TABLE OF CONTENTS

OPENING CEREMONY

Professor Osama A. Mohammed, Florida International University, USA
General Chair, IEEE CEFC 2006
May 1, 2006
8:30 – 8:55

OPENING ORAL SESSION OA

Advances in Electromagnetic Field Modeling
May 1, 2006, Monday
8:55 – 10:10

OA1	Homogenization via Harmonic Analysis	1
	<i>Alain Bossavit</i> LGEP, France	
OA2	Calculating Static Field and Charge Distributions Using Full-Wave Boundary Element Methods.....	2
	<i>Haixin Ke and Todd Hubing</i> University of Missouri-Rolla, USA	
OA3	Numerical Analysis of Plasmon Resonances in Metallic Nanoshells With Silicon Cores	3
	<i>I. D. Mayergoyz and Zhenyu Zhang</i> University of Maryland, USA	

POSTER SESSION PA1

Static and Quasi-Static Fields I
May 1, 2006, Monday
10:30 – 12:10

PA1-1	3D Electric Calculation for a Station Class ZnO Surge Arrester for 1100kV Substation Using the Hybrid Finite Element -Analytical Approach	4
	<i>Shejiao Han¹, Shanqiang Gu², Jinliang He², Yanfeng Lu¹, and Yiping Han¹</i> ¹ Xidian University, China, ² Tsinghua University, China	
PA1-2	An Iterative Solution to FEM-BEM Algebraic Systems for Open Boundary Electrostatic Problems.....	5
	<i>G. Aiello, S. Alfonzetti, E. Dilettoso, and N. Salerno</i> Università di Catina, Italy	
PA1-3	3D Spectral Stochastic Finite Element Method in Electromagnetism.....	6
	<i>R. Gaignaire^{1,2}, S. Clénet¹, B. Sudret², and O. Moreau^{1,2}</i> ¹ LAMEL, France, ² Electricité de France, France	

PA1-4	A 3D Cell Method Formulation for Coupled Electric and Thermal Problems.....	7
	<i>Marco Bullo, Valentina D'Ambrosio, Fabrizio Dughiero, and Massimo Guarnieri</i> Università di Padova, Italy	
PA1-5	Nonlinear Analysis of Magnetic Device by Finite Difference Surface-Current Method (FDSCM).....	8
	<i>Mehdi Arehpanahi and Jafar Milimonfared</i> Amir kabir University of Technology, Iran	
PA1-6	A Boundary Integral Formulation on Unstructured Dual Grids for Eddy Current Analysis in Thin Shields.....	9
	<i>P. Alotto, M. Guarnieri, and F. Moro</i> Università di Padova, Italy	
PA1-7	A Hybrid Finite Element-Analytical Approach With Prolate Spheroids Surface Fictitious Boundary for Open Boundary Axisymmetrical Eddy Current.....	10
	<i>Shejjao Han¹, Shanqiang Gu², Jinliang He², Yanfeng Lu¹, and Yiping Han¹</i> ¹ Xidian University, China, ² Tsinghua University, China	
PA1-8	A hybrid Movement Method to Model Electrical Machines With End Winding in 3D Finite Element Method	11
	<i>Xiaodong Shi, Yvonnick Le Menach, Jean-Pierre Ducreux, and Francis Piriou</i> LAMEL, France	
PA1-9	A Magnetic Vector Potential Formulation to Deal With Dynamic Hysteresis and Induced Losses Within Two-Dimensional Models	12
	<i>O. Maloberti^{1,2}, V. Mazaucic¹, G. Meunier², A. Kedous-Lebouc², and P. Wendling^{3,1}</i> Schneider Electric, France, ² Laboratoire d' Electrotechnique, France, ³ Magsoft Corporation, USA	

POSTER SESSION PA2
Static and Quasi-Static Fields II
 May 1, 2006, Monday
 10:30 - 12:10

PA2-1	A Meshless Method for Electromagnetic Field Computation Based on the Multiquadric Technique.....	13
	<i>Frederico Guimarães, Rodney Saldanha, Renato Mesquita, David Lowther, and Jaime Ramírez</i> Federal University of Minas Gerais, Brazil, McGill University, Canada	
PA2-2	A New Variational Method in Magnetostatics for Iron Shells.....	14
	<i>Bernard Bandelier and Françoise Rioux-Damidaou</i> Université Paris XI, France	

PA2-3	A Perturbation Approach for the Modelling of Eddy Current Nondestructive Testing Problems With Differential Probes	15
	<i>Ruth V. Sabariego and Patrick Dular</i> University of Liège, Belgium	
PA2-4	A Subregion Expansion Method for Computational Electromagnetics	16
	<i>Dezhi Chen¹, K. Shao¹, X. Hu¹, D. Xie², Youguang Guo³, and J. Lavers⁴</i> ¹ Huazhong University of Science and Technology, China, ² Shenyang University of Technology, China, ³ University of Technology, Australia, ⁴ University of Toronto, Canada	
PA2-5	Acceleration of Linear-Implicit Time Integration Schemes Using Subspace Projection Techniques for Electro-Quasistatic Field Simulations	17
	<i>T. Steinmetz, G. Wimmer, and M. Clemens</i> Helmut-Schmidt-University, Germany	
PA2-6	Accuracy Investigations of Boundary Element Methods for the Solution of Laplace Equations.....	18
	<i>André Buchau, Wolfgang Hafła, and Wolfgang M. Rucker</i> University of Stuttgart, Germany	
PA2-7	Adaptive Galerkin Approach of Indirect Boundary Element Method for Calculating 3D Magnetostatic Field With Local Updating Algorithm	19
	<i>H. Y. Yu¹, J. L. He¹, J. B. Lee², S. H. Chang², and J. Zou¹</i> Tsinghua University, China, ² Korea Electrotechnology Research Institute, Korea	
PA2-8	Algebraic Multigrid for Implicit Runge-Kutta Discretizations of the Eddy Current Problem.....	20
	<i>Tim Boonen¹, Jan Van Ient¹, Herbert De Gerssem², Johan Driesen¹, and Stefan Vandewalle¹</i> ¹ K. U. Leuven, Belgium, ² T. U. Darmstadt, Germany	
PA2-9	An Efficient Harmonic Balance Method for Nonlinear Eddy Current Problems.....	21
	<i>Stefan Außerhofer, Oszkár Bíró, and Kurt Preis</i> Graz University of Technology, Austria	
PA2-10	Scattering in Photonic Crystal Devices Using the Flexible Local Approximation Method.....	22
	<i>H. Pinheiro¹, J. P. Webb¹, and I. Tsukerman²</i> ¹ McGill University, Canada, ² The University of Akron, USA	

POSTER SESSION PA3
Wave Propagation I
May 1, 2006, Monday
10:30 - 12:10

PA3-1	A H,J BEM for Printed Circuit Antennas at High Frequencies..... 23 <i>Bernard Bandelier¹, Nabil Alami², and Françoise Rioux-Damidou¹</i> ¹ Université Paris XI, France, ² ECIME, France
PA3-2	A Mesh-free Particle Method for Transient Full-Wave Simulation..... 24 <i>Guido Ala¹, Elisa Francomano², Adele Tortorici², Elena Toscano², and Fabio Viola¹</i> ¹ Elettronica delle Telecomunicazioni, Italy, ² Università degli Studi di Palermo, Italy
PA3-3	A Multigrid Algorithm for the Transfinite-Element Time-Domain Method Using the A, V Formulation..... 25 <i>Bernhard Weiß, Oszkár Bíró, Karl Hollaus, Kurt Preis, and Christian Stockreiter</i> Graz University of Technology, Austria
PA3-4	A New Method for Phase-Mode Transformation Matrix of Untransposed Bilateral Three-phase Transmission Lines..... 26 <i>Xuzheng Chai, Xidong Liang, Rong Zeng, Jinliang He, and Bo Zhang</i> Tsinghua University, China
PA3-5	A Nonconformal Volume Integral Equation for Electromagnetic Scattering from Penetrable Objects 27 <i>Nilufer Ozdemir and Jin-Fa Lee</i> The Ohio State University, USA
PA3-6	A Triangle Shape Dipole Antenna With Enhanced Pattern Stability for Wideband Phased Antenna Array Systems..... 28 <i>Abdelnasser Eldek</i> Jackson State University, USA
PA3-7	A Two-Dimensional Self-Adaptive hp Finite Element Method for the Analysis of Open Region Problems in Electromagnetics 29 <i>Ignacio Revuelto¹, Luis García-Castillo², David Pardo³, and Leszek Demkowicz³</i> ¹ Universidad Politecnica de Madrid, Spain, ² Universidad de Alcala, Spain, ³ Escuela Politecnica, Spain
PA3-8	A Wavelet Approach for the Discrimination of Buried Objects 30 <i>R. Araneo¹, S. Barmada², and F. Maradei¹</i> ¹ "La Sapienza" University of Rome, Italy, ² University of Pisa, Italy
PA3-9	A Wideband ADI-FDTD Algorithm for the Design of Double Negative Metamaterial-Based Waveguides and Antenna Substrates 31 <i>Nikolaos Kantartzis, Dimitrios Sounas, Christos Antonopoulos, and Theodoros Tsiboukis</i> Aristotle University of Thessaloniki, Greece

PA3-10	Accurate Integration of the Weakly Singular Integrals from EFIE	32
	<i>Seung Seo and Jin-Fa Lee</i> The Ohio-State University, USA	
PA3-11	An E-B Mixed FEM for First-Order Maxwell Curl Equations.....	33
	<i>Bo He and Fernando Teixeira</i> The Ohio State University, USA	
PA3-12	An Iterative Absorbing Boundary Condition Using Varying Element Orders	34
	<i>P. Paul and J. Webb</i> McGill University, Canada	
POSTER SESSION PA4 Coupled Problems I May 1, 2006, Monday 10:30 - 12:10		
PA4-1	Calculation of the Parallel Finite Plate Capacitances Using Wavelets.....	35
	<i>Aldo Artur Belardi¹, José Roberto Cardoso², and Carlos A. França Sartori²</i> ¹ Centro Universitário da FEI, Brazil, ² Escola Politécnica da Universidade de São Paulo, Brazil	
PA4-2	A Comprehensive Theory for Electromagnetic Force Formulae in Continuous Media.....	36
	<i>François Henrotte and Kay Hameyer</i> RWTH Aachen University, Germany	
PA4-3	A Coupled Electrical-Mechanical-Thermal Analysis of EHV Disconnecting Switch for Short Circuit Current Condition.....	37
	<i>Y. Oh¹, K. Song¹, W. Lee¹, and S. Hahn²</i> ¹ Korea Electrotechnology Research Institute, Korea, ² Dong-A University, Korea	
PA4-4	A Global Approach Dedicated to EMC and Energy Efficiency.....	38
	<i>Jean-Paul Gonnet¹, Vincent Mazauric¹, Nadia Maïzi², and Philippe Wendling³</i> ¹ Schneider Electric Corporate Research, France, ² Centre de Mathématiques Appliquées, France, ³ Magsoft Corporation, USA	
PA4-5	An Algorithm for Modeling Heat Flow and Quasi-Static Field Distributions in High Voltage Direct Current Power Systems	39
	<i>Jeffrey Braunstein¹, Hyang-Beom Lee², Tae-Kyung Chung¹, and Hyeong-Seok Kim¹</i> ¹ Chungang University, Korea, ² Soongsil University, Korea	
PA4-6	An Inverse Problem Methodology to Analyze Demagnetization Phenomenon in Permanent Magnet Machines	40
	<i>J. Farooq, A. Djerdir, and A. Miraoui</i> University of Technology Belfort-Monbeliard, France	

PA4-7	Analysis and Improvement of Potential Distribution of 1000-kV Metal Oxide Arrester by Combining 3D FEM and Circuit Analysis Method	41
	<i>Jinliang He, Shanqiang Gu, Bo Zhang, and Jun Hu</i> Tsinghua University, China	
PA4-8	Analysis of PWM Inverter Fed Linear Permanent Magnet Motor Using MATLAB/Simulink Coupled With FEM.....	42
	<i>Takeo Ishikawa¹, Takafumi Mogi¹, Seiji Hashimoto¹, Michio Matsunami¹, Masafumi Sakamoto², and Atsuo Nakayama²</i> ¹ Gunma University, Japan, ² Japan Servo Co. Limited, Japan	
PA4-9	Analysis of Single-Phase Line Start Permanent Magnet Motor Considering Overhang Structure Effect.....	43
	<i>Han-byul Kang¹, Se-hyun Rhyu¹, Byung-il Kwon¹, and Byung-taek Kim²</i> ¹ Hanyang University, Korea, ² Kunsan National University, Korea	
 POSTER SESSION PA5 Numerical Techniques I May 1, 2006, Monday 10:30 - 12:10 		
PA5-1	A Comparison of Point Interpolative Boundary Meshless Method Based on PBF and RBF for Transient Eddy Current Analysis.....	44
	<i>Yong Zhang¹, K. Shao¹, Youguang Guo², D. Xie³, and J. Lavers⁴</i> ¹ Huazhong University of Science & Technology, China, ² University of Technology, Australia, ³ Shenyang University of Technology, China, ⁴ University of Toronto, Canada	
PA5-2	A Decomposition Projective Method Employing a Scanning-Type Algorithm to Predict Scattering From Electrically Large Objects	45
	<i>Lianyou Sun</i> McGill University, Canada	
PA5-3	A New Proposed Method for Minimizing the Bandwidth and Skyline Storage for Triangular Finite Elements Meshes	46
	<i>Y. Boutora¹, N. Takorabet², R. Ibtouen¹, and S. Mezani³</i> ¹ LRE-ENP BP, Algeria, ² GREEN-INPL-CNRS, France, ³ GREEN-UHP-CNRS, France	
PA5-4	A Novel Algebraic Multigrid Preconditioning for Large-Scale Edge-Element Analyses	47
	<i>Takeshi Mifune, Takeshi Iwashita, and Masaaki Shimasaki</i> Kyoto University, Japan	
PA5-5	A Parallel PCG Method With Overlapping Domain Decomposition.....	48
	<i>Kota Watanabe and Hajime Igarashi</i> Hokkaido University, Japan	

PA5-6	A Wavelet-Based Algebraic Multigrid Preconditioning for Iterative Solvers in 3D Time-Harmonic Electromagnetic Edge-Based Finite Element Analysis	49
	<i>Fabio Henrique Pereira, Marcelo F. Palin, Sérgio L.L. Verardi, Viviane Silva, José Roberto Cardoso, and Silvio Nabeta</i> Universidade de São Paulo, Brazil	
PA5-7	Acceleration of Field Computations Using Graphical Processing Units	50
	<i>Matthew Inman and Atef Elsherbeni</i> University of Mississippi, USA	
PA5-8	Accuracy Improvement of Inner-Point Formula in Three-Dimensional BEM	51
	<i>Ayumu Saitoh¹ and Atsushi Kamitani²</i> ¹ YPOINT, Japan, ² Yamagata University, Japan	
PA5-9	An Algorithm for Generation of Non-uniform Meshes for Finite Difference Time Domain Simulations	52
	<i>Insung Ihm¹, Byung-Joon Chang¹, Hyeong-Seok Kim², Ha-young Lee², and Jeffrey Braunstein²</i> ¹ Sogang University, Korea, ² Chung-Ang University, Korea	
PA5-10	An Automatic Hexhedral Mesh Generation to Control Shape of Elements	53
	<i>Hiroto Fujimori, So Noguchi, and Hajime Igarashi</i> Hokkaido University, Japan	
PA5-11	An Automatic Winding Layout Technique for Permanent Magnet Machines	54
	<i>C. Hwang, S. Cheng, and M. Wu</i> Feng Chia University, Taiwan	

POSTER SESSION PA6
Optimization and Design I
May 1, 2006, Monday
10:30 - 12:10

PA6-1	Pulse Shaping Numerical Procedures for Ultra Wide Bandwidth Systems	55
	<i>Concettina Buccella, Mauro Feliziani, and Giuliano Manzi</i> ¹ Univ. of L'Aquila, Italy	
PA6-2	A Framework for Efficient Automated Optimal Design of Electromagnetic Actuators	56
	<i>Laurentiu Encica¹, Johan Paulides¹, David Echeverría², Elena Lomonova¹, and André Vandenput¹</i> ¹ Eindhoven University of Technology, The Netherlands, ² Center for Mathematics and Computer Science, The Netherlands	
PA6-3	A Global Optimization Algorithm Based on C¹ Piecewise Response Surface Patches	57
	<i>Yingying Yao¹, Chang Seop Koh², and Shiyong Yang¹</i> ¹ Zhejiang University, China, ² Chungbuk National University, Korea	

PA6-4	An Adaptive Interpolating Moving Least Squares Response Surface Model Applied to the Design Optimizations of Electromagnetic Devices.....	58
	<i>S.L. Ho¹, P.H. Ni¹, S.Y. Yang², and K.F. Wong¹</i>	
	¹ Hong Kong Polytechnic University, Hong Kong, ² Zhejiang University, China	
PA6-5	A Neural Network Tool for the Prediction of Electromagnetic Field in Urban Environment.....	59
	<i>Giacomo Capizzi, Salvatore Coco, and Antonino Laudani</i>	
	University of Catania, Italy	
PA6-6	A Neural Networks Inversion-Based Algorithm for Multiobjective Design of a High-Field Superconducting Dipole Magnet.....	60
	<i>Francesca Cau, Manuela DiMauro, Alessandra Fanni, Augusto Montisci, and Pietro Testoni</i>	
	University of Cagliari, Italy	
PA6-7	A New Tool for the Identification and Localization of Electromagnetic Sources by Using Independent Component Analysis.....	61
	<i>G. Capizzi, S. Coco, and A. Laudani</i>	
	University of Catina, Italy	

POSTER SESSION PA7
Devices and Applications I
May 1, 2006, Monday
10:30 - 12:10

PA7-1	Fast Cortical-Imaging Approach by Using BEM-LORETA Source Contracting Algorithm.....	62
	<i>J. Zou¹, J. B. Lee², and S. H. Chang²</i>	
	¹ Tsinghua University, China, ² Korea Electrotechnology Research Institute, Korea	
PA7-2	3D Finite Element Analysis of Skew and Overhang Effects in Permanent Magnet Linear Synchronous Motor.....	63
	<i>Dong-Yeup Lee¹, In-Cheol Hwang¹, Gyu-Hong Kang², and Gyu-Tak Kim¹</i>	
	¹ Changwon National University, Korea, ² Motor-Net Int. Co., Korea	
PA7-3	A Best-Fit Model of Power Losses in Cold Rolled Motor Lamination Steel Operating in a Wide Range of Frequency and Magnetization.....	64
	<i>Mircea Popescu¹ and Dan Ionel²</i>	
	¹ University of Glasgow, UK, ² A. O. Smith Corporation, USA	
PA7-4	A Fast 3D Modeling of Arrayed Eddy Current Sensor.....	65
	<i>A. Zaoui¹, M. Feliachi², V. Doirat², and M. Djennah¹</i>	
	¹ EMP, Algerie, ² IREENA-IUT, France	
PA7-5	A Fast Model to Predict the Stray Magnetic Field Created by Electrical Machines.....	66
	<i>Olivier Chadebec¹, Viet Bui¹, Laure-Line Rouve², and Jean-Louis Coulomb¹</i>	
	¹ Laboratoire d'Electrotechnique de Grenoble, France,	
	² Laboratoire de Magnétisme du Navire, France	

