# 2026 Annual Reliability and Maintainability Symposium (RAMS)
# Program

**01C Autonomous Systems**

Reinforcement Learning Qualification Process - 01C-1 - 175
***Steven Senczyszyn**, Michigan Technological University (United States); Jason Summers, ARiA (United States); Benjamin Werner, US Army DEVCOM AC (United States); Benjamin Schumeg, US Army DEVCOM AC (United States); Timothy Havens, Michigan Technological University (United States)...1*

Human-Autonomy Teams: Driver Simulator Experiments for Level 3 Automated Driving - 01C-2 - 39
***Camila Correa-Jullian**, The B. John Garrick Institute for the Risk Sciences - UCLA (United States); Ali Mosleh, UCLA (United States); Jiaqi Ma, ()...7*

A Separable BDD-based Analytical Method for Drone Mission Reliability Analysis - 01C-3 - 5
***Junxing Ren**, University of Massachusetts Dartmouth (United States); Liudong Xing, University of Massachusetts Dartmouth (United States)...13*

LLM-Optimized Fault Tree Analysis for the Probabilistic Metric for Random Hardware Failures under ISO 26262 - 01C-4 - 17
***Atsushi SAKURAI**, FS Micro Corporation (Japan)...20*

**01E Risk Analysis and Management - 1**

Explainable AI for Obsolescence using Weak Labels - 01E-1 - 114
***Aya Mrabah**, Merem-INSTITUT SUPERIEUR DE MECANIQUE DE PARIS (ISAE-SUPMECA) (France); Elie Saad, INSTITUT SUPERIEUR DE MECANIQUE DE PARIS (ISAE-SUPMECA) (France); Marc Zolghadri, (France); Christophe Edouard, (France)...26*

METHODOLOGY FOR FORMAL INTEGRATION OF PROBABILISTIC RISK ASSESSMENT AND DECISION - 01E-2 - 195
***Suroosh Mosleh**, (United States); Katrina Groth, University of Maryland (United States)...32*

Evaluating Ignition Probability of Hydrogen Releases in Alkaline Electrolyzers - 01E-4 - 193
*Federica Tamburini, University of Bologna (Italy); **Samantha E. Wismer**, University of*

*Maryland (United States); Valerio Cozzani, University of Bologna (Italy); Katrina Groth, University of Maryland (United States)...39*

**02C Data Analytics**

Information Extraction for Discovery and Analysis in Mission Assurance - 02C-1 - 173
***Cuyler O'Brien**, MIT Lincoln Laboratory (United States)...45*

Dual-Regulator Conformal Prediction for Medical Digital-Twin Uncertainty - 02C-2 - 151
*Yuwei Zong, University of Texas at Dallas (United States); Phat Huynh, North Carolina A&T State University (United States); Jacques Kpodonu, Beth Israel Deaconess Medical Center, Harvard Medical School (United States); **Yanwen Xu**, University of Texas at Dallas (United States)...49*

Data Analytic Framework driving Diagnostics/PHM - 02C-3 - 148
***Raymond Beshears**, Raytheon, an RTX Business (United States)...56*

Gaussian Noise-Augmented Machine Learning for Reliable Friction Estimation in Bolted Joints - 02C-4 - 198
***Nehal Afifi**, IPEK-Institute of Product Engineering at Karlsruhe Institute of Technology (KIT) (Germany); Sven Matthiesen, Institute of Product Engineering (IPEK) at Karlsruhe Institute of Technology (KIT) (Germany)...61*

**02E Reliability Modeling - 1**

Deep Neural Network-Based Reliability Estimation and Optimization of Networks - 02E-1 - 157
***Risat Rimi Chowdhury**, North Carolina A&T State University (United States); Om Prakash Yadav, North Carolina A&T State University (United States); Shah M Limon, Slippery Rock University of Pennsylvania (United States); Maneesh Singh, Western Norway University of Applied Sciences (Norway)...68*

Physics-Informed Pipeline Corrosion Reliability Analysis Using Inspection Images - 02E-2 - 52
***Nikesh Kumar**, University of Arkansas (United States); Miao Tan, University of Arkansas (United States); Haitao Liao, University of Arkansas (United States)...75*

Use of Improper Prior Distribution Beta(0,0) for Bayesian Reliability Analysis - 02E-3 - 89
***Zhaofeng Carl Huang**, Aerospace Corporation (United States)...81*

