

2006 Securecomm and Workshops

28 August - 1 September 2006

Baltimore, MD

TABLE OF CONTENTS

DaTA – Data-Transparent Authentication Without Communication Overhead	1
<i>Songqing Chen, Shiping Chen, Xinyuan Wang, Sushil Jajodia</i>	
A Double Horizon Defense Design for Robust Regulation of Malicious Traffic	11
<i>Ying Xu, Roch Guerin</i>	
Leveraging IPsec for Mandatory Per-Packet Access Control	22
<i>Trent Jaeger, David H. King, Kevin R. Butler, Serge Hallyn, Joy Latten, Xiaolan Zhang</i>	
Preventing Cross Site Request Forgery Attacks.	31
<i>Nenad Jovanovic, Engin Kirda, Christopher Kruegel</i>	
Towards More Efficient Distance Bounding Protocols for Use in Sensor Networks	41
<i>Catherine Meadows, Paul Syverson, LiWu Chang</i>	
Discount Anonymous On Demand Routing for Mobile Ad hoc Networks	46
<i>Liu Yang, Markus Jakobsson, Susanne Wetzl</i>	
Message Dropping Attacks in Overlay Networks: Attack Detection and Attacker Identification	56
<i>Liang Xie, Sencun Zhu</i>	
Implementation and Performance Evaluation of EAP-TLS-KS	66
<i>Jared Cordasco, Ulrike Meyer, Susanne Wetzl</i>	
A Distributed Stealthy Coordination Mechanism for Worm Synchronization	78
<i>Gaurav Kataria, Gaurav Anand, Rudolph Araujo, Ramayya Krishnan, Adrian Perrig</i>	
On Filtering of DDoS Attacks Based on Source Address Prefixes	86
<i>Gary Pack, Jaeyoung Yoon, Eli Collins, Cristian Estan</i>	
Reputation-Based Algorithm for Managing Trust in File Sharing Networks	98
<i>Lara Srour, Ayman Kayssi, Ali Chehab</i>	
Non-Invasive Methods for Host Certification	108
<i>Patrick Traynor, Michael Chien, Scott Weaver, Boniface Hicks, Patrick McDaniel</i>	
Secure Real-time User Preference Collection for Broadcast Scheduling	118
<i>Xuhua Ding, Shuhong Wang, Baihua Zheng</i>	
Towards Communal Governed Transactions Among Decentralized Trading Agents	128
<i>Avinanta Tarigan</i>	
Towards Cooperative Self-Protecting Mobile Devices using Trustful Relationships	137
<i>Stephan Groß</i>	
An Infrastructure for Gaining Trust in Context Information	144
<i>Frank Fransen, Eddy Olk, Sven Lachmund, Laurent Bussard</i>	
A Flexible Approach to Intrusion Alert Anonymization and Correlation	154
<i>Dingbang Xu, Peng Ning</i>	
Denial of Service Attacks and Defenses in Decentralized Trust Management	164
<i>Jiangtao Li, Ninghui Li, XiaoFeng Wang, Ting Yu</i>	
A Framework for Identifying Compromised Nodes in Sensor Networks	176
<i>Qing Zhang, Ting Yu, Peng Ning</i>	
An Intelligent Infrastructure Strategy to Improving the Performance and Detection Capability of Intrusion Detection Systems.	186
<i>Emmanuel Hooper</i>	
Protecting Against Distributed Denial of Service (DDoS) Attacks Using Distributed Filtering.	201
<i>Jonathan Trostle</i>	
Effective Detection of Active Worms with Varying Scan Rate	212
<i>Wei Yu, Xun Wang, Dong Xuan, David Lee</i>	
Exploiting MMS Vulnerabilities to Stealthily Exhaust Mobile Phone’s Battery	222
<i>Radmilo Racic, Denys Ma, Hao Chen</i>	
In-Band Wormholes and Countermeasures in OLSR Networks	232
<i>Peter Kruus, Dan Sterne, Richard Gopaul, Michael Heyman, Brian Rivera, Peter Budulas,</i> <i>Brian Luu, Tommy Johnson, Natalie Ivanic, Geoff Lawler</i>	
Enabling Confidentiality in Content-Based Publish/Subscribe Infrastructures.	243
<i>Costin Raiciu, David S. Rosenblum</i>	
Enhancing Privacy Preservation of Anonymous Location Sampling Techniques in Traffic Monitoring Systems.	254
<i>Baik Hoh, Marco Gruteser, Hui Xiong, Ansa Alrabady</i>	
An Identity-based Ring Signature Scheme with Enhanced Privacy	257
<i>Chandana Gamage, Ben Gras, Bruno Crispo, Andrew S Tanenbaum</i>	

