## Twentieth IEEE International Symposium on Computer-Based Medical Systems

20-22 June 2007  
Maribor, Slovenia

Sponsored by  
IEEE Computer Society Technical Committee on Computational Medicine (TCCM)  
Faculty of Electrical Engineering and Computer Science  
Faculty of Health Sciences

*Los Alamitos, California*  
*Washington • Tokyo*

# Table of Contents

## 20<sup>th</sup> IEEE International Symposium on Computer-Based Medical Systems (CBMS 2007)

Preface	xvii
CBMS 2007 Committees	xviii

### Invited Speaker

Rotation Forest and Random Oracles: Two Classifier Ensemble Methods	3
<i>Juan J. Rodríguez</i>	

### GS1: Software Systems in Medicine

A Medical Case-Based Reasoning Component for the Rare Metabolic Diseases Database RAMEDIS	7
<i>Thoralf Töpel, Jens Neumann, and Ralf Hofestädt</i>	

CiteXtract: Extracting Citation Data from Biomedical Literature	12
<i>Nikolay Nikolov, Peter Stoehr, Weimin Zhu, Mark Rijnbeek, and Sharmila Pillai</i>	

Diagnostic Games, A Tool for Clinical Experience Formalization in Interactive “Physician – IT-specialist” Framework	15
<i>Michael Shifrin, Olga Belousova, and Eva Kasparova</i>	

Determining Readmission Time Window Using Mixture of Generalised Erlang Distribution	21
<i>Eren Demir, Thierry Chaussalet, and Haiheng Xie</i>	

A Gesture Interface for Radiological Workstations	27
<i>Brian Tani, Rafael Maia, and Aldo von Wangenheim</i>	

Open Source Software in Health Care and Open Three Example	33
<i>Dejan Dinevski, Paolo Inchingolo, Ivan Krajnc, and Peter Kokol</i>	

### GS2: Computer Aided Diagnosis

A System for Computer Aided Detection of Diseases Patterns in High Resolution CT Images of the Lungs	41
<i>Tatjana Zrimec and S. Busayarat</i>	

SuGAR: A Framework to Support Mammogram Diagnosis	47
<i>Marcela Ribeiro, Agma Traina, Andre Balan, Caetano Traina Jr., and Paulo Marques</i>	

Computational Techniques for Accompaniment and Measuring of Otology Pathologies _____	53
<i>Vilson Heck Junior, Aldo von Wangenheim, D.D. Abdala, E. Comunello, S.S. Costa, and C.C. Dornelles</i>	
Diagnosis of Carpal Tunnel Syndrome from Thermal Images Using Artificial Neural Networks _____	59
<i>Miroslav Palfy and Breda Jesenšek Papež</i>	
Multiple Sclerosis Diagnoses—Case-Base Reasoning Approach _____	65
<i>V. Kurbalija, M. Ivanović, Z. Budimac, and M. Semnic</i>	
<b>GS3: Knowledge Based Systems</b>	
Recognize a Special Structure in Palmprint for Palm Medicine _____	73
<i>Kuanquan Wang, Jing Liao, Xiangqian Wu, and Henggui Zhang</i>	
Web-Based Decision Support in Selecting Patients with Parkinson’s Disease for Deep Brain Stimulation _____	79
<i>Marcus Vitek, Michaela Pinter, Andrea Rappelsberger, Yoichi Hayashi, and Klaus-Peter Adlassnig</i>	
Computerized Contingency Management for Motivating Behavior Change: Automated Tracking and Dynamic Reward Reinforcement Management _____	85
<i>Massoud Vahabzadeh, Jia-Ling Lin, David Epstein, Mustapha Mezghanni, John Schmittner, and Kenzie Preston</i>	
A Bayesian Network Hybrid Model for Representing Accident and Emergency Waiting Times _____	91
<i>Adele Marshall and Louise Burns</i>	
Supporting Collaboration of Medical Informatics Researchers and Teams _____	97
<i>Vili Podgorelec and Luka Pavlič</i>	
Analyzing Requirements for a Large Scale System for Cancer Research _____	103
<i>Vito Perrone and Anthony Finkelstein</i>	
Intelligent Data Analysis of Out-of-Hospital Cardiac Arrest _____	109
<i>Mateja Verlič, Miljenko Krizmaric, Stefek Grmec, and Peter Kokol</i>	
Symbol-Based Machine Learning Approach for Supervised Segmentation of Follicular Lymphoma Images _____	115
<i>Milan Zorman, Peter Kokol, Mitja Lenič, José Luis Sánchez de la Rosa, José Francisco Sigut, and Silvia Alayón</i>	
The Bayesian Decision Tree Technique Using an Adaptive Sampling Scheme _____	121
<i>Vitaly Schetinin, Wojtek Krzanowski, and Carsten Maple</i>	

