

2007 IEEE Electric Ship Technologies Symposium

**Arlington, VA
21-23 May, 2007**

IEEE Catalog Number:
ISBN:

07EX1668
1-4244-0946-2

TABLE OF CONTENTS

Plenary 1 “Electric Ship Total System Engineering”

Moderator: C. Hodge, BMT Defence Services, UK/US

| | |
|--|---|
| Sizing Power Generation and Fuel capacity of the All-Electric Warship | 1 |
| <i>Norbert H. Doerry</i> | |

| | |
|--|---|
| Integrated Electric Power and Propulsion System on Land – An Overview | 7 |
| <i>M. Benatmane and Ralph Maltby</i> | |

| | |
|--|----|
| Impact of Marine Power System Architectures on IFEP Vessel Availability and Survivability | 14 |
| <i>J.D. Schuddebeurs, C.D. Booth, G.M. Burt and J.R. McDonald</i> | |

P1 “Ship Integration”

Chair: D. Clayton, NavSea 05

| | |
|---|----|
| Performance Metrics for Electric Warship Integrated Engineering Plant Battle Damage Response | 22 |
| <i>Aaron M. Cramer, Scott D. Sudhoff and Edwin L. Zivi</i> | |

| | |
|--|----|
| U.S.S. Makin Island: Simulation-Based Analysis and its role in Electric-Plant Control System Design | 30 |
| <i>J. Turso, W. Ainsworth, L. Dusang, D. Miller and L. Smith</i> | |

| | |
|---|----|
| Large-Signal Stability Analysis in Power Systems with a Synchronous Generator Connected to a Large Motor Drive | 42 |
| <i>Sebastian Rosado, Rolando Burgos, Fred Wang and Dushan Boroyevich</i> | |

| | |
|---|----|
| Impedance Identification of Integrated Power System Components using Recurrent Neural Networks | 48 |
| <i>Peng Xiao, Ganesh K. Venayagamoorthy and Keith A. Corzine</i> | |

T1 “Propulsion”

Chair: Capt. N. Doerry, USN

| | |
|---|----|
| The Reduction of Simulation Software Execution Time for Models of Integrated Electric Propulsion Systems through Partitioning and Distribution | 53 |
| <i>Paul T. Norton, Peter Deverill, Paul Casson, Malcolm Wood, Graham Dudgeon and Andrew Bennett</i> | |

| | |
|--|----|
| Modeling and Simulation of Electric Propulsion Systems for All-Electric Cruise Liners | 60 |
| <i>S. Castellan, R. Menis, M. Pigani, G. Sulligoi and A. Tassarolo</i> | |

| | |
|--|----|
| Multi-Objective Design Optimisation of Submarine Electric Drive Systems | 65 |
| <i>Benjamin A. Skinner, Patrick R. Palmer and Geoffrey T. Parks</i> | |

| | |
|--|----|
| Suppression of the Thrust Loss for the Maximum Thrust Operation in the Electric Propulsion Ship | 72 |
| <i>So-Yeon Kim, Young-Doo Yoon and Seung-Ki Sul</i> | |

| | |
|--|----|
| Modelling and Analysis of Electro-Mechanical Interactions between Prime-Mover and Load in a Marine IFEP System | 77 |
| <i>I.M. Elders, P.J. Norman, J.D. Schuddebeurs, C.D. Booth, G.M. Burt, J.R. McDonald, J. Apsley, M. Barnes, A. Smith, S. Williamson, S. Loddick and I. Myers</i> | |

T2 “Design Tools”