Reliability Equivalent “Strength” Percentile when Fleet Usage is Random - 02E-4 - 167
***Fengbin Sun**, Tesla Inc. (United States)...87*

**03C Design Optimization Using R&M Techniques**

New reliability models for systems with clusters of degrading components - 03C-1 - 153
*Chenyu Han, Rutgers University (United States); Zhanhang Li, Rutgers University (United States);* ***David Coit****, Rutgers University (United States)...94*

Incorporation of Design for Reliability into New Product Instruction Process. - 03C-2 - 194
***Sarath Jayatilleka****, nVent (United States); James McLinn, Ops A La Carte (United States)...101*

Leveraging Agile Methodology for Risk-based Design for Safety & Reliability Plan - 03C-3 - 61
***Marwa ALI****, Schneider Electric (Egypt); Yunwei Hu, Schneider Electric (United States)...107*

A New Method for Approximating the Failure Rate of a System - 03C-4 - 57
***Masahiro Hayashi****, Electrical, Electronics and Communication Engineering, Tokyo City Univeristy (Japan)...112*

**03D Artificial Intelligence and Machine Learning - 1**

Network Reliability Enhancement Using Machine Learning and Metaheuristics - 03D-1 - 129
***Farid Hashemian****, University of Arkansas (United States); Haitao Liao, University of Arkansas (United States); Ed Pohl, University of Arkansas (United States)...118*

Artificial Intelligence-Based Cascading Failure Prediction in Power Systems - 03D-3 - 13
***Xianchao Guo****, University of Massachusetts Dartmouth (United States); Liudong Xing, University of Massachusetts Dartmouth (United States)...124*

**03E R&M Applications in Health Care**

Extended Weibull Probability Density Function (PDF) for Big Data - 03E-1 - 2
***Vinayak Hegde****, Procept-Biorobotics (United States)...131*

Grad-CAM-Enhanced Dual-Image Prompting of Multimodal LLMs for Trustworthy Brain Tumor Classification - 03E-2 - 156
*Tien Truong, University of South Florida (United States);* ***Phat Huynh****, North Carolina A&T State University (United States); Phi Huynh, International University - VNU-HCM (Vietnam); Yanwen Xu, University of Texas at Dallas (United States); Jacques Kpodonu, Beth Israel Deaconess Medical Center, Harvard Medical School (United States); Trung Le, University of South Florida/North Dakota State University (United States)...138*

Towards the Reliability of Agentic AI Models in Health Care - 03E-3 - 78
*Ikenna Okaro, Philips (Netherlands);* ***Mario Bernardi****, Philips (Netherlands); Olaf van der Burgt, Philips (Netherlands)...145*

Everything Fails For A Cause: Understanding Medical Diagnostic Error Using Reliability Engineering - 03E-4 - 8

***Alexander Franke**, Fremantle Hospital (Australia); Amro Sehly, Fiona Stanley Hospital (Australia)...151*

**04C Big Data IoT Applications in R&M (Life Data Analysis)**

Examining the Challenges of Bayesian Approach in Reliability Demonstration Test - 04C-1 - 6
***Pankaj Shrivastava**, Halliburton (United States)...156*

Maximizing prototype potential by evaluating reliability with variable runtimes - 04C-2 - 32
*Katja Bacher, (Germany); **Philipp Mell**, Institute of Machine Components, University of Stuttgart (Germany); Martin Dazer, University of Stuttgart (Germany)...161*

**04E Reliability Modeling - 2**

Novel Reliability Assessment Methodology for Defense System Acquisition - 04E-1 - 65
*Jeffrey Banks, The Pennsylvania State University Applied Research Lab (United States); Heather Beckwith, The Pennsylvania State University Applied Research Lab (United States); **Lucas Lopes**, The Pennsylvania State University Applied Research Lab (United States); Hunter Rauch, The Pennsylvania State University Applied Research Lab (United States); Aaron Spak, The Pennsylvania State University Applied Research Lab (United States); Robert Walter, The Pennsylvania State University Applied Research Lab (United States); Melinda West, The Pennsylvania State University Applied Research Lab (United States)...167*

MBSE & Digital Engineering: The Key to RMS Compliance - 04E-2 - 111
***Jordan Mills**, INTUITIVE Research and Technology Corporation (United States); Andrew Zelinka, (United States); Blake Williams, INTUTIVE Research and Technology Corp. (United States); Kayla Beth Hampton, Intuitive Research and Technology (United States)...173*

