

2007 IEEE Symposium on Computational Intelligence in Security and Defense Applications

**Honolulu, HI
1-5 April 2007**

**IEEE Catalog Number:
ISBN:**

**07EX1566
1-4244-0700-1**

IEEE Symposium on Computational Intelligence in Security and Defense Applications (CISDA 2007)

Face Recognition using Gaborface-based 2DPCA and (2D)²PCA Classification with Ensemble and Multichannel Model.....	1
Lin Wang, Yongping Li, Chengbo Wang and Hongzhou Zhang	
Toward Open-Set Text-Independent Speaker Identification in Tactical Communications	7
Matt Wolf, WonKyung Park, Jae Oh and Misty Blowers	
PAPER WITHDRAWN	15
The PSO-Based Adaptive Window for People Tracking	23
Yuhua Zheng and Yan Meng	
ATR Applications in Military Missions	30
Ted Wong	
Solving Multicommodity Capacitated Network Design Problems using a Multiobjective Evolutionary Algorithm	33
Mark Kleeman, Gary Lamont, Kenneth Hopkinson and Scott Graham	
Computational Verification of System Architectures	42
Abbas Zaidi and Alexander Levis	
Next Generation End-To-End Logistics Decision Support Tools. Evolutionary Logistics Planning	50
Beth DePass	
Face Recognition System Using Ant Colony Optimization-Based Selected Features	57
Hamidreza Rashidy Kanan, Karim Faez and Mehdi Hosseinzadeh	
Improved Missile Route Planning and Targeting Using Game-Based Computational Intelligence.....	63
Kenneth Doris and David Silvia	
A Review of Intelligent Systems Software for Autonomous Vehicles	69
Lyle Long, Scott Hanford, Oranuj Janrathitikarn, Greg Sinsley and Jodi Miller	
Computational Intelligence Support for Smart Queries and Adaptive Data.....	77
Trevor Martin, Ben Azvine and Yun Shen	
A Template-based Method for Force Group Classification in Situation Assessment	85
Chai Huimin and Wang Baoshu	
Computationally Derived Models of Adversary Organizations	92
Smriti Kansal, Ashraf AbuSharekh and Alexander Levis	
A Temporal Risk Assessment Framework for Planning A Future Force Structure.....	100
Michael Barlow, Ang Yang and Hussein Abbass	

Algorithmic Tools for Adversarial Games: Intent Analysis Using Evolutionary Computation	108
Tasha Vanesian, Ken Kreutz-Delgado, George Burgin and David Fogel	
Course of Action Analysis in a Cultural Landscape Using Influence Nets	116
Lee Wagenhals and Alexander Levis	
Towards Automating Airspace management	124
Glenn Taylor, Brian Stensrud, Susan Eitelman, Cory Dunham and Echo Harger	
Autonomous Visual Self-localization in Completely Unknown Environment using Evolving Fuzzy Rule-based Classifier	131
Xiaowei Zhou and Plamen Angelov	
An Intelligent Controller for Collaborative Unmanned Air Vehicles	139
Gregory Sinsley, Jodi Miller, Lyle Long, Brian Geiger and Albert Niessner	
The Automation of Combat Decision Processes in the Simulation Based Operational Training Support System	145
Andrzej Najgebauer, Ryszard Antkiewicz, Wojciech Kulas, Dariusz Pierzchala and Jaroslaw Rulka	
Automatically Evading IDS Using GP Authored Attacks	153
Gunes Kayacik, Nur Zincir-Heywood and Malcolm Heywood	
A Cognitive Approach to Intrusion Detection	161
David Benjamin	
Detection of Unknown Computer Worms Activity Based on Computer Behavior using Data Mining	169
Robert Moskovitch, Ido Gus, Shay Pluderman, Dima Stopel, Chanan Glezer, Yuval Shahar and Yuval Elovici	
Anomaly Detection for Application Level Network Attacks Using Payload Keywords	178
Like Zhang and Gregory White	
Intrusion Detection Model Based On Particle Swarm Optimization and Support Vector Machine	186
Surat Srinoy	
Use of Trust Vectors for CyberCraft and the Limits of Usable Data History for Trust Vectors	193
Michael Stevens and Paul Williams	
Architectural Design and Complexity Analysis of Large-Scale Cortical Simulation on a Hybrid Computing Platform	201
Qing Wu, Qinru Qiu, Richard Linderman, Daniel Burns, Michael Moore and Dennis Fitzgerald	
Towards an Information Asset-Based Defensive Cyber Damage Assessment Process	206
Michael Grimaila and Larry Fortson	
A Comparison Between Signature and GP-Based IDSs for Link Layer Attacks on WiFi Networks	213
Adetokunbo Makanju, Patrick LaRoche and Nur Zincir-Heywood
