IEEE Symposium on Computational Intelligence in Multicriteria Decision Making (MCDM'07)

Multi-Criteria Decision-Making: The Intersection of Search, Preference Tradeoff, and Interaction Visualization Processes	1
Piero Bonissone	
Fuzzy Multi-Objective Mission Flight Planning in Unmanned Aerial Systems	2
Paul Wu, Reece Clothier, Duncan Campbell and Rodney Walker	
UAV Swarm Mission Planning and Routing using Multi-Objective Evolutionary Algorithms	10
Gary Lamont, James Slear and Kenneth Melendez	
Tools and Techniques for Managing Many-Criteria Decision-Making	21
Peter Fleming	
MCDM Techniques Selection Approaches: State of the Art	22
Elena Kornyshova and Camille Salinesi	
Modeling Vague Data with Genetic Fuzzy Systems under a Combination of Crisp and Imprecise Criteria	30
Luciano Sanchez, Ines Couso and Jorge Casillas	
Robust Basis of Interval Multiobjective Linear and Quadratic Programming.....	38
Masaaki Ida	
Relation between Pareto-Optimal Fuzzy Rules and Pareto-Optimal Fuzzy Rule Sets	42
Hisao Ishibuchi, Isao Kuwajima and Yusuke Nojima	
Multiobjective Genetic Algorithm for Extracting Subgroup Discovery Fuzzy Rules	50
Pedro Gonzalez, Maria Jose del Jesus and Francisco Herrera	
Fuzzy Optimization with Multi-Objective Evolutionary Algorithms: a Case Study	58
Gracia Sanchez, Fernando Jimenez and Pandian Vasant	
Strategy Generation Under Uncertainty Using Bayesian Networks and Black Box Optimization	65
Eli Faulkner	
An interactive fuzzy satisficing method through particle swarm optimization for multiobjective nonlinear programming problems	71
Takeshi Matsui, Masatoshi Sakawa, Kosuke Kato, Takeshi Uno and Koichi Tamada	
Interactive fuzzy programming based on a probability maximization model using genetic algorithms for two-level integer programming problems involving random variable coefficients	77
Kosuke Kato and Masatoshi Sakawa	
Decision Making under Subjective Uncertainty	85
Fabio Campos, Andre Neves and Fernando Campello de Souza	
Variants of Differential Evolution for Multi-Objective Optimization.....	91
Karin Zielinski and Rainer Laur	

Managing Population Diversity Through the Use of Weighted Objectives and Modified Dominance: An Example from Data Mining	99
Alan Reynolds and Beatriz de la Iglesia	
Use of Radial Basis Functions and Rough Sets for Evolutionary Multi-Objective Optimization	107
Luis V. Santana-Quintero, Victor Serrano-Hernandez, Carlos A. Coello Coello, Alfredo Hernandez-Diaz and Julian Molina	
Deciding on the Ideal Channel Coefficients in Multi-Channel Manufacturing	115
Feristah Ozcelik	
Nonlinear dynamic system identification based on multiobjectively selected RBF networks	122
Nobuhiko Kondo, Toshiharu Hatanaka and Katsuji Uosaki	
Improving Classifier Fusion Using Particle Swarm Optimization	128
Kalyan Veeramachaneni, Lisa Osadciw, Kai Goebel and Yan Weizhong	
A Review of Two Industrial Deployments of Multi-criteria Decision-making Systems at General Electric	136
Raj Subbu, Piero Bonissone, Srinivas Bollapragada, Kete Chalermkraivuth and Neil Eklund	
Development of an Integrated Decision Support System to Aid the Cognitive Activities of Operators in Main Control Rooms of Nuclear Power Plants	146
Seung Jun Lee, Kun Mo and Poong Hyun Seong	
A New MCDM Approach to Solve Public Sector Planning Problems	153
Pervin Kaplan and S. Ranji Ranjithan	
Tradeoffs on the Efficient Frontier of Network Disruption Attacks	160
Mark Carroll, John Josephson and James Russell	
Multi-criteria Set Partitioning for Portfolio Management: A Visual Interactive Method	166
Raj Subbu, Gregory Russo, Kete Chalermkraivuth and Jose Celaya	
A Proposal of Visualization of Multi-Objective Pareto Solutions -Development of Mining Technique for Solutions-	172
Daisuke Yamashiro, Tomohiro Yoshikawa and Takeshi Furuhashi	
Interactive Utility Maximization in Multi-Objective Vehicle Routing Problems: A "Decision Maker in the Loop"-Approach	178
Martin Josef Geiger, Wolf Wenger and Walter Habenicht	
Exploring Robustness of Plans for Simulation-Based Course of Action Planning: A Framework and an Example	185
B. Chandrasekaran and Mark Goldman	
The Interactive Pareto Iterated Local Search (iPILS) Metaheuristic and its Application to the Biobjective Portfolio Optimization Problem	193
Martin Josef Geiger	
ISM Band Antenna Design Based on Fuzzy MCDM Selection Technique	200
Sai Ho Yeung, Kim Fung Man and Wing Shing Chan	

