

# 2006 IEEE Sensor Array and Multichannel Signal Processing Workshop Proceedings

# SAM 2006

12 – 14 July 2006  
Waltham, MA USA

*Sponsored by*  
IEEE Signal Processing Society  
IEEE Boston Section

*In co-operation with*  
Air Force Research Laboratory (AFRL)  
Defense Advanced Research Projects Agency (DARPA)  
Air Force Office of Scientific Research (AFOSR)  
Office of Naval Research (ONR)

# TABLE OF CONTENTS

## S01: Beamforming

*Chair:* Ivars Kirsteins, Naval Undersea Warfare Center, USA

1	<b>Robust Adaptive Beamforming using Variable Loading</b> .....	1
	Gu J., Harvard University, USA	
2	<b>Single-Snapshot Beamformer Performance using Large Arrays with Faulty Sensors</b> .....	6
	Kazanci O., Duke University, USA	
3	<b>Adaptive Wideband Beamforming with Robustness Against Presteering Errors</b> .....	11
	El-Keyi A., McMaster University, Canada	
4	<b>Performance Analysis of Krylov Space Adaptive Beamformers</b> .....	16
	Kirsteins I., Naval Undersea Warfare Center, USA	
5	<b>A Hierarchical Bayesian Approach to Direction Finding and Beamforming</b> .....	21
	Sirianunpiboon S., Defence Science and Technology Organisation, Australia	
6	<b>Performance Tradeoffs among Beamforming Approaches</b> .....	26
	Rong Y., University of California, USA	
7	<b>Design of Reduced-Rank MVDR Beamformers under Finite Sample-Support</b> .....	31
	Rubio F., Centre Tecnològic de Telecomunicacions de Catalunya, Spain	
8	<b>Extreme Beam Broadening using Phase Only Pattern Synthesis</b> .....	36
	Brown G., Georgia Tech Research Institute, USA	
9	<b>IMP-Based Fast Adaptive Beamforming Algorithms</b> .....	40
	Tanaka M., Keio University, Japan	

## S02: Direction-of-Arrival Estimation and Tracking

*Chair:* James Ward, MIT Lincoln Laboratory, USA

1	<b>A Wideband Kalman DOA Tracking Algorithm</b> .....	45
	Yan H., University of Cincinnati, USA	
2	<b>A Lattice Viewpoint for Direction of Arrival Estimation using Quantized Time Differences of Arrival</b> .....	50
	Pirinen T., Tampere University of Technology, Finland	
3	<b>DoA and Polarization Estimation using Arbitrary Polarimetric Array Configurations</b> .....	55
	Richter A., Helsinki University of Technology, Finland	
4	<b>Efficient and Accurate Rectangular Window Subspace Tracking</b> .....	60
	Toolan T., University of Rhode Island, USA	
5	<b>The Array Geometry Design in Airborne Microwave 2-D Direction Finding</b> .....	65
	Park C., EW Lab., Agency for Defense Development, Korea	
6	<b>Unitary Cyclic MUSIC for Direction Finding in GPS Receivers</b> .....	70
	Sahmoudi M., Villanova University, USA	

8	<b>Direction-Finding Results for a Vector Sensor Antenna on a Small UAV</b> .....	74
	Appadwedula S., MIT Lincoln Laboratory, USA	