Bridging the gap between MBSE and reliability analysis - 04E-3 - 132
***Sanja Cvijic**, Charles River Analytics (United States); Scott Harrison, (United States); Stephen Marotta, Charles River Analytics (United States)...179*

Graph-Based Spatiotemporal Hotspot Detection for Cascading Power-Grid Failures - 04E-4 - 115
***Anh Le**, (United States); Phat Huynh, North Carolina A&T State University (United States); Om Prakash Yadav, North Carolina A&T State University (United States); Harun Pirim, North Dakota State University (United States); Chau Le, (United States); Trung Le, University of South Florida/North Dakota State University (United States)...185*

**05C Software Reliability (Reliable Software)**

Software Reliability and Availability Testing of a Kubernetes Cluster - 05C-1 - 112
***Myron Hecht**, Aerospace Corporation (United States)...192*

Iterative Chain-of-Thought Refinement: Self-Correcting Generative Reasoning - 05C-2 - 165 ***Tanav Thanjavuru**, Navington Technologies (United States)...198*

JIRA Improvements for Automated Reliability Analysis on Computer Ground Systems - 05C-3 - 139
***Chris Gabe**, Raytheon Technologies (United States); Jordan Long, Raytheon (United States); Tom Brockhagen, Raytheon (United States)...204*

**05E Reliability Modeling - 3**

Integrating conventional reliability prediction methodologies with AI - 05E-1 - 29
***ARAS UYSAL**, ASELSAN (Turkey); Ahmet KESEPARA, (Turkey)...210*

Reference Class Forecasting of System Reliability - 05E-2 - 110
***Harry Jones**, NASA (United States)...216*

A Sequential Surrogate Modeling Approach for the Inverse Design of Solder Joints - 05E-3 - 208
***Hao Wu**, University of Alberta (Canada)...222*

ReliaGrowR: Open Source Software for Reliability Growth Analysis - 05E-4 - 88
***Paul Govan**, GE Aerospace (United States)...228*

**06C FMEA**

Autonomous AI-Driven FMEA Optimization for Safety and Reliability in Healthcare - 06C-1 - 77
***Mario Bernardi**, Philips (Netherlands); Ikenna Okaro, Philips (Netherlands); Olaf van der Burgt, Philips (Netherlands); Michael Hicks, Philips (Netherlands)...234*

Semi-Automated FMEA with Excel, Python, and ChatGPT Integration - 06C-2 - 122
*MOHIT GAUTAM WANKHEDE, CNH industrial (India); Dinesh Junghare, CNH India Technology Center (India); **Mathew Thomas**, CNH Industrial (United States); Massimo Bianco, CNH (Italy)...240*

Build DFMEA using GenAI based on Product's requirements and Field Returns - 06C-3 - 159
***Awni Qasaimeh**, Zebra Technologies (United States); Edgar Alcantara, Zebra Technologies (Canada); Arjun Kanniah, Zebra Technologies (Canada); Fatima Irshaidat, Montclair State University (United States)...246*

AI-Augmented DFMEA: From Manual to Context-Aware Automation - 06C-4 - 117
***Yunwei Hu**, Schneider Electric (United States); Amith Nag Nichenametla, Schneider Electric (India)...252*

**06D Artificial Intelligence and Machine Learning - 2**

A Real-Time Uncertainty-Aware Digital Twin Framework for Intra-Operative Valve Surgery - 06D-2 - 155
***Phat Huynh**, North Carolina A&T State University (United States); Jacques Kpodonu, Beth Israel Deaconess Medical Center, Harvard Medical School (United States); Minh Le, Methodist Hospital (United States); Yanwen Xu, University of Texas at Dallas (United States); Om Prakash Yadav, North Carolina A&T State University (United States); Trung Le, University of South Florida/North Dakota State University (United States)...258*

Integrating Artificial Intelligence/Machine Learning (AI/ML) into FRACAS - 06D-3 - 140
***Kimberly Malone**, Raytheon Technology - Life Cycle Engineering (United States); Jordan Long, Raytheon (United States)...265*

**06E R&M Applications in Aerospace and Defense - 1**

Physics-based Reliability – Discussions and Case Studies in Aerospace - 06E-1 - 27
***Fayssal Safie**, APT Research, Inc (United States)...271*