Managing Diagnostic Process Data Using Semantic Web _____	127
<i>Vili Podgorelec and Luka Pavlič</i>	
<b>GS4: Signal and Image Processing in Medicine</b>	
A Time-Frequency Based Method for the Detection of Epileptic Seizures in EEG Recordings _____	135
<i>Alexandros Tzallas, Markos Tsipouras, and Dimitrios Fotiadis</i>	
Detection of Microcalcifications in Mammographies Based on Linear Pixel Prediction and Support-Vector Machines _____	141
<i>Francisco Martínez-Álvarez, A. Troncoso, J.C. Riquelme, and J.S. Aguilar-Ruiz</i>	
Improving Performance and Quality in Content-Based Medical Image Retrieval _____	147
<i>Antonio da Luz Jr., Daniel Abdala, Aldo von Wangenheim, and Eros Comunello</i>	
Multifaceted Hyperimage-Based Organization and Interaction with Bio-Medical Images _____	153
<i>Rahul Singh, Cedric Massa, and Pierre-Yves Corlobe</i>	
Pit Pattern Classification of Zoom-endoscopical Colon Images Using DCT and FFT _____	159
<i>Michael Häfner, Leonhard Brunauer, Hannes Payer, Robert Resch, Friedrich Wrba, Alfred Gangl, Andreas Vécsei, and Andreas Uhl</i>	
Problem Solving Environment for Medical Image Analysis _____	165
<i>Ketan Maheshwari, Silvia Olabarriaga, Charl Botha, Jeroen Snel, Johan Alkemade, and Adam Belloum</i>	
HEAD: The Human Encephalon Automatic Delimiter _____	171
<i>André Balan, Agma Traina, Marcela Ribiero, Paulo Marques, and Caetano Traina Jr.</i>	
A Fast Vessel Centerline Extraction Algorithm for Catheter Simulation _____	177
<i>Jan Egger, Zvonimir Mostarkić, Stefan Großkopf, and Bern Freisleben</i>	
Automated IVUS Contour Detection Using Intensity Features and Radial Basis Function Approximation _____	183
<i>Maria Papadogiorgaki, Vasileios Mezaris, Yiannis Chatzizisis, George Giannoglou, and Ioannis Kompatsiaris</i>	
Computational Characterization of Thyroid Tissue in the Radon Domain _____	189
<i>M.A. Savelonas, D.K. Iakovidis, N. Dimitropoulos, and D. Maroulis</i>	
SAPhyRA: Stream Analysis for Physiological Risk Assessment _____	193
<i>Daniele Apiletti, Elena Baralis, Giulia Bruno, and Tania Cerquitelli</i>	