### **S03: Applications of Multi-Sensor and Multi-Channel Processing**

*Chair:* Kristine Bell, George Mason University, USA

1	<b>Multi-Channel Detection of Narcotics and Explosives using NQR Signals</b> .....	79
	Jakobsson A., Karlstad University, Sweden	
2	<b>Programmable Processor Design for Givens Rotations based Applications</b> .....	84
	Dickson K., Queen's University Belfast, Northern Ireland	
3	<b>Imaging and Detector Framework for Seismic Landmine Detection</b> .....	88
	Alam M., Georgia Institute of Technology, USA	
4	<b>Study of the Human Eye Working Principle: An Impressive High Angular Resolution System with Simple Array Detectors</b> .....	93
	Betancourt D., Universidad Publica de Navarra, Spain	
5	<b>DSP-Based Dual-Polarity Mass Spectrum Pattern Recognition for Bio-Detection</b> .....	98
	Riot V., Lawrence Livermore National Laboratory, USA	
6	<b>Generalized Coherences Between Vector Data On Two Spacecraft</b> .....	102
	Thomson D., Queen's University, Canada	
7	<b>Blind Separation of Convolutional Mixtures using Nonstationarity and Fractional Lower Order Statistics (FLOS): Application to Audio Signals</b> .....	107
	Sahmoudi M., Villanova University, USA	
8	<b>A Probabilistic Algorithm for Meg Source Reconstruction</b> .....	111
	Zumer J., University of California, UCSF/UC Berkeley, USA	
9	<b>Wireless Sensing of Flow-Induced Vibrations for Pipeline Integrity Monitoring</b> .....	114
	Awawdeh A., Oklahoma State University, USA	
10	<b>Iterative Detection of Linear Objects in GPR and Seismic Images</b> .....	118
	Gurbuz A., Georgia Institute of Technology, USA	
11	<b>Optical Array Aspects of Computed Spectroscopy™</b> .....	122
	Hocor R., General Electric Global Research, USA	
12	<b>Multiple Window Based Ultrawideband Microwave Imaging for Early-Stage Breast Cancer Detection</b> .....	127
	Bond E., University of Wisconsin, USA	

### **S04: Sensor Array Processing I**

*Chair:* Chong Meng Samson See, DSO National Laboratory, Singapore

1	<b>Discriminating Between Stationary and Time-Varying Autoregressive (TVAR) Models in Array Processing</b> .....	132
	Abramovich Y., Defence Science & Technology Organisation (DSTO), Australia	
2	<b>Adaptive Matched Direction Detector</b> .....	137
	Besson O., ENSICA, France	
3	<b>Dynamical Systems for Principal Singular Subspace Analysis</b> .....	142
	Hasan M., University of Minnesota Duluth, USA	

4	<b>Maximum Likelihood Localization using GARCH Noise Models</b> .....	147
	Amiri H., Amirkabir University of Technology, Iran	
5	<b>Improved 2-D Root MUSIC for Non-Circular Signals</b> .....	151
	Salameh A., Florida Atlantic University, USA	
6	<b>Performance Analysis of Linear Predictive Super-Resolution Processing for Antenna Arrays</b> .....	157
	Chen H., University of Massachusetts Dartmouth, USA	
7	<b>A New Near-Field Source Localization Algorithm without Pairing Parameters</b> .....	162
	Liang J., Institute of Acoustics, Chinese Academy of Sciences, China	
8	<b>Design of Linear Sparse Antenna Arrays for Performance Improvement</b> .....	166
	Chen K., University of Electronic Science and Technology of China, China	
9	<b>Optimal Adaptive Array and Angle Tracking for Multiple Targets – A Re-examination of Optimal Array Processing</b> .....	171
	Gu H., Louisiana Tech University, USA	
10	<b>MUSIC using Off-Origin Hessians of the Second Characteristic Function</b> .....	176
	Yeredor A., Tel Aviv University, Israel	

## **S05: Sensor Array Processing II**

*Chair:* Jian Li, University of Florida, USA

1	<b>Performance Analysis of ML Estimation under Misspecified Numbers of Signals</b> .....	181
	Chung P., The University of Edinburgh, UK	
2	<b>CRB Analysis of the Impact of Unknown Receiver Noise on Phased Array Calibration</b> .....	185
	van der Tol S., Delft University of Technology, The Netherlands	
3	<b>Taylor-series Technique for Source Localization using AoAs in the Presence of Sensor Location Errors</b> .....	190
	Lu X., University of Missouri-Columbia, USA	
4	<b>On the Singular Value Manifold and Numerical Stabilization of Algorithms with Orthogonality Constraints</b> .....	195
	Douglas S., Southern Methodist University, USA	
5	<b>A Multisource Calibration Method for Phased Array Radio Telescopes</b> .....	200
	Wijnholds S., ASTRON, The Netherlands	
6	<b>Tomographic Reconstruction from Ring Arrays: A Correlative Interferometric Approach</b> .....	205
	Rao R., Rochester Institute of Technology, USA	
7	<b>Design of 2-Dimension Sparse Arrays using an Improved Genetic Algorithm</b> .....	209
	Chen K., University of Electronic Science and Technology of China, China	
10	<b>Comparing Multistatic with Monostatic Super-Resolution Array Processing Techniques: Detection of Random Targets</b> .....	214
	Ho M., Northeastern University, USA	

