

IEEE International Symposium on Electromagnetic Compatibility

**Honolulu, Hawaii
July 8 – 13, 2007**

Volume 1 of 3

IEEE Catalog Number:
ISBN:

07CH37918
1-4244-1349-4

Table of Contents

Automotive EMC Modeling

Transient Electromagnetic Field Computation in Automotive Environments using FDTD	1
<i>Pere J. Riu, Ricardo Jaúregui, Ferran Silva, Mireya Fernández</i>	
EMI Modeling in Automotive Data Communication Structure	5
<i>Frank X. Li, Tamer Taher, Jalal Jalali, Fred D. Esenwein, Nickolaus J. Lockard, Andriy Ptichkin</i>	
Electromagnetic Conductive Interference Characteristics in Driving System of Fuel Cell Bus	10
<i>Jinliang He, Bo Zhang, Shaofeng Yu, Wei Li, Rong Zeng, Yong Huang, Jae-bok Lee, Sug-hun Chang</i>	
A Statistical Model of Noises at Input Port of Inverter and its Coupling to Low Voltage Cable on Fuel Cell Bus	14
<i>Wei Li, Shaofeng Yu, Bo Zhang, Jinliang He, Yong Huang</i>	

TEM Cell Measurements

New Test Method for the Pulse Immunity of Microcontrollers	19
<i>Tao Su, Markus Unger, Thomas Steinecke, Robert Weigel</i>	
Mode Suppressed TEM Cell Design For High Frequency IC Measurements	25
<i>Shaowei Deng, David Pommerenke, Todd Hubing, James Drewniak, Daryl Beetner, Dongshik Shin, Sunghnam Kim, Hocheol Kwak</i>	
A Field Uniformity Study of a TEM Cell by Using a Short Wire Scatterer	31
<i>Takehiro Morioka</i>	
Evaluation of Electromagnetic Interference Between UWB System and Wireless LAN Using a GTEM Cell	36
<i>Masashi Yamada, Masamitsu Tokuda, Shinobu Ishigami, Kaoru Gotoh, Yasushi Matsumoto</i>	

Electromagnetic Bandgap Structures

Noise Suppression in High Speed Digital Circuits by Means of a Novel EBG Structure with Triangle Patches and Hexagonal Arrays	41
<i>A. Ciccomancini Scogna</i>	
Simplified Computation of Electromagnetic Band-Gap Properties of Via-Holed Metal Patches	47
<i>K. Rambabu, M. Mokhtari, J. Bornemann</i>	
EMI Suppression in Microprocessor Packages using Miniaturized Electromagnetic Bandgap Structures with High-k Dielectrics	51
<i>Baharak Mohajer-Iravani, Omar M. Ramahi</i>	
Miniaturization of Electromagnetic Bandgap (EBG) Structures with High-Permeability Magnetic Metal Sheet	55
<i>Yoshitaka Toyota, Kengo Iokibe, Ryuji Koga, Arif Ege Engin, Tae Hong Kim, Madhavan Swaminathan</i>	

Signal Integrity I

Power and Signal Integrity and Electromagnetic Emission; the Balancing Act of Decoupling, Planes and Tracks	60
<i>Frank B. J. Leferink</i>	
Signal and Power Integrity Co-Simulation for Multi-layered System on Package Modules	65
<i>Krishna Bharath, Ege Engin, Madhavan Swaminathan, Kazuhide Uriu, Toru Yamada</i>	
Signal Integrity of Carbon Nanotube Bundles	71
<i>M. D'Amore, M. S. Sarto, A. Tamburrano</i>	
Concurrent Analysis of Signal-Power Integrity and EMC for High-Speed Signaling Systems	77
<i>Edward K. Chan, Mauro Lai, Myoung Joon Choi, Woong Hwan Ryu</i>	

Table of Contents

EM Environment

Ultra Wideband EMI to Legacy Receivers	85
<i>William G. Duff, Daniel Erndle</i>	
Interference Characterization and Mitigation of 5.5 Mbps CCK WI-FI Signals	91
<i>Ayham Z. Al-Banna, Xiaoguang Zhou, Tae Ri Lee, Joseph L. LoCicero, Donald R. Ucci</i>	
Airborne RF Measurement System and Analysis of Representative Flight RF Environment	99
<i>Sandra V. Koppen, Jay J. Ely, Laura J. Smith, Richard A. Jones, Vincent J. Fleck, Maria Theresa Salud, John Mielnik</i>	
Small Aircraft RF Interference Path Loss	105
<i>Truong X. Nguyen, Sandra V. Koppen, Jay J. Ely, George N. Szatkowski, John J. Mielnik, Maria Theresa P. Salud</i>	

EM Modeling I

Patch Antenna Modeling Issues Using Commercial Software	111
<i>William O. Coburn, Canh Ly, Steven Weiss</i>	
EMI Analysis of a GSM 900 MHz Antenna for a Large Wind Turbine Hub with Method-of-Moments	118
<i>B. Lewke, J. Kindersberger, F. Krug</i>	
Predicting Electromagnetic Coupling between HF, VHF, UHF Antennas using NEC	122
<i>Patrick Perini, William Duff</i>	
EMI Prediction Under Different Program Behavior	128
<i>Shih-Yi Yuan, Chi-Feng Yang, Etienne Sicard, Chiu-Kuo Chen, Shry-Sann Liao</i>	

Special Session - Automotive EMC Design and Integration Session Chairs: Mark Steffka, Richard Wiese

Circuit Board Layout for Automotive Electronics	135
<i>Todd H. Hubing</i>	
Modeling Coax Cable EMI Shielding Performance for Automotive AM Broadcast Band Applications	138
<i>Richard Wiese</i>	
Validation of Worst-Case and Statistical Models for an Automotive EMC Expert System	143
<i>Daryl G. Beetner, Haixiao Weng, Meilin Wu, Todd Hubing</i>	
Impact of Intra-Vehicular Electromagnetic Interference On Tire Pressure Monitoring Systems	148
<i>Vikas Kukshya, Hyok J. Song, Hui P. Hsu, Richard W. Wiese</i>	
International Electrotechnical Commission Documents CISPR 12 and CISPR 25: An Overview	152
<i>Poul Andersen</i>	
Vehicle EMI Integration Issues Identified by Precompliance Test Methods	156
<i>Scott W. Mee, Sreenivas Ranganathan, Craig Harder, Steve Maimville</i>	
Evaluating Cell Phone and Personal Communications Equipment and their EMC Effects on Automotive Audio and In-Cabin Modules	162
<i>Craig W. Fanning</i>	