Detection of Bronchopulmonary Segments on High-Resolution CT— Preliminary Results _____	199
<i>Sata Busayarat and Tatjana Zrimec</i>	
Segmentation of Ovarian Ultrasound Images Using Single Template Cellular Neural Networks Trained with Support Vector Machines _____	205
<i>Mitja Lenič, Damjan Zazula, and Boris Cigale</i>	
<b>GS5: Bioinformatics</b>	
From Local Laboratory Data to Public Domain Database in Search of Indirect Association of Diseases: AJAX Based Gene Data Search Engine _____	213
<i>Nawaz Khan, Ham Long, Shahhedur Rahman, and Tony Stockman</i>	
Early Experiences in the Staining Pattern Classification of HEP-2 Slides _____	219
<i>Paolo Soda</i>	
Ontology Based Clustering for Improving Genomic IR _____	225
<i>Jian Wen, Zhoujun Li, and Xiaohua Hu</i>	
A Conceptual Data Model Language for the Molecular Biology Domain _____	231
<i>Jose Antonio Fernandes de Macedo, Fabio Porto, Sergio Lifschitz, and Phillipe Picouet</i>	
Influence of Dictionary Size on the Lossless Compression of Microarray Images _____	237
<i>Robert Bierman and Rahul Singh</i>	
Effectiveness of Rotation Forest in Meta-learning Based Gene Expression Classification ____	243
<i>Gregor Stiglic and Peter Kokol</i>	
<b>GS6: Medical Image Segmentation</b>	
Region Based Segmentation and Classification of Multispectral Chromosome Images _____	251
<i>Petros Karvelis, Dimitrios Fotiadis, Alexandros Tzallas, and Ioannis Georgiou</i>	
Segmentation and Tracking of the Left Ventricle in 3D MRI Sequences Using an Active Surface Model _____	257
<i>Julien Mille, Romuald Boné, Pascal Makris, and Hubert Cardot</i>	
A System for the Determination of Image Density and Morphometry Developed for the Analysis of Malignant Nuclei _____	263
<i>Sadao Isotani, Nilson Brasil Fo, Olimpio Capeli, Yuriko Sakai, and Antonio R.P. de Albuquerque</i>	
Comparison of 3D Segmentation Algorithms for Medical Imaging _____	269
<i>Hakan Bulu and Adil Alpkocak</i>	

A Reduced Complexity Estimation Algorithm for Ultrasound Images De-Blurring _____	275
<i>Alessandro Palladini, Nicola Testoni, Luca De Marchi, and Nicolò Speciale</i>	
Exploiting the Self-Organizing Map for Medical Image Segmentation _____	281
<i>Ping-Lin Chang and Wei-Guang Teng</i>	
<b>GS7: Medical Databases and Information Systems</b>	
MYHEALTH: Personal Management of Health Information _____	289
<i>Sabah Al-Fedaghi and Ali NourEddine</i>	
Participant: A New Concept for Optimally Assisting the Elder People _____	295
<i>Hong Sun, Vincenzo De Florio, Ning Gui, and Chris Blondia</i>	
Evaluation of Usability and Assessment Capabilities of an e-Learning System for Nursing Radiation Protection _____	301
<i>Ioannis Hatzilygeroudis, Constantinos Koutsojannis, and Nikolaos Papachristou</i>	
Use of Personal Digital Assistants (PDAs) in Medical Education _____	307
<i>Rattiporn Luanrattana, Khin Than Win, and John Fulcher</i>	
Understanding User's Role in Computer-Based Information Systems— Lessons Learned from Dealing with Mislabelling in Blood Production Process _____	313
<i>D. Qiu, G. Junghans, J. Misterek, G. Bein, and K. Marquardt</i>	
Enabling the European Patient Summary through Triplespaces _____	319
<i>Reto Krummenacher, Elena Simperl, Lyndon Nixon, Dario Cerizza, and Emanuele Della Valle</i>	
The TraPa System: A Web-Based System to Improve Cross-Border Patient Transfers _____	325
<i>Stathis Konstantinidis, Panagiotis Bamidis, Slobodan Marolov, and Costas Pappas</i>	
An EHR-Based Multi-Site Recruiting System for Clinical Trials _____	331
<i>Massoud Vahabzadeh, Jia-Ling Lin, Mustapha Mezghanni, Carlo Contoreggi, and Michelle Leff</i>	
Radio Frequency Identification Applications in Smart Hospitals _____	337
<i>Huzaiifa Al Nahas and Jitender Deogun</i>	
Two Models Used as a Basis for Development of Electronic Data Collection Software to Support Clinical Trials _____	343
<i>Ivan Pavlović and Ivan Lazarević</i>	
Teaching IT in Health Care and Nursing Program—Experiences _____	349
<i>Tatjana Welzer, Peter Kokol, Ana Habjanič, Boštjan Brumen, Marjan Družovec, and Aida Kamišalič</i>	

## **ST1: Affective Computing**

- Toward Recognizing Individual's Subjective Emotion from  
Physiological Signals in Practical Application \_\_\_\_\_ 357  
*Olivier Villon and Christine Lisetti*
- Towards an Emotion Specification Method:  
Representing Emotional Physiological Signals \_\_\_\_\_ 363  
*Andrej Luneski and Panagiotis Bamidis*