## **S06: MIMO Processing and Space-Time Coding**

*Chair:* Yingbo Hua, University of California-Riverside, USA

1	<b>Multiple-Pass Decision-Directed Channel Estimation for Highly Mobile MIMO Communications</b> .....	219
	Larsen M., Brigham Young University, USA	

2	<b>Block Layered Space-Time Code Design</b> .....	224
	Agrawal M., Indian Institute of Technology, Delhi, India	
3	<b>Maximum Diversity of MIMO-OFDM Schemes with Linear Equalizers</b> .....	229
	Zhang W., Georgia Institute of Technology, USA	
4	<b>Radar Waveform Design using Minimum Mean-Square Error and Mutual Information</b> .....	234
	Yang Y., Lehigh University, USA	
5	<b>Joint Source and Relay Optimization for a Non-Regenerative MIMO Relay</b> .....	239
	Fang Z., University of California, Riverside, USA	
6	<b>A Kalman Filtering Approach to Joint MIMO Channel Tracking and Symbol Decoding for Orthogonal Space-Time Block Codes</b> .....	244
	Balakumar B., McMaster University, Canada	
7	<b>MIMO Radar Space-Time Adaptive Processing for Multipath Clutter Mitigation</b> .....	249
	Mecca V., Duke University, USA	
8	<b>Utility-Based MIMO Uplink Beamforming</b> .....	254
	Duplity J., Université catholique de Louvain, Belgium	
9	<b>Adaptive Techniques for MIMO Radar</b> .....	258
	Xu L., University of Florida, USA	
10	<b>SOS-based Blind Equalization Algorithm of FIR MIMO System in Frequency Domain</b> .....	263
	Shen X., Shanghai Jaio Tong University, China	

## **S07: Special Session: A Thirty Year Survey of Performance Bounding in Signal and Array Processing**

*Chair(s):* Louis Sharf, Colorado State University, USA  
Hagit Messer, Tel Aviv University, Israel

1	<b>On the Threshold Region Mean-Squared Error Performance of Maximum-Likelihood Direction-of Arrival Estimation in the Presence of Signal Model Mismatch</b> .....	268
	Richmond C., MIT Lincoln Laboratory, USA	
2	<b>Combined Cramér-Rao/Weiss-Weinstein Bound for Tracking Target Bearing</b> .....	273
	Bell K., George Mason University, USA	
3	<b>Barankin Bounds for Target Localization by MIMO Radars</b> .....	278
	Tabrikian J., Ben-Gurion University of the Negev, Israel	
4	<b>A Survey of Time Delay Estimation Performance Bounds</b> .....	282
	Sadler B., Army Research Laboratory, USA	
5	<b>Performance Analysis of Quantifying Fluorescence of Target-Captured Microparticles from Microscopy Images</b> .....	289
	Sarder P., Washington University in St. Louis, USA	
6	<b>Fading Channel Capacity and Passive Sonar Performance Bounds</b> .....	294
	Buck J., University of Massachusetts Dartmouth, USA	
7	<b>Signal Strength Localization Bounds in Ad Hoc and Sensor Networks when Transmit Powers are Random</b> .....	299
	Patwari, N., University of Michigan, USA	
8	<b>The Hybrid Cramer-Rao Lower Bound – From Practice to Theory</b> .....	304
	Messer H., Tel Aviv University, Israel	

## **S08: Synthetic Aperture Space-Time Processing and Imaging**

*Chair:* Dan Fuhrmann, Washington University, USA

- 1 **An Optimal Baseline Design and Performance Analysis in Distributed Spaceborne SAR System** ..... 308  
Jiang Y., Harbin Institute of Technology, China
- 2 **A Synthetic Acoustic Volumetric Array** ..... 313  
Rigelsford J., University of Sheffield, United Kingdom
- 3 **Evaluation and Tuning of a SAR Detector using Sparse-Array Spotlight Mode Simulations** ..... 315  
Linnehan R., Air Force Research Laboratory, USA
- 4 **A Comparison of Back-Projection and Range Migration Algorithms for Ultra-Wideband SAR Imaging** ..... 320  
Na Y., Nanyang Technological University, Singapore
- 5 **A Novel Non-Linear Approximation to the Huygens-Fresnel Diffraction Patterns for Reconstructing Digital Holographic SAR Images** ..... 325  
Alizadeh R., K.N. Toosi University of Technology, Iran
- 6 **Analysis of the Directivity Gain of a Synthetic Aperture in Active and Passive Modes** ..... 330  
Billon D., Thales Underwater Systems, France
- 7 **Airborne Very Long Baseline Interferometry and Geolocation** ..... 334  
Carlsen E., Spectral Systems, Inc., USA
- 8 **Beam Raster Scanning for 2D Flyover SAR** ..... 339  
Burki J., Georgia Institute of Technology, USA