Prediction of Stock Price Movements Based on Concept Map Information	205
Ankit Soni, Nees Jan van Eck and Uzay Kaymak	
Multi-Criteria Identification of a Controllable Descending System	212
Vladimir Dobrokhodov and Roman Statnikov	
Fuzzy Methods for Constructing Multi-Criteria Decision Functions	220
Ronald Yager	
Efficient Decision Making with Interactions Between Goals	221
Rudolf Felix	
Multicriterion Decision Making with Dependent Preferences	227
Wynn Stirling, Richard Frost, Matthew Nokleby and Yabing Luo	
Multi-criterial Decision-Making and the Cognitive Architecture of Problem Solving	235
Balakrishnan Chandrasekaran	
An interactive approach to integer linear vector optimization problems using enumerative cuts	236
Walter Habenicht	
Stackelberg solutions to stochastic two-level linear programming problems	240
Hideki Katagiri, Ichiro Nishizaki, Masatoshi Sakawa and Kosuke Kato	
Finding Representative Nondominated Points in Multiobjective Linear Programming	245
Lizhen Shao and Matthias Ehrgott	
On the Convergence of Multi-Objective Descent Algorithms	253
Martin Brown and Nicky Hutaaruk	
A Multi-Objective Genetic Algorithm for Optimizing Highway Alignments	261
Manoj Jha and Avijit Maji	
A Decision Making Framework for Dressing Consultant	267
Ching-I Cheng and Damon Shing-Min Liu	
Automated Risk Classification and Outlier Detection	272
Naresh Iyer and Piero Bonissone	
Obtaining robust decisions under uncertainty by sensitivity analysis on OWA operator	280
Mahdi Zarghaami, Reza Ardakanian and Ferenc Szidarosky	
Fuzzy multiple attribute decision making with eight types of preference information on alternatives	288
Quan Zhang, Wang Yucai and Yang Yuxian	
The Application of Agent-Based Co-Evolutionary System with Predator-Prey Interactions to Solving Multi-Objective Optimization Problems	294
Rafal Drezewski and Leszek Siwik	
Solving the Molecular Sequence Alignment Problem with Generalized Differential Evolution 3 (GDE3)	302
Saku Kukkonen, Sujit Jangam and Nirupam Chakraborti	
Local Dominance Including Control of Dominance Area of Solutions in MOEAs	310
Hiroyuki Sato, Hernan Aguirre and Kiyoshi Tanaka	

Two Decades Of Evolutionary Multi-Criterion Optimization: A Glance Back And A Look Ahead.....	318
Eckart Zitzler	
Combining Aspiration Level Methods in Multi-objective Programming and Sequential Approximate Optimization using Computational Intelligence.....	319
Hirotaka Nakayama and Yeboon Yun	
Playing in the Objective Space: Coupled Approximators for Multi-Objective Optimization.....	325
Harold Soh, Yew Soon Ong, Mohamed Salahuddin, Terence Hung and Bu Sung Lee	
Crowding Population-based Ant Colony Optimisation for the Multi-objective Travelling Salesman Problem.....	333
Daniel Angus	
Visualization Tools for Multicriteria Analysis of the Prototype Improvement Problem.....	341
Roman Statnikov, Kivanc Anil, Alex Bordetsky and Alexander Statnikov	
A Spatial Classification Model for Multicriteria Analysis.....	348
Ana Del Amo, Luis Garmendia, Daniel Gomez and Javier Montero	
A Two-level Information Filtering Model in Generating Warning Information.....	354
Jun Ma, Jie Lu and Guangquan Zhang	
A Multi-Objective Solution Applying MOEA in Optical Networks.....	360
Yezid Donoso, Carolina Alvarado, Alfredo Perez and Ivan Herazo	
An Application of Interactive Fuzzy Satisficing Approach with Particle Swarm Optimization for Multiobjective Emergency Facility Location Problem with A-distance.....	368
Takeshi Uno, Kato Kosuke and Katagiri Hideki	
Fuzzy Decision Support for Service Selection in E-Business Environments.....	374
Stefan Schmidt, Elizabeth Chang, Tharam Dillon and Robert Steele	
Use of the WFG Toolkit and PISA for Comparison of MOEAs.....	382
Lucas Bradstreet, Luigi Barone, Lyndon While, Simon Huband and Philip Hingston	
Determination of Pruned Pareto Sets for the Multi-Objective System Redundancy Allocation Problem.....	390
Sadan Kulturel-Konak and David W. Coit	
Stability of Optimal Solutions: Multi- and Single-Objective Approaches.....	395
Alex Podgaets and Wubbo Ockels