PA7-6	The Effect on Partial Demagnetization of Permanent Magnet Synchronous Motor for Hybrid Electric Vehicle	67
	<i>Ki-Chan Kim, Seung-Bin Lim, and Ju Lee</i> Hanyang University, Korea	
PA7-7	A Method for Dynamic Simulation and Detection of Air-gap Eccentricity in Induction Motors by Measuring Flux Density	68
	<i>Don-Ha Hwang¹, Jung-Hwang Chang¹, Dong-Sik Kang¹, Jin-Hee Lee², and Kyeong-Ho Choi³</i> ¹ Korea Electrotechnology Research Institute, Korea, ² RIST, Korea, ³ Kyungbuk College, Korea	
PA7-8	A New Electromagnetic Linear Actuator for Quick Latching	69
	<i>Jinho Kim¹ and Junghwan Chang²</i> ¹ Korea Institute of S&T Evaluation and Planning, Korea, ² Transverse Flux Machines Research Group, KERI, Korea	

POSTER SESSION PA8
Devices and Applications II
 May 1, 2006, Monday
 10:30 - 12:10

PA8-1	A Novel Transformation Technique in Analytical Field Solution of Interior Permanent Magnet Synchronous Motor (IPMSM) Including Slot and Magnet Shape Effects	70
	<i>Arash kiyoumars¹, Mehdi Moallem^{2,3}, and Babak Fahimi³</i> ¹ Isfahan University, Iran, ² Isfahan University of Technology, Iran, ³ University of Texas at Arlington, USA	
PA8-2	A Novel Transverse Flux Machine for Direct Drive Applications.....	71
	<i>Junghwan Chang, Jiwon Kim, and Dohyun Kang</i> Transverse Flux Machine Research Group, KERI, Korea	
PA8-3	FE-Based Modeling of Single Phase Distribution Transformers With Internal Winding Short Circuit Faults	72
	<i>Osama Mohammed, Zhiqiang Liu, and Shuo Liu</i> Florida International University, USA	
PA8-4	A Solenoid-type Inductor With FE-Based Soft Magnetic Thin Film for High Frequency Application.....	73
	<i>Xiao-Yu Gao¹, Wen Ding¹, Yong Zhou¹, Chong Lei¹, Ying Cao¹, and Hyung Choi²</i> ¹ Shanghai Jiao Tong university, China, ² Samsung Advanced Institute of Technology, Korea	
PA8-5	A Study on Acoustic Noise Reduction in Brushless DC Interior Permanent Magnet Motor With Concentrated Windings.....	74
	<i>Sang-Ho Lee¹, Jung-Pyo Hong¹, Ji-Young Lee², Young-Kyoun Kim³, and Jae-Young Choi³</i> ¹ Changwon National University, Korea, ² Korea Electrotechnology Research Institute, Korea, ³ Samsung Electronics Co. Ltd., Korea	

PA8-6	A Study on the Calculation and Reduction Method of Torque Ripple for Permanent Magnet Assisted Synchronous Reluctance Motor by Using the Load Angle Curves	75
	<i>Ki-Chan Kim, Joon SeonAhn, Sung HongWon, and Ju Lee</i> Hanyang University, Korea	
PA8-7	A Study on the Determination of the Object Shape in Magnetic Inductance Tomography System.....	76
	<i>GwanSoo Park and Kang Seo</i> Pusan National University, South Korea	
PA8-8	A Transformer With Adjustable Leakage Inductance.....	77
	<i>Yan Lu, Ka-Wai-Eric Cheng, Siu-Lau Ho, Jian-Fei Pan, K.F. Kwok, and X. D. Xue</i> The Hong Kong polytechnic University, Hong Kong	
PA8-9	Active Microwave Imaging Using a Deformable Mirror.....	78
	<i>Kavitha Arunachalam, Lalita Udpa, and Satish Udpa</i> Michigan State University, USA	
PA8-10	An Homogenised FEM Model to Predict the Stray Magnetic Field Created by Faulty Electrical Machines	79
	<i>Viet Bui¹, Olivier Chadebec¹, Laure-Line Rouve², and Jean-Louis Coulomb¹</i> ¹ Laboratoire d'Electrotechnique de Grenoble, France, ² Laboratoire de Magnétisme du Navire, France	

POSTER SESSION PB1
Static and Quasi-Static Fields III
May 1, 2006, Monday
13:30 - 15:10

PB1-1	An Integral Algorithm to Evaluate the Electric Fields Associated With HVDC Power Transmission Lines	80
	<i>Zhibin Zhao, Xiang Cui, Tiebing Lu, and Lin Li</i> North China Electric Power University, China	
PB1-2	3-D Finite Element Analysis of TWT Grid Electron Guns.....	81
	<i>Salvatore Coco¹, Antonino Laudani¹, Giuseppe Pollicino¹, Roberto Dionisio², and Rosario Martorana²</i> ¹ University Of Catania, Italy, ² Galileo Avionica, Italy	
PB1-3	Analysis of Foundation Grounding System Buried in a Horizontal Multilayer Soil by Means of Fictitious Conductivity Concept.....	82
	<i>Y. F. Ji¹, J. B. Lee², S. H. Chang², B. Zhang¹, J. L. He¹, and J. Zou¹</i> ¹ Tsinghua University, China, ² Korea Electrotechnology Research Institute, Korea	
PB1-4	Analysis of Rotating Magnetic Device by Surface-Current Method	83
	<i>Mehdi Arehpanahi and Jafar Milimonfared</i> Amir kabir University of technology, Iran	

PB1-5	Analysis of the Electric Field and Ion Current Density Under Ultra High-Voltage Direct-current Transmission Lines Based on Finite Element Method.....	84
	<i>Tiebing Lu, Han Feng, and Xiang Cui</i> North China Electric Power University, China	
PB1-6	Application of Homogenization Techniques to Thin-Shell Formulation	85
	<i>Oriano Bottauscio¹, Valeria Chiadò Piat², Mario Chiamp², Marco Codegone², and Alessandra Manzin¹</i> ¹ Istituto Nazionale di Ricerca Metrologica, Italy, ² Politecnico di Torino, Italy	
PB1-7	Application of Least-Squares Finite Element Method to Magnetostatic and Eddy-Current Field Problems	86
	<i>Tetsuji Matsuo¹, Hidehiro Yamamoto^{1,2}, Takehiro Tsukuda^{1,3}, and Masaaki Shimasaki¹</i> Kyoto University, Japan, ² Chubu Electric Power Co., Japan, ³ Kobe Steel Limited, Japan	
PB1-8	Applying, Canceling and Identifying the Magnetic Field Received and Emitted by a 2D Plan System.....	87
	<i>Xavier Margueron, Jean-Pierre Keradec, Tuan Anh, Olivier Chadebec, and Gérard Meunier</i> Laboratoire d'Electrotechnique de Grenoble, France	
PB1-9	ARL Electric-Field Cage Modeling, Design and Calibration.....	88
	<i>David Hull¹, Stephen Vinci¹, and Yongming Zhang²</i> ¹ US Army Research Laboratory, USA, ² Quasar Inc., USA	
PB1-10	Assessment of Appropriate Spaces for Basis Functions in FEM.....	89
	<i>Jari Kangas, Timo Tarhasaari, and Lauri Kettunen</i> Institute of Electromagnetics, Finland	

POSTER SESSION PB2
Material Modeling I
May 1, 2006, Monday
13:30 - 15:10

PB2-1	3D Magnetic Reluctivity Tensor of Soft Magnetic Composite Material	90
	<i>Y. Guo¹, J. Zhu¹, Z. Lin¹, J. Zhong¹, H. Lu¹, and S. Wang²</i> ¹ University of Technology, Australia, ² Xi'an Jiao Tong University, China	
PB2-2	A Computationally Efficient Finite Element Analysis Algorithm Considering Two-Dimensional Magnetic Properties	91
	<i>Yingying Yao¹ and Chang Seop Koh²</i> ¹ Zhejiang University, China, ² Chungbuk National University, Korea	
PB2-3	A Coupled Numerical-Experimental Analysis of Iron Core Losses in Inverter Fed Induction Motor.....	92
	<i>G. Kalokiris, P. Rovolis, A. Kladas, and J. Tegopoulos</i> National Technical University of Athens, Greece	

PB2-4	A Novel Ultrasonic Motor Using Orthogonal Bimorphs	93
	<i>Jung-Moo Seo and Jin Hur</i> Korea Electronics Technology Institute, Korea	
PB2-5	Ab-Initio Calculation of the Properties of Permalloys Used in Electrical Machines.....	94
	<i>Marco Trapanese</i> Palermo University, Italy	
PB2-6	An Energy-Based Framework for Dynamic Hysteresis	95
	<i>V. Mazauric¹, O. Maloberti^{1, 2}, G. Meunier², A. Kedous-Lebouc², O. Geoffroy³, and P. Wendling⁴</i> ¹ Schneider Electric Corporate Research, France, ² Laboratoire d'Electrotechnique de Grenoble, France, ³ Laboratoire Louis Néel, France, ⁴ Magsoft Corporation, USA	
PB2-7	Analysis and Simulation of Rotating Magnetic Field Diffusion Through a Parallelogram Hysteresis Model	96
	<i>E. Cardelli¹, S. Di Fraia², B. Tellini², and C. Zappacosta²</i> ¹ Università di Perugia, Italy, ² Università di Pisa, Italy	
PB2-8	Application of the Preisach Hysteresis Model to Computation of Behavioral Characteristics in GMR Structures	97
	<i>Vladimir Ac</i> University of Trencin, Slovakia	
PB2-9	Comparison of the Identification Methods of Preisach Model for a Grain-Oriented Electrical Steel Sheet.....	98
	<i>Chang Koh¹, Young Hwan Eum¹, Sun-ki Hong², and Pan-seok Shin³</i> ¹ Chungbuk National University, Korea, ² Hoseo University, Korea, ³ Hongik University, Korea	

POSTER SESSION PB3
Coupled Problems II
May 1, 2006, Monday
13:30 - 15:10

PB3-1	Application of Finite Elements to High Frequency Transformer Modeling	99
	<i>Osama Mohammed and Nagy Abed</i> Florida International University, USA	
PB3-2	Calculations of Eddy Current, Fluid and Thermal Fields in an Air Insulated Bus Duct System	100
	<i>S. L. Ho¹, Y. Li², X. Lin², Edward W. C. Lo¹, S. Y. Yang¹, K. W. E. Cheng¹, and K. F. Wong¹</i> ¹ The Hong Kong Polytechnic University, Hong kong, ² Shenyang University of Technology, China	

PB3-3	Comparison of Biot Savart Simulation and 3D Finite Element Simulation of the Electromagnetic Forces Acting on End Windings of Electrical Machines	101
	<i>Ki-Chan Kim and Ju Lee</i> Hanyang University, Korea	
PB3-4	Coupled Analysis Method of Electromagnetic Wave Propagation and Heat Conduction With Temperature-Dependent Nonlinear Permittivity.....	102
	<i>Yoshifumi Okamoto¹, Ryutaro Himeno¹, Kiminori Ushida¹, and Akira Ahagon²</i> ¹ The Institute of Physical and Chemical Research, Japan, ² Science Solutions International Laboratory Inc., Japan	
PB3-5	Coupled Analysis Method of Temperature, Voltage and Magnetic Field for Motors Using 3-D Finite Element Method.....	103
	<i>Tadashi Yamaguchi¹, Yoshihiro Kawase¹, Masashi Watanabe¹, Naotaka Toida¹, Kazuya Nakamura², and Eri Fukushima²</i> ¹ Gifu University, Japan, ² Namiki Precision Jewel Co. Limited, Japan	
PB3-6	Coupled Thermal and Flow Analysis for Oil-Immersed Transformers	104
	<i>P. H. Tang</i> Far East College, Taiwan	
PB3-7	Design of Multilayered Magnetostrictive/Piezoelectric Composite Materials for Tunable Microwave Applications.....	105
	<i>S. De Blasi and P. Qu��ff��lec</i> Universit�� de Bretagne Occidentale, France	
PB3-8	Dynamic Analysis Method of Two-Dimensional Linear Oscillatory Actuator Employing Finite Element Method	106
	<i>Katsuhiro Hirata¹, Tadashi Yamamoto¹, Tadashi Yamaguchi², Yoshihiro Kawase², and Yuya Hasegawa³</i> ¹ Osaka University, Japan, ² Gifu University, Japan, ³ Matsushita Electric Works, Ltd., Japan	
PB3-9	Dynamic Analysis of Electromagnetic Impact Drive Mechanism Using Eddy Current	107
	<i>Tomohiro Ota¹, Yoshio Mitsutake¹, Yuya Hasegawa¹, Katsuhiro Hirata², and Toshimitsu Tanaka²</i> ¹ Matsushita Electric Works Ltd., Japan, ² Osaka University, Japan	

POSTER SESSION PB4
Numerical Techniques II
 May 1, 2006, Monday
 13:30 – 15:10

PB4-1	An Improved Multiquadric RBF Method for 3D Electromagnetic Problems	108
	<i>Yong Zhang¹, K. Shao¹, Youguang Guo², D. Xie³, and J. Lavers⁴</i> ¹ Huazhong University of Science and Technology, China, ² University of Technology, Australia, ³ Shenyang University of Technology, China, ⁴ University of Toronto, Canada	

PB4-2	An Irregular Meshless h-p Adaptive Finite Element Analysis Formulation for High Performance Computing Environments	109
	<i>Donglin Ma and Steve McFee</i> McGill University, Canada	
PB4-3	Analysis of Synchronous Reluctance Motor Using Equivalent Magnet Circuit Considering Skew and Flux Density Harmonics Contents	110
	<i>Sol Kim¹, Seung-Bin Lim², Ki-Chan Kim², JoonSeon Ahn², and Ju Lee²</i> ¹ Yuhan College, Korea, ² Hanyang University, Korea	
PB4-4	Efficient Implementation of Non-Uniform Refinement Levels in a Geometric Multigrid Finite Element Method for Electromagnetic Waves	111
	<i>V. Hill, O. Farle, P. Ingelströem, and R. Dyczij-Edlinger</i> Saarland University, Germany	
PB4-5	Efficient Linear Solvers for Mortar Finite Element Method	112
	<i>Tetsuji Matsuo¹, Yoshinori Ohtsuki^{1,2}, and Masaaki Shimasaki¹</i> ¹ Kyoto University, Japan, ² Horiba Limited, Japan	
PB4-6	Electromagnetic Field Analysis by Using Parallel Processing Based on OpenMP	113
	<i>Norio Seshima, Motoo Tanaka, and Hajime Tsuboi</i> Fukuyama University, Japan	
PB4-7	Equivalent Rectangular Element Method for Regularized Distribution of Electromagnetic Body Force	114
	<i>Hong-Soon Choi¹, Se-Hee Lee², and Il-Han Park¹</i> ¹ Sungkyunkwan University, Korea, ² Massachusetts Institute of Technology, USA	
PB4-8	Evaluation Index of Acceleration Factor and Ordering in Shifted ICCG Method for Electromagnetic Field Analyses	115
	<i>Takeshi Iwashita, Takeshi Mifune, and Masaaki Shimasaki</i> Kyoto University, Japan	
PB4-9	FDTD Calculation of Cavity Resonant Frequencies in Case of Nonuniform Internal Magnetic Field Distribution	116
	<i>Alireza Farahani and Adalbert Konrad</i> University of Toronto, Canada	
PB4-10	Finite Element Analysis of Field Distribution and Characteristic Performance of Squirrel Cage Induction Motor With Broken Bars	117
	<i>Weili Li¹, Ying Xie¹, Jiafeng Shen¹, and Yingli Luo²</i> ¹ Harbin Institute of Technology, China, ² North China Electric Power University, China	

PB4-11	Fuzzy Logic Adaptive Mesh Refinement for 3D Nonlinear Magnetostatic Problems Using Integral Equation Method.....	118
	<i>W. Hafsa, A. Buchau, A. Bardakcioglu, C. Scheiblich, and W. Rucker</i>	
	Univerity of Stuttgart, Germany	

POSTER SESSION PB5
Optimization and Design II
May 1, 2006, Monday
13:30 - 15:10

PB5-1	A Study on the Improvement of Static Characteristic in Claw Poled Permanent Magnet Stepping Motor.....	119
	<i>Dae-Sung Jung, Seung-Bin Lim, Sung Gu Lee, and Ju Lee</i>	
	Hanyang University, Korea	

PB5-2	A Technique for Selecting an Optimal Solution from among Paret-optima of Multi-purposed Electromagnetic Apparatus Design Based on Game Theory	120
	<i>Tomoyuki Miyamoto¹, Kazufumi Kaneda¹, So Noguchi², and Hideo Yamashita³</i>	
	¹ Hiroshima University, Japan, ² Hokkaido University, Japan, ³ Hiroshima Institute of Technology, Japan	

PB5-3	Accuracy-Controlled Combined Adaption-Optimization Scheme for Finite Element Analysis of 3D Microwave Devices.....	121
	<i>D. Nair and J. Webb</i>	
	McGill University, Canada	

PB5-4	A Multi-Expression Programming Application to the Design of Planar Antennae.....	122
	<i>Jeffrey Braunstein¹, Hyeong-Seok Kim¹, Sungtek Kahng², and Sang-Hoon Ha¹</i>	
	¹ Chungang University, Korea, ² University of Incheon, Korea	

PB5-5	Design of a Harmonic Rejection Microstrip Low-Pass Filter With Defected-Ground Using Finite-Difference Time-Domain and Optimization Algorithms	123
	<i>Jeffrey Braunstein¹, Hyang-Beom Lee², Jun-Seok Park³, and Hyeong-Seok Kim¹</i>	
	¹ Chung-Ang University, Korea, ² Soongsil University, Korea, ³ Kookmin University, Korea	

PB5-6	An Improved Particle Swarm Optimization Method With Application to Multimodal Functions of Inverse Problems	124
	<i>S. Ho¹, S. Yang², G. Ni², and K. Wong¹</i>	
	¹ Hong Kong Polytechnic University, Hong Kong, ² Zhejiang University, China	

PB5-7	An Improved Simulated Annealing Algorithm for the Channel Allocation Problem in Cellular Networks	125
	<i>P. Girdinio, M. Nervi, and M. Rossi</i>	
	University of Genova, Italy	

PB5-8	An Optimization Framework Using Sequential Approximation Model and Multimodal Evolution Strategy	126
	<i>Hong-Kyu Kim¹, Chang-Hwan Im², and David Lowther³</i>	
	¹ Korea Electrotechnology Research Institute, Korea, ² Yonsei University, Korea, ³ McGill University, Canada	
PB5-9	Application of Stepwise Multiple Regression to Design Optimization of Electric Machine	127
	<i>Shimpei Sonoda, Yasuhito Takahashi, Kenji Kawagishi, Naoki Nishida, and Shinji Wakao</i>	
	Waseda University, Japan	
PB5-10	Artificial Intelligence Combined With Hybrid FEM-BE Techniques for Global Transformer Optimization	128
	<i>E. Amoiralis¹, P. Georgilakis¹, M. Tsilf², and A. Kladas²</i>	
	¹ Technical University of Crete, Greece, ² National Technical University of Athens, Greece	