## **S09: Space-Time Processing for Radar I**

*Chair:* Braham Himed, Air Force Research Laboratory, USA

- 1 **Projection Techniques for Separation of Multiple Secondary Surveillance Radar Sources in a Real Environment** ..... 344  
Petrochilos N., CReSTIC, University of Reims, France
- 2 **A Generalized Formulation for Adaptive Pulse Compression of Multistatic Radar** ..... 349  
Blunt S., University of Kansas, USA
- 3 **A New Radar Detector in Unknown Signal and Clutter Environment** ..... 354  
Abbasi Bastami B., Amirkabir University of Technology, Iran
- 4 **Analyses of Autofocusing Schemes for Indoor Imaging with Unknown Walls** ..... 358  
Ahmad F., Villanova University, USA
- 5 **Polarization-Based High Resolution Radar Scatterer Classification** ..... 363  
Sprouse C., Johns Hopkins University Applied Physics Laboratory, USA
- 6 **Moving Target Localization for Indoor Imaging using Dual Frequency CW Radars** ..... 367  
Amin M., Villanova University, USA
- 7 **Link Between the Joint Diagonalisation of Symmetrical Cubes and PARAFAC: An Application to Secondary Surveillance Radar** ..... 372  
Petrochilos N., CReSTIC, University of Reims, France
- 8 **Interference Cancellation using a Single Snapshot** ..... 377  
Belkacemi H., Laboratoire des Signaux et Systèmes CNRS/Supélec, France

9	<b>Signal Waveform's Optimal Under Restriction Design for Active Sensing</b> .....	382
	Li J., University of Florida, USA	
10	<b>Advanced Optical Processor for Arbitrary Waveform Radar Imaging</b> .....	387
	Frampton K., Essex Corporation, USA	
11	<b>Distributed Coherent Aperture Measurements for Next Generation BMD Radar</b> .....	390
	Coutts S., MIT Lincoln Laboratory, USA	

## **S10: Detection and Estimation I**

*Chair:* Paul Fiore, BAE Systems, USA

1	<b>Cramér-Rao Lower Bound for Prior-Subspace Estimation</b> .....	394
	Boyer R., CNRS - Université Paris-Sud (UPS) - SUPELEC, France	
2	<b>Parametric GLRT for Multichannel Adaptive Signal Detection</b> .....	399
	Sohn K., Stevens Institute of Technology, USA	
3	<b>Probabilistically-constrained Estimation of Random Parameters with Unknown Distribution</b> .....	404
	Vorobyov S., Darmstadt University of Technology, Germany	
4	<b>Adaptive Detection of a Signal Whose Signature Belongs to a Cone</b> .....	409
	Besson O., ENSICA, France	
5	<b>A Wideband Compressive Receiver for Real-time Signal Detection</b> .....	414
	Park C., EW Lab., Agency for Defense Development, Korea	
6	<b>Blind Detection, Separation, and Location of Dense Co-Channel Emitters using Multiplatform Spatial-Coherence Restoral</b> .....	418
	Agee B., B3 Advanced Communication Systems, USA	
7	<b>Sanger's Like Systems for Generalized Principal and Minor Component Analysis</b> .....	425
	Hasan M., University of Minnesota Duluth, USA	
8	<b>The Akaike Information Criterion with Parameter Uncertainty</b> .....	430
	Seghouane A., The Australian National University, Australia	
9	<b>Novel Nonlinear Functions used for Optimal Detection in Gaussian Mixture Noise based on Maximum Entropy Densities</b> .....	435
	Saberali S., Amirkabir University of Technology, Iran	
10	<b>Constrained MMSE Estimator for Distribution Mismatch Compensation</b> .....	439
	Lederman D., Ben-Gurion University of the Negev, Israel	
11	<b>Information Theoretic Criterion for Waveform Selection</b> .....	444
	Roman, J., SAIC, USA	

