

*Proceedings*

---

*International Conference on  
Dependability of Computer Systems*

*Szklarska Poreba, Poland*

*14-16 June 2007*

Los Alamitos, California  
Washington • Tokyo

# Table of Contents

## DepCoS-RELCOMEX 2007

<b>Preface</b> _____	<b>xi</b>
<b>Program Committee</b> _____	<b>xv</b>
<b>Organizing Committee</b> _____	<b>xvii</b>
<b>Reviewers</b> _____	<b>xviii</b>

### 1. Modelling

Semiformal Approach to the IT Security Development _____ <i>Andrzej Bialas</i>	3
Evaluating the Combined Effect of Vulnerabilities and Faults on Large Distributed Systems _____ <i>Manuel Cheminod, Ivan Cibrario Bertolotti, Luca Durante, Riccardo Sisto, and Adriano Valenzano</i>	11
Evaluation of MDA/PSM Database Model Quality in the Context of Selected Non-Functional Requirements _____ <i>Iwona Dubielewicz, Bogumila Hnatkowska, Zbigniew Huzar, and Lech Tuzinkiewicz</i>	19
An Overlay Simulator for Interdependent Critical Information Infrastructures _____ <i>Sandrine Duflos, Alpha Diallo, and Gwendal Le Grand</i>	27
The Influence of Relations among Different Levels of UML Diagrams onto Software Maintenance _____ <i>Dariusz Dymek and Leszek Kotulski</i>	35
Multi-Version Information Technologies and Development of Dependable Systems out of Undependable Components _____ <i>Vyacheslav Kharchenko, Vladimir Sklyar, and Andriy Volkoviy</i>	43
Assurance of System Consistency during Independent Creation of UML Diagrams _____ <i>Leszek Kotulski and Lukasz Fryz</i>	51
Information Systems Metamodels Developing for Providing Structural and Semantic Interoperability _____ <i>Mikhaylov Ilya Sergeevitch</i>	59

Using Distributed Multilevel Agent-Based Monitoring Technique for Automated Network Modelling Approach _____	65
<i>Katarzyna Nowak and Łukasz Bagrij</i>	

Dataflow Analysis of Distributed Programs Using Generalized Marked Nets _____	73
<i>Victor Toporkov</i>	

Investigation Multi-State System Reliability by Structure Function _____	81
<i>Elena Zaitseva and Vitaly Levashenko</i>	

## **2. Methodology and Tools**

Supporting Compliance with Security Standards by Trust Case Templates _____	91
<i>Łukasz Cyra and Janusz Górski</i>	

Transient Fault Detection in State-Automata _____	99
<i>Bernhard Fechner and Andre Osterloh</i>	

Duration Calculus for Analysis of Fault Trees with Time Dependencies _____	107
<i>Pawel Gluchowski</i>	

Technique for Analyzing Items Reliability by Simulating their Behaviour over Time Intervals _____	115
<i>Igor Ladygin and Sergey Yankov</i>	

Testing Duration Systems Using an Approximation Method _____	119
<i>Lotfi Majdoub and Riadh Robbana</i>	

Error Prevention, Detection and Diffusion Algorithms for Cryptographic Hardware _____	127
<i>Maciej Nikodem</i>	

Requirement Centric Security Evaluation of Software Intensive Systems _____	135
<i>Reijo Savola</i>	