POSTER SESSION PB6
Bioelectric Field Computation I
May 1, 2006, Monday
13:30 – 15:10

PB6-1	A Computational Model of Magnetic Fluid Flow Based on Maxwell's Equation and Navier-Stokes Equations.....	129
	<i>Meechai Lohakan^{1,2}, Pisuit Janchaichanakun², Siridech Boonsang¹, Chuchart Pintavirooj¹, and Manas Sangworasil¹</i>	
	¹ King Mongkut's Institute of Technology Ladkrabang, Thailand, ² King Mongkut's Institute of Technology North Bangkok, Thailand	
PB6-2	An Approach to the Electrical Resistive Tomography Based on Meshless Methods	130
	<i>Vincenzo Cutrupi¹, Fabrizio Ferraioli², Alessandro Formisano¹, and Raffaele Martone¹</i>	
	¹ Seconda Università di Napoli, Italy, ² Ansaldo Ricerche, Italy	
PB6-3	Assessment of the Performance and Sensitivity to Different Head Model Data of a New Coil Design for Field Localization During TMS.....	131
	<i>Dong-Hun Kim¹, Chulho Won², and G. Georghiou³</i>	
	¹ Kyungpook National University, Korea, ² Kyungil University, Korea, ³ University of Cyprus, Cyprus	
PB6-4	Bioelectric Activity Evaluation of Fetal Heart Muscle by Mother ECG Processing.....	132
	<i>Fabio La Foresta, Nadia Mammone, and Francesco Morabito</i>	
	Mediterranea University of Reggio Calabria, Italy	
PB6-5	Detecting Bioelectric Muscle Activity Corrupted by Superimposed Magnetic Resonance Field	133
	<i>Fabio La Foresta¹, Francesco Morabito¹, Bruno Azzerboni², and Maurizio Ipsale²</i>	
	¹ Mediterranea University of Reggio Calabria, Italy, ² University of Messina, Italy	

PB6-6	Estimation of Solution Accuracy From Leadfield in Magnetoencephalography.....	134
	<i>Chany Lee¹, Chang-Hwan Im², Kyung Choi³, and Hyun-Kyo Jung¹</i>	
	¹ Seoul National University, Korea, ² Yonsei University, Korea, ³ Kangwon National University, Korea	

PB6-7	Estimation of Brain Electrical Sources Using Multi-level Source Space Model.....	135
	<i>Kwang-Ok An¹, Chang-Hwan Im², Ki-Yong Jung³, Ji-Hwan Park⁴, and Hyun-Kyo Jung¹</i>	
	¹ Seoul National University, Korea, ² Yonsei University, Korea, ³ Sungkyungwan University, Korea, ⁴ CR Technology Co. Limited, Korea	

POSTER SESSION PB7
Devices and Applications III
 May 1, 2006, Monday
 13:30 - 15:10

PB7-1	An FE-based Physical Phase Variable Model for PM Synchronous Machines Including Dynamic Core Losses	136
	<i>Osama A. Mohammed, Shuo Liu, and Zhiqiang Liu</i>	
	Florida International University, USA	

PB7-2	An Integrated Solenoid-type Inductor With Electroplated Ni-Fe Magnetic Core	137
	<i>Xiao-Yu Gao¹, Wen Ding¹, Yong Zhou¹, Chong Lei¹, Ying Cao¹, and Hyung Choi²</i>	
	¹ Shanghai Jiao Tong university, China, ² Samsung Advanced Institute of Technology, Korea	

PB7-3	An Observation of Body Force Distributions in Electric Machines.....	138
	<i>Hong-Soon Choi¹, Joon-Ho Lee², Il-Han Park¹, and Young-Sun Kim¹</i>	
	¹ Sungkyunkwan University, Korea, ² Duke University, USA	

PB7-4	An Optimal Design of Solid Insulated Vacuum Interrupter Using Response Surface Method.....	139
	<i>J. G. Lee¹, J. H. Lee¹, J. S. Ryu¹, Y. K. Kim¹, Y. J. Shin¹, and C. S. Koh²</i>	
	¹ LS Industrial Systems, Korea, ² Chungbuk National University, Korea	

PB7-5	Analysis of a Magnetization Effect on the Sensing Signals in Magnetic Flux Leakage Type NDT.....	140
	<i>GwanSoo Park, Kang Seo, D.S. Kim, M.H. Lee, H.R. Yoo, and Y.W. Rho</i>	
	Pusan National University, Busan, South Korea	

PB7-6	Analysis of Bearing Current of the Inverter-fed Induction Motor Using Equivalent Circuit Parameters by FEM.....	141
	<i>Ji-hoon Jun¹, Byung-il Kwon¹, and Byung-taek Kim²</i>	
	¹ Hanyang University, Korea, ² Kunsan University, Korea	

PB7-7	Analysis of Flux Leakage in a Segmented Core Brushless Permanent Magnet Motor	142
	<i>Faizul Momen and Susanta Datta</i>	
	CMC Torque Systems, USA	

PB7-8	Analysis of Hysteresis Losses in Synchronous Permanent Magnet.....	143
	<i>Pierre-Daniel Pfister, Christian Koechli, Miroslav Markovic, and Yves Perriard</i> Ecole Polytechnique Fédérale de Lausanne, Switzerland	
PB7-9	Analysis of Inductance Characteristics in Interior Permanent Magnet Synchronous Motor Considering Inductance Variation.....	144
	<i>Sang-Yub Lee¹, Sang-Yeop Kwak¹, Sang-Yong Jung², Jae-Kwang Kim¹, Sun-Ki Hong³, Cheol-Gyun Lee⁴, and Hyun-Kyo Jung¹</i> ¹ Seoul National University, Korea, ² Dong-A University, Korea, ³ Hoseo University, Korea, ⁴ Dong-eui University, Korea	
PB7-10	Analysis of Magnetic Field in an Axial-Flux Permanent-Magnet Synchronous Generator Using an Analytical Method.....	145
	<i>T. Chan¹, Shuming Xie², and L. Lai³</i> ¹ The Hong Kong Polytechnic University, China, ² Shenyang University of Technology, China, ³ City University, UK	
 POSTER SESSION PB8 Devices and Applications IV May 1, 2006, Monday 13:30 – 15:10 		
PB8-1	Analysis of Thrust and Core Loss of Linear Motor With Magnetic Powder Core.....	146
	<i>Takafumi Mogi¹, Takeo Ishikawa¹, Seiji Hashimoto¹, Michio Matsunami¹, Masafumi Sakamoto², and Atsuo Nakayama²</i> ¹ Gunma University, Japan, ² Japan Servo Co. Limited, Japan	
PB8-2	Analytical Formula for the Torque/Emf Constant of a Slotless BLDC Motor	147
	<i>Miroslav Marković and Yves Perriard</i> EPFL, Switzerland	
PB8-3	Analytical Modeling of the Flux Density in Permanent Magnet Motors	148
	<i>Christian Koechli and Yves Perriard</i> Ecole Polytechnique Fédérale de Lausanne, Switzerland	
PB8-4	Anisotropy Rotor Design of Synchronous Reluctance Motor Using a Coupled FEM & Preisach Model.....	149
	<i>Rae Lee¹, Jung Lee¹, Min-Myung Lee¹, Sun Kwon¹, and Jang-Sung Chun²</i> ¹ Hanbat National University, Korea, ² TSA Co. Limited, Korea	
PB8-5	Back Propagation Neural Network Applied to Modeling of Switched Reluctance Motor.....	150
	<i>Jianbo Sun¹, Qionghua Zhan¹, Youguang Guo², and Jianguo Zhu²</i> ¹ Huazhong University of Science & Technology, China, ² University of Technology, Australia	

PB8-6	Calculation and Experiments Analysis of Switching Overvoltagein Coaxial Underground Cable Distribution Network.....	151
	<i>Zhenchong Cao¹, Xuechang Yang¹, Pengfei Yan², and Zhensheng Wu³</i>	
	<i>¹Tsinghua University, China, ²Tianji Coal Chemical Industry Group Co. Ltd., China, ³Beijing Jiaotong University, China</i>	
PB8-7	Characteristic Analysis of Single Phase SRM With Stepped rotor pole face by FEM.....	152
	<i>Jong-Han Lee, Eun-Woong Lee, and Yeon-Chan Cho</i>	
	<i>Chungnam National University, Korea</i>	
PB8-8	Characteristics Analysis and Optimization of a Novel Synchronous Permanent Magnet Planar Motor	153
	<i>Jianpei Zhou, Rui Huang, and Gyu-Tak Kim</i>	
	<i>Changwon National University, Korea</i>	
PB8-9	Characterization of Stand Alone AC Generators During No-Break Power Transfer Using AI-EM Based Approach	154
	<i>A. A. Arkadan, N. Al Aawar, and Y. Abou-Samra</i>	
	<i>Marquette University, USA</i>	
PB8-10	Comparison and Design Analysis of Pulse Transformer for HID Ballasts.....	155
	<i>Ping Dong, Ka-Wai-Eric Cheng, D.H. Wang, Siu-Lau Ho, K.F. Kwok, and X.D. Xue</i>	
	<i>The Hong Kong Polytechnic University, HongKong</i>	

ORAL SESSION OB1

Coupled Problems

May 1, 2006, Monday

15:30 - 17:10

OB1-1	Internal Short Circuit Fault Diagnosis for PM Machines Using FE-Based Phase Variable Model and Wavelet Analysis.....	156
	<i>Osama Mohammed, Shuo Liu, and Zhiqiang Liu</i>	
	<i>Florida International University, USA</i>	
OB1-2	Efficient Global and Local Force Calculations Based on Continuum Sensitivity Analysis	157
	<i>Dong-Hun Kim¹, David A. Lowther², and Jan Sykulski³</i>	
	<i>¹Kyungpook National University, Korea, ²McGill University, Canada, ³University of Southampton, UK</i>	
OB1-3	Coupled Analysis Method for Linear Oscillatory Actuator Driven by Motor.....	158
	<i>Tadashi Yamaguchi¹, Yoshihiro Kawase¹, Hiroyuki Kodama¹, Satoshi Suzuki¹, Katsuhiko Hirata², Tomohiro Ota³, and Yuya Hasegawa³</i>	
	<i>¹Gifu University, Japan, ²Osaka University, Japan, ³Matsushita Electric Works, Ltd., Japan</i>	

OB1-4	Impact of Nearby Adiabatic and Isothermal Barriers on the Thermal Characteristics of a Vertically Oriented Pot-Core Magnetic Component.....	159
	<i>Farzad Farahmand, J. Douglas Lavers, and Francis P. Dawson</i> University of Toronto, Canada	

OB1-5	A New Method to Solve the 3D Transient Electromagnetic Field-Circuit-Motion Coupled Problem	160
	<i>Zhang Yang, Bai Baodong, and Xie Dexin</i> Shenyang University of Technology, China	

ORAL SESSION OB2
Optimization and Design
May 1, 2006, Monday
15:30 - 17:10

OB2-1	A Rationale for Pursuing EIT and MREIT in 3-D Based on Weyl Asymptotics and Problem Conditioning	161
	<i>P. Robert Kotiuga</i> Boston University, USA	

OB2-2	A New Implementation of Population Based Incremental Learning Method for Optimization Studies in Electromagnetics.....	162
	<i>S. Y. Yang¹, S. L. Ho², G. Z. Ni¹, Jose. M. Machado³, and K. F. Wong²</i> ¹ Zhejiang University, China, ² Hong Kong Polytechnic University, Hong Kong, ³ Sao Paulo State University, Brazil	

OB2-3	Knowledge Acquisition From Optimization Results of Electromagnetic Systems	163
	<i>S. Ota, F. Campelo, and H. Igarashi</i> Hokkaido University, Japan	

OB2-4	Design Optimization of ALA Rotor SynRM Drives Using T-AI-EM Environment.....	164
	<i>A. A. Arkadan, A. A. Hanbali, and N. AL-Aawar</i> Marquette University, USA	

OB2-5	Optimization of Cost Functions Using Evolutionary Algorithms With Local Learning and Local Search.....	165
	<i>Frederico Guimarães¹, Felipe Campelo¹, Hajime Igarashi², David A Lowther³, and Jaime Ramírez¹</i> ¹ Federal University of Minas Gerais, Brazil, ² Hokkaido University, Japan, ³ McGill University, Canada	

ORAL SESSION OC1
Wave Propagation
May 2, 2006, Tuesday
8:30 – 10:10

OC1-1	Electromagnetic Scattering From Chiral Material Using the Finite Difference Frequency Domain Method.....	166
	<i>Lokman Kuzu¹, Veysel Demir², Atef Elsherbeni², and Ercument Arvas¹</i>	
	¹ Syracuse University, USA, ² University of Mississippi, USA	
OC1-2	Fully Coupled Multi-Hybrid FEM-PO/PTD-UTD Method for the Analysis of Scattering and Radiation Problems	167
	<i>R. Fernández-Recio¹, L. E. García-Castillo¹, I. Gomez Revuelto², and M. Salazar-Palma³</i>	
	¹ Univesidad de Alcalá, Spain, ² Universidad Politécnica de Madrid, Spain, ³ University Carlos III de Madrid, Spain	
OC1-3	3D Numerical Modeling and Circuit Extraction Techniques for the Analysis of Unshielded Twisted Pairs	168
	<i>S. Caniggia¹, A. Maffucci², F. Maradei³, F. Villone², and W. Zamboni²</i>	
	¹ EMC Consultant, Italy, ² Università di Cassino, Italy, ³ University of Rome "La Sapienza", Italy	
OC1-4	Multilevel Analysis of Electromagnetic Resonators Using Hierarchical p-Type Finite Elements.....	169
	<i>Patrick Nickel, Volker Hill, Pär Ingelström, and Romanus Dyczij-Edlinger</i>	
	Saarland University, Germany	
OC1-5	A Fourier-Based Solver for 3-D High-Frequency Surface Scattering Problems	170
	<i>Christophe Geuzaine</i>	
	Case Western Reserve University, USA	

ORAL SESSION OC2
Numerical Methods for Devices and Applications
May 2, 2006, Tuesday
8:30 – 10:10

OC2-1	Eddy Current and Loss Analysis of Multi-Steel Configuration and Validation	171
	<i>Zhiguang Cheng¹, Norio Takahasah², Sumei Yang¹, Changzai Fan¹, Mansheng Guo¹, Lanrong Liu¹, Junjie Zhang¹, and Sheng Gao¹</i>	
	¹ Baoding Tianwei Group, China, ² Okayama University, Japan	
OC2-2	A Practical Method for Building the FE-based Phase Variable Model of Single Phase Transformers for Dynamic Simulations	172
	<i>Osama Mohammed, Zhiqiang Liu, and Shuo Liu</i>	
	Florida International University, USA	

OC2-3	Calculation of the Torque on a Permanent Magnet Rotating in a Conducting Tube	173
	<i>Kurt Preis¹, Oszkár Biró¹, and Igor Tičar²</i>	
	<i>¹Graz University of Technology, Austria, ²University of Maribor, Slovenia</i>	
OC2-4	The Equivalent T Circuit of the Induction Motor: Its Nonuniqueness and Use to the Magnetic Field Analyst.....	174
	<i>Kent R. Davey</i>	
	<i>University of Texas, USA</i>	
OC2-5	Determination of Frequency Dependent Characteristics of Substation Grounding Systems by Vector Finite Element Analysis	175
	<i>Viviane Cristine Silva, José-Roberto Cardoso, Silvio-Ikuyo Nabeta, Marcelo-Facio Palin, and Fábio-Henrique Pereira</i>	
	<i>Escola Politécnica da Universidade de São Paulo, Brazil</i>	

POSTER SESSION PC1
Static and Quasi-Static Fields IV
May 2, 2006, Tuesday
10:30 - 12:10

PC1-1	BEM for Eddy-Current Analysis in Multi-Material Configurations	176
	<i>Zoran Andjelic and Jasmin Smajic</i>	
	<i>ABB Corporate Research, Switzerland</i>	
PC1-2	Calculation of Ion Flow Field Under HVDC Bipolar Transmission Lines by Integral Equation Method.....	177
	<i>Bo Zhang, Jinliang He, and Rong Zeng</i>	
	<i>Tsinghua University, China</i>	
PC1-3	Calculations of Transient Eddy Current Field and Dynamic Short Circuit Force in a Large Power Transformer	178
	<i>S.L. Ho¹, Y. Li², S.Y. Yang¹, H.C. Wong¹, and K.F. Wong</i>	
	<i>¹The Hong Kong Polytechnic University, Hong kong,</i>	
	<i>²Shenyang University of Technology, China</i>	
PC1-4	Combination Approach of FEM and Circuit System in Voltage Drop Analysis	179
	<i>Zhanghong Tang, Jiansheng Yuan, and J. Zou</i>	
	<i>Tsinghua University, China</i>	
PC1-5	Computation of 3D Magnetic Field Distribution in Long-Lifetime Electromagnetic Actuators.....	180
	<i>Sanowar Khan¹, Ming Cai¹, Kenneth Grattan¹, Kamalanathan Kajan¹, Mark Honeywood², and Stewart Mills²</i>	
	<i>¹City University, UK, ²Sortex Limited, UK</i>	
PC1-6	Computation of Land Mine Signatures Using Domain Decomposition With Lagrange Multipliers	181
	<i>Sabine Schulze and Ursula van Rienen</i>	
	<i>Rostock University, Germany</i>	

PC1-7	Computation of the Effect of Space Harmonics on the Performances of a Cage Induction Motor Using Time Harmonic and Time Stepping Methods.....	182
	<i>Noureddine Takorabet¹, Ramdane Lateb¹, Smail Mezani², Youcef Ouazir³, Farid Meibody-Tabar¹, and Rachid Ibtouen³</i>	
	¹ GREEN-INPL-CNRS, France, ² GREEN-UHP-CNRS, France, ³ LRE-ENP BP, Algeria	
PC1-8	Computation of the External Magnetic Field, Near-Field or Far-Field, from a Circular Cylindrical Magnetic Source Using Toroidal Functions.....	183
	<i>Jerry Selvaggi, S. Salon, O-Mun Kwon, and M.V.K. Chari</i>	
	Rensselaer Polytechnic Institute, USA	
PC1-9	Constitutive Matrices Using Hexahedra in a Discrete Approach for Eddy Currents	184
	<i>P. Dular¹, R. Specogna², and F. Trevisan²</i>	
	¹ Montefiore Institute, Belgium, ² Università of Udine, Italy	
PC1-10	Contradicting Source Quantities and Boundary Conditions Formalized for Quasi-Statics.....	185
	<i>Saku Suuriniemi, Jari Kangas, and Lauri Kettunen</i>	
	Tampere University of Technology, Finland	

POSTER SESSION PC2
Static and Quasi-Static Fields V
May 2, 2006, Tuesday
10:30 - 12:10