## **S11: Sensor Networking and Management**

*Chair:* Antonia Papandreou-Suppapola, Arizona State University, USA

1	<b>Model for a Smart Network Monitoring a Wired Sensor Matrix</b> .....	449
	Magagni L., ARCES University of Bologna, Italy	
2	<b>Distributed Turbo-BLAST for Cooperative Wireless Networks</b> .....	452
	Zhang Y., Villanova University, USA	
3	<b>Sensor Management with Uncertain Performance Characteristics</b> .....	456
	Kolba M., Duke University, USA	

4	<b>Throughput of Large Wireless Networks on Square, Hexagonal and Triangular Grids</b> .....	461
	Hong K., University of California, USA	
5	<b>Node Density and Range Improvement in Cooperative Networks using Randomized Space-Time Block Coding with Time Synchronization Errors</b> .....	466
	Chembil Palat R., Virginia Tech, USA	
6	<b>Sensor Scheduling using a 0-1 Mixed Integer Programming Framework</b> .....	471
	Chhetri A., Arizona State University, USA	

## **S12: Detection and Estimation II**

*Chair:* Steven Smith, MIT Lincoln Laboratory, USA

1	<b>Multiple Window Bispectrum Estimator</b> .....	476
	He H., Queen's University, Canada	
2	<b>Threshold Optimization for Distributed Detection using Particle Filtering Methods</b> .....	481
	Kyriakides I., Arizona State University, USA	
3	<b>On Proposal Functions for Cost-Reference Particle Filtering</b> .....	486
	Bugallo M., Stony Brook University, USA	
4	<b>Statistical Identifiability of Multidimensional Frequency Estimation with Finite Snapshots</b> .....	491
	Liu J., University of Louisville, USA	
5	<b>A Note on the Derivation of Orthogonal Gradient Algorithm for Subspace Estimation</b> .....	496
	Bojanczyk A., Cornell University, USA	
6	<b>A Relationship Between Time-Reversal Imaging and Maximum Likelihood Scattering Estimation</b> ....	500
	Shi G., Washington University in St. Louis, USA	
7	<b>Concurrent Detection and Tracking using Multiple, Flying, Sensors</b> .....	505
	Deming R., Consultant, Anteon Corporation, USA	
8	<b>The Strong Uncorrelating Projection Approximation (SUPA) Algorithm for Decorrelating Complex Non-Circular Data</b> .....	510
	Douglas S., Southern Methodist University, USA	
9	<b>A Simplified Direct-Sequence Spread Spectrum (DSSS) Multi-User Interference Variance Estimator</b> ..	515
	Demirkiran I., Embry-Riddle Aeronautical University, USA	
10	<b>Spectral Analysis from Multi-Rate Observations: Itakura-Saito based Approximation of Power Spectra and Capon-like Spectral Envelopes</b> .....	521
	Nasiri Amini A., University of Minnesota, USA	
11	<b>Analysis of Prior-Subspace Estimation Schemes</b> .....	526
	Bouleux G., CNRS - Université Paris-Sud (UPS) - SUPELEC, France	
12	<b>Analysis of Dynamical Systems for Generalized Principal and Minor Component Extraction</b> .....	531
	Hasan M., University of Minnesota Duluth, USA	

## **S13: Space-Time Processing for Communications**

*Chair:* Ananthram Swami, Army Research Laboratory, USA

1	<b>Blind Timing Synchronization for OFDM Systems via Adaptive Beamforming</b> .....	536
	Yang K., E.E. Research Institute, Xidian University, China	
2	<b>Indoor Localization using Subspace Matching: An Experimental Evaluation</b> .....	541
	Tsuji H., National Institute of Information and Communications Technology (NICT), Japan	

3	<b>Application of 2D-Direction Locked Loop Tracking Algorithm to Mobile Satellite Communications</b> .....	546
	Gieron R., IMST GmbH, Germany	
4	<b>A Deterministic Blind Equalization Method for Multi-Modulus Signals</b> .....	551
	Neugebauer S., Booz Allen Hamilton, USA	
5	<b>Toward Bandwidth Invariance of Spatial Processing in the Non-Cooperative Receiver</b> .....	556
	Shaw A., Wright State University, USA	
6	<b>Adapting Matching Pursuit Dictionaries to Waveform Structure using Particle Filtering</b> .....	561
	Kyriakides I., Arizona State University, USA	
7	<b>Semi-Blind Source Separation for Memoryless Volterra Channels in UWB and its Uniqueness</b> .....	566
	Petrochilos N., CReSTIC, University of Reims, France	
8	<b>A Comparative Performance Investigation of Adaptive Beamformers with Iterative Weight Refinement for GSM Signal Detection</b> .....	571
	Yeon M., University of California, Santa Barbara, USA	