Chair: P. Chapman, University of Illinois

| | |
|--|------------|
| Software in Maritime: Cost efficient Quality Management and Control | 85 |
| <i>Torbjørn Skramstad, Lars Bratthall, Egil Johansen and Asgeir Torstensen</i> | |
| Improved System Operational Availability (Ao) through Autonomous Data Transfer Analysis | 90 |
| <i>Dong Shao, David VanBuskirk, Roger Rosenberger and Paul Kessel</i> | |
| Dynamic Simulation based Analysis of a New Load Shedding Scheme for a Notional Destroyer Class Shipboard Power System | 95 |
| <i>Z. Ding, S.K. Srivastava, D.A. Cartes and S. Suryanarayanan</i> | |
| Modeling and Testing of Protection Devices for SPS using MATLAB/Simulink and VTB | 103 |
| <i>Yujie Zhang, Jimena L. Bastos, Noel N. Schulz and Daxa Patel</i> | |
| Graph Trace Analysis based Shipboard HM&E System Priority Management and Recovery Analysis | 109 |
| <i>D.L. Kleppinger, K.J. Russell and R.P. Broadwater</i> | |

P2 “Standards”

Chair: M. Islam, Northrop Grumman Ship

| | |
|--|------------|
| Meeting Harmonic Limits on Marine Vessels | 115 |
| <i>I.C. Evans, A.H. Hoevenaars and P. Eng</i> | |
| Insulated Bus Pipe (IBP) for Shipboard Applications | 122 |
| <i>Richard Worth, Ruth H. Pater, Moni Islam and Charles Smith</i> | |
| Standard Tools for Hardware-in-the-Loop (HIL) Modeling and Simulation | 130 |
| <i>R. McNeal and M. Belkhat</i> | |
| ABS Naval Vessel Rules (NVR) for Mission Critical Networks, Software Development, and Safety Critical Control Systems | 138 |
| <i>Mike Roa</i> | |

T3 “Materials and Components”

Chair: S. Beermann-Curtin, DARPA

| | |
|--|------------|
| 270 kVA Solid State Transformer based on 10 kV SiC Power Devices | 145 |
| <i>Tiefu Zhao, Liyu Yang, Jun Wang and Alex Q. Huang</i> | |
| Evolutionary Design of Electromagnetic and Electromechanical Devices | 150 |
| <i>B.N. Cassimere, R.R. Chan, J. Cale, A.M. Cramer and S.D. Sudhoff</i> | |
| A Diode Rectifier with a Special Coupled Reactor and Additional Active Power Filter in the Marine Local Power Network Supply Conditions | 158 |
| <i>Piotr Mysiak, Ryszard Strzelecki and Daniel Wojciechowski</i> | |
| Aging of High Voltage Cables by Switching Impulse | 165 |
| <i>S. Grzybowski, P. Trnka and J.C. Fulper</i> | |

T4 “Power Systems Reconfiguration”

Chair: S. Suryanarayanan, Florida State

| | |
|--|------------|
| Distributed Approaches for Determination of Reconfiguration Algorithm Termination | 169 |
| <i>Pinak Tulpule, Karl Schoder, Ali Feliachi and Hong-Jian Lai</i> | |

| | |
|---|------------|
| Models for Optimal Dynamic Reconfiguration and Simulation of Ship Power Systems in SIMULINK with Stateflow | 175 |
| <i>Edoe Mensah, Harry Kwatny, Dagmar Niebur, Jean-Etienne Dongmo, Gaurav Bajpai and Carole Teolis</i> | |
| Self-Reconfigurable Electric Power Distribution System using Multi-Agent Systems | 180 |
| <i>Janeth G. Gomez-Gualdrón, Miguel Vélez-Reyes and Luis J. Collazo</i> | |
| Perspectives on Power System Reconfiguration for Shipboard Applications | 188 |
| <i>Keerthi C. Nagaraj, Johnson Carroll, Thomas Rosenwinkel, Ari Arapostathis, Mack Grady and Edward J. Powers</i> | |
| Practical Considerations in Implementing Shipboard Power System Reconfiguration Control Schemes | 196 |
| <i>Michael Shasteen, Kent Davey, Raul Longoria and William Shutt</i> | |

P3 “Protection”

