79]

14011 3I **A GM (1,1)-ARIMA-MPI-based forecasting model for waterway maintenance funding requirements** [14011-126]

14011 3J **GNN-based prediction of closeness centrality in urban road networks** [14011-179]