### **S14: Space-Time Processing for Radar II**

*Chair:* Shannon Blunt, University of Kansas, USA

1	<b>Preprocessing for Adaptive Spatial Filtering in Ground-Based Rotating Radar Systems</b> .....	576
	Oudin M., Institut National des Télécommunications, France	
2	<b>Incorporating Pulse-to-Pulse Motion Effects into Side-Looking Array Radar Models</b> .....	580
	Green J., Air Force Institute of Technology, USA	
3	<b>Progress Towards a Wideband RF Imager</b> .....	586
	Braker B., University of Colorado-Boulder, USA	
4	<b>An Approach to Active Sensor Imaging</b> .....	589
	Demirkol A., University of Missouri-Rolla, USA	
5	<b>Range-dependence Issues in Multistatic STAP-based Radar</b> .....	594
	Neyt X., Royal Military Academy of Belgium, Belgium	
6	<b>Ultra Wideband Multibeam Optical Coherent Transient Radar</b> .....	599
	Braker B., University of Colorado-Boulder, USA	
7	<b>Forward-Looking Planar Array 3D-STAP using Space Time Illumination Patterns (STIP)</b> .....	602
	Corbell P., Air Force Research Laboratory, USA	
8	<b>Large Phased Array Radar using Networked Small Parabolic Reflectors</b> .....	607
	Amoozegar F., Jet Propulsion Laboratory, USA	
9	<b>Application of the Frequency Response Matrix Method for an Extended Target</b> .....	616
	Ho M., Northeastern University, USA	
10	<b>Three Variants of an Outlier Removal Algorithm for Radar STAP</b> .....	621
	Lin F., ARCON Corporation, USA	
11	<b>Information Theoretic Measures for Through-the-Wall Surveillance</b> .....	626
	Aviyente S., Michigan State University, USA	

## **S15: Sonar and Microphone Array Processing**

**Chair:** Hongya Ge, New Jersey Institute of Technology, USA

<b>1</b>	<b>Performance of DCMP Adaptive Array Utilizing Aggregated Microphones .....</b>	<b>631</b>
	Matsumoto M., Waseda University, Japan	
<b>2</b>	<b>Rate Distortion Bounds on Passive Sonar Performance .....</b>	<b>636</b>
	Meng T., University of Massachusetts Dartmouth, USA	
<b>3</b>	<b>A Probabilistic Graphical Model for Microphone Array Source Separation using Rich Pre-Trained Source Models .....</b>	<b>641</b>
	Attias H., Golden Metallic, Inc., USA	
<b>4</b>	<b>Capacity Analysis of Ocean Channels .....</b>	<b>646</b>
	Ophir N., Tel Aviv University, Israel	
<b>5</b>	<b>Neuro-Fuzzy Model for Multi-Channel Underwater Imaging .....</b>	<b>651</b>
	Contarino V., Naval Air Systems Command Research and Engineering Group, USA	
<b>6</b>	<b>Planar Spherical Diffraction-Arrays: Linear Sound Localization Algorithms .....</b>	<b>655</b>
	Handzel A., Consultant, USA	
<b>7</b>	<b>Real-Time Implementation of a Distributed Voice Activity Detector .....</b>	<b>659</b>
	Berisha V., Arizona State University, USA	
<b>8</b>	<b>Development of a Multi-Dimensional SVD based Technique for Multi-Receiver Ultrasound used in Bone Status Characterization .....</b>	<b>663</b>
	Sasso M., Université Paris 12, Laboratoire de Mécanique Physique, France	
<b>9</b>	<b>Wide-Band Transducers and Higher-order Spectral Characterization of Low-level Ultrasounds in Wood .....</b>	<b>667</b>
	González De la Rosa J., University of Cádiz, Spain	
<b>10</b>	<b>Analysis of Source Localization in Reverberant Environments .....</b>	<b>672</b>
	Peterson M., University of Southern California, USA