Chair: *P. Norton, MOD UK*

| | |
|--|------------|
| Circuit Breaker Technologies for Advanced Ship Power Systems | 201 |
| <i>Slobodan Krstic, Edward L. Wellner, Ashish R. Bendre and Boris Semenov</i> | |
| State Estimation and Fast Fault Detection for Ship Electrical Systems | 209 |
| <i>George L. Kusic</i> | |
| Experimental Evaluation of Lightning Protection Zone Used on Ship | 215 |
| <i>S. Grzybowski</i> | |
| Overcurrent Protection in DC Zonal Shipboard Power Systems using Solid State Protection Devices | 221 |
| <i>Mesut E. Baran, Sercan Teleke and Subhasish Bhattacharya</i> | |
| An Adaptive Protection Scheme for Shipboard Power System | 225 |
| <i>Oluwaseun A. Amoda and Noel N. Schulz</i> | |

T5 “Motors”

Chair: *S. Sudhoff, Purdue University*

| | |
|--|------------|
| Coupled Field Analysis Needs in the Design of Submersible Electric Motors | 231 |
| <i>Shehab Ahmed and Hamid A. Toliyat</i> | |
| Application of a Time-Frequency Algorithm for Adaptive Estimation of Transfer Function of a Notional High-Temperature Superconducting Motor | 238 |
| <i>N. Senroy, S. Suryanarayanan, M. Steurer and S.L. Woodruff</i> | |
| High Frequency Modeling of PM Synchronous Machine for use in Integrated Motor Drive | 245 |
| <i>O.A. Mohammed, S. Ganu, N. Abed, Z. Liu and S. Liu</i> | |
| Modeling and Characterization of Induction Motor Internal Faults using Finite Element and Discrete Wavelet Transform | 250 |
| <i>O.A. Mohammed, N.Y. Abed and S.Ganu</i> | |

T6 “Analytical Tools”

Chair: *A. Monti, University of South Carolina*

| | |
|---|------------|
| Magnetic Equivalent Circuit Simulations of Electrical Machines for Design Purposes | 254 |
| <i>Marco Amrhein and Philip T. Krein</i> | |
| Sequential Experimental Design based Modeling of a Notional All-Electric Ship AC/DC Conversion System for Sensitivity and Uncertainty Analysis | 261 |
| <i>J. Langston, A. Martin, J. Simpson, M. Steurer, N. Senroy, S. Suryanarayanan and S.L. Woodruff</i> | |

| | |
|--|-----|
| Methods of Optimal Lyapunov Function Generation with Application to Power Electronic Converters and Systems | 267 |
| <i>Charles J. Sullivan, Scott D. Sudhoff, Edwin L. Zivi and Stanislaw H. Zak</i> | |
| Out-of-Core LU Decomposition on a Multiple-DSP Platform | 275 |
| <i>Guanglei Wang, Antonello Monti and Gang Quan</i> | |
| Plenary 2 “DC Power Systems” | |
| <i>Chair: T. Ericson, ONR</i> | |
| Bus Selection in Multibus DC Power Systems | 281 |
| <i>Robert S. Balog and Philip T. Krein</i> | |
| DC Link Stability Design Tool | 288 |
| <i>R. McNeal and M. Belkhat</i> | |
| DC Protection on the Electric Ship | 294 |
| <i>Hymiar Hamilton and Noel N. Schulz</i> | |
| P4 “Power Quality” | |
| <i>Chair: P. Cho, ONR Asia Systems</i> | |
| Electric Ship Surge Environment | 301 |
| <i>Ronald W. Hotchkiss and Andrea T. Haa</i> | |
| Voltage Dips in Ship Systems | 309 |
| <i>J. Prousalidis, E. Styvaktakis, E. Sofras, I.K. Hatzilau and D. Muthumuni</i> | |
| Investigating the Impact of Pulsed Power Charging Demands on Shipboard Power Quality | 315 |
| <i>M. Steurer, M. Andrus, J. Langston, L. Qi, S. Suryanarayanan, S. Woodruff and P. Ribeiro</i> | |
| Improving Power Quality in All Electric Ships using a Voltage and VAR Integrated Regulator | 322 |
| <i>Vittorio Arcidiacono, Roberto Menis and Giorgio Sulligoi</i> | |
| Power Quality Assessment and Management in an Electric Ship Power System | 328 |
| <i>Philip Crapse, Jingjiang Wang, John Abrams, Yong-June Shin and Roger Dougal</i> | |
| T7 “Generators” | |
| <i>Chair: J. Schwartzberg, L-3 SPD Electrical Systems</i> | |
| Load Following Ability of a Ship Generating Plant Comprising a Mixed Set of High-Speed and Synchronous Turbo-Generators | 335 |
| <i>Zimin W. Vilar and Roger A. Dougal</i> | |
| Directly-Coupled Gas Turbine Permanent Magnet Generator Sets for Prime Power Generation On Board Electric Ships | 340 |
| <i>S.Z. Vijlee, A. Ouroua, L.N. Domaschk and J.H. Beno</i> | |
| A Generic Digital Model of Multiphase Synchronous Generator for Shipboard Power System | 348 |
| <i>Minglan Lin, Anurag K. Srivastava and Noel N. Schulz</i> | |
| On-Board Electrical Network Topology using High Speed Permanent Magnet Generators | 356 |
| <i>Raed A. Ahmad, Zhiguo Pan and Dan M. Saban</i> | |