## **ST2: Bioinformatics and its Medical Applications**

- Feature Extraction for DNA Microarray Data \_\_\_\_\_ 371  
*Yihui Liu*
- Analysis of Knee-joint Vibroarthrographic Signals Using Statistical Measures \_\_\_\_\_ 377  
*Rangaraj Rangayyan and Yunfeng Wu*
- Inferring Gene Regulatory Networks from Microarray Time Series Data  
Using Transfer Entropy \_\_\_\_\_ 383  
*Thai Quang Tung, Taewoo Ryu, Kwang Lee, and Doheon Lee*
- An Unsupervised and Fully-Automated Image Analysis Method for cDNA Microarrays \_\_\_ 389  
*E. Zacharia and D. Maroulis*

## **ST3: Computational Proteomics: Management and Analysis of Proteomics Data**

- MS2DB: A Mass-Based Hashing Algorithm for the Identification of Disulfide Linkage  
Patterns in Protein Utilizing Mass Spectrometric Data \_\_\_\_\_ 397  
*Timothy Lee, Rahul Singh, Ten-Yang Yen, and Bruce Macher*
- Statistical Classification and Visualization of MALDI-Imaging Data \_\_\_\_\_ 403  
*Marc Gerhard, Sören-Oliver Deininger, and Frank-Michael Schleif*
- SWISS-TANDEM: A Web-Based Workspace for MS/MS  
Protein Identification on PC Grids \_\_\_\_\_ 406  
*Dominique Zosso, Konstantin Arnold, Torsten Schwede, and Michael Podvinec*
- A Time Series Based Approach for Classifying Mass Spectrometry Data \_\_\_\_\_ 412  
*F. Gullo, G. Ponti, A. Tagarelli, G. Tradigo, and P. Veltri*

## ST4: Data Mining

Text Categorization for Multi-label Documents and Many Categories _____	421
<i>I. Sandu Popa, K. Zeitouni, G. Gardarin, D. Nakache, and E. Métais</i>	
Statistical Comparison of Machine Learning Techniques for Treatment Optimisation of Drug-Resistant HIV-1 _____	427
<i>Mattia Prospero, Giovanni Ulivi, and Maurizio Zazzi</i>	
A Bayesian Network Model for the Diagnosis of the Caring Procedure for Wheelchair Users with Spinal Injury _____	433
<i>Maria Athanasiou and Jonathan Clark</i>	
A Large Scale Data Mining Approach to Antibiotic Resistance Surveillance _____	439
<i>Eugenia Giannopoulou, Vasileios Kemerlis, Michalis Polemis, Joseph Papaparaskevas, Alkiviadis Vatopoulos, and Michalis Vazirgiannis</i>	
Intelligent Data Analysis for Diagnostics of Alcohol Dependency _____	445
<i>Petra Povalej, Matej Kravos, and Peter Kokol</i>	
Improving Clinical Path Management Strategies by Constructive Induction _____	451
<i>Matej Mertik, Milan Zorman, and Bojan Zalar</i>	

## ST5: Grids for Biomedicine and Bioinformatics

Switched Lightpaths for e-Health Applications: Issues and Challenges _____	459
<i>Lee Momtahan, Sharon Lloyd, and Andrew Simpson</i>	
HIV-1 Coreceptor Usage Prediction via Indexed Local Kernel Smoothing Methods and Grid-Based Multiple Statistical Validation _____	465
<i>Iuri Fanti, Mattia Prospero, Giovanni Ulivi, and Alessandro Micarelli</i>	
Intensive Care Window: A Multi-Modal Monitoring Tool for Intensive Care Research and Practice _____	471
<i>Harald Gjermundrød, Marios Papa, Demetrios Zeinalipour-Yazti, Marios Dikaiakos, George Panayi, and Theodoros Kyprianou</i>	
An Application Platform Enabling High Performance Grid Processing of Microarray Experiments _____	477
<i>Ilias Maglogiannis, Aristotelis Chatzioannou, John Soldatos, Vasileios Mylonakis, and Yiannis Kanaris</i>	
A Grid-ready Clinical Database for Parkinson's Disease Research and Diagnosis _____	483
<i>Susumu Date, Takahito Tashiro, Kazunori Nozaki, Haruki Nakamura, Saburo Sakoda, and Shinji Shimojo</i>	