PC2-1	Design Optimization and Eddy Current Losses Analysis of Permanent Magnets in PMSM	186
	<i>Xiaoyuan Wang, Juan Li, and Peng Song</i>	
	Tianjin University, China	
PC2-2	Difference Schemes With Local Numerical Bases for Multiparticle Interactions.....	187
	<i>Jianhua Dai and Igor Tsukerman</i>	
	The University of Akron, USA	
PC2-3	Eddy Current Analysis of a Conductor With a Conductive Crack by Boundary Integral Equation Method.....	188
	<i>Kazuhisa Ishibashi and Hagino Fujita</i>	
	Tokai University, Japan	
PC2-4	Eddy Current Analysis of a Thin Metal Plate by Line Integral Equations	189
	<i>Hagino Fujita¹ and Kazuhisa Ishibashi²</i>	
	¹ Toyo Seikan Kaisha Ltd., Japan, ² Tokai University, Japan	
PC2-5	Eddy Currents Computation in Multiply Connected Domains	190
	<i>Bernard Bandelier, Fatiha Djehaf, and Françoise Rioux-Damidau</i>	
	Université Paris XI, France	

PC2-6	Effects of Coulomb Gauge Condition on Magnetic Vector Potential Formulations for Eddy Current Problems	191
	<i>Hyang-beom Lee¹, Lalita Udpa², and Satish Udpa²</i>	
	¹ Soongsil University, Korea, ² Michigan State University, USA	
PC2-7	Efficient Magnetic Field Calculation Method for Pancake Coil Using Biot-Savart Law	192
	<i>Hyang-beom Lee and Ho-jun Song</i>	
	Soongsil University, Korea	
PC2-8	Electric-Field Calculation for Hot-line Working on the Head of Transmission Tower	193
	<i>Ling Wang, Rong Zeng, Bo Zhang, Shanqiang Gu, Lin Cao, and Jinliang He</i>	
	Tsinghua University, China	
PC2-9	Electromagnetic Field Computation of Helmholtz Coils for Sensitivity Analysis of GMR Sensor	194
	<i>S. Mukhopadhyay</i>	
	Massey University, New Zealand	
PC2-10	Element-Free Galerkin Modeling of Electromagnetic Phenomena in Ferromagnetic Deformable Bodies.....	195
	<i>Alessandra Manzin</i>	
	Istituto Nazionale di Ricerca Metrologica I.N.R.I.M., Italy	

POSTER SESSION PC3

Wave Propagation II

May 2, 2006, Tuesday

10:30 - 12:10

PC3-1	Analysis and Measurements of Tapered Microstrip Patch Antennas for Mobile Communication Systems	196
	<i>Adaildo G. D'Assunção Jr., Laércio M. Mendonça, and Adaildo G. D'Assunção</i>	
	Federal University of Rio Grande do Norte, Brazil	
PC3-2	Analysis on the Radiated Emission From the DC Power-Bus by a Fast Calculation Technique.....	197
	<i>Sungtek Kahng¹, Hyeong-Seok Kim², and Jeffrey Braunstein²</i>	
	¹ University of Incheon, Korea, ² Chung-Ang University, Korea	
PC3-3	Application of CFS-PML to Finite Volume Analysis of EM Well-logging Tools in Multilayered Geophysical Formations	198
	<i>Marcela Novo^{1,2}, Luiz da Silva², and Fernando Teixeira¹</i>	
	¹ The Ohio State University, USA, ² Pontifical Catholic University, Brazil	
PC3-4	Characteristics of Evanescent Waves in the Nonstandard FDTD Method.....	199
	<i>Kenji Taguchi¹, Tadao Ohtani², Tatsuya Kashiwa¹, and Yasushi Kanai³</i>	
	¹ Kitami Institute of Technology, Japan, ² Mitsubishi Heavy Industries, Ltd., Japan, ³ Niigata Institute of Technology, Japan	
PC3-5	Classification and Prediction of Interference Pathloss Measurements Inside B-757 Using Feed Forward Neural Networks	200
	<i>Madiha Jafri¹, Jay Ely², and Linda Vahala¹</i>	
	¹ Old Dominion University, USA, ² NASA Langley Research Centre, USA	

PC3-6	Comparison of Different Integral Equations in Moment Methods Applied to Solve Scattering Problems from Bodies of Revolution	201
	<i>U. Resende, F. Moreira, O. Pereira-Filho, J. Vasconcelos, and D. Schettino</i> Federal University of Minas Gerais, Brazil	
PC3-7	Computation of Power With Vector Finite Element	202
	<i>C. Vollaire, F. Musy, and R. Perrussel</i> Ecole Centrale de Lyon, France	
PC3-8	Computing the Phase Center of Axially-Symmetric Feeds Using Finite Difference Time Domain Method of Bodies of Revolution	203
	<i>Jose Carrion and Nader Farahat</i> Polytechnic University of Puerto Rico, Puerto Rico	
PC3-9	Dispersive Analysis to a Large Chamber With a MRTD Method.....	204
	<i>Baodong Bai and Dexin Xie</i> Shenyang University of Technology, China	
PC3-10	Dyadic Green's Function for Quasi-Isotropic Generalized Soft-and-Hard Planar Surface.....	205
	<i>Binhao Jiang and Qun Wu</i> Harbin Institute of Technology, China	
PC3-11	Effects of Solar Flare to Shortwave Communication	206
	<i>Zhang Yinghui, Wang Yizhuo, and Peng Yong</i> Dalian Maritime University, China	
PC3-12	Efficient Evaluation of Singular Integrals in Moment Methods Applied to Solve Scattering Problems from Bodies of Revolution	207
	<i>U. Resende, F. Moreira, O. Pereira-Filho, J. Vasconcelos, and D. Schettino</i> Federal University of Minas Gerais, Brazil	

POSTER SESSION PC4
Material Modeling II
May 2, 2006, Tuesday
10:30 - 12:10

PC4-1	Complex Representation of Field Diffusion in Magnetic Materials Involving Saturation and Eddy Currents	208
	<i>Smail Mezani¹ and Bernard Laporte²</i> ¹ GREEN-UHP-CNRS, France, ² INPL-ENSEM, France	
PC4-2	Computation of Local Magnetization Curve from Visualized Magnetic Domain Dynamics By Bitter Method.....	209
	<i>Tadaharu Fujisaku¹, Hisashi Endo², Seiji Hayano¹, and Yoshifuru Saito¹</i> ¹ Hosei University, Japan, ² Tohoku University, Japan	
PC4-3	Dynamic Strain Model With Eddy Current Effects for Giant Magnetostrictive Transducer	210
	<i>Wenmei Huang, Bowen Wang, Shuying Cao, Ying Sun, Ling Weng, and Haiyan Chen</i> Hebei University of Technology, China	

PC4-4	FEM Approach to the Numerical Simulation of Vector Hysteresis	211
	<i>Ermanno Cardelli¹, Sebastiano Di Fraia², Antonio Faba¹, Bernardo Tellini², and Carmine Zappacosta²</i>	
	¹ Università di Perugia, Italy, ² Università di Pisa, Italy	
PC4-5	FEM Computation of Magnetic Field and Iron Loss in Laminated Iron Core Using Homogenization Method	212
	<i>Hiroyuki Kaimori¹, Akihisa Kameari¹, and Koji Fujiwara²</i>	
	¹ Science Solutions International Laboratory Inc., Japan, ² Okayama University, Japan	
PC4-6	FEM Modeling of Quench Phenomena in NbTi Coils	213
	<i>Vincenzo Cavaliere¹, Marco Cioffi¹, Alessandro Formisano², Raffaele Martone², and Giovanni Masullo¹</i>	
	¹ CRIS, Italy, ² Seconda Università di Napoli, Italy	
PC4-7	Finite Difference Time Domain Analysis of Shielding Effectiveness of Wire-Mesh Reinforcement	214
	<i>Chaoqun Jiao, Xiang Cui, Lin Li, and Zhibin Zhao</i>	
	North China Electric Power University, China	
PC4-8	Finite Element Analysis of Permanent Magnet Assembly With High Field Strength Using Preisach Theory	215
	<i>Dexin Xie, Weimin Zhang, Baodong Bai, and Linsuo Zeng</i>	
	Shenyang University of Technology, China	
PC4-9	Generalization of an Isotropic Vector Hysteresis Model Represented by the Superposition of Stop Models - Its Identification and Rotational Hysteresis Loss	216
	<i>Tetsuji Matsuo and Masaaki Shimasaki</i>	
	Kyoto University, Japan	

POSTER SESSION PC5
Software Methodology
May 2, 2006, Tuesday
10:30 - 12:10

PC5-1	A CAD Tool Enhanced Framework for Teaching Electromagnetics Topics: a Recipe for Classroom Success	217
	<i>Milica Popović and Dennis Giannacopoulos</i>	
	McGill University, Canada	
PC5-2	A Complete Open-Source Solution for Electromagnetic Field Computation	218
	<i>Christophe Geuzaine¹, Patrick Dular², and Jean-Francois Remacle³</i>	
	¹ Case Western Reserve University, USA, ² University of Liège, Belgium, ³ Catholic University of Louvain, Belgium	
PC5-3	A Finite Element Analysis System Based on World Wide Web	219
	<i>Xiao Wang¹, Shuhong Wang¹, Jie Qiu¹, Jian Guo Zhu², and Youguang Guo²</i>	
	¹ Xi'an Jiaotong University, China, ² University of Technology, Australia	

PC5-4	A Tool for Efficient Transferring of Triangular FEM Elements Through Internet	220
	<i>Sebastian Krivograd, Mladen Trlep, and Borut Žalik</i> University of Maribor, Slovenia	
PC5-5	Animated Post-Processing of Electromagnetic Results	221
	<i>O. Fabregue¹, L. Nicolas¹, R. Scorretti², and N. Burais²</i> ¹ Ecole Centrale de Lyon, France, ² Université Claude Bernard Lyon, France	
PC5-6	Efficient Pipelined Communication Design for Parallel Mesh Refinement in 3-D Finite Element Electromagnetics With Tetrahedra.....	222
	<i>DaQi Ren and Dennis Giannacopoulos</i> McGill University, Canada	
PC5-7	From General Finite Element Simulation Software to Engineering-focused Software	223
	<i>G. Lacombe^{1,2}, A. Foggia¹, Y. Maréchal^{1,3}, X. Brunotte², and P. Wendling³</i> ¹ Laboratoire d' Electrotechnique de Grenoble, France, ² Cedrat SA, France, ³ Magsoft Corporation, USA	
PC5-8	Parallel Hierarchical Tetrahedral-Octahedral Subdivision Mesh Refinement: Performance Modeling, Simulation and Validation.....	224
	<i>DaQi Ren, Timothy Park, Baruyr Mirican, and Dennis Giannacopoulos</i> McGill University, Canada	
PC5-9	Unification of Physical Data Models. Application in a Platform for Numerical Simulation: SALOME	225
	<i>Gilles David, Thierry Chevalier, and Gérard Meunier</i> Laboratoire d' Electrotechnique de Grenoble, France	

POSTER SESSION PC6
Optimization and Design III
 May 2, 2006, Tuesday
 10:30 - 12:10

PC6-1	Balancing Exploration and Exploitation Using Kriging Surrogate Models in Electromagnetic Design Optimization.....	226
	<i>G. Hawe^{1,2} and J. Sykulski¹</i> ¹ University of Southampton, UK, ² Vector Fields Limited, UK	
PC6-2	Chaotic Differential Evolution Applied to Electromagnetics Optimization	227
	<i>Leandro Coelho and Viviana Mariani</i> University of Paraná, Brazil	
PC6-3	Conformal Mapping Technique for Magnetic Saliency Analysis of Double-Layer Interior Permanent Magnet Motor	228
	<i>Liang Fang, Soon-O Kwon, Peng Zhang, and Jung-Pyo Hong</i> Changwon National University, Korea	

PC6-4	Dealing With Model Errors in Approximation Model-Based Optimization	229
	<i>Linda Wang and David Lowther</i> McGill University, Canada	
PC6-5	An Efficient Multiobjective Optimizer Based on Genetic Algorithm and Approximation Technique for Electromagnetic Designs	230
	<i>S. Ho¹, S. Yang², G. Ni², and K. Wong¹</i> ¹ Hong Kong Polytechnic University, Hong Kong, ² Zhejiang University, China	
PC6-6	Design of Broadband Yagi-Uda Antennas Using the Cone of Efficient Directions Algorithm and the Multiobjective Line Search.....	231
	<i>D. Vieira, A. Lisboa, J. Vasconcelos, R. Saldanha, and R. Takahashi</i> Federal University of Minas Gerais, Brazil	
PC6-7	Design of Dielectric Waveguide Filter Using Topology Optimization Technique	232
	<i>Jin-Kyu Byun¹ and Il-han Park²</i> ¹ Electronics and Telecommunications Research Institute, Korea, ² Sungkyunkwan University, Korea	
PC6-8	Design of Inductors Using Efficiently-Calculated Sensitivities of the Admittance Matrix.....	233
	<i>J. Atalaya¹, P. Jacobsson¹, Y. Q. Liu¹, T. Rylander¹, and E. Salinas²</i> ¹ Chalmers University of Technology, Sweden, ² London South Bank University, UK	
PC6-9	Design Optimization for Cogging Torque Minimization of a High-speed 2-Pole IPM Machine	234
	<i>C. Hwang and T. Lin</i> Feng Chia University, Taiwan	
PC6-10	Differential Evolution Strategy for Constrained Global Optimization and Application to Practical Engineering Problems.....	235
	<i>Hong-Kyu Kim¹, Jin-Kyo Chong¹, and David Lowther²</i> ¹ Korea Electrotechnology Research Institute, Korea, ² McGill University, Canada	

POSTER SESSION PC7
Devices and Applications V
May 2, 2006, Tuesday
10:30 - 12:10

PC7-1	Comparison of the Iron Loss of a Flux-reversal Machine Under Four Different PWM Modes	236
	<i>Tae Heoung Kim¹, Heung-Kyo Shin¹, Hwi-Beom Shin¹, Soon-Young Lee¹, and Ju Lee²</i> ¹ Gyeongsang National University, Korea, ² Hanyang University, Korea	

PC7-2	Design of a New Linear Magnetic Damper for Shock-Absorbing From Crash Accident of High Speed Vehicles.....	237
	<i>Yongdae Kim, Heon Lee, Semyung Wang, and Kyihwan Park</i> Gwangju Institute of Science and Technology, Korea	
PC7-3	Design of Flux Barrier for Reducing Torque Ripple and Cogging Torque in IPM type BLDC motor	238
	<i>Byoung-Yull Yang¹, Hyun-Kag Park², and Byung-Il Kwon²</i> ¹ Samsung Electronics, Korea, ² Hanyang University, Korea	
PC7-4	Design of Permanent Magnet DC Motor Using FEA –Based Optimization and Parallel Computing Method	239
	<i>Cheol-Gyun Lee¹, Myung-Soo Cho¹, Sang-Yong Jung², Sung-Chin Hahn², Hae-Ryong Choi³, Jae-Kwang Kim⁴, and Hyun-Kyo Jung⁴</i> ¹ Dong-Eui University, Korea, ² Dong-A University, Korea, ³ Design Center Hyundai Motor Company, Korea, ⁴ Seoul National University, Korea	
PC7-5	Design of the Rotary Magnetic Position Sensor With the Sinusoidally Magnetized Permanent Magnet.....	240
	<i>Seung-ho Jeong, Se-hyun Rhyu, and Byung-il Kwon</i> Hanyang University, Korea	
PC7-6	Design of the Starting Device Installed in the Single-Phase Switched Reluctance Motor.....	241
	<i>Jun-Ho Kim¹, Eun-Woong Lee², and Jong-Han Lee²</i> ¹ LS Industrial Systems, Korea, ² ChungNam Nat'l University, Korea	
PC7-7	Design Technique of Magnetic Suspension for Vibration Free Table.....	242
	<i>Jae-Woo Jung¹, Sung-Il Kim¹, Jung-Pyo Hong², Ji-Young Lee², and Ju-Hoon Lee²</i> ¹ Changwon National University, Korea, ² Korea Electrotechnology Research Institute, Korea	
PC7-8	Development and Analysis of a New Type of Switchgear for High Voltage Gas Circuit Breaker: Electromagnetic Force Driving Actuator.....	243
	<i>Jong-Ho Kang¹, Sang-Hun Park¹, Woo-Young Lee², Hong-Kyu Kim², Wang-Byuck Suh³, Won-Seok Kim³, and Hyun-Kyo Jung¹</i> ¹ Seoul National University, Korea, ² Korea Electrotechnology Research Institute, Korea, ³ ILJIN Electric Co., Ltd, Korea	

POSTER SESSION PC8
Devices and Applications VI
May 2, 2006, Tuesday
10:30 – 12:10

PC8-1	Dynamic Analysis of Linear Synchronous Machines.....	244
	<i>H. Yu¹, W. Dai¹, S. Ho², M.Q. Hu¹, S. Yang², K. Cheng², and K.F. Wong²</i> ¹ Southeast University, China, ² Hong Kong Polytechnic University, Hong Kong	

PC8-2	Dynamic Characteristic Analysis of Small Sized PM Type Stepping Motor With H Shape Stator Yoke	245
	<i>Se-hyun Rhyu^{1,2}, Byung-il Kwon¹, and In-Soung Jung²</i>	
	¹ Hanyang University, Korea, ² Korea Electronics Technology Institute, Korea	
PC8-3	Dynamic Characteristics Analysis of 3D Conveyer System Linear Induction Motor for Control Algorithm Developments	246
	<i>Sujin Jeon, Seongjune Park, and Jungho Lee</i>	
	Hanbat National University, Korea	
PC8-4	ECT Characterization of the Extent of Minute Cracks Using a Database Based Inversion Procedure	247
	<i>S. Rapacchi¹, Y. Bihan¹, J. Pávó², and C. Marchand¹</i>	
	¹ Laboratoire de Génie Electrique de Paris, France,	
	² Budapest University of Technology and Economics, Hungary	
PC8-5	Eddy Current Loss Calculation by Rapid Process in Solid and Laminated Cores of Transverse Flux Linear Motor	248
	<i>Ji-Young Lee¹, Jung-Hwan Chang¹, Do-Hyun Kang¹, Sung-Il Kim², and Jung-Pyo Hong²</i>	
	¹ Korea Electrotechnology Research Institute, Korea, ² Changwon National University, Korea	
PC8-6	Eddy Current NDT for Anisotropic Composites	249
	<i>Vincent Doirat, Javad Fouladgar, Gérard Berthiau, and Samir Bensaid</i>	
	IREENA, France	
PC8-7	Eddy-Current Type Proximity Sensor With Closed Magnetic Circuit Geometry	250
	<i>Koichi Koibuchi¹, Koichiro Sawa¹, Takashi Honma², Takumi Hayashi², Kuniyoshi Ueda², and Hiroshi Sasaki²</i>	
	¹ KEIO University, Japan, ² Yamatake Corporation, Japan	
PC8-8	Effect of the Magnetic Dipole-Dipole Interaction on the Capture Efficiency in Open Gradient Magnetic Separation.....	251
	<i>R. Mehasni¹, MEH. Latreche¹, M. Feliachi², and M. Louaayou²</i>	
	¹ Constantine University, Algeria, ² Nantes University, France	
PC8-9	Electromagnetic Stimulation in NDT Thermography	252
	<i>M. Louaayou, J. Fouladgar, T. Saidi, and G. Berthiau</i>	
	Boulevard de l'université, France	

POSTER SESSION PD1
Static and Quasi-Static Fields VI
 May 2, 2006, Tuesday
 13:30 - 15:10