T8 “Modeling and Simulation”

Chair: *N. Schulz, Mississippi State*

| | |
|--|------------|
| Summary of Recent Work on Reduction Techniques Applied to Electromechanical Modeling | 363 |
| <i>A. Davoudi, L. Qu and P.L. Chapman</i> | |
| Graph Trace Analysis Approach to Optimizing Power and Heat Flow for Clustered Computing | 371 |
| <i>John W. Rapp, Robert Broadwater</i> | |
| ASD System Condition Monitoring using Cross Bicoherence | 378 |
| <i>Taekhyun Kim, Wonjin Cho, Edward J. Powers, W. Mack Grady and Ari Arapostathis</i> | |

P5 “University R&D”

Chair: *N. Hingorani, Consultant*

| | |
|---|------------|
| Multi-Rate Simulation Techniques for Electric Ship Design | 384 |
| <i>Roy E. Crosbie, John J. Zenor, Richard Bednar, Dale Word, Narain G. Hingorami</i> | |
| Shipboard Power Systems Research Activities at Mississippi State University | 390 |
| <i>Quili Yu, Sarika Khushalani, Jignesh Solanki, Noel N. Schulz, Herbert L. Ginn III, Stanislaw Grzybowski, Anurag Srivastava and Jimena Bastos</i> | |
| A PC-Cluster based Real-Time Simulator for All-Electric Ship Integrated Power Systems Analysis and Optimization | 396 |
| <i>Yanhui Xie, Gayathri Seenamuni, Jing Sun, Yifei Liu and Zhen Li</i> | |
| High Dimensional Stochastic Simulation and Electric Ship Models | 402 |
| <i>Josh Taylor and Franz Hover</i> | |
| Controlled Series Compensation of High Speed Brushless Flux Switching Generators for Direct Drive Variable Speed Application | 408 |
| <i>K.N. Ochije and C. Pollock</i> | |

T9 “Testing”