Reliability Assessment of Spacecraft Solar Array with Varying Power Margins - 06E-2 - 158
***Wei Huang**, The Aerospace Corporation (United States)...275*

The many forms of XR in manufacturing - 06E-3 - 102
*James Cooper, Raytheon (United States); **Nick Castillo**, Raytheon (United States); Jonathan Hager, Raytheon (United States); Brent Dingle, (United States); Jason Ritacco, Raytheon (United States)...281*

**08C Economic and Life Cycle Cost Models for R&M**

Graceful Degradation's Impact on Reliability and Life Cycle Cost Estimation - 08C-1 - 177
***Ian Campbell**, Raytheon (United States); Eric Lopez, Raytheon (United States)...287*

Using Reliability Analysis to Optimize Cost and Reduce Capex - 08C-2 - 59
***Subhadip Sengupta**, (Australia); Supriyo Kar, ADNOC Offshore (United Arab Emirates)...292*

Critique of Standards to Enhance Circular Economy and Lifetime Extension - 08C-3 - 183
*Yunwei Hu, Schneider Electric (United States); **James Ezhaya**, Schneider Electric (United States); Pascal Gabeur, Schneider Electric (France); David Kidd, Schneider Electric (United States); DAVID YELLAMATI, Microsoft (United States); Yavuz Goktas, Schneider Electric*
*(United States)...298*

Predicting the Quality Defect Rate: A Stochastic Approach from Automotive Field - 08C-4 - 75
***Aziz Moudoub**, Valeo Power Asia (Japan); Marco Bonato, VALEO Power Division FRANCE (France)...305*

**08D Artificial Intelligence and Machine Learning - 3**

Interpretable Tabular Predictive Maintenance using Small Language Models - 08D-1 - 99
***Elie Saad**, INSTITUT SUPERIEUR DE MECANIQUE DE PARIS (ISAE-SUPMECA) (France); Mariem Besbes, (France); Marc Zolghadri, (France); Victor Czmil, (France)...311*

Integrating Large Language Models and Knowledge Graphs for System Diagnostics - 08D-2 - 101
***Saman Marandi**, University of Maryland (United States); Yu-Shu Hu, DML International (United States); Mohammad Modarres, University of Maryland (United States)...317*

AI-Driven Confidence Level Estimation for Reliability in ALT - 08D-3 - 3
***Vinayak Hegde**, Procept-Biorobotics (United States); Robert Carvalho, PROCEPT-BioRobotics (United States)...323*

Interactive Quality and Reliability Management using LLMs - 08D-4 - 174
***Cuyler O'Brien**, MIT Lincoln Laboratory (United States); Kevin Nam, MIT Lincoln Laboratory (United States)...329*

**08E System Safety Analysis**

SOTIF-Oriented Safety Validation Framework for Battery Diagnosis - 08E-1 - 58
***Zhiyi Xu**, Robert Bosch GmbH (Germany); Armin Köhler, Robert Bosch GmbH (Germany); Alexander Uwe Schmid, (Hungary); Martin Dazer, University of Stuttgart (Germany)...335*

PFD Calculation of Multi-Channel Safety Functions Considering the Demand Rate - 08E-2 - 209
***Armin Zimmermann**, Technische Universität Ilmenau (Germany); Andreas Hildebrandt, Pepperl+Fuchs SE (Germany)...342*

Integrated System Failure Analysis with Chemical Techniques (IS-FACT) for TRISO SiC Coating Safety - 08E-3 - 172
***Daniel Layer**, The Ohio State University (United States); Vinicius Zanardo Rodrigues, The Ohio State University (United States); Xiaoxu Diao, The Ohio State University (United States); Carol Smidts, The Ohio State University (United States)...348*

Validating Design Models for their Application in Model-based Safety Assessment - 08E-4 - 161

***Tim Gonschorek**, Otto von Guericke University Magdeburg (Germany); Wiebke Outzen, (Germany); Michael Oppermann, Airbus Operations GmbH (Germany); Frank Ortmeier, OVGU Magdeburg (Germany)...354*

**08F R&M Management**

Extending Lifetime and Enhancing Efficiency in High-Demand Environments - 08F-1 - 79
***Pascal Gabeur**, Schneider Electric (France); DAVID YELLAMATI, Microsoft (United States); Yavuz Goktas, Schneider Electric (United States); James Ezhaya, Schneider Electric (United States); David Kidd, Schneider Electric (United States); Yunwei Hu, Schneider Electric (United States)...360*

