# 2005 AMOS TECHNICAL CONFERENCE PROCEEDINGS

## Volume 1

### SSA OVERVIEW

- Making Vision a Reality: Delivering Counterspace Capabilities to the High Frontier .....** 10  
*Colonel James Haywood, Space Superiority Materiel Wing (SMC)*

- Situational Awareness: Space/Near Space to the Warfighter. ....** 11  
*Cindi Schmitt, Space and Missile Defense Battle Lab*

### IMAGING

- Rendering High-Dynamic Range Images: Algorithms that Mimic Human Vision .....** 19  
*John McCann, McCann Imaging*

- SPQR: Imaging Experiments Illuminating the ISS.....** 29  
*Doug Currie, University of Maryland*

- Temporal Constraints in the Blind Restoration of High-Cadence Imagery Obtained Through Atmospheric Turbulence .....** 39  
*Stuart Jefferies, Maui Scientific Research Center*

- Quantifying the Benefits of Positivity .....** 44  
*Brandoch Calef, Boeing LTS Maui*

- Spatial Frequency Bounds of a Polarimetric Sensor .....** 52  
*David Strong, Air Force Institute of Technology*

- Diffraction-Limited Image Restoration Using a New Object Prior .....** 59  
*Doug Hope, Maui Scientific Research Center, University of New Mexico*

- Experimental Studies of Anisoplanatism and Anisoplanatic Effects in Compensated Imagery from the AMOS 3.67 m Telescope .....** 65  
*Michael Roggemann, Michigan Technological University*

- Blind Iterative Restoration of Images with Spatially-Varying Blur.....** 78  
*Robert Plemmons, Wake Forest University*

### NON-RESOLVED OBJECT CHARACTERIZATION

- Non-Resolved Object Characterization (NROC) Mission Effectiveness to Space Situation Awareness (SSA).....** 87  
*Gary Nelson, SPARTA, Inc.*

- The Visual Magnitude Distribution and Optical Variability of LEO Space Objects .....** 99  
*Charles Gow, Northrop Grumman Corporation*

- Simultaneous Spectral Data and High Accuracy Positional Metrics of GEOs.....** 108  
*David Monet, U.S. Naval Observatory*

- Satellite Brightness Estimation Using Kriging Optimized Interpolation .....** 113  
*Jennifer Okada, AMOS (Boeing LTS)*

- ANDE Risk Reduction Flight Observing Opportunities and Mission Update .....** 124  
*Andrew Nicholas, Naval Research Laboratory*

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Utility of a Multi-Color Photometric Database.....</b>                                                                      | 137 |
| <i>Tamara Payne, AMOS (Boeing LTS)</i>                                                                                         |     |
| <b>Comparisons Between Simulated and Observed Color Photometric Signatures of Geosynchronous Satellites .....</b>              | 146 |
| <i>Stephen Gregory, AMOS (Boeing LTS)</i>                                                                                      |     |
| <b>Applying Space Weathering Models to Common Spacecraft Materials to Predict Spectral Signatures.....</b>                     | 154 |
| <i>Kira Abercromby, ESCG/Jacobs Sverdrup</i>                                                                                   |     |
| <b>A Technique for Space Aging Incorporation in Satellite Photometry Models .....</b>                                          | 162 |
| <i>Anil Chaudhary, Applied Optimization, Inc.</i>                                                                              |     |
| <b>Spectral Unmixing Methods for Non-Resolved Space Object Characterization .....</b>                                          | 171 |
| <i>Kris Hamada, AMOS (Boeing LTS)</i>                                                                                          |     |
| <b>Hyperspectral Algorithms for Extraction of Information about Subpixel Targets.....</b>                                      | 180 |
| <i>John Schott, Rochester Institute of Technology</i>                                                                          |     |
| <b>Model of the AEOS Spectral Imaging Sensor (ASIS) for Spectral Image Deconvolution .....</b>                                 | 189 |
| <i>Travis Blake, Air Force Institute of Technology</i>                                                                         |     |
| <b>ORBITAL DEBRIS</b>                                                                                                          |     |
| <b>The Second Confirmed Unintentional On-Orbit Collision .....</b>                                                             | 199 |
| <i>Timothy Payne, HQ AFSPC/XPY</i>                                                                                             |     |
| <b>The LEO Environment as Determined by the LMT Between 1998 and 2002.....</b>                                                 | 206 |
| <i>Ed Barker, NASA Johnson Space Center</i>                                                                                    |     |
| <b>Properties of the High Area-to-Mass Ratio Space Debris Population in GEO .....</b>                                          | 216 |
| <i>Thomas Schildknecht, Astronomical Institute, University of Bern</i>                                                         |     |
| <b>An Optical Survey for GEO Debris in High Inclination Orbits .....</b>                                                       | 224 |
| <i>Pat Seitzer, Department of Astronomy, University of Michigan</i>                                                            |     |
| <b>METRICS</b>                                                                                                                 |     |
| <b>Rapid Orbit Characterization and Real-Time State Vector Hand-Off Using High Accuracy Metrics .....</b>                      | 230 |
| <i>Tom Kelecy, AMOS (Boeing LTS)</i>                                                                                           |     |
| <b>Orbit Determination Using Raven Telescope for Highly Eccentric Orbits .....</b>                                             | 240 |
| <i>Mike Thrall, Space Systems Operations, Naval Postgraduate School</i>                                                        |     |
| <b>Canadian Surveillance of Space Concept Demonstrator, Performance Assessment After One Year of Automated Operation .....</b> | 250 |
| <i>Lauchie Scott, Defence R&amp;D Canada-Ottawa, Space Systems Group</i>                                                       |     |
| <b>INSTRUMENTATION</b>                                                                                                         |     |
| <b>The Rice University CCD Imager for Gamma-Ray Burst Studies.....</b>                                                         | 260 |
| <i>Ian Smith, Rice University</i>                                                                                              |     |

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The HiVIS Spectrograph at AEOS: A Unique Tool for Visible and Infrared Spectroscopy .....</b>                                                                          | 270 |
| <i>Kathryn Whitman, University of Hawaii, Institute for Astronomy</i>                                                                                                     |     |
| <b>New Thermal IR Spectroscopic Capability on AEOS .....</b>                                                                                                              | 279 |
| <i>Ray Russell, The Aerospace Corporation</i>                                                                                                                             |     |
| <b>Results from the AOptix Laser Communications Test Range.....</b>                                                                                                       | 287 |
| <i>Buzz Graves, AOoptix technologies</i>                                                                                                                                  |     |
| <b>Multiple Wavefront Sensor Characterization with Dynamic Aberration Control.....</b>                                                                                    | 288 |
| <i>Jonathan Andrews, Naval Research Laboratory</i>                                                                                                                        |     |