Special Session - Waveform Diversity Session Chair: Andy Drozd

The True Meaning of Electromagnetic Diversity Seen Through the First Principles of Fundamental Physics	168
<i>Tapan K. Sarkar</i>	

Table of Contents

Waveform Diversity and Electromagnetic Compatibility	173
<i>G. T. Capraro, I. Bradaric, M. C. Wicks</i>	
Why and What is Waveform Diversity, and How Does it Affect Electromagnetics?	180
<i>John W. Garnham, Jaime R. Roman</i>	
Distributed and Layered Sensing: Relevant EMC Issues	184
<i>Michael C. Wicks, William Moore</i>	
Electromagnetic Diversity and EMI Implications for Multiple Co-sited Radars and Targeting Applications	191
<i>Andrew L. Drozd, Irina Kasperovich, Ruixin Niu, Pramod K. Varshney</i>	
Effect of In-band Intermodulation Interference on Direct-Sequence Spread Spectrum (DSSS) Communication Systems for Electromagnetically Diverse Applications	198
<i>Ilteris Demirkiran, Donald D. Weiner, Andrew Drozd</i>	
Detection/Imaging of Buried Objects: Using Spatial/Angular Diversity with Distributed/Embedded Sub-Surface Sensors for Reduced Mutual Coupling and Suppressed EM Emissions	204
<i>John Norgard, Kevin Magde, Michael Wicks, Andy Drozd, Randy Musselman</i>	
Polarization Diversity for Detecting Targets in Heavy Inhomogeneous Clutter	209
<i>Martin Hurtado, Arye Nehorai</i>	
EMC Measurements	
Development and Application of a High-Resolution Thin-Film Probe	216
<i>Shaohua Li, Kuifeng Hu, Daryl Beetner, James Drewniak, James Reck, Matt O'Keefe, Kai Wang, Xiaopeng Dong, Kevin Slattery</i>	
The Design of Electric-optical Modulator Used in EMC Measurements	221
<i>Yinan Geng, Rong Zeng, Jinliang He, Shuiming Chen, Bo Zhang</i>	
The Development of Integrated Electro-optic Sensor for Intensive Electric Field Measurement	227
<i>Rong Zeng, Weiyuan Chen, Jinliang He, Puxua Zhu</i>	
On the Selection of Telecommunication Port Impedance Stabilization Networks (ISNs)	232
<i>David Arnett, Ed Blankenship</i>	
Addressing an EMC Weakness Due to Strong Static Magnetic Fields	237
<i>Marian Soinski, Roman Rygal, Wojciech Pluta, Peter Kepski</i>	
Logistic Regression in Immunity Testing	243
<i>G. Giunta, B. Audone</i>	
Basis for a Wireless Network for EMC Measurements in Electric Substations	249
<i>W. H. Siew, Y. C. Liu, B. Musa, F. Mir, Y. Wang</i>	
Signal Integrity II	
An Improved Cavity Model for the Analysis of the Voltage Bounce in Power-Bus Structures	254
<i>Giulio Antonini, Mauro Lai, Todd Bermensolo</i>	
Causal Modeling and Extraction of Dielectric Constant and Loss Tangent for Thin Dielectrics	260
<i>A. Ege Engin, Abdemanaf Tambawala, Madhavan Swaminathan, Swapan Bhattacharya, Pranabes Pramanik, Kazuhiro Yamazaki</i>	
Determination of Propagation of Fast Induced Transient Impulses on PCB-Level	265
<i>Mohamed Taki, Werner John</i>	

Table of Contents

Noise Isolation Modeling and Experimental Validation of Power Distribution Network in Chip-Package	270
<i>Hyunjeong Park, Changwook Yoon, Kyoungchoul Koo, Jounggho Kim</i>	
Signal Integrity Analysis of a 1.5 Gbit/s LVDS Video Link	276
<i>Volker Zwillich, Michael Wollitzer, Thomas Wirschem, Wolfgang Menzel, Helmut Leier</i>	
Implementation of On-Chip and On-Package Reactive Equalizer to Minimize Inter-symbol Interference (ISI) and Jitter from Frequency Dependent Attenuation	282
<i>Seungyoung Ahn, Jongtae Chun, Jounggho Kim</i>	
Causality Enforcement in Transient Simulation of HDMI Interconnects with Magnitude Equalization	288
<i>Eakhwan Song, Jeonghyeon Cho, Jounggho Kim, Gun Kam Dong</i>	
Product Safety Testing	
How to Perform EMI Testing within an Existing EMI Chamber on an EUT with Low Particle Count Cleanliness Requirements	292
<i>Larry Freeman</i>	
Medical Equipment Immunity Assessment by Time Domain Analysis Application to GSM signals	298
<i>Mireya Fernández-Chimeno, Miguel Ángel García-González, Ferran Silva</i>	
Recent Developments in Standardization Related to EMC and Functional Safety	302
<i>Bernd W. Jaekel</i>	
Validation, Verification and Immunity Testing Techniques for EMC for Functional Safety	308
<i>Eurlng Keith Armstrong</i>	
A Novel Assessment Methodology for the EMI Occurrence in Implantable Medical Devices Based Upon Magnetic Flux Distribution of RFID Reader/writers	314
<i>Shunichi Futatsumori, Takashi Hikage, Toshio Nojima, Ben Koike, Hiroshi Fujimoto, Takeshi Toyoshima</i>	
EM Modeling II	
Measurement of a Point Source Radiator Using Magnetic and Electric Probes and Application to Silicon Design of Clock Devices	320
<i>Kevin Slattery, Kevin Daniel, Xiaopeng Dong</i>	
Efficient Low-Frequency Modal Analysis of Anechoic Chamber	326
<i>Ignacio Monterde, Luis Nuño, Juan Vicente Balbastre, Fernando Niño</i>	
Calculation of the H-Plane Pattern Influence to the Site VSWR Result using the Monte Carlo Method	331
<i>Alexander Kriz, Wolfgang Müllner</i>	
Em Fields Between Two Parallel Plates Supported by Conductive Multi-Poles - Pole-Plate System: Shield Effectiveness and Field Leakage	337
<i>Kazuo Aizawa, Hiroshi Echigo</i>	
Analysis of Radiated Emissions and Shielding Effectiveness for a Metallic Enclosure with Shielding Springs	343
<i>A. Ciccomancini Scogna, G. Antonini, A. Orlandi</i>	
Extending Winding Capacitance Cancellation to Three-Phase EMC Input Filter Networks	349
<i>Marcelo L. Heldwein, Johann W. Kolar</i>	
Ultra-Wideband Printed-Circuit Antenna in Coplanar Technology	358
<i>Hung-Jui Lam, Jens Bornemann</i>	