Circular Economy and Reliability: Extended Lifespan Requirements in Automotive - 08F-2 - 23
***Marco Bonato**, VALEO Power Division FRANCE (France); Aziz Moudoub, Valeo Power Asia (Japan)...366*

Reliability and Maintainability for Heavy Duty Trucks at Volvo - 08F-3 - 60
***Daniel Pires Fernandes**, Volvo Group North America (United States); Tim James, Volvo Trucks North America (United States); Eric Nordby, Volvo Trucks North America (United States)...372*

Agile Approach to Hardware Design for Reliability - 08F-4 - 30
***Andre Kleyner**, Becton, Dickinson and Co. (BD) (United States)...378*

**09C Prognostics and Health Management - 1**

SDDC-YOLO: A Diagnostic Framework for Defect Detection in Industrial Materials - 09C-1 - 144
***Mingwei Gao**, (United States); Eunkyoung Shim, North Carolina State University (United States); Mengmeng Zhu, North Carolina State University (United States)...383*

Smart Battery Management: Leveraging Prognostics for Improved System Performance - 09C-2 - 142
***Mohammad Pourgol**, Schneider Electric/University of Maryland (United States); Mohammad Pishahang, Schneider Electric (United States); Yavuz Goktas, Schneider Electric (United States); Ed Chan, Schneider Electric (United States)...389*

Innovative Sensor Placement and Features for Effective PHM in Cooling Systems - 09C-3 - 141
***Mohammad Pourgol**, Schneider Electric/University of Maryland (United States); Mohammad Pishahang, Schneider Electric (United States); Yunwei Hu, Schneider Electric (United States); Ed Chan, Schneider Electric (United States)...395*

Prognostic Health Monitoring of Hard Drives: A Machine Learning Approach Using S - 09C-4 - 31
***Ananthakrishnan Narayanan**, Lenovo Inc. (United States); Sai Vaishnavi Potluri, Lenovo (United States)...402*

**09E Fault Tree Analysis**

Dynamic Fault Tree Analysis Using Phase-Type Distribution and Model Checking - 09E-1 - 95
***Rong Pan**, Arizona State University (United States); Matthias Volk, Eindhoven University of Technology (Netherlands); Guanqi Fang, Arizona State University (United States); Falak Sher Vira, DGB Technologies LLC (United States)...409*

Fault Tree and Markov Chain-Based Reliability of Angle Grinders for Circularity - 09E-2 - 197
***Nehal Afifi**, IPEK-Institute of Product Engineering at Karlsruhe Institute of Technology (KIT) (Germany); Victor Mas, IPEK-Institute of Product Engineering at Karlsruhe Institute of Technology (KIT) (Germany); Felix Leitenberger, Institute of Product Engineering (IPEK) at Karlsruhe Institute of Technology (KIT) (Germany); Sven Matthiesen, Institute of Product Engineering (IPEK) at Karlsruhe Institute of Technology (KIT) (Germany)...415*

Using Reliability Optimization to Prevent Planetary Destruction - 09E-3 - 163
***Joseph Belland**, PHM Technology (United States); Natesan Jambulingam, NASA (United States); Jeremy Hynek, Isograph Inc. (United States)...422*

Dependencies within model-based safety analysis - 09E-4 - 176
***Vitus Lüntzel**, Karlsruhe Institute of Technology (Germany); Maximilian Beck, (Germany); Romain Pascual, MICS, Université Paris Saclay (France); Eric Sax, (Germany)...429*

**09F R&M Applications in Manufacturing**

An AOQ metric for sequential systematic sampling - 09F-1 - 41
***Kristen Gore**, Willamette University (United States); Emma Schneider, (United States)...435*

Resilient Optimization of High-risk production systems under stochastic failure - 09F-2 - 118
***Shoog Nimri**, Binghamton University (United States); Sara Kohtz, Binghamton University (United States)...440*

Production Screening Reimagined: Using HASS to Optimize Quality and Cut Costs - 09F-3 - 147
***Chris Laplante**, ESPEC (United States)...446*

Secure and Privacy-Enhanced Framework for Smart Manufacturing Systems - 09F-4 - 188
***Lukmon Rasaq**, North Carolina A & T State University (United States); Om Prakash Yadav, North Carolina A&T State University (United States); Madhuri Siddula, (United States); Joao Paulo Jacomini Prioli, North Carolina A&T State University (United States)...451*

