

2007 IEEE Cement Industry Technical Conference Record

**Charleston, S.C.
April 29 – May 2, 2007**

IEEE Catalog Number:
ISBN:

07CH37902
1-4244-1195-5

TABLE OF CONTENTS

Automation

<i>Current Trends in Cement Plant Instrumentation</i>	1
Sheldon V. Shepherd (Siemens)	
<i>Automated Mill Control using Vibration Signal Processing</i>	17
Dr. Karl Gugel (Digital Control Lab), Rodney Moon (CPC)	
<i>Process Control Network Security - Concerns and Remedies</i>	26
Michael Sopko (Lehigh Cement), Kevin Winegardner (Lehigh Cement)	
<i>Automated Cement Shipping and Raw Materials Receiving</i>	38
Richard Miller (Lehigh Cement), Dave Rogers (Process Solutions)	
<i>Automation Primer – Discussion of the Various Levels of Automation</i>	45
Greg DiFrank P.E. (River Consulting)	

General Practices

<i>The Installation of a New Horizontal, Fixed Grate-line Cooler at Ash Grove Cement-Montana City</i>	63
Chris Hines (Ash Grove), Mark Blower (FLS), Peter Paone (FLS)	
<i>Lafarge's Harleyville Cement Plant Kiln Baghouse Project</i>	74
Marijan Sever (Lafarge), Andre Lerebours (Lafarge)	
<i>The Best Total Value for Pyro Technology</i>	81
Brian P. Keefe, Robert E. Shenk	
<i>Pyro-Process Technology: Continuous Improvement</i>	90
Matthias Mersmann (KHD), Andreas Hand (KHD)	
<i>Building the World's Largest Kiln Line</i>	103
Jeff Ouhl (Holcim), Kevin Happ (FLS)	
<i>Experience with Design of large Size Cement Plants - Process and Layout Considerations in Pyroprocess Systems</i>	114
A.K. Dembla (KHD), Matthias Mersmann (KHD)	
<i>Implementation of Large Scale Equipment in Cement Production Plants</i>	123
Alexander Tigges (Polysius)	
<i>Optimizing Calciner Burners: Theoretical Treatment of Turbulent Diffusion Jets in Cross Flow</i>	129
Dr. Melahat Tosunoglu	

<i>Highly Efficient Burning of Clinker Using Flame Analysis and NMPC</i>	140
Dirk Schmidt	

Environmental, Maintenance and Safety

<i>Cause and Cure for High Volatile Coal and Corrosive Gases at TXI, Midlothian Plant</i>	147
Ahmed Shahid, Brian Bottelberghe and Jason Crowther (TXI)	

<i>Condition Monitoring and Non-destructive Testing of Mechanical Equipment</i>	160
Bill Hanks (A-C Equipment Services); Derek Couse (Mitsubishi Cement)	

<i>ISO– A ThreeLetter Word - A Description of Holcim (US) Inc. ’s Devil’s Slide Utah Plant Road to ISO Certification</i>	168
Kevin Ovard (Holcim)	

Drives

<i>Gearbox Design Development for Central Mill Drives and Vertical Roller Grinding Mill Drives</i>	182
Andreas Lüdiger	

<i>Stator Insulation Problems Associated with Low Voltage and Medium Voltage PWM Drives</i>	187
Greg Stone, I. Culbert and B. Lloyd (Iris Power Engineering)	

<i>Successful Retrofit Upgrade of Direct Hydraulic Drive System for Apron Feeder Application in a Limestone Quarry to Improve Reliability and Production</i> ..	193
Gordon Jones (Essroc), Ashok Amin (Hagglunds)	

<i>Gear Rating Impact of AGMA 6014 for Mill and Kiln Service</i>	207
Frank Uherek and Glen Cahala (Rexnord Geared Products)	

<i>Motor Bearings, not just a piece of metal</i>	214
Rolf Hoppler (ABB), Reinhold Errath (ABB)	

Power Distribution and Generation

<i>Ammonia and Water-based Thermal Conversion Technology: Applications in Waste-Heat Recovery for the Cement Industry</i>	234
Mark D. Mirolli (Recurrent Engineering, LLC)	

<i>Misapplication of Power Capacitors in Cement Mill Systems with Non-linear Loads</i>	242
Ronald H. Simpson (GE)	

<i>Arc Flash Hazard Reduction: Learnings from the IEEE Petroleum and Chemical Industry Committee</i>	255
H. Landis Floyd II (DuPont Engineering)	

*Using AC Control Power for Microprocessor-based
Protective Relays in Cement Industry Applications*263
Gary H. Fox (GE Consumer and Engineering)

First Order Thermal Model Applied to Cyclic Loads275
Ed Lebenhaft (Schweitzer Engineering Laboratories Inc.)