### 3. Dependability of Computer Networks

Detection Methods of Dynamic Spammers' Behavior _____	145
<i>Radoslaw Brendel and Henryk Krawczyk</i>	
Experimental Comparison of Automatic Tools for the Formal Analysis of Cryptographic Protocols _____	153
<i>Manuel Cheminod, Ivan Cibrario Bertolotti, Luca Durante, Riccardo Sisto, and Adriano Valenzano</i>	
Methods and Tools for Reasoning by Analogy in Intelligent Decision Support Systems ____	161
<i>Alexandr Eremeev and Pavel Varshavsky</i>	
An Approach to Change Availability of the Service by Adding Forecasting Module to Firewall _____	169
<i>Przemysław Krekora</i>	
Dependability Analysis of Reconfigurable Information Systems _____	177
<i>Przemysław Krekora and Dariusz Caban</i>	
Intrusion Detection and Internet Services Failure Reporting System _____	185
<i>Przemysław Nowak, Bartosz Sakowicz, George Anders, and Andrzej Napieralski</i>	
The Basics of Methodology for Estimation and Choosing Parameters of Multi-Service Telecommunication Systems _____	191
<i>Vladimir Shirokov</i>	
Reliability of E-mail Delivery in the Era of Spam _____	198
<i>Tomasz Surmacz</i>	
Incident Detection and Analysis in Communication and Information Systems by Fuzzy Logic _____	205
<i>Tomasz Walkowiak and Tomasz Wilk</i>	
Maintenance Policy of a Network with Traffic Reconfiguration _____	213
<i>Wojciech Zamojski and Dariusz Caban</i>	

## 4. Software Security and Dependability

Dependability in Software Component Deployment _____	223
<i>Meriem Belguidoum and Fabien Dagnat</i>	
Metrics for Object-Oriented Design Focusing on Class Inheritance Metrics _____	231
<i>Kadhim Breesam</i>	
An Artificial Immune System Approach for Fault Prediction in Object-Oriented Software _____	238
<i>Cagatay Catal, Banu Diri, and Bulent Ozumut</i>	
Towards Reliability and Fault-Tolerance of Distributed Stream Processing System _____	246
<i>Marcin Gorawski and Pawel Marks</i>	
A Hardware-Based Software Protection Systems-Analysis of Security Dongles with Time Meters _____	254
<i>Ireneusz Jozwiak and Krzysztof Marczak</i>	
VoIP Availability and Service Reliability through Software Rejuvenation Policies _____	262
<i>Vasilis Koutras and Agapios Platis</i>	
Error Recovery Problems _____	270
<i>Artur Lesiak, Piotr Gawkowski, and Janusz Sosnowski</i>	
Analysis of Timing Requirements for Intrusion Detection System _____	278
<i>Jan Magott, Pawel Skrobanek, and Marek Woda</i>	
A FMECA Framework for Service Oriented Systems Based on Web Services _____	286
<i>Andrzej Zalewski</i>	
Verification of Component Behavioral Compatibility _____	294
<i>Wlodek Zuberek and Donald Craig</i>	

## 5. Applications

Methods of Efficiency Enhancement of Network Interaction in Distributed Systems of Virtual Reality _____	305
<i>Vasily Kharitonov</i>	
Problem of Model Selection for Estimation of Equipment Remaining Life _____	309
<i>Henryk Maciejewski and George Anders</i>	
Building a Predictive Model from Data in High Dimensions with Application to Analysis of Microarray Experiments _____	316
<i>Henryk Maciejewski and Łukasz Konarski</i>	
Development of Distributed Planner for Decision Support Systems _____	324
<i>Anna Nedelina, Alexander Eremeev, and Wolfgang Fengler</i>	
Performance Analysis of System of 3D Scenes Networked Parallel Dynamic Visualisation _____	331
<i>Dmitry Orlov</i>	
Modeling Changes in Maintenance Activities through Fine-Tuning Markov Models of Ageing Equipment _____	336
<i>Jarosław Sugier and George J. Anders</i>	
The Effect of Large Clock Drifts on Performance of Event and Time Triggered Network Interfaces _____	344
<i>Dawid Trawczynski, Janusz Sosnowski, and Janusz Zalewski</i>	
Discrete Transport System Simulated by SSF for Reliability and Functional Analysis _____	352
<i>Tomasz Walkowiak and Jacek Mazurkiewicz</i>	
The SCSI Interface Conformance Tests Generation _____	360
<i>Sławomir Zielski and Janusz Sosnowski</i>	
Methodology for Analysis of Networks Performance _____	368
<i>Leonid Abrosimov</i>	
<b>Author Index _____</b>	<b>377</b>