**10C Maintenance Models and Methodologies**

Evaluation of Maintenance Strategy using the GINI Index - 10C-1 - 50
***Fahad Izhar Khan**, University of Arizona (Pakistan); Rana Yasir Ayub, Sadara Chemical Company (Saudi Arabia)...458*

Resilience Prediction: A Transformer-based Approach - 10C-2 - 130
***Fatemeh Salboukh**, University of Massachusetts Dartmouth (United States); Hesam Saki, University of Tehran (Iran); Lance Fiondella, University of Massachusetts (United States)...465*

Integrating Repair Modes into RAMS for Enhanced System Reliability - 10C-3 - 164 ***Maileth Cantillo Figueroa**, Knar Global (Colombia)...471*

Stochastic Degradation Modeling of Gear Pitting under Variable Loading Condition - 10C-4 - 166
***Maximilian Posner**, University of Stuttgart (Germany); Martin Dazer, University of Stuttgart (Germany)...476*

**10E Fault Tolerance and Safety Critical Systems**

The use of DFMEA in safety critical medical device software - 10E-1 - 76
***Jessica Ralvoni**, Philips (Netherlands); Melvin Brinkman, Philips (Netherlands); Michael Hicks, Philips (Netherlands)...482*

Smarter DFMEA for Safer Products: Introducing DDMA. - 10E-2 - 33
*Jonathan Moore, exida LLC (United States); **William Goble**, exida.com LLC (United States)...488*

SEA Methodology for Reliability Analysis of Fault-Tolerant Digital Systems - 10E-3 - 201
***Suprasad Amari**, BAE SYSTEMS (United States); Liudong Xing, Department of Electrical and Computer Engineering at the University of Massachusetts (UMass) Dartmouth (United States)...492*

An Efficient Method to Address Dynamic Component Irrelevance in Coverage Models - 10E-4 - 204
***Suprasad Amari**, BAE SYSTEMS (United States)...499*

**10F Poster Session**

HALT for Complex Products: Overcoming Testing Challenges for Reliable Results - 10F-1 - 213
*Neill Doertenbach, ESPEC North America Colorado Office (United States);* ***Jordan Melonas****, Espec North America (United States)...506*

Process and Tool for Development Assurance Level Allocation - 10F-2 - 12
***Manju Maheve****, Collins Aerospace (United States); Mamatha Surajmal, (India)...512*

Impact of Hydrogen on Risks in Natural Gas Distribution and End Use Facilities - 10F-3 - 100
***Theresa Stewart****, University of California Los Angeles (United States); Ali Mosleh, UCLA (United States)...518*

Degradation Detection in Ship Hulls Underwater Inspection through Image Analysis - 10F-4 - 135
*Gilberto Francisco Martha de Souza, Fundação de Apoio à Universidade de São Paulo CNPJ 68.314.830/0001-27 (Brazil); Edilson Gabriel Veruz, Escola Politécnica - Universidade de São Paulo (Brazil); João Francisco Oliveira Faganello, Escola Politécnica - University of São Paulo (Brazil);* ***Renan Favarão da Silva****, Escola Politécnica - Universidade de São Paulo (Brazil)...524*

Leveraging Large Language Models for Predictive Maintenance of In-House Critical Equipment - 10F-5 - 186
***Kimberly Malone****, Raytheon Technology - Life Cycle Engineering (United States); Nicole Hatten, Raytheon Technologies (United States)...530*

Adaptive Sampling Guided Multi-Surrogate Models for Thermal Runaway Propagation - 10F-6 - 207
*Yiyue Jiang, University of Illinois at Urbana-Champaign (United States); Jiayi Zhao, University of Illinois at Urbana-Champaign (United States);* ***Pingfeng Wang****, University of Illinois at Urbana-Champaign (United States)...535*

Online Algorithm for Computing Chatterjee Correlation using Quantile Sketches - 10F-7 - 211
***Michael Nisenzon****, SAS Institute (United States); Kevin Scott, SAS Institute Inc (United States); Arin Chaudhuri, SAS Institute (United States); Srikanth Patala, SAS Institute (United States)...542*

Proactive Reliability Modeling in Early Complex Medical Product Development - 10F-14 - 200
*Nishith Kumar Reddy Gorla, (United States);* ***Robinson Lawrance****, HCL America INC (United States)...549*

