

Proceedings

2007 Australian Software Engineering Conference

ASWEC 2007

10-13 April, 2007
Melbourne, Australia

Gold Sponsors

Data Processors
Infosys Australia

Bronze Sponsors

Davies Collison Cave
Object Consulting
Sun Microsystems Labs
Swinburne University of Technology

Additional Sponsors

IT Today
Elsevier Australia

Organised by

Australian Computer Society (ACS) and Engineers Australia
acting through The Joint Board in Software Engineering

Los Alamitos, California
Washington • Tokyo

Table of Contents

ASWEC 2007

Message from the General Chair	ix
Message from the Research Program Chairs	x
Organizing Committee	xi
Steering Committee	xi
Research Program Committee	xii
Industry Program Committee	xiii
Additional Reviewers	xiii

Keynotes

Modeling Change as a First-Class Entity	3
<i>Oscar Nierstrasz</i>	
Engineering Large-Scale Software-Intensive Systems	4
<i>R. Geoff Dromey</i>	

Software Architecture

An Asset-Based Architecture Design Methodology for Rapid Telecom Service Delivery Platform Development	7
<i>Jun Shen, Qiming Tian, Xiaoyan Chen, Chun Ying, and Ken Chen</i>	
A Pattern-Driven Process Model for Quality-Centered Software Architecture Design – A Case Study on Usability-Centered Design	17
<i>Jukka Kaartinen, Jarmo Palviainen, and Kai Koskimies</i>	
Prerequisites for Successful Architectural Knowledge Sharing	27
<i>Rik Farenhorst, Patricia Lago, and Hans van Vliet</i>	

Adaptive and Reconfigurable Software Architectures

Dynamic Protocol Aggregation and Adaptation for Service-Oriented Computing	39
<i>Linh Duy Pham, Alan Colman, and Jean-Guy Schneider</i>	

A Configurable Event Correlation Architecture for Adaptive J2EE Applications	49
<i>Yan Liu, Ian Gorton, and Vinh Khanh Le</i>	
Influence Control for Dynamic Reconfiguration.....	59
<i>Zhikun Zhao and Wei Li</i>	

Service-Oriented Software Systems

A Formal Model of Service-Oriented Design Structure	71
<i>Mikhail Pereplechikov, Caspar Ryan, Keith Frampton, and Heinz W. Schmidt</i>	
Web Service Recommendation Based on Client-Side Performance Estimation	81
<i>Niko Thio and Shanika Karunasekera</i>	
Tool Support for BPEL Verification in ActiveBPEL Engine.....	90
<i>Yi Qian, Yuming Xu, Zheng Wang, Geguang Pu, Huibiao Zhu, and Chao Cai</i>	

Object-Oriented Software Engineering

Supporting OO Design Heuristics	101
<i>Neville Churcher, Sarah Frater, Cong Phuoc Huynh, and Warwick Irwin</i>	
Using Stealth Mixins to Achieve Modularity	111
<i>Robert Strandh, John Hamer, and Gilbert Baumann</i>	
Suitability of Object and Aspect Oriented Languages for Software Maintenance	117
<i>Khalid Al-Jasser, Peter Schachte, and Ed Kazmierczak</i>	

Knowledge-Based Software Engineering

Using Social Networking and Semantic Web Technology in Software Engineering — Use Cases, Patterns, and a Case Study.....	129
<i>Jens Dietrich and Nathan Jones</i>	
OntoMove: A Knowledge Based Framework for Semantic Requirement Profiling and Resource Acquisition	137
<i>Mehul Bhatt, Wenny Rahayu, Sury Prakash Soni, and Carlo Wouters</i>	
Reusable SW Requirements Development Process: Embedded SW Industry Experiences	147
<i>Seungyun Lee, Hyunmin Ko, Myungjin Han, Dongcho Jo, Junho Jeong, and Kangtae Kim</i>	

Software Performance

Explicitly Controlling the Fair Service for Busy Web Servers.....	159
<i>Zhanwen Li, David Levy, Shiping Chen, and John Zic</i>	
Benchmark Generation Using Domain Specific Modeling	169
<i>Ngoc Bao Bui, Liming Zhu, Ian Gorton, and Yan Liu</i>	

Formal Methods

Formal Validation of Hierarchical State Machines against Expectations.....	181
<i>Ian Toyn and Andy Galloway</i>	
Slicing Communicating Automata Specifications for Efficient Model Reduction.....	191
<i>Sébastien Labbé, Jean-Pierre Gallois, and Marc Pouzet</i>	
A Kleene Algebra Framework for Data Flow Analysis.....	201
<i>Therrezinha Fernandes</i>	
Timed Behavior Trees and their Application to Verifying Real-Time Systems.....	211
<i>Lars Grunske, Kirsten Winter, and Robert Colvin</i>	

Software Analysis

Comparing the Cost-Effectiveness of Statically Analysing and Model Checking Concurrent Java Components for Deadlocks.....	223
<i>John Ngui, Paul Strooper, Luke Wildman, and Margaret Wojcicki</i>	
Obstacles to Comprehension in Usage Based Reading	233
<i>David J.A. Cooper, Brian R. von Konsky, Michael C. Robey, and David A. McMeekin</i>	

Software Testing

Class Testing from State Diagrams Using Stream X-machine Based Methods	245
<i>Florentin Ipate</i>	
Managing Conflicts when Using Combination Strategies to Test Software.....	255
<i>Mats Grindal, Jeff Offutt, and Jonas Mellin</i>	
Enhancing Adaptive Random Testing through Partitioning by Edge and Centre.....	265
<i>Tsong Yueh Chen, Fei-Ching Kuo, and Huai Liu</i>	
On the Learnability of Two Representations of Equivalence Partitioning and Boundary Value Analysis	274
<i>Tafline Murnane, Karl Reed, and Richard Hall</i>	
Model-Based Security Vulnerability Testing	284
<i>Percy A. Pari Salas, Padmanabhan Krishnan, and Kelvin J. Ross</i>	

Software and Tool Usability

Reflection as a Principle for Better Usability	297
<i>Christof Lutteroth and Gerald Weber</i>	
Improving Usability of Software Refactoring Tools	307
<i>Erica Mealy, David Carrington, Paul Strooper, and Peta Wyeth</i>	

Software Metrics

Measuring the Strength of Indirect Coupling	319
<i>Hong Yul Yang and Ewan Tempero</i>	
Coupling Metrics for Predicting Maintainability in Service-Oriented Designs.....	329
<i>Mikhail Pereplechikov, Caspar Ryan, Keith Frampton, and Zahir Tari</i>	

Project Estimation

Adjustable Cost Estimation Model for COTS-Based Development.....	341
<i>Poom Naunchan and Daricha Sutivong</i>	
Combining Estimates with Planning Poker – An Empirical Study.....	349
<i>Kjetil Moløkken-Østvold and Nils Christian Haugen</i>	
The Impact of Irrelevant Information on Estimates of Software Development Effort	359
<i>Stein Grimstad and Magne Jørgensen</i>	

Project Management

Planning Software Project Success with Semi-Quantitative Reasoning	369
<i>He Zhang, Barbara Kitchenham, and Ross Jeffery</i>	
Factors in Multimedia Project and Process Management — Australian Survey Findings	379
<i>Anne Hannington and Karl Reed</i>	
Software Project Risk in the Public Sector	389
<i>Paul L. Bannerman</i>	
NextMove: A Framework for Distributed Task Coordination.....	399
<i>David K.M. Mak and Philippe B. Kruchten</i>	

Author Index	409