PD1-1	Evaluation of Electromagnetic and Magnetic Shielding Configurations Related to Large Power Transformers	253
	<i>Sumei Yang¹, Zhiguang Cheng², Norio Takahashi³, Qingxin Yang¹, and Xiaoquan Zhu¹</i> ¹ Hebei University of Technology, China, ² R&D Center, Baoding Tianwei Group, China, ³ Okayama University, Japan	
PD1-2	Evaluation of the Magnetic Field in a Permanent Magnet-Type Linear Motor	254
	<i>Aly Filho¹ and Marilia da Silveira²</i> ¹ Federal University of Rio Grande do Sul, Brazil, ² Lutheran University of Brazil, Brazil	
PD1-3	Fast BEM for Eddy-Current Problems Using H-matrices and ACA	255
	<i>Jasmin Smajic¹, Zoran Andjelic¹, and Mario Bebendorf²</i> ¹ ABB Switzerland Limited, Switzerland, ² University in Leipzig, Germany	
PD1-4	3D FEM Analysis of Electromagnetic Inspection of Outer Side Defects on Steel Tube Using Inner Coil.....	256
	<i>Yuji Gotoh¹ and Norio Takahashi²</i> ¹ Kurume National College of Technology, Japan, ² Okayama University, Japan	
PD1-5	FE-Based Equivalent Circuits for Simulating Transformer Internal Faults	257
	<i>Guanzhong Hu, Yingying Yao, Guangzheng Ni, Shiyong Yang, and Junpeng Xie</i> Zhejiang University, China	
PD1-6	FEM-Simulation of Electric Currents in a Galvanic Cell With Superimposed AC Voltage	258
	<i>Arne Nysveen¹, Martin Høyer-Hansen¹, and Jens Lervik²</i> ¹ NTNU, Norway, ² SINTEF Energy Research, Norway	
PD1-7	Grounding Performance Analysis of the Substation Grounding Grids by Finite Element Method in Frequency Domain.....	259
	<i>Lei Qi, Xiang Cui, Zhibin Zhao, and Huiqi Li</i> North China Electric Power University, China	
PD1-8	High Frequency Proximity Losses Determination for Rectangular Cross Section Conductors.....	260
	<i>Anh-Tuan Phung, Olivier Chadabec, Gérard Meunier, Xavier Margueron, and Jean-Pierre Keradec</i> Laboratoire d' Electrotechnique de Grenoble, France	
PD1-9	Inductance Calculation of Large Salient-Pole Synchronous Generator With Air-Gap Eccentricity	261
	<i>Jiahui Zhu and Arui Qiu</i> Tsinghua University, China	

PD1-10	Influence of Coke Bed on HVDC Grounding Electrode in Multilayer Soil	262
	<i>Fan Chen, Bo Zhang, Jinliang He, Shanqiang Gu, and Lin Cao</i>	
	Tsinghua University, China	

POSTER SESSION PD2
Wave Propagation III
May 2, 2006, Tuesday
13:30 - 15:10

PD2-1	Efficient Expression of Electromagnetic Fields of Lightning Return Stroke Current.....	263
	<i>Qun Wu and Bin-Hao Jiang</i>	
	Harbin Institute of Technology, China	
PD2-2	Efficient Ray Tracing for Radio Channel Characterization of Urban Scenarios	264
	<i>Daniela Schettino, Fernando Moreira, and Cassio Rego</i>	
	Federal University of Minas Gerais, Brazil	
PD2-3	Element-Free Galerkin Method in Modeling Microwave Inspection of Civil Structures	265
	<i>Zhiwei Zeng, Kavitha Arunachalam, Chuan Lu, Balasubramaniam Shanker, and Lalita Udpa</i>	
	Michigan State University, USA	
PD2-4	EMC Analysis of High-Speed on-Chip Interconnects via a Mixed Quasi-Static Finite Difference–FEM Technique	266
	<i>Traianos Yioultsis¹, Theodoros Kosmanis¹, Ioannis Rekanos², and Theodoros Tsiboukis¹</i>	
	¹ Aristotle University of Thessaloniki, Greece, ² Technological Educational Institute of Serres, Greece	
PD2-5	Fast Analysis of a Broad Band Microwave Rectenna Using 3D FEM and Padé Approximation.....	267
	<i>Brahim Essakhi¹, Lionel Pichon¹, and Gilles Akoun²</i>	
	¹ Laboratoire de Génie Electrique de Paris, France, ² European Aeronautic Defence and Space - Common Research Center, France	
PD2-6	FDTD Sub-Cell Modeling of the Inner Conductor of the Coaxial Feed: Accuracy and Convergence Analysis	268
	<i>Amir Hajiaboli and Milica Popović</i>	
	McGill University, Canada	
PD2-7	Heuristic TD-UTD Coefficients for the Transient Analysis of Diffraction by Lossy Conducting Wedges	269
	<i>Daniela Schettino, Fernando Moreira, and Cássio Rego</i>	
	Federal University of Minas Gerais, Brazil	

PD2-8	Mesh Generation for the Simulation of PPF in PCBs and ICs Analysis	270
	<i>Zhanghong Tang, Tao Su, Jiayuan Fang, Jun Zou, and Jiansheng Yuan</i> Tsinghua University, China	
PD2-9	Novel Heuristic UTD Coefficient for the Characterization of Radio Channels.....	271
	<i>Daniela Schettino, Fernando Moreira, Kleber Borges, and Cássio Rego</i> Federal University of Minas Gerais, Brazil	
PD2-10	Numerical Evaluation of Electromagnetic Fields in the Presence of Non-ferromagnetic Plates	272
	<i>Qi-Bin Zhou and Y. Du</i> The Hongkong Polytechnic University, Hong Kong	
PD2-11	Numerical Validation of Smallest Singular Value Estimation Techniques Applied to Localization of EFIE Interior Resonances.	273
	<i>Giovanni Angiulli and Renato Eportentosi</i> DIMET, Univ. Mediterranea, Italy	

POSTER SESSION PD3
Coupled Problems III
May 2, 2006, Tuesday
13:30 - 15:10

PD3-1	3-D Finite Element Poisson-Nernst-Planck Model for the Analysis of Ion Transport Across Ionic Channels.....	274
	<i>Salvatore Coco, Daniela Gazzo, Antonino Laudani, and Giuseppe Pollicino</i> University of Catania, Italy	
PD3-2	Electromagnetic Model in Finite Volume for Magnetohydrodynamic Breaking Applications	275
	<i>Loïc Rondot^{1,2}, Vincent Mazaucic¹, Yves Delannoy², and Gerard Meunier³</i> ¹ Schneider Electric Corporate Research, France, ² MADYLAM-EPM INPG/UJF-CNRS, France, ³ Laboratoire d' Electrotechnique de Grenoble, France	
PD3-3	Evaluation of Electromagnetic Radiative Noise Magnetostrictively Coupled to Elastic Vibrations in Steel Pipes	276
	<i>Martin Sablik¹, Gary Burkhardt¹, and John Casey²</i> ¹ Southwest Research Institute, USA, ² Naval Undersea Warfare Center, USA	
PD3-4	Experiments and Calculations for Magnetostrictive Thin Film Actuator	277
	<i>Haiyan Chen, Qingxin Yang, Suzhen Liu, Wenrong Yang, Rongge Yan, and Weili Yan</i> Hebei University of Technology, China	
PD3-5	Field and Circuit Modeling of Rotor Eccentricity Effects in Surface Permanent Magnet Generator	278
	<i>A. Haniotis, N. Thivet, E. Jonnet, and A. Kladas</i> National Technical University of Athens, Greece	

PD3-6	Field Oriented Linear Induction Motor Drives: an Electromagnetic Perspective.....	279
	<i>Haidong Yu, Ranjit Jayabalan, Babak Fahimi, and Mehdi Moallem</i> University of Texas at Arlington, USA	
PD3-7	Finite Element Analysis of Corona Discharge Onset in Air With Artificial Diffusion Scheme and Under Fowler-Nordheim Electron Emission Condition	280
	<i>Se-Hee Lee¹, Se-Yeon Lee², and Il-Han Park^{1,2}</i> ¹ Massachusetts Institute of Technology, USA, ² Sungkyunkwan University, Korea	
PD3-8	Finite Volume Method for the Coupled Equations in Electromagnetic Centrifugal Casting.....	281
	<i>Jinming Wang and Dexin Xie</i> Shenyang University of Technology, China	
PD3-9	Fully Coupled Electromagnetic-Thermal-Motion 3D Models for Transverse Flux Induction Heating.....	282
	<i>Fabrizio Dughiero, Michele Forzan, and Sergio Lupi</i> University of Padua, Italy	

POSTER SESSION PD4
Material Modeling III
May 2, 2006, Tuesday
13:30 - 15:10

PD4-1	Hysteresis Modeling Including Asymmetric Domain Rotation	283
	<i>David Ribbenfjård and Göran Engdahl</i> Royal Institute of Technology, Sweden	
PD4-2	Magnetic Field Analysis of a Coreless Permanent Magnet Synchronous Motor	284
	<i>Xiaoyuan Wang, Lixiao Qi, Fang Zhao, and Jingjuan Du</i> Tianjin University, China	
PD4-3	Modeling Magnetic Vector Hysteresis With Play Hysterons.....	285
	<i>Jean Leite, Nelson Sadowski, Patrick kuo-Peng, João Bastos, and Pedro da Silva</i> GRUCAD/EEL/CTC/UFSC, Brazil	
PD4-4	Modeling of B-H Loop for Core Loss Calculations in Power Transformer Using Finite Element Method	286
	<i>K. Abbaszadeh¹, S.A Gholamian¹, M. Ardebili¹, and Hamid A. Toliyat²</i> ¹ K. N. Toosi University of Technology, Iran, ² Texas A&M University, USA	
PD4-5	Modeling of Magnetic Force Control Device Based on the Inverse Magnetostrictive Effect.....	287
	<i>Shuying Cao, Bowen Wang, Jiaju Zheng, Wenmei Huang, Hui Duan, and Haiyan Chen</i> Hebei University of Technology, China	

PD4-6	New Expressions of Higher-order Transition Boundary Conditions for Thin Bianisotropic Layer	288
	<i>Bin-Hao Jiang, Yongming Zhang, and Qun Wu</i> Harbin Institute of Technology, China	
PD4-7	Numerical Simulation of Shielding Current Density in High-Temperature Superconducting Thin Film	289
	<i>Atsushi Kamitani¹, Teruou Takayama¹, and Soichiro Ikuno²</i> ¹ Yamagata University, Japan, ² Tokyo University, Japan	
PD4-8	Performance Improvement of Hysteresis Parameter Determination	290
	<i>Julius Krah and Göran Engdahl</i> Royal Institute of Technology, Sweden	
 POSTER SESSION PD5 Optimization and Design IV May 2, 2006, Tuesday 13:30 - 15:10 		
PD5-1	Efficient Method to Treat Parameters' Uncertainties in Complex Circuits	291
	<i>S. Barmada, A. Musolino, M. Raugi, and R. Rizzo</i> Università di Pisa, Italy	
PD5-2	Electromagnetic Device Optimization Using Improved Differential Evolution Methods	292
	<i>Leandro Coelho and Piergiorgio Alotto</i> University of Paraná, Brazil	
PD5-3	Evolution of Two Dimensional Electromagnetic Devices Using a Novel Genome Structure	293
	<i>Mark Dorica and Dennis Giannacopoulos</i> McGill University, Canada	
PD5-4	Evolution of Wire Antennas in Three Dimensions Using a Novel Growth Process	294
	<i>Mark Dorica and Dennis Giannacopoulos</i> McGill University, Canada	
PD5-5	Experimental Design to Quantify Influence of Electromagnetic and Thermal Tissues Properties on Predicted Numerical Temperature Distribution in Human Body Due to Radiofrequency Exposure	295
	<i>N. Siauve¹ and L. Nicolas²</i> ¹ University of Lyon, France, ² Ecole Centrale Lyon, France	
PD5-6	Implementation of an Object-Oriented Knowledge-Based System for Distribution Transformer Design	296
	<i>Concepcion Hernandez and Marco Arjona</i> Instituto Tecnológico de la Laguna, Mexico	

PD5-7	Improving Neural Networks Sensitivity Extraction of Electromagnetic Devices.....	297
	<i>D. Vieira, J. Vasconcelos, and W. Caminhas</i> Federal University of Minas Gerais, Brazil	
PD5-8	Magnet Pole Shape Optimization for Large Scale BLDC Motor by Using Response Surface Method	298
	<i>Pan-Seok Shin¹, Han-Deul Kim¹, Chang Seop Koh², and Gwan-Soo Park³</i> ¹ Hongik University, Korea, ² Chungbuk National University, Korea, ³ Pusan National University, Korea	
PD5-9	Microwave Devices and Antennas Modelling by Support Vector Regression Machines	299
	<i>Giovanni Angiulli, Matteo Cacciola, and Mario Versaci</i> Univ. Mediterranea, Italy	
PD5-10	Multi Model Optimization Based on Response Surface of the Reduced FEM Simulation Model With Application to a Permanent Magnet Synchronous Motor.....	300
	<i>Stefan Giurgea¹, Hakim Zire¹, Abdelatif Miraoui¹, and Giansalvo Cirrincione²</i> ¹ Electrical Engineering and Systems Laboratory, France, ² University of Picardie-Jules Verne, France	
PD5-11	Multiobjective Optimization of an Electrostatic Micromotor Using the Multiple Cuts Ellipsoid Method.....	301
	<i>Adriano Lisboa, Douglas Vieira, Joao Vasconcelos, Rodney Saldanha, and Ricardo Takahashi</i> Federal University of Minas Gerais, Brazil	

POSTER SESSION PD6
Devices and Applications VII
 May 2, 2006, Tuesday
 13:30 - 15:10

PD6-1	Evaluation of DC Motor Variable Torque Components From Measurement of Stator Angular Vibrations.....	302
	<i>Iudean Dan^{1,2}, Dragan Florin², Munteanu Radu Jr.², Djerdir Abdesslem¹, and Miraoui Abdellatif¹</i> ¹ UTBM, France, ² Technical University of Cluj-Napoca, Romania	
PD6-2	Experiments on Single Layer Acsr Conductors	303
	<i>Raymond Findlay and Fang Liu</i> McMaster University, Canada	
PD6-3	Feasibility Studies for the Detection of Long Defects in Hot Rods	304
	<i>E. Cardelli^{1,2,3}, A. Faba^{1,2,3}, R. Specogna³, and F. Trevisan³</i> ¹ University of Perugia, Italy, ² Polo Scientifico Didattico di Terni, Italy, ³ University of Udine, Italy	

PD6-4	FEM Analysis of a Compressor Induction Motor Drive's Starting Characteristics.....	305
	<i>Andrej Stermecki, Igor Tičar, Ivan Zagradišnik, and Peter Kitak</i> University of Maribor, Slovenia	
PD6-5	FEM-Based Computation of Flashover Condition for a Special Three-electrode Spark Gap Design.....	306
	<i>Matjaž Gaber, Mladen Trlep, and Jože Pihler</i> University of Maribor, Slovenia	
PD6-6	Finite Element Modeling of Cell Exposed To Harmonic and Transient Electric Fields	307
	<i>I. Meny, N. Burais, F. Buret, and L. Nicolas</i> Université Claude Bernard Lyon, France	
PD6-7	Flaws Identification Using an Approximation Function and Artificial Neural Networks.....	308
	<i>Tomasz Chady and Przemyslaw Lopato</i> Szczecin University of Technology, Poland	
PD6-8	Fluids, Particles, and Multiple Robots in Electrostatic Fields	309
	<i>Luciano Pimenta, Miguel Mendes, Renato Mesquita, and Guilherme Pereira</i> Federal University of Minas Gerais, Brazil	
PD6-9	High Frequency Analysis of a Switching Mode Power Supply	310
	<i>Bruno Bolsens, Johan Driesen, and Ronnie Belmans</i> Katholieke Universiteit Leuven, Belgium	
PD6-10	Image Reconstruction of Defects in Metallic Plates Using a Multi-Frequency Detector System and a Discrete Geometric Approach	311
	<i>Ermanno Cardelli^{1,2,3}, Antonio Faba^{1,2,3}, Ruben Specogna³, and Francesco Trevisan³</i> ¹ University of Perugia, Italy, ² Polo Scientifico Didattico di Termi, Italy, ³ University of Udine, Italy	

POSTER SESSION PD7
Devices and Applications VIII
 May 2, 2006, Tuesday
 13:30 - 15:10

PD7-1	Improved Characteristic Analysis Procedure of Hybrid Stepping Motor Considering Overhang Effect.....	312
	<i>Ji-Young Lee¹, Sang-Ho Lee², and Jung-Pyo Hong²</i> ¹ Korea Electrotechnology Research Institute, Korea, ² Changwon National University, Korea	
PD7-2	Improved Efficiency for an In-Wheel Motor in Large Speed Operating.....	313
	<i>Daniel Fodorean¹, Abdesslem Djerdir¹, Ioan-Adrian Viorel², and Abdellatif Miraoui¹</i> ¹ Technological University of Belfort-Montbéliard, France, ² Technical University of Cluj-Napoca, Romania	

PD7-3	Improvement of Eddy Current Distribution Induced by Exciting Coil in Eddy Current Testing	314
	<i>Hajime Tsuboi and Norio Seshima</i> Fukuyama University, Japan	
PD7-4	Influence of Winding Configuration on Characteristics of Doubly Salient Permanent Magnet Machines	315
	<i>Jianzhong Zhang, Ming Cheng, Wei Hua, and Xiaoyong Zhu</i> Southeast University, China	
PD7-5	Inquiry for Technical Feasibility Assessment of a New Design of MHD Generator	316
	<i>Rita Delogu, Manuela Di Mauro, and Augusto Montisci</i> University of Cagliari, Italy	
PD7-6	Investigation of End-Effect and Experimental Validation For Hybrid Excited Doubly Salient Machine	317
	<i>Xiaoyong Zhu, Ming Cheng, Wei Hua, and Jianzhong Zhang</i> Southeast University, China	
PD7-7	Investigation on EMF Waveform in the Interior Permanent Magnet Synchronous Machine Considering Load Condition	318
	<i>Seo Jang-Ho¹, Kwak Sang-Yeop¹, Jung Sang-Yong², Kim Jae-Kwang¹, Chung Tae-Kyung³, and Jung Hyun-Kyo¹</i> ¹ Seoul National University, Korea, ² Dong-A University, Korea, ³ Chung-Ang University, Korea	
PD7-8	Iron Loss Analysis of Rotating Machines Considering Skin Effect and Excess Loss in Electrical Steel Sheets	319
	<i>Katsumi Yamazaki, Makoto Tanida, and Hitoshi Satomi</i> Chiba Institute of Technology, Japan	
PD7-9	Iterative Method Applied to Solve Electromagnetic Susceptibility Problem	320
	<i>Ricardo Adriano¹, Marcio Afonso², Roginelle Pires¹, Cassio Rego¹, João Vasconcelos¹, José Paulino¹, Marco Schroeder², Anderson Rabello², and Tarciso Oliveira²</i> ¹ Federal University of Minas Gerais, Brazil, ² Federal Center of Technological Education of Minas Gerais, Brazil	
PD7-10	Leakage Field Modeling of Spiral Winding Transformer for Contactless Power Converters	321
	<i>Ka-Wai-Eric Cheng, Yan Lu, Ka-Wing Chan, Y.L. Kwok, K.W. Kwok, and K. F. Kwok</i> The Hong Kong Polytechnic University, Hong Kong	