Biological Experiments on the Grid: A Novel Workflow Management Platform _____	489
<i>D. Laforenza, R. Lombardo, M. Scarpellini, M. Serranò, F. Silvestri, and P. Faccioli</i>	
GReC Data Storage: A Lightweight Disk Storage Management Solution for Bioinformatics “in silico” Experiments _____	495
<i>Sandro Fiore, Maria Mirto, Massimo Cafaro, and Giovanni Aloisio</i>	
<b>ST6: Healthcare Knowledge Management</b>	
Retrospective Analysis of the Electronic Health Records of Patients Enrolled in a Computerized Glucose Management Protocol _____	503
<i>Vojtech Huser and Roberto Rocha</i>	
Medical Domain Ontology Construction Approach: A Basis for Medical Decision Support _____	509
<i>Rim Djedidi and Marie-Aude Aufaure</i>	
Embedding the Evidence Information in Guideline Representation Languages _____	512
<i>Alime Öztürk, Katharina Kaiser, Patrick Martini, and Silvia Miksch</i>	
Semantic Clinical Process Management _____	518
<i>Massimo Ruffolo, Marco Manna, Vittoria Cozza, and Raffaello Ursino</i>	
Process-oriented Knowledge Support in a Clinical Research Setting _____	524
<i>Sascha Müller and Stefan Jablonski</i>	
Merging Healthcare Ontologies: Inconsistency Tolerance and Implementation Issues _____	530
<i>Fahim Imam, Wendy MacCaull, and Margaret Ann Kennedy</i>	
Ontology Engineering to Model Clinical Pathways: Towards the Computerization and Execution of Clinical Pathways _____	536
<i>Katrina Hurley and Syed Sibte Raza Abidi</i>	
Ontology-Based Modeling of Breast Cancer Follow-up Clinical Practice Guideline for Providing Clinical Decision Support _____	542
<i>Samina Raza Abidi</i>	
Understanding Individual Experiences of Chronic Illness with Semantic Space Models of Electronic Discussions _____	548
<i>Guocai Chen, Jim Warren, Robert McArthur, Peter Bruza, Debbie Kralik, and Kay Price</i>	
Medical Knowledge Morphing via a Semantic Web Framework _____	554
<i>Syed Sibte Raza Abidi and Sajjad Hussain</i>	

## **ST7: Machine Learning and Management of Health-Care Procedural Knowledge**

- The SDA\* Model: A Set Theory Approach \_\_\_\_\_ 563  
*David Riaño*
- Increasing Acceptability of Decision Trees with Domain Attributes Partial Orders \_\_\_\_\_ 569  
*Joan Albert López-Vallverdú, David Riaño, and Antoni Collado*
- Automatic Generation of Formal Intervention Plans Based on the  
SDA\* Representation Model \_\_\_\_\_ 575  
*Francis Real, David Riaño, and John Bohada*
- Temporal Constraints Approximation from Data about Medical Procedures \_\_\_\_\_ 581  
*Aida Kamišalić, David Riaño, Francis Real, and Tatjana Welzer*

## **ST8: Ontologies for Biomedical Systems**

- Multi-level Conceptual Modeling for Biomedical Data and Ontologies Integration \_\_\_\_\_ 589  
*Ramez Elmasri, Jack Fu, and Feng Ji*
- Feature Ontology for Improved Learning from Large-Dimensional  
Disease-Specific Heterogeneous Data \_\_\_\_\_ 595  
*Alexey Tsymbal, Sonja Zillner, and Martin Huber*
- Visual Modeling of Ontology Views for e-Sciences Using Xsemantic Nets \_\_\_\_\_ 601  
*R. Rajugan, Elizabeth Chang, and Tharam Dillon*
- Protein Ontology Project in 2007: Looking Backward and Forward \_\_\_\_\_ 607  
*Amandeep Sidhu, Tharam Dillon, and Elizabeth Chang*
- Auto-Extraction, Representation and Integration of a  
Diabetes Ontology Using Bayesian Networks \_\_\_\_\_ 612  
*Ken MCGarry, Sheila Garfield, and Stefan Wermter*
- Conceptual Graphs Based Information Retrieval in HealthAgents \_\_\_\_\_ 618  
*Madalina Croitoru, Bo Hu, Srinandan Dasmahapatra,  
Paul Lewis, David Dupplaw, Alex Gibb, Margarida Julia-Sape,  
Javier Vicente, Carlos Saez, Juan Miguel Garcia-Gomez,  
Roman Roset, Francesc Estanyol, Xavier Rafael, and Mariola Mier*
- Managing Conceptual Revisions in a Temporal Fungal Taxonomy \_\_\_\_\_ 624  
*Arash Shaban-Nejad and Volker Haarslev*