Table of Contents

Biological Effects

Enabling the Use of Broadband Tissue Equivalent Liquids for Specific Absorption Rate Measurements	362
<i>Mark G. Douglas, C-K. Chou</i>	
Electromagnetic Field Radiation of Mobile Phone Inside Metallic Enclosure	368
<i>C. K. Tang, L. C. Fung, S. W. Leung</i>	
Testing Large Industrial Systems, Preparations and Techniques	374
<i>Kenneth L. Boston</i>	

SAR Measurements and Models

Relationship Between Temperature Elevation and Spatial Average SAR in Japanese Human Head Model Due to Dipole Antenna	380
<i>Akimasa Hirata, Kazuyuki Shirai, Osamu Fujiwara</i>	
Numerical Prediction of SAR and Thermal Elevation in a 0.25-mm 3-D Model of the Human Eye Exposed to Handheld Transmitters	385
<i>Concettina Buccella, Valerio De Santis, Mauro Feliziani</i>	
Study of Using Fractional Spherical Phantom on SAR Evaluation	391
<i>K. H. Chan, S. W. Leung, W. K. Lam, Y. M. Siu</i>	
SA/SAR Analysis for UWB Pulse	395
<i>Jianqing Wang</i>	

Poster Session 01 - PCB and IC EMC

Effectiveness of PCB Simulation in Teaching High-Speed Digital Design	400
<i>Jianjian Song, Keith E. Hoover, Edward Wheeler</i>	
Transmission Line Attenuation-Impedance Realistic Corner Modeling by Scaled-Down Tolerance Boundary Scan	406
<i>Zhaoqing Chen</i>	
Impact of Linear Regulator Topology on Integrated Circuit Emissions	412
<i>Kevin Lavery, Ricky Smith</i>	
Degree of Unbalance About Earth and Radiated Emission of Differential Type Microstrip Line in GHz Band	416
<i>Masahiro Shiota, Kiyotaka Matsubara, Chiharu Miyazaki, Masamitsu Tokuda</i>	
A Scalable Model of Board to FPC Interconnect Using Neural Networks	422
<i>Hoon Hwangbo, Jongmin Kim, Minkyu Shim, Jongsung Lee, Hyungseok Lee, Byongsu Seol, Seungboo Jung, Wansoo Nah</i>	
The Solutions of LCD Panel (T-Con) EMI Noise for Wireless Integration	429
<i>Sung-Kyu Lee, Jung-man Lim, Ki-Seob Lee, On-Sik Choi, Bae-Won Lee, Do-Wan Kim, Masashi Hayakawa, Yoshio Kami</i>	
Comparative Analysis of Intel Pentium 4 and IEEE/EMC TC-9/ACEM CPU Heat Sinks	433
<i>Junwei Lu, Xiao Duan</i>	
Chip Level EMI Approach for LCD TV Panels	439
<i>Do-Wan Kim, On-Sik Choi, Bae-Won Lee, In-Gu Kwak, Sung-Kyu Lee</i>	
A Study on the Reduction Method of the Magnetic Field Radiated from PCB Including Multi-Loops (n=2)	443
<i>Atsuo Mutoh, Shuichi Nitta, Yuxin Yan</i>	

Table of Contents

Experimental Evaluation of Isolation Effect on Printed Circuit Board with Gapped Power Plane	449
<i>Yuichi Sasaki, Chiharu Miyazaki, Naoto Oka, Yoshihiko Konishi</i>	
Special Session - EMC History	
Establishing EMC Education: The Ten-Year Contribution of the University Grant Program	453
<i>Thomas A. Jerse, Mark A. Steffka</i>	
A Historical Perspective of System-Level TDFD EME Simulation	457
<i>R. A. Perala, G. J. Rigden, J. R. Elliott</i>	
EMC Absorbers through the Years with Respect to the New Site VSWR Validation Procedure in the Frequency Range from 1 to 18 GHz - a Practical Approach	461
<i>Friedrich-Wilhelm Trautnitz</i>	
Fifty Years of EMC Research At Georgia Tech	467
<i>Hugh W. Denny</i>	
EMC of Integrated Circuits : A Historical Review	474
<i>E. Sicard, S. Ben Dhia, M. Ramdani, T. Hubing</i>	
Military Aircraft Electromagnetic Compatibility: Release to Service Testing in the United Kingdom, Past, Present and Future	478
<i>T. J. Duggan</i>	
Special Session - Power Integrity / Signal Integrity for Next Generation Systems Session Chairs: Jun Fan, Jim Knighten, Zhiping Yang	
Broadband Noise Suppression Using a Hybrid Photonic Crystal Power/Ground Plane Substrate	485
<i>Yi-Che Chen, Ting-Kuang Wang, Shao-Min Lan, Chi-Hsiu Lu, Tzong-Lin Wu</i>	
Load Current Funneling Examination for Power Distribution in High Performance Multi-Core Silicon Devices ...	489
<i>J. Ted DiBene II</i>	
Power Delivery for High Performance Processor Packages - Part I	493
<i>David M. Hockanson, J. Ted DiBene II</i>	
Multi-Gigabit I/O Link Circuit Design Challenges and Techniques	499
<i>Zuoguo Wu, Evelina Yeung, Peng Zou, Fenardi Thenus, J. Ted DiBene II</i>	
Early Time Charge Replenishment of the Power Delivery Network in Multi-Layer PCBs	504
<i>G. Selli, M. Cocchini, J. L. Knighten, B. Archambeault, J. Fan, S. R. Connor, A. Orlandi, J. L. Drewniak</i>	
EMC Test Facilities and Antennas	
A Critique on Traceability in Site Validation Measurements	510
<i>Zhong Chen, Achim Enders</i>	
Extracting Useful Information from Radiated Emission Test Site NSA and VNSA Data Sets	516
<i>Ed Blankenship, David Arnett, Gary Town, Derick Skouby, Henry Benitez</i>	
Verification of an EMC Facility Retrofit by Time-Domain and Field Uniformity Measurements	522
<i>Dennis Camell, Robert T. Johnk, Ben N. Davis, Michael Taylor</i>	
Uncertainty Analysis and Novel Test Procedures Performed with a Realtime Time-Domain EMI Measurement System	527
<i>Stephan Braun, Peter Russer</i>	