POSTER SESSION PD8
Devices and Applications IX
 May 2, 2006, Tuesday
 13:30 - 15:10

PD8-1	Loss Analysis of Interior Permanent Magnet Motors Considering Carrier Harmonics of PWM Inverters Using 3-D Nonlinear Time-Stepping Finite Element Method	322
	<i>Katsumi Yamazaki and Atsushi Abe</i> Chiba Institute of Technology, Japan	
PD8-2	Measurement and Verification of the Voltage Distribution on High Voltage Insulators	323
	<i>Vassiliki Kontargyri¹, Ioannis Gonos¹, Ioannis Stathopoulos¹, and Alex Michaelides²</i> ¹ National Technical University of Athens, Greece, ² Vector Fields, UK	
PD8-3	Multidisciplinary Optimal Design of Electric Machines Using Multimodeling Approach	324
	<i>Victor Mester, Frédéric Gillon, Michel Hecquet, and Pascal Brochet</i> Ecole Centrale de Lille, France	
PD8-4	Non-Linear Calculation of High Power Density and High Speed Permanent Magnet DC Motor Including Demagnetization Effects	325
	<i>John Kim</i> Robert Bosch Tool Corporation, USA	
PD8-5	Nonlinear Observer Based Flux Estimation of Induction Motors	326
	<i>Chang-Woo Park, Sungryul Lee, Jongbae Lee, and Ha-Gyeong Sung</i> Korea Electronics Technology Institute, Korea	
PD8-6	Novel Method for Fast Analysis of Cogging-Torque Harmonics in Permanent-Magnet Synchronous-Machines	327
	<i>C. Schlenzok, M. Kurzidem, and K. Hameyer</i> RWTH Aachen University, Germany	
PD8-7	On Designing Transformer for LCD Backlight Inverter	328
	<i>Youn-Hyun Kim¹, Min-Myung Lee¹, and Ju Lee²</i> ¹ Hanbat University, Korea, ² Hanyang University, Korea	
PD8-8	Online Torque Estimator of Switched Reluctance Motor Running under Hysteresis Current Control	329
	<i>K. Wong, K. Cheng, S. Ho, and S. Yang</i> The Hong Kong Polytechnic University, China	
PD8-9	Optimal Design of Flux-Switching Permanent Magnet Machine Based on Finite Element Analysis	330
	<i>Wei Hua, Ming Cheng, Jianzhong Zhang, and Xiaoyong Zhu</i> Southeast University, China	

- PD8-10 Study on the Multi-Feed Method to Improve the On-Edge Fields of the DC Power-Bus by a Fast Calculation Technique 331**
Sungtek Kahng¹, and Hyeong-Seok Kim²
¹University of Incheon, Korea, ²Chung-Ang University, Korea

ORAL SESSION OD1
Methodologies and Applications
 May 2, 2006, Tuesday
 15:30 - 17:10

- OD1-1 Pole Shape Optimization of Switched Reluctance Motor for Reduction of Torque Ripple 332**
Yong Kwon Choi and Chang Seop Koh
 Chungbuk National University, Korea
- OD1-2 Influence of the Source Potential Distribution on FEM Potential Formulations in Magnetostatics 333**
T. Henneron¹, S. Clénet¹, F. Piriou², J. P. A. Bastos³, and N. Sadowski³
¹L2EP, ENSAM, France, ²L2EP, France, ³GRUCAD/EEL/CTC, Brazil
- OD1-3 A Magneto-Mechanical Strong Coupled Model for Giant Magnetostrictive Force Sensor 334**
Qingxin Yang, Rongge Yan, Changzai Fan, Haiyan Chen, Fugui Liu, and Shuo Liu
 Hebei University of Technology, China
- OD1-4 Coupled Magnetic-Electric-Mechanical Model for Alternative Configurations Comparison of Electric Power Plant From Sea Waves 335**
N. M. Kimoulakis, A. G. Kladas, and J. A. Tegopoulos
 National Technical University of Athens, Greece
- OD1-5 New Performance Bounds in Signal Parameter Estimation under Mismatch 336**
Demetrios Kazakos¹ and Sam Makki²
¹University of Idaho, USA, ²University of Toledo, USA

ORAL SESSION OD2
Static and Quasi-Static Fields
 May 2, 2006, Tuesday
 15:30 - 17:10

- OD2-1 Surface Integration Free Combined Finite Element Method With Biot-Savart Law 337**
Koji Fujiwara¹, Yoshifumi Okamoto², and Akihisa Kameari³
¹Okayama University, Japan, ²Advanced Center for Computing and Communication, The Institute of Physical and Chemical Research, Japan, ³Science Solutions International Laboratory, Inc., Japan
- OD2-2 Generating Source Field Functions With Limited Support for Edge Finite Element Eddy Current Analysis 338**
Oszkár Bíró and Kurt Preis
 Graz University of Technology, Austria

OD2-3	Hybrid Discretization Based on Finite Elements and Harmonic Functions for the Simulation of Technical Models Exhibiting Partial Symmetry.....	339
	<i>S. Koch¹, H. De Gersem¹, T. Weiland¹, Jens Hoppe², and Peter Heitzig²</i>	
	¹ Technische Universität Darmstadt, Germany, ² Siemens AG, Germany	
OD2-4	Source Field Modeling by Mesh Incidence Matrices	340
	<i>Zsolt Badics and Zoltan Cendes</i>	
	Ansoft Corporation, USA	
OD2-5	A Perturbation Method for Computing Field Distortions Due to Conductive Regions With H-Conform Magnetodynamic Finite Element Formulations	341
	<i>Patrick Dular and Ruth V. Sabariego</i>	
	University of Liège, Belgium	

ORAL SESSION OE1

Nanomagnetics and Biomedical Applications

May 3, 2006, Wednesday

8:30 – 10:10

OE1-1	Micromagnetic Modeling of Magnetization Dynamics in Magnetic Tunnel Junctions Driven by Spin-Polarized Current.....	342
	<i>Giovanni Finocchio¹, Gregory Fuchs², Luis Torres³, Mario Carpentier¹, Giancarlo Consolo¹, Luis Lopez-Diaz³, and Bruno Azzerboni¹</i>	
	¹ University of Messina, Italy, ² Cornell University, USA,	
	³ Universidad de Salamanca, Spain	
OE1-2	Micromagnetic Simulations of Perpendicular Single-Pole-Type Head for Various Pole Tip Structures	343
	<i>Yasushi Kanai¹, Masahiko Saiki¹, and Kazuetsu Yoshida²</i>	
	¹ Niigata Institute of Technology, Japan, ² Kogakuin University, Japan	
OE1-3	Parasitic Extraction of IC Interconnects in Consideration of Optical Distortion by Using Shape Sensitivity Modeling	344
	<i>Z. Ren and J. Falbo</i>	
	Mentor Graphics Corporation, USA	
OE1-4	Bidomain Formulation for Modeling Brain Activity Propagation.....	345
	<i>Robert Szmurlo¹, Jacek Starzyński¹, Bartosz Sawicki¹, Stanislaw Wincenciak¹, and Andrzej Cichocki²</i>	
	¹ Warsaw University of Technology, Poland,	
	² RIKEN, ABSP Lab, BSI RIKEN ABSP Lab., Japan	
OE1-5	Modeling Virtual Channels in Cochlear Implant Systems.....	346
	<i>Charles Choi and Wei-Dian Lai</i>	
	I-Shou University, Taiwan	

ORAL SESSION OE2
 Numerical Techniques
 May 3, 2006, Wednesday
 8:30 - 10:10

OE2-1	Strategies for h-p Adaptive Finite Element Analysis for Electromagnetics in Large Scale Parallel Computing Environments: Theory and Practice 347 <i>Steve McFee, Dennis Giannacopoulos, and Baruyr Mirican</i> McGill University, Canada
OE2-2	An Efficient Method for Solving Nonlinear Time-Periodic Eddy-Current Problems 348 <i>Ioan Ciric¹ and Floreal Hantila²</i> ¹ The University of Manitoba, Canada, ² Politehnica University of Bucharest, Romania
OE2-3	Performance of Low-Rank QR Approximation of the Finite Element Biot-Savart Law 349 <i>Daniel White and Benjamin Fasenfest</i> Lawrence Livermore National Laboratory, USA
OE2-4	Remeshing Driven by Smooth Surface Approximation of Mesh Nodes 350 <i>Cássia Nunes, Renato Mesquita, Rafael Toledo, and David Lowther</i> McGill University, Canada
OE2-5	An Automatic Strategy for Solving ill-Conditioned Linear Systems of Equations Resulting From a Finite Element Method 351 <i>Cedric Doucet^{1,2,3}, Isabelle Charpentier¹, Jean-Louis Coulomb², and Christophe Guérin³</i> ¹ Laboratoire de Modelisation et Calcul, France, ² Laboratoire d' Electrotechnique de Grenoble, France, ³ CEDRAT SA, France

POSTER SESSION PE1
 Static and Quasi-Static Fields VII
 May 3, 2006, Wednesday
 10:30 - 12:10

PE1-1	Large-Scale and Fast Nonlinear Magnetostatic Field Analysis by the Magnetic Moment Method With the Adaptive Cross Approximation 352 <i>Yasuhito Takahashi, Chiharu Matsumoto, and Shinji Wakao</i> Waseda University, Japan
PE1-2	Low-Frequency Electromagnetic Scattering From a Perfectly Conducting Scatterer With Apertures Using a T-Omega Finite Element Method 353 <i>Kengo Sugahara and Kiyoshi Yoda</i> Mitsubishi Electric Corporation, Japan

PE1-3	Magneto–Fluid Analysis of Electromagnetic Fluid Pump Taking Account of Eddy Currents due to Velocity Effects.....	354
	<i>Kazuhiro Muramatsu¹, Hideki Kitamura¹, and Kenji Kikuchi²</i>	
	¹ Saga University, Japan, ² Japan Atomic Energy Research Agency, Japan	
PE1-4	Measurement of the Magnetic Field Radiating by Electrostatic Discharge Generators Along Various Directions	355
	<i>Georgios Fotis, Andreas Rapanakis, Ioannis Gonos, and Ioannis Stathopoulos</i>	
	National Technical University of Athens, Greece	
PE1-5	Meshless Multiquadric RBF Method Applied to Two-dimensional Boundary Value Problems	356
	<i>Simone Viana, David Rodger, and Hong Cheng Lai</i>	
	University of Bath, UK	
PE1-6	Minimization of Eddy Current Losses in a Straight Rectangular Cross Section Conductor.....	357
	<i>Xavier Margueron, Jean-Pierre Keradec, Tuan Anh, Olivier Chadebec, and Gérard Meunier</i>	
	Laboratoire d'Electrotechnique de Grenoble, France	
PE1-7	Modeling of a Random Distribution of Turns in Wrapped Windings.....	358
	<i>Armèle Canali¹, Vincent Mazauric¹, Vincent Leconte¹, and Denis Boss²</i>	
	¹ Schneider Electric, 38TEC Research Center, France, ² France Transfo, France	
PE1-8	New Computational Models for Electrostatics of Macromolecules in Solvents	359
	<i>Jianhua Dai¹, Igor Tsukerman¹, Alexander Rubinstein², and Simon Sherman²</i>	
	¹ The University of Akron, USA, ² The University of Nebraska Medical Center, USA	
PE1-9	Electrical Rotating Equipment Failure Detection Using Wavelet Based Current Signature	360
	<i>Aldo Artur Belardi¹, Fabrizio Leonardi¹, José Roberto Cardoso², and Carlos A. França Sartori²</i>	
	Centro Universitário da FEI, Brazil, ² Escola Politécnica da Universidade de São Paulo, Brazil	
PE1-10	Non-Overlapping Domain Decomposition Combined With Algebraic Multigrid Method for Eddy Current Fields in Railgun.....	361
	<i>YuanQing Liu, Duo Chen, Shanqiang Gu, and Bo Zhang</i>	
	Tsinghua University, China	

POSTER SESSION PE2
Static and Quasi-Static Fields VIII
May 3, 2006, Wednesday
10:30 – 12:10

PE2-1	Numerical Analysis of Resistivity Variation of Horizontal Multi-layer Earth and Its Application in Earthquake Prediction.....	362
	<i>Bo Zhang, Jinliang He, and Rong Zeng</i>	
	Tsinghua University, China	

PE2-2	Numerical Solution and Experimental Test for Corona Discharge between a Blade and a Facing Plate.....	363
	<i>Bassem Khaddour^{1,2}, Pierre Atten¹, and Jean-Louis Coulomb²</i>	
	¹ LEMD, CNRS & Université Joseph Fourier, France, ² LEG, INPG/UJF-CNRS, France	
PE2-3	Optimization of the Different Pole Arc Combination to Reduce the Cogging Torque in PMDC Motors	364
	<i>Xiuhe Wang¹, Tingting Ding¹, Ning Shen¹, Shiyong Liu¹, and Shiyong Yang²</i>	
	¹ Shandong University, China, ² Zhejiang University, China	
PE2-4	Performance of the Impedance Boundary Conditions for Eddy-Current Problems.....	365
	<i>K. Jayasekera and I. Ciric</i>	
	The University of Manitoba, Canada	
PE2-5	Potential Distribution along Long Ceramic Insulator Strings on the Head of High Voltage Transmission Tower.....	366
	<i>Bo Zhang, Jinliang He, Rong Zeng, Shuiming Chen, Lin Cao, and Shanqiang Gu</i>	
	Tsinghua University, China	
PE2-6	Power Transformer No Load Loss Optimization considering Manufacturing Process Effects.....	367
	<i>Th. Kefalas¹, M. Tsili¹, A. Kladas¹, P. Georgilakis², A. Souflaris³, and D. Paparigas³</i>	
	¹ National Technical University of Athens, Greece, ² Technical University of Crete, Greece, ³ Schneider Electric AE, Greece	
PE2-7	Quasi-Static Field Computation in Inhomogeneous Axisymmetric Conducting and Magnetic Materials	368
	<i>Michael Morgan</i>	
	Naval Postgraduate School, USA	
PE2-8	Reduced Order Electromagnetic Models Based on Dual Finite Integration Technique.....	369
	<i>Daniel Ioan and Gabriela Ciuprina</i>	
	Politehnica University of Bucharest, Romania	
PE2-9	Simulation of the Electric Field on High Voltage Insulators Using the Finite Element Method.....	370
	<i>Vassiliki Kontargyri¹, Ioannis Gonos¹, Ioannis Stathopoulos¹, and Alex Michaelides²</i>	
	¹ National Technical University of Athens, Greece, ² Vector Fields, UK	
PE2-10	Space-Time Adaptive Methods for the Simulation of Magnetic Fields.....	371
	<i>Georg Wimmer, Thorsten Steinmetz, and Markus Clemens</i>	
	Helmut-Schmidt University, Germany	

POSTER SESSION PE3
Wave Propagation IV
May 3, 2006, Wednesday
10:30 - 12:10

PE3-1	Optimization of a Patch Antenna by Genetic Algorithms and a Hybrid FEM/RBCI Method 372 <i>Salvatore Alfonzetti¹, Giuseppe Borzi², Emanuele Dilettoso¹, and Nunzio Salerno¹</i> ¹ Università di Catania, Italy, ² Università di Messina, Italy
PE3-2	Overlap Algorithm for the Nonstandard FDTD Method Using Nonuniform Mesh 373 <i>Tadao Ohtani¹, Kenji Taguchi², Tatsuya Kashiwa², and Yasushi Kanaï³</i> ¹ Mitsubishi Heavy Industries, Ltd., Japan, ² Kitami Institute of Technology, Japan, ³ Niigata Institute of Technology, Japan
PE3-3	Parallel Post-Processing Techniques for Fast Radar Cross-Section Computation 374 <i>Adrian Ngoly and Steve McFee</i> McGill University, Canada
PE3-4	Patch Antennas for Homogeneous Local Hyperthermia 375 <i>Charles Lima, Walter Carpes Jr., and João Bastos</i> Universidade Federal de Santa Catarina, Brazil
PE3-5	Radiation of USB-WLAN Antenna Influenced by Human Tissue and by Notebook Enclosure 376 <i>W. Renhart, K. Hollaus, C. Magele, and G. Matzenauer</i> Technical University of Graz, Austria
PE3-6	Recognition of Buried Objects by Their EM Scattering 377 <i>R. Araneo, F. Gentili, G. Lovat, and F. Maradei</i> University of Rome "La Sapienza", Italy
PE3-7	S-Parameter Extraction From Structures on Printed Circuit Boards by FDTD and Surface Impedance Boundary Condition 378 <i>Karl Hollaus, Oszkár Bíró, Kurt Preis, Christian Stockreiter, and Bernhard Weiß</i> Graz University of Technology, Austria
PE3-8	Synthesis of a Narrow Beamwidth Radiation Pattern Using a Finite Patch Antenna Array 379 <i>Jeffrey Braunstein, Hyeong-Seok Kim, Ha-Young Lee, and Yong-Soo Kwak</i> Chung-Ang University, Korea
PE3-9	Technique Based on SQP Algorithm for Antenna Array Pattern Synthesis: Beam and Null Steering 380 <i>Moctar Mouhamadou and Patrick Vaudon</i> XLIM-UMRS CNRS, France

PE3-10	Three-Dimensional FEM Approach to Model Twisted Wire Pair Cables	381
	<i>Concettina Buccella, Mauro Feliziani, and Giuliano Manzi</i> University of L'Aquila, Italy	
PE3-11	Time Domain Analysis of Transient Characteristics of Grounding Electrode Based on Chebyshev Expansions	382
	<i>Shaofeng Yu, Jinliang He, Jun Zou, Bo Zhang, and Sanqiang GU</i> Tsinghua University, China	
PE3-12	Transfinite Element Method Using the A, ν-Potential Formulation With Edge-Elements in the Frequency Domain	383
	<i>Christian Stockreiter, Gernot Matzenauer, Oszkár Bíró, Karl Hollaus, Kurt Preis, and Bernhard Weiss</i> Graz University of Technology, Austria	
 POSTER SESSION PE4 Coupled Problems IV May 3, 2006, Wednesday 10:30 - 12:10 		
PE4-1	Influence of Space Harmonics on Starting Performance of 1-phase Line Start Permanent Magnet Motor	384
	<i>Byung-taek Kim¹ and Byung-il Kwon²</i> ¹ Kunsan National University, Korea, ² Hanyang University, Korea	
PE4-2	Introducing the Virtual Air gap Scheme to the Kelvin Force Densities With External and Total Field	385
	<i>Se-Hee Lee¹, Hong-Soon Cho², and Il-Han Park^{1,2}</i> ¹ Massachusetts Institute of Technology, USA, ² Sungkyunkwan University, Korea	
PE4-3	Local Magneto-Mechanical Coupling in Electrical Machines	386
	<i>A. Belahcen and A. Arkkio</i> Helsinki University of Technology, Finland	
PE4-4	Magneto-Thermal Coupled Simulation in the Design of Electrical Equipment Using Code Coupling Interface	387
	<i>Benjamin Pulido, Vincent Leconte, Ian Lyttle, Kevin Parker, and Ali Zolfaghari</i> Schneider Electric, USA	
PE4-5	MHD FEM Analysis of Electromagnetic Stirrers for Aluminium Furnaces	388
	<i>Dario Ciscato¹, Fabrizio Dughiero², Michele Forzan², and Cristiano Greggio²</i> ¹ INOVA, Italy, ² University of Padua, Italy	
PE4-6	Modeling and Characterization of Transformers Internal Faults Using Finite Elements and Discrete Wavelet Transforms	389
	<i>Osama Mohammed and Nagy Abed</i> Florida International University, USA	