Chair: *Z. Soghomonian, General Atomics*

| | |
|---|------------|
| T-AKE Lewis and Clark Class Auxiliary Dry Cargo/Ammunitions Ship Sea Trials | 414 |
| <i>Xavier Goy and Robert Clarence</i> | |
| Simulink Model of the Hybrid Power System Test-Bed | 421 |
| <i>M.C. Knauff, C.J. Dafis, D. Niebur, H.G. Kwatny, C.O. Nwankpa and J. Metzger</i> | |
| Enhancement and Application of a Voltage Sag Station to Test Transient Load Response | 428 |
| <i>Matthew Rylander, W. Mack Grady, Ari Arapostathis, Edward Powers</i> | |
| Test Bed for Studying Real-Time Simulation and Control for Shipboard Power Systems | 434 |
| <i>Karen L. Butler-Purry, Gayatri R. Damle, N.D.R. Sarma, Fabian Uriarte and Derek Grant</i> | |
| An Integrated Electric Shipboard Power System Testbed | 438 |
| <i>Pradeep Pant, Karl Schoder and Ali Feliachi</i> | |

T10 “Hardware-in-Loop and VTB”

Chair: *F. Wang, Virginia Tech University*

| | |
|--|------------|
| Applying Controller and Power Hardware-in-the-Loop Simulation in Designing and Prototyping Apparatuses for Future All Electric Ship | 443 |
| <i>W. Ren, M. Steurer and S. Woodruff</i> | |

| | |
|--|------------|
| Hardware in the Loop Test for Relay Model Validation | 449 |
| <i>Sunil Palla, Anurag K. Srivastava and Noel N. Schulz</i> | |
| Hardware-in-the-Loop Experiments on the use of Propulsion Motors to Reduce Pulse-Load System Disturbances | 455 |
| <i>Stephen L. Woodruff, Li Qi and Michael J. Sloderbeck</i> | |
| System-Level Dynamic Thermal Modeling and Simulation for an All-Electric Ship Cooling System in VTB | 462 |
| <i>Ruixian Fang, Wei Jiang, A. Monti, M. Zerby, G. Anderson, P. Bernotas and J. Khan</i> | |
| Modeling of Multifunctional Voltage Source Converters for Shipboard Power Systems in the Virtual Test Bed | 470 |
| <i>Konstantin Borisov and Herbert Ginn</i> | |
| P6 “Industrial R&D” | |
| <i>Chair: R. Hepburn, SAIC</i> | |
| Development of a Low-EMI Advanced Variable Speed Drive for Shipboard Applications | 478 |
| <i>Erik R. Limpaecher, Mark P. Holveck and B.J. Ryder</i> | |
| T11 “Power Systems” | |
| <i>Chair: L. Petersen, ONR</i> | |
| Single-Phase Ac Impedance Modeling for Stability of Integrated Power Systems | 483 |
| <i>Jing Huang, Keith Corzine and Mohamed Belkhat</i> | |
| Performance Prediction and Dynamic Simulation of Electric Ship Hybrid Power System | 490 |
| <i>Wei Jiang, Ruixian Fang, Jamil Khan and Roger Dougal</i> | |
| Distributed Simulation Applied to Shipboard Power Systems | 498 |
| <i>Qinghua Huang, Jian Wu, Jimena L. Bastos and Noel N. Schulz</i> | |
| Intelligent Placement of Meters/Sensors for Shipboard Power System Analysis | 504 |
| <i>Sandhya Sankar and Noel N. Schulz</i> | |
| T12 “Controls” | |
| <i>Chair: R. Ashton, Naval Postgraduate School</i> | |
| Networked Intelligent Instrumentation and Control for Switchboards | 510 |
| <i>Chris Gartner, David Johnson and Joan Provine</i> | |
| Optimal Power Generation Scheduling of a Shipboard Power System | 519 |
| <i>Wei Wu, Daifeng Wang, Ari Arapostathis and Kent Davey</i> | |
| Using the Non-Intrusive Load Monitor for Shipboard Supervisory Control | 523 |
| <i>Robert W. Cox, Patrick L. Bennett, T. Duncan McKay, James Paris and Steven B. Leeb</i> | |
| Variable Structure Design of a Fault Tolerant Control System for Induction Motors | 531 |
| <i>Jean-Etienne Dongmo, Harry G. Kwatny, Chica Nwankpa, Gaurav Bajpai and Carole Teolis</i> | |