Table of Contents

Free-Space Antenna Factors through the Use of Time-Domain Signal Processing	531
<i>Dennis Camell, Robert T. Johnk, David Novotny, Chriss Grosvenor</i>	
Computational Electromagnetic Modeling I	
An Extended-Hybrid-Method a Combination of MOM, GMT and UTD	536
<i>Stefan Balling, Dirk Plettemeier, Karl-Heinz Gonschorek</i>	
Razor Blade Functions in the PEEC Method	542
<i>Volker Vahrenholt, Heinz-Dietrich Brüns, Hermann Singer</i>	
Extended MagPEEC Model Including Dispersive Medium	548
<i>Xiao Zhang, Haibo Long, Wenhua Chen, Yaqin Chen, Zhenghe Feng</i>	
The Error Reduced ADI-CPML Method for EMC Simulation	552
<i>Ifiikhar Ahmed, Er-Ping Li</i>	
Efficient 3D Simulation of Thin Conducting Layers of Arbitrary Thickness	556
<i>Göran Eriksson</i>	
Wide-Band Hybrid MM-PO Computational Electromagnetics Technique Using [Z] Matrix Interpolation and Adaptive Frequency Sampling	562
<i>Artur Noga, Andrzej Karwowski</i>	
Printed Circuit Board EMC I	
A Study on Correlation Between the PCB Layout and EMI from Chassis	566
<i>Hiroki Funato, Takashi Suga</i>	
EMI Resulting from Interconnected Printed Circuit Boards by a Coaxial Cable	571
<i>Yoshiki Kayano, Hiroshi Inoue</i>	
Power and Ground Bounce Effects on Component Performance Based on Printed Circuit Board Edge Termination Methodologies	576
<i>Mark I. Montrose, En-Xiao Liu</i>	
Analysis of Emission from Printed Circuit Board with a Conducting Wire Directed to Various Directions	582
<i>Masahiro Takashima, Teruo Tobana, Takayuki Sasamori, Kohshi Abe</i>	
Radiated Emissions from Proximity Coupled Oversized Heat-Sinks	588
<i>Dheena Moongilan</i>	
Modeling & Measurement of Mutual Coupling Resulting from via Structures Within Printed Circuit Boards	594
<i>Leigh Cornock, Ian Dilworth</i>	
Shielding	
Shielding Specification Techniques and Measurement Methods for Aircraft	599
<i>William D. Prather</i>	
Rf Electromagnetic Penetration of the Nasa Space Shuttle Endeavour Performed with an Ultra-Wideband System	605
<i>Robert T. Johnk, David R. Novotny, Chriss A. Grosvenor, Nino Canales, Dennis G. Camell, Galen H. Koepke, Robert C. Scully</i>	
Engineering of Absorbing Gaskets Between Metal Plates	611
<i>Marina Y. Koledintseva, Sandeep K. R. Chandra, James L. Drewniak, James A. Lenn</i>	

Table of Contents

Protective Properties of a Generic Missile Enclosure to Different Electromagnetic Influences	616
<i>Sven Fisahn, Heyno Garbe, Frank Sabath</i>	
Rethinking Shielding Theory	622
<i>David A. Larrabee</i>	
Electromagnetic Coupling Inside Enclosures with Closely Coupled Electric Monopoles and Conducting Planes	628
<i>Leonardo Sandrolini, Ugo Reggiani, David W. P. Thomas, Christos Christopoulos</i>	
System Level EMC	
The Role of EMC Standards in Product Quality	634
<i>Wayne A. Hunter</i>	
Electromagnetic Topology: a Modular Junction Approach for a System Level Interaction Problem	640
<i>Phumin Kirawanich, Justin Wilson, N. E. Islam, Christos Christodoulou, S. J. Yakura</i>	
A Hierarchical Model for Prescribing EMC Design Targets to the Components of a System	647
<i>Hirayr M. Kudyayn</i>	
Design Philosophy for a Satellite with Extremely Low Radiated Emissions Requirements	653
<i>William R. Elkman, Gregory L. Tettemer, Steven R. Hungate</i>	
Reduction of Radiated Emission from PLC Systems by Studying Electrical Unbalance of the PLC Device and T- ISN	658
<i>Naoto Oka, Mitsuhiro Kanda, Yoshihiko Konishi, Atsushi Morita, Masataka Kato, Shuichi Nitta</i>	
Simulation of an Indoor Power Cable Network for PLC Applications	663
<i>Concettina Buccella, Valerio De Santis, Mauro Feliziani</i>	
Poster Session 02 - Power Line Communications, Safety and Biological Effects	
Terminal Condition Dependency of Transmission Characteristics for High-speed Power Line Communication	668
<i>S. Sakuta, Y. Watanabe, M. Tokuda, T. Higuma</i>	
LCL Characteristics of Power Line for Power Line Communication Using Four Port Network Theory	674
<i>J. Karino, Y. Watanabe, A. Mori, M. Tokuda</i>	
Transmission Characteristics of an OFDM Signal for Power Line Communication System with High Bit Rate	680
<i>A. Mori, Y. Watanabe, M. Tokuda, K. Kawamoto</i>	
EMC Analysis of a Wind Turbine Blade's Lightning Protection System	686
<i>B. Lewke, S. Krämer, J. Kindersberger, F. Puente León, J. Kirchhof, Y. Méndez Hernández</i>	
Evaluation of Genotoxic Potential of Microwave Electromagnetic Field in Onion (Allium Cepa)	690
<i>Mirta Tkalec, Zeljka Vidakovic-Cifrek, Branka Pevalek-Kozlina, Kresimir Malaric, Roman Malaric</i>	
Analysis on Propagation of Wideband EM Waves Emitted from Partial Discharge Using the Constrained Interpolation Profile (CIP) Method	694
<i>Masatake Kawada, Katsuo Isaka</i>	
Special Session - Emerging EMC Technologies in Japan Session	
Chairs: Youji Kotsuka, Yoshio Kami	
Time-Domain Simulation of CMOS Output Buffer with LECCS-I/O Model and Time-Variant Linear Switches	698
<i>Takashi Hisakado, Atsushi Koyama, Osami Wada</i>	