PE4-7	Movement Simulation of Three-phase Short Circuit Arcs on Distribution Lines Based on the Coupling of Magnetic Field and Motion	390
	<i>Shanqiang Gu¹, Jinliang He¹, Weijiang Chen², Rong Zeng¹, and Bo Zhang¹</i>	
	¹ Tsinghua University, China, ² Wuhan High Voltage Research Institute, China	
PE4-8	Numerical Calculation of Multi-Coupled Fields in Large Salient Synchronous Generator	391
	<i>Weili Li¹, Shuye Ding², Huiyong Jin², and Yingli Lou³</i>	
	¹ Harbin Institute of Technology, China,	
	² Harbin University of Science and Technology, China,	
	³ North China Electric Power University, China	
PE4-9	Search Algorithm for Free Boundary of Thin Liquid Conducting Domains	392
	<i>Stéphane Dufour and Gérard Vinsard</i>	
	LEMMA-INPL, France	

POSTER SESSION PE5
Numerical Techniques III
 May 3, 2006, Wednesday
 10:30 - 12:10

PE5-1	Goal-Oriented Error Estimates for hp-Adaptive Solutions of the Time-Harmonic Maxwell's Equations	393
	<i>Pär Ingelström, Volker Hill, and Romanus Dyczij-Edlinger</i>	
	Universität des Saarlandes, Germany	
PE5-2	Hardware Acceleration for Finite Element Electromagnetics: Efficient Sparse Matrix Floating-Point Computations With Field Programmable Gate Arrays.....	394
	<i>Yousef El Kurdi, Warren Gross, and Dennis Giannacopoulos</i>	
	McGill University, Canada	
PE5-3	Hi-Speed Prediction of Strict Numerical Solutions Using Multi-Adaptive-Meshing.....	395
	<i>Katsumi Yamazaki and Nobuyoshi Yamada</i>	
	Chiba Institute of Technology, Japan	
PE5-4	Imperfect Electric Conductor Thin Wires Model for Finite Difference Time Domain Method.....	396
	<i>Changzheng Gao, Lin Li, Zhibin Zhao, and Xiang Cui</i>	
	North China Electric Power University, China	
PE5-5	Implementation of Higher Order Absorbing Boundary Conditions in Vector Finite Element Methods.....	397
	<i>Feridun Gundes, Kezhong Zhao, and Jin-Fa Lee</i>	
	The Ohio State University, USA	
PE5-6	Implementation of Virtual Air-gap for Maxwell Stress Tensor	398
	<i>Hong-Soon Choi¹, Se-Hee Lee², and Il-Han Park¹</i>	
	¹ Sungkyunkwan University, Korea, ² Massachusetts Institute of Technology, USA	

PE5-7	Influence of Method for Imposing Essential Boundary Condition on Meshless Galerkin/Petrov-Galerkin Approaches	399
	<i>Soichiro Ikuno¹, Katsuyuki Takakura², and Atsushi Kamitani²</i>	
	¹ Tokyo University of Technology, Japan, ² Yamagata University, Japan	
PE5-8	Large Scale Simulation for Optical Propagation in 3-D Photonic Crystal Using the FDTD Method With Parallel Processing	400
	<i>Hanawa Toshihiro and Ikuno Soichiro</i>	
	Tokyo University of Technology, Japan	
PE5-9	LU Parallel Preconditioning With Block Intersection Applied to FEM on Computer Clusters.....	401
	<i>M. Fischborn, P. Kuo-Peng, N. Sadowski, J. Bastos, and J. Trevisan</i>	
	GRUCAD/EEL/CTC/UFSC, Brazil	
PE5-10	Macro Element Formulations for Recursive Domain Decomposition in h-p Adaptive Finite Element Analysis	402
	<i>Xuan Zhang and Steve McFee</i>	
	McGill University, Canada	
PE5-11	New RPQ Formulae for the Numerical Differentiation of 3-D Finite Element Solutions of Electromagnetic Problems.....	403
	<i>S. Coco and A. Laudani</i>	
	University of Catina, Italy	

POSTER SESSION PE6
Optimization and Design V
May 3, 2006, Wednesday
10:30 - 12:10

PE6-1	Multi-Objective Optimization of Bow-Tie Antennas for Radar Assessment of Concrete Structures	404
	<i>X. Travassos¹, S. Avila¹, A. Lisboa², C. Vollaire², and A. Nicolas²</i>	
	¹ Ecole Centrale Lyon, France, ² Federal University of Minas Gerais, Brazil	
PE6-2	Multiphysical Brushless DC Motor Optimization Process	405
	<i>Y. Perriard and M. Markovic</i>	
	EPFL, Switzerland	
PE6-3	Design Optimization of a Low-Power Micromachined Fluxgate Sensor Using Localized Core Saturation Method.....	406
	<i>Pei-Ming Wu and Chong H. Ahn</i>	
	University of Cincinnati, USA	
PE6-4	Niched Genetic Simulated Annealing Algorithm in the Optimization Design of a Permanent Magnetic Actuator for a 40.5kV Vacuum Circuit Breaker	407
	<i>S.L. Ho¹, Y. Li², H. Cui², Edward W.C.Lo¹, S.Y. Yang¹, and H.C. Wong¹</i>	
	¹ The Hong Kong Polytechnic University, Hong Kong, ² Shenyang University of Technology, China	

PE6-5 Optimal Design of Auxiliary-Teeth to Reduce Detent Force by End-Effect in Moving Coil Type PMLSM..... 408
Dong-Yeup Lee, Jianpei Zhou, Su-Kwon Jeong, and Gyu-Tak Kim
 Changwon National University, Korea

PE6-6 Optimal Design of Resonant Filters Employing Genetic Algorithm Combined With Moment Method..... 409
Yoshio Mitsutake¹, Manabu Nakata¹, and Katsuhiro Hirata²
¹Matsushita Electric Works Limited, Japan, ²Osaka University, Japan

POSTER SESSION PE7
 Devices and Applications X
 May 3, 2006, Wednesday
 10:30 - 12:10

PE7-1 Optimal Design of Single Phase Switched Reluctance Motor Considering Driving Converter 410
Youn-Hyun Kim¹, Seung-Bin Lim², and Ju Lee²
¹Hanbat University, Korea, ²Hanyang University, Korea

PE7-2 Overhang Effect Analysis of Permanent Magnet Machine According to the Rotor Types 411
Ki-Chan Kim and Ju Lee
 Hanyang University, Korea

PE7-3 Parametric Variance Consideration in Speed Control of Flux Reversal Machine..... 412
JoonSeon Ahn¹, Seung-joo Kim¹, Sol Kim², and Ju Lee¹
¹Hanyang University, Korea, ²Yuhan College, Korea

PE7-4 Penetrating Cracks Assessment in Metallic Plates 413
Pietro Burrascano^{1,2,3}, Ermanno Cardelli^{1,2,3}, Antonio Faba^{1,2,3}, Alessandro Pirani^{1,2,3}, and M. Ricci^{1,2,3}
¹Perugia University, Italy, ²Polo Scientifico Didattico di Terni, Italy, ³Center for Electric and Magnetic Applied Research, Italy

PE7-5 Performance Prediction of Switched Reluctance Motor Considering Windage Loss for High Speed Application..... 414
Sung Won, Joon Ahn, Ki Kim, and Ju Lee
 Hanyang University, Korea

PE7-6 Potential Control Inside Switch Device Using FEM and Stochastic Optimization Algorithm 415
Peter Kitak¹, Jože Pihler¹, Igor Tičar¹, Andrej Stermecki¹, Oszkar Biró², and Kurt Preis²
¹University of Maribor, Slovenia, ²Graz University of Technology, Austria

PE7-7 Power Capability and Flux-Weakening Performance of Interior Permanent Magnet Synchronous Motor With Multiple Flux Barriers 416
Bojan Štumberger, Gorazd Štumberger, Marko Jesenik, Viktor Goričan, Anton Hamler, and Mladen Trlep
 University of Maribor, Slovenia

PE7-8 Quasi-3D Crack Size Estimation Using Eddy Current Testing Images on Austenite Stainless Steel Plates..... 417
Hisashi Endo, Tetsuya Uchimoto, and Toshiyuki Takagi
 Tohoku University, Japan

PE7-9 Ray Tracing Model for Terahertz Inspection of Spray on Foam Insulation (SOFI)..... 418
Vikram Melapudi¹, Satish Udpa¹, Lalita Udpa¹, and William Winfree²
¹Michigan State University, USA, ²NASA Langley Research center, Hampton, VA, USA

POSTER SESSION PE8
 Devices and Applications XI
 May 3, 2006, Wednesday
 10:30 - 12:10

PE8-1 Relative Importance of the Surface Waves in the Electromagnetic Field Radiated by Linear Antennas..... 419
Weberton Eller, Fábio Arruda, Marco Aurélio Schroeder, Márcio Afonso, Tarcísio Oliveira, and Anderson Rabello
 Federal Center of Technological Education of Minas Gerais, Brazil

PE8-2 Rotor Design Functional Standard of Synchronous Reluctance Motor According to Torque/volume Using FEM & SUMT 420
Rae-Hwa Lee¹, Su Jin Jeon¹, Sun Bum Kwon², Jang-Sung Chun³, Min-Myung Lee¹, and Jung-Ho Lee¹
¹Hanbat National University, Korea, ²WOOJIN Industrial Systems Co. Limited, Korea, ³TSA Co. Limited, Korea

PE8-3 Rotor Design on Torque Ripple Reduction for a Synchronous Reluctance Motor With Concentrated Winding Using Response Surface Methodology..... 421
Jung-Min Park¹, Seong-June Park², Min-Myung Lee¹, Jang-Sung Chun³, and Jung-Ho Lee¹
¹Hanbat National University, Korea, ²WOOJIN Industrial Systems Co. Limited, Korea, ³TSA Co. Limited, Korea

PE8-4 Rotor Pole Design in Spoke Type BLDC Motor by RSM 422
Kyu-yun Hwang, Sang-bong Rhee, Byung-yull Yang, and Byung-il Kwon
 Hanyang University, Korea

PE8-5 Sensitivity Analysis of Eddy Current Sensor Parameters for Non-Destructive Measurement of Zirconium Oxide Thin Film Using 3D Finite Element..... 423
A. Abakar¹, J-C. Verité¹, and R. Cauvin²
¹EDF R&D, France, ²EDF DCN, France

PE8-6 Sensorless Vector Control Parameters Estimation of Synchronous Reluctance Motor Using a Coupled FEM & Preisach Model 424
Hong Seok Kim¹, Jung Ho Lee¹, Jung Min Park¹, Min-Myung Lee¹, and Jang-Sung Chun²
¹Hanbat National University, Korea, ²TSA Co. Limited, Korea

PE8-7	Source Field Computation in NDT Applications	425
	<i>T. Henneron¹, Y. Le Menach², J. Ducreux³, O. Moreau³, J. Vérité³, S. Clénet¹, and F. Piriou²</i>	
	¹ LAMEL, L2EP, ENSAM France, ² LAMEL, L2EP, Bat.P2, France, ³ LAMEL, Electricité de France, R&D Division, France	
PE8-8	Spherical Harmonic Identification Using a Priori Information about an Electrical Device.....	426
	<i>Louis Schmerber, Laure-Line Rouve, Albert Foggia, and Olivier Chadebec</i>	
	Laboratoire d' Electrotechnique de Grenoble, France	
PE8-9	Starting Performance of a Three-Phase Induction Motor With the Smith Connection on a Single-Phase Supply	427
	<i>T. Chan¹, L. Lai², and L. Yan³</i>	
	¹ The Hong Kong Polytechnic University, China, ² City University, UK, ³ Tsinghua University, China	

POSTER SESSION PF1
Static and Quasi-Static Fields IX
May 3, 2006, Wednesday
13:30 – 15:10

PF1-1	Study of Weight Functions in the Element-Free Galerkin Method	428
	<i>Suzhen Liu, Qingxin Yang, Haiyan Chen, Wenrong Yang, and Weili Yan</i>	
	Hebei University of Technology, China	
PF1-2	The Impact of Ground Surface and Conducting Bodies under Transmission Lines on Electric Field Distribution	429
	<i>M. Trlep, A. Hamler, M. Jesenik, and B. Štumberger</i>	
	University of Maribor, Slovenia	
PF1-3	The Influence of an Additional Substance in the Trenches Surrounding the Grounding Grid's Conductors on the Grounding Grid's Performance.....	430
	<i>Anton Habjanič, Mladen Trlep, and Jože Pihler</i>	
	University of Maribor, Slovenia	
PF1-4	Time-Domain Homogenisation of Windings in 2D FE Calculations	431
	<i>Johan Gyselinck¹, Ruth Sabariego², and Patrick Dular²</i>	
	¹ Université libre de Bruxelles, Belgium, ² University of Liège, Belgium	
PF1-5	Toward an Energy-Based Error Criterion for Adaptive Meshing	432
	<i>D. Ladas^{1,2}, V. Mazauric¹, G.Meunier², O. Chadebec², J.-L. Coulomb², Y. Marechal², and P Wendling³</i>	
	¹ Schneider Electric Corporate Research and Development, France, ² Laboratoire d' Electrotechnique, France, ³ MAGSOFT Corp., USA,	
PF1-6	3-D FEM Analysis of Residual Magnetism Produced by X-Gradient Coil of Permanent Magnet Type of MRI.....	433
	<i>Atsushi Muraoka¹, Daisuke Miyagi¹, Norio Takahashi¹, Koji Miyata², and Ken Ohashi²</i>	
	¹ Okayama University, Japan, ² Shin-Etsu Chemical Co., Ltd., Japan	

PF1-7	Transverse Flux Reluctance Linear Motor (TFRLM) Analytical Model Based on Finite Element Method (FEM) Analysis Results	434
	<i>J. Chang¹, D. Kang¹, I. Viorel², and Larisa Strete¹</i>	
	¹ Transverse Flux Machines Research Group, KERI, Korea,	
	² Technical University of Cluj-Napoca, Romania	
PF1-8	Using Coulombian Approach for Modeling Scalar Potential and Magnetic Field of a Permanent Magnet With Radial Polarization.....	435
	<i>Harijaona Rakotoarison, J. Yonnet, and B. Delinchant</i>	
	Laboratoire d'Electrotechnique de Grenoble, France	
PF1-9	Using Polynomial Curve Fitting Method to Improve Image Quality in EIT.....	436
	<i>Jianjun Zhang, Guizhi Xu, Haiyan Chen, Quanming Zhao, and Weili Yan</i>	
	Hebei University of Technology, China	
PF1-10	Verification of 3-D Large-Scale Nonlinear Magnetostatic Analysis.....	437
	<i>Hiroshi Kanayama, Shin-ichiro Sugimoto, and Shuuji Asakawa</i>	
	Kyushu University, Japan	

POSTER SESSION PF2
Nanomagnetics/Nanophotonics
May 3, 2006, Wednesday
13:30 - 15:10

PF2-1	Angle Resolved Analysis of Magnetic Dynamic Process for Micro Magnetic Clusters With Dislocations	438
	<i>Katsuhiko Yamaguchi¹, Osamu Nittono¹, Toshiyuki Takagi², and Koji Yamada³</i>	
	¹ Fukushima University, Japan, ² Tohoku University, Japan,	
	³ Saitama University, Japan	
PF2-2	Large Deformation of Electromagnetic Solids by Variational Method.....	439
	<i>Zsolt Badics and Zoltan Cendes</i>	
	Ansoft Corporation, USA	
PF2-3	Magnetization Reversal Driven by Spin-Polarized Current in Exchanged Biased Samples.....	440
	<i>Giovanni Finocchio¹, Ilya Krivorotov², Luis Torres³, and Bruno Azzaroni¹</i>	
	¹ University of Messina, Italy, ² University of California, USA,	
	³ Universidad de Salamanca, Spain	
PF2-4	Methodology and Tool for Generating Semi-Analytical Models Used to Pre-design Electromagnetic MEMS (Mag-MEMS).....	441
	<i>Harijaona Rakotoarison, B. Delinchant, and O. Cugat</i>	
	Laboratoire d'Electrotechnique de Grenoble, France	

PF2-5	Principle and Analysis of a Two-Dimensional on Chip Magnetophoresis of Bioparticles for Contamination-free Biochemical Reactors	442
	<i>H. Chetouani^{1,2}, C. Jeandey², V. Haguët², H. Rostaing¹, C. Dieppedale², and G. Rayne¹</i>	
	¹ Laboratoire d'Electrotechnique de Grenoble, France,	
	² Commissariat à l'Energie Atomique de Grenoble, France	
PF2-6	Spin-Transfer Torque Switching in Magnetic Multilayers	443
	<i>Mario Carpentieri¹, Giancarlo Consolo¹, Bruno Azzerboni¹, Luis Torres², and E. Cardelli³</i>	
	¹ University of Messina, Italy,	
	² University of Salamanca, Spain, ³ University of Perugia, Italy	
PF2-7	Suppression of Magnetization Ringing in Submicron Pac-Man Shaped Ni80Fe20 Thin Film Elements	444
	<i>James Jabal¹, Yang-Ki Hong¹, Byung-Chul Choi², Hongmei Han¹, Gavin Abo¹, and Sung-Hoon Gee¹</i>	
	¹ University of Idaho, USA, ² University of Victoria, Canada	
PF2-8	Weitzenbock Identities and Variational Formulations in Nanophotonics and Micromagnetics.....	445
	<i>P. Robert Kotiuga</i>	
	Boston University, USA	
PF2-9	Modeling and Detection Algorithms of the P-SLAM Optical Data Storage System.....	446
	<i>Kelly Goss, Mike Potter, and Geoffrey Messier,</i>	
	University of Calgary, Canada	
PF2-10	Numerical Analysis of Nanoparticle-Structured Plasmon Waveguides of Light	447
	<i>Isaak Mayergoyz and Zhenyu Zhang</i>	
	University of Maryland, College Park, USA	
PF2-11	The Computation of Extinction Cross-Sections of Resonant Metallic Nanoparticles Subject to Optical Radiation	448
	<i>Isaak Mayergoyz and Zhenyu Zhang</i>	
	University of Maryland, College Park, USA	

POSTER SESSION PF3
Coupled Problems V
May 3, 2006, Wednesday
13:30 - 15:10

PF3-1	Simulation of AC Contactors Fed by a Distorted Source Using the Coupled Finite Element Method, Circuit and Mechanical Equations	449
	<i>J. Ortiz¹, P. Koltermann¹, J. Pinto¹, V. Pereira¹, L. Santana¹, and L. Righi²</i>	
	¹ DEL/CCET/UFMS, Brazil, ² CEE/CT/UFMS, Brazil	