Reputation-based Trust-Aware Recommender System	262
<i>Sukunjal Kitisin, Clifford Neuman</i>	
TOPO: A Topology-aware Single Packet Attack Traceback Scheme	269
<i>Linfeng Zhang, Yong Guan</i>	
Enhancing Benign User Cooperation in the Presence of Malicious Adversaries in Ad Hoc Networks	279
<i>George Theodorakopoulos, John S. Baras</i>	
Detecting the Sybil Attack in Mobile Ad hoc Networks	285
<i>Chris Piro, Clay Shields, Brian Neil Levine</i>	
An Architecture for an Email Worm Prevention System	296
<i>Mohamed Mahmoud Taibah, Ehab Al-Shaer, Raouf Boutaba</i>	
Mithril: Adaptable Security for Survivability in Collaborative Computing Sites	305
<i>Jim Basney, Patrick Flanigan, Jin Heo, Himanshu Khurana, Joe Muggli, Meenal Pant, Adam Slagell, Von Welch</i>	
Distributed Authentication of Program Integrity Verification in Wireless Sensor Networks	312
<i>Katharine Chang, Kang G. Shin</i>	
On Mobile Viruses Exploiting Messaging and Bluetooth Services	322
<i>Abhijit Bose, Kang G. Shin</i>	
Provably Secure Ubiquitous Systems: Universally Composable RFID Authentication Protocols	332
<i>Mike Burmester, Tri van Le, Breno de Medeiros</i>	
MOBIWORP: Mitigation of the Wormhole Attack in Mobile Multihop Wireless Networks	341
<i>Issa Khalil, Saurabh Bagchi, Ness B. Shroff</i>	
Work in Progress: Streamlined IT Risk Management through a Micro Risk Management System (μ RMS)	353
<i>Timothy Wright, Michael J. Chapple, Robert Winding</i>	
An Intelligent Infrastructure Strategy to Improving the Performance and Detection Capability of Intrusion Detection Systems	355
<i>Emmanuel Hooper</i>	
Work in Progress: Bro-LAN Pervasive Network Inspection and Control for LAN Traffic	365
<i>Nicholas Weaver, Vern Paxson, Robin Sommer</i>	
Sensor Networks that Are Provably Resilient	367
<i>Roberto Di Pietro, Luigi V. Mancini, Alessandro Mei, Alessandro Panconesi, Jaikumar Radhakrishnan</i>	
Work in Progress - Tracking Correlated Attacks in Enterprise Intranets through Lattices	377
<i>Sule Simsek</i>	
Packet Coding for Strong Anonymity in Ad Hoc Networks	379
<i>Imad Aad, Claude Castelluccia, Jean-Pierre Hubaux</i>	
System Anomaly Detection: Mining Firewall Logs	389
<i>Robert Winding, Timothy Wright, Michael Chapple</i>	
Work in Progress: Who is Watching You? Video Conferencing Security	394
<i>Navid Jam, Elliot Proebstel</i>	
A Unified Framework for Trust Management	396
<i>Weiliang Zhao, Vijay Varadharajan, George Bryan</i>	
A Customizable Reputation-based Privacy Assurance System using Active Feedback	404
<i>Stephen Crane, Marco Casassa Mont</i>	
Flow Anomaly Detection in Firewalled Networks	412
<i>Michael J. Chapple, Timothy E. Wright, Robert M. Winding</i>	
Outsourcing Security Analysis with Anonymized Logs	418
<i>Jianqing Zhang, Nikita Borisov, William Yurcik</i>	
S-DV: A new approach to Secure Distance Vector routing protocols	427
<i>Abdelaziz Babakhouya, Yacine Challal, Abdelmadjid Bouabdallah, Saïd Gharout</i>	
Computing with Trust: Definition, Properties, and Algorithms	437
<i>Jennifer Golbeck</i>	
A History-Based Framework to Build Trust Management Systems	444
<i>Samuel Galice, Véronique Legrand, Marine Minier, John Mullins, Stéphane Ubéda</i>	
Passive Wireless Host Detection Using Local RTT Timing Characteristics on an Enterprise Network	451
<i>Chad D. Mano, David A. Cieslak</i>	
Efficient visualization of change events in enterprise networks	457
<i>Andrew Stewart</i>	
Providing Tunable Security Services: An IEEE 802.11i Example	463
<i>Stefan Lindskog, Anna Brunstrom, Zoltán Faigl, Katalin Tóth</i>	
Wavelet-based Real Time Detection of Network Traffic Anomalies	473
<i>Chin-Tser Huang, Sachin Thareja, Yong-June Shin</i>