Table of Contents

Fast and Accurate Estimation of Radiated Emission from Printed Circuit Board Using Common-mode Antenna Model Based on Common-Mode Potential Distribution	702
<i>Yoshitaka Toyota, Youhei Sakai, Makoto Torigoe, Ryuji Koga, Tetsushi Watanabe, Osami Wada</i>	
Electromagnetic Field Distribution Measurements Using an Optically Scanning Probe System	708
<i>Masanori Takahashi, Katsumi Kawasaki, Hiroyuki Ohba, Hiroyasu Ota, Tatsuru Orikasa, Kazushi Ishiyama, Nobuyasu Adachi, Ken Ichi Arai</i>	
Novel Metamaterial Based on the Concept of Autonomous Control System of Living Cell and its EMC Applications.....	714
<i>Youji Kotsuka, Chikara Kawamura</i>	
New Radiated Immunity/Susceptibility Test Method Using Four-Septum TEM Cell: Measurements and Field Analysis.....	719
<i>Kimitoshi Murano, Hiroko Kawahara, Majid Tayarani, Fengchao Xiao, Yoshio Kami</i>	
Methods of Evaluating Information Leakage from PC Displays	725
<i>Toshihide Tosaka, Kaori Fukunaga, Yukio Yamanaka, Ryo Ishikawa, Mitsuo Hattori</i>	
Correlation Between Absorption Cross Section and Body Surface Area of Human for Far-Field Exposure at GHz Bands.....	729
<i>Akimasa Hirata, Yoshio Nagaya, Fujiwara Osamu, Tomoaki Nagaoka, Soichi Watanabe</i>	
Signal Integrity III	
Transmission Line Model for the Gapped Power Bus Structure	733
<i>Joe Trinkle, Antonio Cantoni</i>	
Nonlinear Identification of Complex Systems Using Radial Basis Function Networks and Model Order Reduction.....	737
<i>C. Wiegand, C. Hedayat, W. John, Lj. Radi'c-Weissenfeld, U. Hilleringmann</i>	
Fast Macromodel-based Signal Integrity Assessment for RF and Mixed-Signal Modules	743
<i>S. Grivet-Talocia, P. Brenner, F. G. Canavero</i>	
Stripline Simulation Model with Tapered Cross Section and Conductor Surface Profile	749
<i>A. Ciccomancini Scogna, M. Schauer</i>	
Improvements of Time-Domain Transmission Waveform in Serpentine Delay Line with Guard Traces.....	754
<i>Guang-Hwa Shiue, Chia-Ying Chao, Wei-Da Guo, Ruey-Beei Wu</i>	
Multimodal Analysis of Guard Traces	759
<i>Pablo Rodriguez-Cepeda, Miquel Ribó, Francisco-Javier Pajares, Joan-Ramon Regué, Albert-Miquel Sánchez, Antonio Pérez</i>	
Singular Value Based Model Order Reduction for Interconnect ARX Modelling.....	764
<i>Lj. Radi'c-Weissenfeld, C. Wiegand, C. Hedayat, W. Mathis, W. John</i>	
Computational Electromagnetic Modeling II	
Fast FDTD Simulation Using Laguerre Polynomials in MNA Framework	769
<i>K. Srinivasan, E. Engin, M. Swaminathan</i>	
Application of a Hierarchical SVD/ACA Compression Technique to Near-Field Calculations of Monopole Antennas.....	775
<i>Miguel Astner, Heinz-D. Brüns, Guido Bürger, Hermann Singer</i>	
Efficient Evaluation of Equivalent-Principle Sources in MoM-FDTD Hybrid Method by Employing Spatial Interpolation and Adaptive Sampling	781
<i>Tomasz Topa, Andrzej Karwowski</i>	

Table of Contents

Near Field - Far Field Conversion Based on Genetic Algorithm for Predicting Radiation from PCBs	785
<i>Hongmei Fan, Franz Schlagenhauer</i>	
Use of Genetic Algorithms to Solve Inverse Scattering Problems a Contribution to the Experiment CONSERT onboard the Spacecraft Rosetta	791
<i>D. Plettemeier, S. Balling, D. Landmann, K.-H. Gonschorek</i>	
An Efficient Shielding Effectiveness Calculation (A Rectangular Enclosure with Numerous Square Apertures)	797
<i>Parisa Dehkhoda, Ahad Tavakoli, Rouzbeh Moini</i>	
TLM Simulation of RF Emissions and Confirmation of Results through Testing	801
<i>David Johns, Federico Centola, Boris Shusterman</i>	
Integrated Circuit EMC	
Thermal Influence on 16-Bits Microcontroller Emission	805
<i>S. Ben Dhia, E. Sicard, Y. Mequignon, A. Boyer, J. M. Dienot</i>	
Comparison of Radiation from Two Microprocessor Test Packages	809
<i>Xiaopeng Dong, Kevin Daniel, Kevin Slattery</i>	
Assessment of the DPI Standard for Immunity Simulation of Integrated Circuits	813
<i>Johan Loeckx, Georges Gielen</i>	
Efficiency of Embedded On-Chip EMI Protections to Continuous Harmonic and Fast Transient Pulses with Respect to Substrate Injection	818
<i>Ali Alaeldine, Nicolas Lacrampe, Jean-Luc Levant, Richard Perdriau, Mohamed Ramdani, Fabrice Caignet, Marise Bafleur, Etienne Sicard, M'hamed Drissi</i>	
Investigation on ESD Transient Immunity of Integrated Circuits	823
<i>Nicolas Lacrampe, Ali Alaeldine, Fabrice Caignet, Richard Perdriau, Marise Bafleur, Nicolas Nolhier, Mohamed Ramdani</i>	
Latchup-Like Failure of Power-Rail ESD Clamp Circuits in CMOS Integrated Circuits Under System-Level ESD Test	828
<i>Ming-Dou Ker, Cheng-Cheng Yen</i>	
Printed Circuit Board EMC II	
PPW Noise Mitigation in Multilayer PCBs by Means of Virtual Island And/or Array of Shorting Vias	832
<i>A. Ciccomancini Scogna</i>	
Suppression Effect of Emission from Printed Circuit Board Using Conducting Plate	837
<i>Teruo Tobana, Takayuki Sasamori, Kohshi Abe</i>	
Numerical and Experimental Investigation of Power Supply Noise Decoupling Strategies on Single-Sided Printed Circuit Boards	843
<i>Cyrous Rostamzadeh, Samuel Connor, Bruce Archambeault</i>	
Automotive EMC Measurements	
Vehicle Active Antennas Face "EMC"- and "RF-Reception"-Challenges	848
<i>Jean-Roger K. Kuvedu-Libla</i>	
Automotive EMC: Key Concepts for Immunity Testing	854
<i>Heri Rakouth, Clane Cammin, Luke Comstock, Joseph Ruiz</i>	