**11C Reliability Testing**

Optimizing Test Duration and Test Effectiveness via Failure Mode Discovery - 11C-1 - 85
*Nishith Kumar Reddy Gorla, (United States);* ***Robinson Lawrance****, HCL America INC (United States)...554*

Reliability and Performance Analysis of Ferrite Beads in Harsh Environments - 11C-2 - 63
*HSIAO-I CHEN, Moxa Inc. (Afghanistan); Vimal Kant Pandey, Moxa Inc. (Taiwan);* ***Steve Wang****, Moxa Inc. (); Henry Luo, Moxa (Taiwan); Cher Ming Tan, Chang Gung University ()...560*

Test-To-Failure Reliability Validation Test Design - 11C-3 - 25
***Jiliang Zhang****, (United States)...567*

Optimizing Reliability Testing Through a Structured Method Align with Real-World - 11C-4 - 38
***Nishith Kumar Reddy Gorla****, (United States); Robinson Lawrance, HCL America INC (United States)...573*

**11D R&M Applications in Aeropace and Defense 2**

Guidance for Governments to Manage Defence Systems Dependability - 11D -1 - 46
***Hervé du Baret de Limé****, Ministère des Armées / DGA Maîtrise de l'Information (France)...580*

Streamlining R&M MBSE: Defining Essential Data Requirements for System Models - 11D -2 - 196
***Justin Brown****, Bell Textron (United States); Galen Valentine, Bell Flight (United States)...586*

Integrating Radiation and Reliability for Holistic Space System Risk Predictions - 11D -3 - 62
***Matthew Daniels****, General Atomics Electromagnetic Systems (United States)...592*

Beyond Performance: Integrating Sustainment into Early DoD Acquisition - 11D -4 - 54
***Adam Szott****, Systecon North America (United States)...598*

**11E Human Reliability**

Application of Causal Logic Human Reliability Models to Maintenance Errors - 11E-1 - 87
***Camille Levine****, University of Maryland (United States); Katrina Groth, University of Maryland (United States)...605*

Modeling Knowledge Retention in PRA Models for Mission Critical Infrastructure - 11E-2 - 82
***Mark Ansell****, NAVSEA, NUWC Keyport (United States); Douglas Van Bossuyt, Naval Postgraduate School (United States); Nikolaos Papakonstantinou, Fortum Power and Heat Oy (Finland)...611*

Repeated Operations in Human-System Interaction: Phoenix HRA Application - 11E-3 - 113
*Tingting Cheng, UCLA (United States); Ali Mosleh, UCLA (United States);* ***Theresa Stewart****, University of California Los Angeles (United States)...618*

Event Interval Probability Explained with Healthcare Case Study - 11E-4 - 202
***Jan Smith****, PMF Series (United States)...625*

**11F Availability**

Predicting Mission Performance Considering Condition-Based Maintenance - 11F-1 - 168
***Gustaf Solveling****, Systecon North America (United States); Michael Gruell, Systecon North America (United States)...631*

Modeling Reliability of Liquid Colling Systems for Data Center Availability - 11F-2 - 134
***Sarath Jayatilleka****, nVent (United States); Jacob Speight, nVent (United States); Arun Rajendran, nVent (India)...637*

Bridging ex-ante simulation and real-time AI for system availability enhancement - 11F-3 - 20
*Luc HOSSENLOPP, Schneider Electric (France); Marcel Chevalier, Schneider Electric (France); Laurent BUCHSBAUM, Schneider Electric (France);* ***Laurence Amigues****, Schneider Electric (France)...643*

An Algorithm to Compute Birnbaum Importance for Series-Parallel System - 11F-4 - 43
***Masahiro Hayashi****, Electrical, Electronics and Communication Engineering, Tokyo City Univeristy (Japan)...651*

**12C Risk Analysis and Management - 2**

Fix-Time Estimation Model Speedup Through Cross-Validating Feature Importance - 12C-1 - 19
***Walter Church****, (United States); Marie Vans, (United States)...657*

Data-Driven Commercial AI - Reliability and Safety Solutions for Space Missions - 12C-2 - 67
***Nikhil Churi****, Utah Valley University (United States); Prince Kalia, NASA - Goddard Space Flight Center (Retired) (United States); Lynn Adams, Utah Valley University (United States); Rachael Hutchings, Utah Valley University (United States)...662*