PF3-2	Some Consideration on a Large Deformation Theory of Solids Subjected to Electromagnetic Loads	450
	<i>Isoharu Nishiguchi</i> Kanagawa Institute of Technology, Japan	
PF3-3	Temperature Distribution of Power Transformer by Coupled Magneto-Fluid-Thermal Analysis	451
	<i>JoongKyoung Kim¹, JeongGeun Lee¹, SungChin Hahn¹, KyongYop Park², HongKyu Kim², and YeonHo Oh²</i> ¹ Dong-A University, Korea, ² Advanced Power Apparatus Group, Korea	
PF3-4	The Calculation of Rotor Temperature Field for Hydro-Generator As Well As the Analysis on Relevant Factors	452
	<i>Weili Li¹, Shuye DING², Feng ZHOU², and Yingli LUO³</i> ¹ Harbin Institute of Technology, China, ² Harbin University of Science and Technology, China, ³ North China Electric Power University, China	
PF3-5	Transient Currents and Forces of a Plunger Core Reactor by Using 3D Field-Circuit Coupled Finite Element Analyses	453
	<i>Erich Schmidt¹, Oszkar Biró², and Peter Hamberger³,</i> ¹ Vienna University of Technology, Austria, ² Graz University of Technology, Austria, ³ VA TECH EBG Transformatoren GmbH & Co., Austria	
PF3-6	Transient Modeling of Rotating Electrical Machines Including Motion, Circuit, Thermal and Deformation.....	454
	<i>Zsolt Badics, Ping Zhou, and Zoltan Cendes</i> Ansoft Corporation, USA	
PF3-7	Transient Simulation of Synchronous Generators Using Time-Stepping FEM.....	455
	<i>Yingli Luo¹, Xinli Zhang¹, Liang Meng¹, Weili Li², and Jiafeng Shen²</i> ¹ North China Electric Power University, China, ² Harbin University of Science and Technology, China	

POSTER SESSION PF4
Numerical Techniques IV
May 3, 2006, Wednesday
13:30 - 15:10

PF4-1	Numerical Analysis of Plasmon Resonances Based on Fast Multipole Method	456
	<i>Zhenyu Zhang, Isaak Mayergoyz, Nail Gumerov, and Ramani Duraiswami</i> University of Maryland, College Park, USA	
PF4-2	Optimizing an Artificial Neural Network Generator of Finite Element Meshes.....	457
	<i>S. Alfonzetti, E. Dilettoso, and N. Salerno</i> Università di Catina, Italy	
PF4-3	Periodic Steady State Solution of Voltage-Driven Magnetic Devices.....	458
	<i>Derek Dyck and Phillip Weicker</i> Infolytica Cooperation, Canada	

PF4-4	Piecewise Linear Companders Are Robust	459
	<i>Demetrios Kazakos¹ and Sam Makki²</i>	
	¹ University of Idaho, USA, ² University of Toledo, USA	
PF4-5	Reducing Computational Time in Solving Microwave Heating of Temperature Dependent Dielectric Media	460
	<i>Anderson Rabello, Elson Silva, and Rodney Saldanha</i>	
	Tecnologica de Minas Geras, Brazil	
PF4-6	Robust Estimation for Multivariate Time Series	461
	<i>Demetrios Kazakos¹ and Sam Makki²</i>	
	¹ University of Idaho, USA, ² University of Toledo, USA	
PF4-7	Simulation of Starting Process and Calculation of Operating Performances of Induction Motor With Compound Cage Rotor	462
	<i>Weili Li¹, Junci Cao¹, Yingli Luo², and Xiaochen Zhang³</i>	
	¹ Harbin Institute of Technology, China, ² North China Electric Power University, China, ³ Harbin University of Science and Technology, China	
PF4-8	Solution of the Tridiagonal Matrix System in ADI-FDTD	463
	<i>Zhiyong Yuan, Tun Li, Jinliang He, Shuiming Chen, Rong Zeng, and Bo Zhang</i>	
	Tsinghua University, China	
PF4-9	Speedup of Nonlinear Iterative Scheme by Utilizing Convergence Characteristics of Newton-Raphson Method and ICCG Method	464
	<i>Yoshifumi Okamoto¹, Koji Fujiwara², and Akihisa Kameari³</i>	
	¹ Advanced Center for Computing and Communication, Japan, ² Okayama University, Japan, ³ Science Solutions International Laboratory, Inc., Japan	

POSTER SESSION PF5
Optimization and Design VI
 May 3, 2006, Wednesday
 13:30 - 15:10

PF5-1	Optimal Placement of a Wall-Tank Magnetic Shunt in a Transformer Using FE Models and a Stochastic-Deterministic Approach	465
	<i>Concepcion Hernandez¹, Marco Arjona¹, and Jonathan Sturgess²</i>	
	¹ Instituto Tecnológico de la Laguna, Mexico, ² Areva T&D, England	
PF5-2	Optimization of Low Voltage Metallized Film Capacitor Geometry	466
	<i>Y. Vuillermet¹, O. Chadebec¹, J. Lupin², A. Saker², G. Meunier¹, and J. Coulomb¹</i>	
	¹ Laboratoire d'Electrotechnique de Grenoble, France, ² Rectiphase-Schneider Electric, France	
PF5-3	Optimization of Magnet Pole of Brushless DC Motor by Experimental Design Method	467
	<i>Young Kwon, Jee Kim, Hyun Yi, and Gwan Park</i>	
	Pusan National University, Korea	

PF5-4	Optimization of Material and Structural Parameters of Nonlinear Stress Control Tubes in Cable Terminations	468
	<i>Le Liu¹, Shuhong Wang¹, Jie Qiu¹, Ruilei Gong¹, Jianguo Zhu², and Youguang Guo²</i>	
	¹ Xi'an Jiaotong University, China, ² University of Technology, Australia	
PF5-5	Optimum Design of TFLM With Constraint to Maximize Thrust Force, Minimize Detent Force for Weight Reduction Using Characteristic Function	469
	<i>Do-Kwan Hong, Byung-Chul Woo, and Do-Hyun Kang</i>	
	Korea Electrotechnology Research Institute, Korea	
PF5-6	Parameter Evaluation of the Equation of the Electrostatic Discharge Current Using Genetic Algorithms as Optimization Tool	470
	<i>Georgios Fotis, Fani Asimakopoulou, Ioannis Gonos, and Ioannis Stathopoulos</i>	
	National Technical University of Athens, Greece	
PF5-7	R-FL-C Model for Design Optimization of PM Generators	471
	<i>A. A. Arkadan, M. A. Mneimneh, and N. Al-Aawar</i>	
	Marquette University, USA	
PF5-8	Shape Design Sensitivity Analysis and Optimization of HVDC Joint Considering Nonlinear Conductivity	472
	<i>Hyang-beom Lee¹, Jeffrey Braunstein², Hyeong-seok Kim², and Kyung Choi³</i>	
	¹ Soongsil University, Korea, ² Chung-Ang University, Korea, ³ Kangwon National University, Korea	
PF5-9	Study of Magnet Shifting for Reduction of Cogging Torque in Permanent Magnet Motors	473
	<i>Xiuhe Wang¹, Yubo Yang¹, Xin Zhang¹, Ran Zhang¹, and Shiyong Yang²</i>	
	¹ Shandong University, China, ² Zhejiang University, China	
PF5-10	The Optimal Design of an Improved Monohedral Magnet for MRI	474
	<i>Junpeng Xie, Yingying Yao, Guangzheng Ni, and Shiyong Yang</i>	
	Zhejiang University, China	
PF5-11	Thrust Optimization of Synchronous Permanent Magnet Planar Motor With Halbach Array by Using Genetic Algorithm	475
	<i>Jianpei Zhou, Rui Huang, Dong-Yeup Lee, and Gyu-Tak Kim</i>	
	Changwon National University, Korea	
PF5-12	Tolerance Allocation of Barrier Shape in Switched Reluctance Motor Based on Stochastic Response Surface Methodology	476
	<i>Sung-Il Kim¹, Jung-Pyo Hong¹, Young-Kyoun Kim², and Ji-Young Lee³</i>	
	¹ Changwon National University, Korea, ² Samsung Electronics Co. Limited, Korea, ³ Korea Electrotechnology Research Institute, Korea	
PF5-13	Topology Optimization Based on Immune Algorithm and Multi-Grid Method	477
	<i>Kota Watanabe, Felipe Campelo, and Hajime Igarashi</i>	
	Hokkaido University, Japan	

PF5-14	Topology Optimization of Magneto-Thermal Systems Considering Eddy Current as Joule Heat	478
	<i>Hokyung Shim¹, Semyung Wang¹, and Kay Hameyer²</i>	
	¹ Gwangju Institute of Science and Technology, Korea, ² RWTH Aachen University, Germany	

PF5-15	Use of Cultural Particle Swarm Optimization for Loney's Solenoids Design.....	479
	<i>Leandro Coelho and Viviana Mariani</i>	
	University of Paraná, Brazil	

POSTER SESSION PF6
Bioelectric Field Computation II
May 3, 2006, Wednesday
13:30 - 15:10

PF6-1	Microscopic Analysis of Energy Conversion in a 5-Phase Permanent Magnet Synchronous Machine	480
	<i>Mahesh Krishnamurthy¹, Babak Fahimi¹, and Steven Pekarek²</i>	
	¹ University of Texas-Arlington, USA, ² Purdue University, USA	

PF6-2	Incorporating the Electrode-Tissue Interface to Cochlear Implant Model.....	481
	<i>Charles Choi and Wei-Dian Lai</i>	
	I-Shou University, Taiwan	

PF6-3	Large-Scale Calculations of Low-Frequency Induced Currents in High-Resolution Human Body Models.	482
	<i>Andreas Barchanski, Markus Clemens, Erion Gjonaj, Herbert Gersem, and Thomas Weiland</i>	
	Institut für Theorie Elektromagnetischer Felder(TEMF), Germany	

PF6-4	Magnetic Field Analysis of the Realistic Head Model Based on Transcranial Magnetic Stimulation.....	483
	<i>Shuo Yang, Qingxin Yang, Yong Chen, Huijuan Hou, Guizhi Xu, and Haiyan Chen</i>	
	Hebei University of Technology, China	

PF6-5	Numerical Formulations to Compute Induced Electromagnetic Fields in the Human Body	484
	<i>L. Bernard¹, N. Burais², and L. Nicolas¹</i>	
	¹ Ecole Central de Lyon, France, ² Université Claude Bernard Lyon, France	

PF6-6	Precise Estimation of Brain Electrical Sources Using Anatomically Constrained Area Source (ACAS) Localization	485
	<i>Chang-Hwan Im¹, Chany Lee², Hyun-Kyo Jung², Ki-Young Jung³, and Soo Yeol Lee⁴</i>	
	¹ Yonsei University, Korea, ² Seoul National University, Korea, ³ SungKyunwan University, Korea, ⁴ Kyung Hee University, Korea	

PF6-7	Reconstruction of Continuous and Focalized Brain Functional Source Images From Electroencephalography	486
	<i>Chang-Hwan Im¹, Kwang-Ok An², Hyun-Kyo Jung², Ki-Young Jung³, and Soo Yeol Lee⁴</i>	
	¹ Yonsei University, Korea, ² Seoul National University, Korea,	
	³ SungKyunwan University, Korea, ⁴ Kyung Hee University, Korea	

POSTER SESSION PF7
Devices and Applications XII
May 3, 2006, Wednesday
13:30 - 15:10

PF7-1	Stray Losses Computation in Power Transformer	487
	<i>L. Susnjic¹, Z. Haznadar², and Z. Valkovic³</i>	
	¹ University of Rijeka, Croatia, ² University of Zagreb, Croatia,	
	³ Polytechnic of Zagreb, Croatia	
PF7-2	Swarm Optimization for Imaging of Corrosion by Impedance Measurements in Eddy Current Test.....	488
	<i>M. Cacciola, S. Calcagno, F. Morabito, and M. Versaci</i>	
	University of Reggio Calabria, Italy	
PF7-3	Synchronous Machine Parameters Estimation Considering the Field Flux Leakage Saturation.....	489
	<i>Xinli Zhang, Yingli Luo, and Liang Meng</i>	
	North China Electric Power University, China	
PF7-4	The Characteristics of Noise and Vibration by Asymmetrical Overhang Effect of Permanent Magnet in BLDC Motor.....	490
	<i>Gyu-Hong Kang¹, Young-Gyu An², and Gyu-Tak Kim²</i>	
	¹ Motor-Net Int. Co. Limited, Korea, ² Changwon National University, Korea	
PF7-5	The Comparison Study of Distributed and Concentrated Winding Types in Interior Permanent Magnet Motor for Integrated Starter Generator	491
	<i>Ji-Young Lee¹, Soon-O Kwon², Jae-Woo Jung², Jung-Pyo Hong², Yang-Su Lim³, and Yoon Hur³</i>	
	¹ Korea Electrotechnology Research Institute, Korea, ² Changwon National University, Korea, ³ Daewoo Precision Industries Co. Ltd., Korea	
PF7-6	A FE Tool for the Electromagnetic Analysis of Slow-Wave Helicoidal Structures in Traveling Wave Tubes	492
	<i>S. Coco¹, A. Laudani¹, G. Pollicino¹, R. Dionisio², and R. Martorana²</i>	
	¹ Univesity of Catania, Italy, ² Galileo Avionica, Italy	
PF7-7	The Influence of Pressure on SF6 Arc With Contact Evaporation.....	493
	<i>Vui Liau, Byeong Lee, Ki Song, and Kyung Park</i>	
	Korean Electrotechnology Research Institute, Korea	

PF7-8 Theoretical and Experimental Demonstration of the Feasibility of Metallic Surface Cracks Detection Using Microwaves Techniques 494
J. Kerouedan¹, P. Quéffélec¹, S. De Blasi¹, A. Le Brun², and P. Talbot¹
¹Université de Bretagne Occidentale, France, ²EDF-R&D/OPP, France

PF7-9 Thin Crack Modeling in ECT With Combined Potential Formulations..... 495
Y. Choua, L. Santandrea, Y. Le Bihan, and C. Marchand
 Laboratoire de Génie Electrique de Paris, France

POSTER SESSION PF8
 Devices and Applications XIII
 May 3, 2006, Wednesday
 13:30 – 15:10

PF8-1 Three-Dimensional Loss Distribution Analysis of an Interior Permanent Magnet Motor Driven by PWM Inverter 496
Yoshihiro Kawase¹, Tadashi Yamaguchi¹, Toshiyuki Yano¹, Satoshi Suzuki¹, Kazuo Ida², Yoshihiro Kataoka², and Akio Yamagiwa³
¹Gifu University, Japan, ²Daikin Industries Limited, Japan, ³Daikin Air-Conditioning And Environmental Laboratory Limited, Japan

PF8-2 Tooth Shape Optimization for Cogging Torque Reduction of Transverse Flux Rotary Motor Using Design of Experiment and Response Surface Methodology 497
Ji-Young Lee¹, Jung-Hwan Chang¹, Do-Hyun Kang¹, Sung-Il Kim², and Jung-Pyo Hong²
¹Korea Electrotechnology Research Institute, Korea, ²Changwon National University, Korea

PF8-3 Topology Optimization of an Interior Permanent Magnet Synchronous Machine Using a Coupled Finite Elements – Genetic Algorithms Technique..... 498
Dorin Iles-Klumpner¹, Milorad Risticvic², Ioan Serban², and Ion Boldea³
¹MACCON GmbH, Germany, ²ebm-papst, Germany, ³University Politehnica of Timisoara, Romania

PF8-4 Torque Calculation Method of Spherical Robotic Wrist Motor 499
Sung Won and Ju Lee
 Hanyang University, South Korea

PF8-5 Transient Simulation and Analysis for Saturated Core High Temperature Superconducting Fault Current Limiter 500
Cuixia Zhao¹, Shuhong Wang¹, Jie Qiu¹, Jianguo Zhu², Youguang Guo², Weizhi Gong³, and Zhengjian Cao³
¹Xi'an Jiaotong University, China, ²University of Technology, Australia, ³Innopower Superconductor Cable Co. Ltd, China

PF8-6 Trigonometry-Based Numerical Method to Compute Nonlinear Magnetic Characteristics in Switched Reluctance Motors..... 501
Xiangdang Xue, Ka-Wai-Eric Cheng, Siu-Lau Ho, and K.F. Kwok
 The Hong Kong Polytechnic University, China

PF8-7 Useful Techniques for Field Analysts in the Design and Optimization of Induction Motors 502
Kent Davey and Ray Zowarka
 University of Texas, USA

PF8-8 Winding Arrangement Effects on Electromagnetic Forces and Short-Circuit Reactance Calculation in Power Transformers via Numerical and Analytical Methods 503
M. Ardebili¹, Karim Abbaszadeh¹, S. Jamali¹, and Hamid Toliyat²
¹K. N. Toosi University of Technology, Iran, ²Texas A&M University, USA

ORAL SESSION OF1
Material Modeling
 May 3, 2006, Wednesday
 15:30 - 17:10

OF1-1 Visualization of Chaotic System in Parallel Ferroresonant Circuit by Chua-Type Magnetization Model 504
Yuji Tanaka¹, Hisashi Endo², Seiji Hayano¹, Yoshifuru Saito¹, and Yoshifuru Saito¹
¹Hosei University, Japan, ²Tohoku University, Japan

OF1-2 An Energy-Based Model of Magnetostriction With Hysteresis 505
François Henrotte and Kay Hameyer
 RWTH Aachen University, Germany

OF1-3 Analysis of Hysteresis Torque in a High-Speed Induction Machine 506
Emad Dlala and Antero Arkkio
 Helsinki University of Technology, Finland

OF1-4 Calculation of AC Losses in Bulk HTS Rods From the Combined Action of Transport Current and External Field 507
Yong-Bae Jung and Sheppard Salon
 Rensselaer Polytechnic Institute, USA

OF1-5 Possible Extension of the Radial Vector Model for Magnetic Hysteresis 508
Ermanno Cardelli¹, Edward Della Torre², and Antonio Faba¹
¹Perugia University, Italy, ²The George Washington University, USA

ORAL SESSION OF2
Devices and Applications
 May 3, 2006, Wednesday
 15:30 - 17:10

OF2-1 Virtual Air Gap Length Computation With the Finite Element Method 509
Adalbert Konrad¹ and Jean F. Brudny²
¹Universtiy of Toronto, Canada, ²University of Artois, France

OF2-2	Built-in Field Controlled Permanent Magnet Machines - Eddy Currents Distribution in the Field Circuits	510
	<i>Ifrim Costin</i> DRS-Electric Power Technologies, USA	
OF2-3	Design of Salient Structures Using Parameterized Finite Element Models.....	511
	<i>Dave Rodger¹, Hong Cheng Lai¹, Simone Viana¹, and Seamus Garvey²</i> ¹ University of Bath, UK, ² University of Nottingham, UK	
OF2-4	Impact of Uncertainties in MagnetoEncephalography Inverse Problem.....	512
	<i>Fabrizio Ferraioli¹, Alessandro Formisano², and Raffaele Martone²</i> ¹ Ansaldo Ricerche, Italy, ² Seconda Universita di Napoli, Italy	
OF2-5	A Combined Method for Analysis of High Speed Linear Induction Machines	513
	<i>Mehran Mirzaei¹, Mahmood Joorabian², and Hamid Toliyat³</i> ¹ Amirkabir University of Technology, Iran, ² Chamran University of Ahwaz, Iran, ³ Texas A&M University, USA	
	Author Index.....	515

CLOSING CEREMONY AND POSTER PAPER AWARDS
May 3, 2006, Wednesday
17:10 - 17:30