Table of Contents

Development and Evaluation of a Realtime Time-Domain EMI Measurement System for Automotive Testing	861
<i>Stephan Braun, Martin Aidam, Peter Russer</i>	
Improving Automotive Radiated Emissions Repeatability When Using Optic Link Bus Converters	865
<i>Ferran Silva, Marc Aragon</i>	
Evaluation of Falling Time Restriction of ESD Immunity Test Current Waveform: The Result of IEC 61000-4-2 Round Robin Test in Japan	870
<i>Masayuki Hirata, Takehiro Takahashi, Noboru Schibuya</i>	
The Effects of ESD in Multiple Testing Environments on Adhesive-Label RFID Tags	874
<i>C. Bauer-Reich, R. M. Nelson, D. Vaselaar</i>	
Experimental Investigation of the ESD Sensitivity of an 8-Bit Microcontroller	880
<i>Lijun Han, Jayong Koo, David Pommerenke, Daryl Beetner, Ross Carlton</i>	
Interference in Shielded Foil Twisted Pair (SFTP) Cables Due to ESD	886
<i>Spartaco Caniggia, Francescaromana Maradei</i>	
Susceptibility of Electronic Devices to Variable Transient Spectra	891
<i>Sven Korte, Heyno Garbe</i>	
Methodology for the HEMP Clearance of a Modern Air Fighter	897
<i>Frank Sabath, Anthony Wraight, Alfred Brenner, Chris C. Jones</i>	
Systematic Description of the Protection Capability of Protection Elements	903
<i>Roland Krzikalla, Jan Luiken ter Haseborg, Frank Sabath</i>	
Poster Session 03 - System EMC	
EMC Management in a High Power Pulse Laser	907
<i>J. Raimbourg</i>	
EMI Sub-System Emission Limits Based on Statistic Analysis	912
<i>Q. Yu, Z. Zhang</i>	
Development of Apparatus for Measuring Electromagnetic Shielding Effectiveness at GHz Frequency Band	918
<i>Hwa Jong Kwon, Hyung Do Choi, Jae Ick Choi, Jong Gwan Yook</i>	
Analysis of Shielding Effectiveness of Rectangular Cavity with Apertures to ESD Radiated Field by Transmission Line Method	922
<i>Liuping Wang</i>	
Distribution and Characteristic of the Disturbances in the Driving System of a Fuel Cell Bus	926
<i>Bo Zhang, Jinliang He, Shaofeng Yu, Wei Li, Rong Zeng, Yong Huang, Jae-bok Lee, Sug-hun Chang</i>	
Electromagnetic Cross Coupling Between Ground Support Power Lines and Spacecraft Umbilical Cables	931
<i>J. C. Chai, E. Dressel, D. B. Taylor</i>	
Development of a Maritime Electronic Warfare and Sensor Systems EMI Mathematical Assessment Capability	936
<i>Giuseppina Dall'Armi-Stoks, Guy Morris, Annie Yau</i>	
Effective Technique for System Level Prediction of the Radiated Emissions of Electronic Devices and Cables inside Satellites from Unit Level Measurements.	941
<i>F. Saez de Adana, M. F. Cátedra, J. M. Gómez, R. Mitra</i>	