A Dynamic Bayesian Approach for Prognostics: Application to Circuit Breakers - 12C-3 - 71
***Augustin Cathignol****, Schneider Electric (France); Jacques Kluska, Schneider Electric (France); Alex Daniel Szapiro, (Argentina); Diego ALBERTO, Schneider Electric (France)...668*

**12D Repairable Systems**

Poisson based sparing analysis with forecastability and performance evaluation - 12D-1 - 37
***myungkeun yoon**, Raytheon, An RTX Business (United States); Jaime Franqui, Raytheon (United States)...674*

Repairable systems analysis for fleet equipment using Crow Amsaa model and AI - 12D-2 - 171
***Adolfo Casilla**, CIGAM (Peru)...680*

Monitoring and modelling failure rate using the bathtub curve - 12D-3 - 189
***Harry Jones**, NASA (United States)...686*

**12E R&M and Quality Applications in Electronics Design & MFG**

Integrating FIDES and DFMEA for Smarter Component Risk Management - 12E-1 - 18
***Laurence Amigues**, Schneider Electric (France); Marc Ferrazzi, Schneider Electric (France)...690*

Using Modularity to Analyze Discriminated Circuit Cards in a Full Assembly - 12E-2 - 169
*Joshua Johnson, Raytheon (United States);* ***Jorge Guzman**, (United States)...696*

Comprehensive Testing of a Solid-State Drive for Quality and Reliability - 12E-3 - 7
***Ayswarya Rajagopalan**, Sandisk (United States)...702*

**12F Prognostics and Health Management - 2**

Application of Machine Learning Technique for Battery Bank Health Prediction - 12F-1 - 185
*Gilberto Francisco Martha de Souza, Fundação de Apoio à Universidade de São Paulo CNPJ 68.314.830/0001-27 (Brazil); José Renato Gomes de Oliveira, Programa de Educação Continuada - Escola Politécnica - University of São Paulo (Brazil); Arthur Henrique de Andrade Melani, Polytechnic School - University of São Paulo (Brazil);* ***Renan Favarão da Silva**, Escola Politécnica - Universidade de São Paulo (Brazil); Miguel Michalski, Polytechnic School - University of São Paulo (Brazil); Segura Luis Guilgerme Targão, Programa de Educação Continuada - Escola Politécnica - University of São Paulo (Brazil)...706*

Distributed Battery Prognosis with Quantized Edge Inference and Cloud Refinement - 12F-2 - 206
*Lakshmi Manoj, University of Illinois at Urbana Champaign (United States);* ***Pingfeng Wang**, University of Illinois at Urbana-Champaign (United States)...712*

A Plug-and-Play Framework for Physics-Based PHM at Scale - 12F-3 - 214
***Theo Guenais**, (United States); Iman Khorsand, Tesla (United States); Mehrdad Biglarbegian, (United States)...718*

A Plug-and-Play Framework for Physics-Based PHM at Scale - 12F-3 - 214
***Theo Guenais**, (United States); Iman Khorsand, Tesla (United States); Mehrdad Biglarbegian, (United States)...N/A*

Evaluating the Effect of Degradation Behavior on Predictive Maintenance Strategies - 12F-4 - 138
***Paula Fischer**, Institute of Machine Components - University of Stuttgart (Germany); Giuseppe Mannone, University of Stuttgart (Germany); Erich Rittmaier, Institute of Machine Components - University of Stuttgart (Germany); Martin Dazer, University of Stuttgart (Germany)...724*

**Additional Papers**

Numerical Study on the Impact of Sand Erosion on T-56 Compressor Blades with Varying Parameters
***N. A. Qattan**, King Abdulaziz University (Saudi Arabia); B. Kada, King Abdulaziz University (Saudi Arabia); A. M. Al-Bahi, King Abdulaziz University (Saudi Arabia)...731*

A Review on the Thermo-Mechanical-Chemical Coupling Effects of Water in Different States on Polymer Coatings
*Sa Wu, Beihang University (China); Huimin He, Beihang University (China)...738*

Operational Availability and Obsolescence: A Usage-Oriented Approach
***S. Karaani**, LAAS-CNRS (France); M. Zolghadri, Isae-Supmeca (France); M. Besbes, Isae-Supmeca (France); C. Baron, LAAS-CNRS (France)...744*