## ST9: Technology Enhanced Learning in Medical Education

Lessons Learned from Caisis: An Open Source, Web-Based System for Integrating Clinical Practice and Research _____	633
<i>Paul Fearn, Kevin Regan, Frank Sculli, Jason Fajardo, Brandon Smith, and Paul Alli</i>	
Knowledge Acquisition through Computer-Based Training: Histology of the Skin in Basic Medical Education _____	639
<i>Josef Smolle and Gilbert Reibnegger</i>	
A Web-Based Authoring System Supporting Metadata— Using e-Learning as an Example _____	645
<i>Eric Jui-Lin Lu, Gwoboa Horng, Chia-Ssu Yu, and Ling-ying Chou</i>	
A Customized Open Source Content Management System to Support Collaborative Distance Learning: The J@LON Platform _____	651
<i>Pascal Staccini, Christophe Bordonado, Jérôme Alet, Michel Joubert, Jean-Charles Dufour, and Marius Fieschi</i>	
Vicarious Learning and (Virtual) Case-Based Teaching in Health Science Education _____	657
<i>Richard Cox and Jianxiong Pang</i>	
Online Medical CBT Usage _____	663
<i>A.J.M. de Man, P.M. Bloemendaal, and S. Eggermont</i>	
An Ontology-Based Approach to Constructing Medical Computational Problems for Use in Electronic Medical Education _____	669
<i>Charalampos Bratsas, Evangelos Kaimakamis, Vassilis Koutkias, Panagiotis Bamidis, and Nicos Maglaveras</i>	
IMPROHEALTH II: Web Based Virtual Quality Center for Vocational Education and Training in Health Informatics _____	675
<i>Spyros Kitsiou, Maro Vlachopoulou, and Vicky Manthou</i>	
Pen Based Graphical Annotation in Medical Education _____	681
<i>Dorian Gorgan, Teodor Stefanut, and Bogdan Gavrea</i>	
Evaluation of an E-learning Course in Biomedical Technology Management _____	687
<i>Panagiotis Malataras and Nipa Pallikarakis</i>	
A Proposed Framework for Accreditation of Online Continuing Medical Education _____	693
<i>Panagiotis Bamidis, Maria Nikolaidou, Stathis Konstantinidis, and Costas Pappas</i>	

## **ST10: Intelligent Patient Management**

<b>Generalized Net Model for Outpatient Care in Bulgaria</b> _____	<b>701</b>
<i>Violeta Tasseva, Desislava Peneva, Krassimir Atanassov, Elia El-Darzi, Panagiotis Chountas, and Christos Vasilakis</i>	
<b>A Test-Data Management Function for Chronic Conditions Patients</b> _____	<b>707</b>
<i>Shuichi Toyoda, Noboru Niki, and Hiromu Nishitani</i>	
<b>Using Markov Models to find Interesting Patient Pathways</b> _____	<b>713</b>
<i>Sally McClean, Lalit Garg, Brian Meenan, and Peter Millard</i>	
<b>A Semi-open Queueing Network Approach to the Analysis of Patient Flow in Healthcare Systems</b> _____	<b>719</b>
<i>Haifeng Xie, Thierry Chausalet, and Mike Rees</i>	
<b>Patients Flow: A Mixed-Effects Modelling Approach to Predicting Discharge Probabilities</b> _____	<b>725</b>
<i>Shola Adeyemi, Thierry Chausalet, Haifeng Xie, and Peter Millard</i>	
<b>Author Index</b> _____	<b>731</b>