Table of Contents

Special Session - Electronic Packaging EMC and Signal Integrity Session

Chairs: Erping Li, Joungho Kim

Noise Isolation in LTCC-Based X/Ku-Band Transceiver SiP Using Double-Stacked Electromagnetic Bandgap Structure	946
<i>Jongbae Park, Junchul Kim, Albert Chee W. Lu, Yujeong Shim, Joungho Kim</i>	
Design of UWB Transceiver SiP for Short Range Communication	952
<i>Changwook Yoon, Hyunjeong Park, Joungho Kim, Junwoo Lee, Youngjin Park</i>	
A Systematic Semi-Numerical Approach for Modeling of Signal and Power Integrity of Electronic Packages	958
<i>Er-Ping Li, En-Xiao Liu, Zaw Zaw Oo, Xingchang Wei, Yaojiang Zhang, R. Vahldieck</i>	
Modeling of Signal and Power Integrity in System on Package Applications	964
<i>Madhavan Swaminathan, A. Ege Engin</i>	
Accurate Characterization of Package and Board Components for Efficient System Level Signal Integrity Analysis	970
<i>Ivan Ndip, Stephan Guttowski, Herbert Reichl</i>	
Modeling and Verification to Analyze Effect of Power/Ground Noises on CMOS Feedback Operational Amplifier	976
<i>Yujeong Shim, Jongbae Park, Jongjoo Shim, Joungho Kim</i>	
Special Session - Algorithm and Techniques for Parallel Processing for EMI/EMC	
Session Chairs: Alan Roden, Albert Ruehli, Giulio Antonini	
Parallel Implementations of the PEEC Method	983
<i>Jonas Ekman, Peter Anttu</i>	
A Parallel Electromagnetic Simulation Approach for the Signal Integrity Analysis of IC Packages	989
<i>Erion Gjonaj, Thomas Weiland, Irina Munteanu, Peter Thoma</i>	
Accelerated Integral Equation Solution Methods on Clusters and Multicore Processors Session Name: Algorithm and Techniques for Parallel Processing for EMI/EMC	994
<i>Vikram Jandhyala, Xiren Wang</i>	
Waveform Relaxation for the Parallel Solution of Large PEEC Model Problems	999
<i>Giulio Antonini, Jonas Ekman, Albert E. Ruehli</i>	
The Discontinuous Galerkin Finite Element Time Domain Method (DGFETD): A High Order, Globally-Explicit Method for Parallel Computation	1005
<i>Stephen D. Gedney, Chong Luo, Bryan Guernsey, J. Alan Roden, Robert Crawford, Jeffrey A. Miller</i>	
An Efficient Implementation of Parallel FDTD	1008
<i>Xiaohe Chen, Michael Cracraft, Yaojiang Zhang, Jianmin Zhang, James L. Drewniak, Bruce Archambeault, Samuel Connor</i>	
Reverberation Chamber Measurements I	
Properties of Fields in Reverberant Environments and its Implications	1013
<i>Jose Perini, Patrick Perini</i>	
Comparison of Different Definitions of Field Strength Used in Reverberation Chamber Standards	1019
<i>Luk R. Arnaut, Hans-Georg Krauthäuser, Magnus Höijer</i>	
Reverberation Chamber Calibration: Differences in Results When Using a Slot Instead of a Dipole Antenna	1024
<i>Tobias Aurand, John F. Dawson, Andrew C. Marvin, Martin P. Robinson</i>	

Table of Contents

Enhanced Backscatter in a Reverberation Chamber: Inside Every Complex Problem is a Simple Solution Struggling to Get Out	1028
<i>John M. Ladbury, David A. Hill</i>	
Sensitivity Analysis of a Reverberation Chamber with Respect to Tuner Speeds	1033
<i>Vignesh Rajamani, Charles F. Bunting, James C. West</i>	
Evaluation of Test Reproducibility of Calibration in Reverberation Chamber	1039
<i>Jinliang He, Zhiyong Yuan, Rong Zeng, Shuiming Chen, Bo Zhang, Fan Wu</i>	
Printed Circuit Board Modeling	
The Effects of Signal Trace's Termination on Ground Bounce and Common-Mode Radiation	1043
<i>Eng-Kee Chua, Er-Ping Li, Kye-Yak See, Weng-Yew Chang</i>	
Capacitance of an Open Circuit Via Port	1048
<i>Matthew Wood, Franz Schlagenhauer</i>	
Coupling Analysis of PCB-Chassis Systems with Signal Lines and Via Structures using SPICE	1054
<i>Naoki Kobayashi, Ken Morishita, Manabu Kusumoto, Takashi Harada, Todd Hubing</i>	
High-Accuracy Emission Simulation Models for VLSI Chips including Package and Printed Circuit Board	1060
<i>Thomas Steinecke, Mehmet Goekcen, Dirk Hesidenz, Andreas Gstoettner</i>	
SPICE-Compatible Cavity and Transmission Line Model for Power Bus with Narrow Slots	1066
<i>Gang Feng, Yao Jiang Zhang, James L. Drewniak, Lin Zhang</i>	
Modelling of a Mixed Signal Processor Susceptibility to Near-Field Aggression	1071
<i>A. Boyer, S. Bendhia, E. Sicard</i>	
EM Materials	
Method of Measuring Permittivity of Composite Materials with Hexagonal Ferrite Inclusions	1076
<i>Alexander A. Kitaitsev, Gulnur N. Zhumabayeva, Marina Y. Koledintseva</i>	
Effective Properties of Carbon Fiber Composites: EM Modeling Versus Experimental Testing	1082
<i>A. Balzano, I. M. De Rosa, F. Sarasini, M. S. Sarto</i>	
Shielding Effectiveness of a Metamaterial Slab	1088
<i>Giampiero Lovat, Paolo Burghignoli</i>	
Development of Lightweight Solid Phantom Composed of Silicone Rubber and Carbon Nanotubes	1093
<i>Takashi Hikage, Yuki Sakaguchi, Toshio Nojima, Yuji Koyamashita</i>	
Broad Band Electromagnetic Absorption of Flexible Foils in the Microwave Range	1097
<i>P. Görnert, P. Payer, O. Surzhenko, L. Michalowsky, H. Heegn, E. Madai, M. Langer</i>	
Resonance Suppression in Enclosures with a Metallic-Lossy Dielectric Layer by Means of Genetic Algorithms	1102
<i>Antonio J. Lozano-Guerrero, Alejandro Díaz-Morcillo, Juan Vicente Balbastre-Tejedor</i>	
Shielding Performance Modeling	
Numerical Modeling of Periodic Composite Media for Electromagnetic Shielding Application	1107
<i>Dagang Wu, Rui Qiang, Ji Chen, Ce Liu, Marina Koledintseva, James Drewniak, Bruce Archambeault</i>	
Modeling of the Reverberation Chamber Method for the Wire-mesh Shielding Performance Evaluation	1112
<i>Valter Mariani Primiani, Franco Moglie, Anna Pia Pastore, Sara Pistolesi</i>	

Table of Contents

Effects of Aperture Thickness on the Shielding Effectiveness of Metallic Enclosures	1117
<i>Rodolfo Araneo, Giampiero Lovat, Simone Paulotto</i>	
Evaluation of Frequency Characteristics of Absorbing Materials Using Time-Domain Single Antenna Method at Standard Site	1123
<i>Satoru Kurokawa, Masanobu Hirose, Koji Komiyama</i>	
Shielding Effectiveness of Rectangular Enclosures with Aperture Using Multiresolution Method of Moments	1126
<i>Fatemeh Hodjat, Rouzbeh Moini, Masood Shafiee</i>	
An Investigation on ILCMS for Coupling of Fields Into a Generic Missile Body through Apertures	1129
<i>L. C. Chirwa, J. F. Dawson, M. P. Robinson</i>	
Poster Session 04 - EM Measurements	
Low Cost Noise Sources	1132
<i>Lukás Vojtech</i>	
3D Radiated Spurious Emission Test System	1135
<i>Guo Lin, Xiao Li, Wang Nan, Zhou Beiqi</i>	
Understanding and Selecting Antennas for Measuring in Congested Electromagnetic Environments	1139
<i>Philip F. Keebler, Kermit O. Phipps</i>	
Investigation of Wave Propagation Using Smart Antenna for Indoor Wireless Communication	1145
<i>Junwei Lu, Zhaohui Sun</i>	
Circuit Specifications for Radio-Noise Reduction Vehicle-mounted Communication Network: Specification Development using Inverse Calculation	1150
<i>Youichirou Suzuki, Noboru Maeda, Nobuyuki Iwasaki</i>	
Investigation of the Coupling Paths of a Galvanically Isolated AC/AC Converter	1156
<i>Anne Roc'h, Dongsheng Zhao, Frank Leferink, Henk Polinder, Braham Ferreira</i>	
Using Nested Reverberation Chambers to Determine the Shielding Effectiveness of a Material: Getting Back to the Basics With a "Lei"-Person's Approach	1162
<i>Jason B. Coder, John M. Ladbury, Christopher L. Holloway</i>	
Measurement of Shielding Effectiveness in the Microwave Frequency Range using a Dual Focus Flat Cavity	1168
<i>Toshihide Tosaka, Atsuhiko Nishikata, Kaori Fukunaga, Yukio Yamanaka</i>	
Special Session - Industry Standard Cables and Shielding Performance Session Chairs: Bruce Archambeault, Dana J. Bergey	
EMI Design of Shielded Cable Assemblies	1172
<i>Jim Nadolny</i>	
Cable Shielding Test Methods: A Comparison of Different Test Methods	1178
<i>Joachim Mueller</i>	
The Shielding Performance of Industry Standard Cable Assemblies	1184
<i>Dana J. Bergey, Nathan Altland</i>	
EMI Emissions from mismatches in High Speed Differential Signal Traces and Cables	1190
<i>Bruce Archambeault, Joseph C. Diepenbrock, Samuel Connor</i>	
Predictive Modeling of the Effects of Skew and Imbalance on Radiated EMI from Cables	1196
<i>J. Chen, J. L. Drewniak, R. E. DuBroff, J. L. Knighten, J. Fan, J. Flavin</i>	

Table of Contents

Special Session - Advanced EMI Measurements Session

Chairs: Hiroshi Yamane, H.R. Hofman

Investigation of Radiated Emission Measurement Method above 1 GHz 1201
Chiharu Miyazaki, Yoichi Igarashi, Kiyoshi Endo, Shozo Satake, Jiro Kawano

Development and Evaluation of a Prototype Multichannel APD Measuring Receiver 1206
K. Gotoh, Y. Matsumoto, S. Ishigami, T. Shinozuka, M. Uchino

Adjacent Electromagnetic Field APD Measurement for Analyzing Autojamming Issue on Wireless Communication System 1212
Satoshi Kazama, Hiroshi Tutagaya

Common Mode Voltage Evaluation for choosing Quiet MCU and Optimizing PCB Design: Electromagnetic Emissions Measurement for Integrated Circuits 1218
Atsushi Nakamura, Yuichi Mabuchi

Inter-laboratory Comparison Result as the Proficiency Testing Program of EMI Test Sites in Japan 1224
Kunihiro Osabe, Rikio Watanabe, Atsuya Maeda, Masanori Yamaguchi

Reverberation Chamber Measurements II

An Investigation of the Shielding Performance of PCB-level Enclosures using a Reverberation Chamber 1230
He Yuhui, Andy Marvin

Measuring the Shielding Effectiveness of Small Enclosures/Cavities with a Reverberation Chamber 1236
C. L. Holloway, J. Ladbury, J. Coder, G. Koepke, D. A. Hill

Pulsed Power 3 GHz Feasibility Study for a 36.7 m³ Mode Stirred Reverberation Chamber 1241
Olof Lundén, Mats Bäckström

Hybrid Mode-Stirring Technique for Shielding Effectiveness Measurement of Enclosures Using Reverberation Chambers 1247
Sandra Greco, Maria Sabrina Sarto

How to Avoid Unstirred High Frequency Components in Mode Stirred Reverberation Chambers 1253
Olof Lundén, Mats Bäckström

Cables and Transmission Lines

On Eliminating Crosstalk in a Multiconductor Telecommunication Cable 1257
Sandrine Roblot, Ahmed Zeddani, Alain Reineix

A Study on Suppression of Crosstalk between Parallel Transmission Lines at High Frequency Band 1263
Takashi Kasuga, Hiroshi Inoue

High-Voltage EMC

Corona Onset Voltage at High Frequency for an Isolated, Cylindrical Electrode 1269
William O. Price, John Drapala, David V. Thiel, Robert G. Olsen

HPM Testing and Transmission Measurements on Optical Sensors 1273
Patrik Svensén

Comparative Study of Electrode Geometry Affects on Corona Onset and Schottky Diode Breakdown 1279
Mark Barlow, Frank X. Li, Tom N. Oder, Salvatore Pansino

Table of Contents

Computational Electromagnetic Modeling III

Analytical HF Model of a Low Voltage DC Motor Armature Including Parasitic Properties	1284
<i>Jens Benecke, Stefan Dickmann</i>	
Simulation Analysis on EMI of ± 800-kV UHVDC Converter Station	1288
<i>Zhanqing Yu, Jinliang He, Rong Zeng, Bo Zhang, Shuiming Chen, Hong Rao, Jie Zhao, Xiaolin Li, Qi Wang</i>	
Simulation and Analysis of EMC Chambers by Ray Tracing Method	1293
<i>Ming-Shing Lin, Jia-Ming Ji, Chung -I. G. Hsu, Han-Chang Hsieh</i>	
Reduced Order Modeling for Transient Analysis of Carbon Nanotubes Interconnects	1297
<i>G. Antonini, A. Orlandi</i>
