2007

TABLE OF CONTENTS

Applied Energy

How to Improve Inductor Life, Part 2	1
<i>W.I. Stuehr, D. Lynch, Induction Tooling, Inc., North Royalton, OH, USA</i>	
Optimizing Axle Scan Hardening Inductors	5
<i>R. Goldstein, V. Nemkov, R. Madeira, Fluxtrol, Inc., Auburn Hills, MI, USA</i>	
Processing of Multi-Layer Materials by Induction Heating Gradient Effect	10
<i>E. Baake, H. Schülbe, A. Nikanorov, R. Mergen, A. Eberhard</i> <i>(1) Leibniz University of Hannover, Hannover, Germany;</i> <i>(2) Miba Bearing Group, Laakirchen, Austria</i>	
Increasing Inductor Lifetime by Predicting Coil Copper Temperatures	16
<i>R. Goldstein, V. Nemkov, Fluxtrol, Inc., Auburn Hills, MI, USA</i>	
Heat Transfer Characteristics of Laminar Methane/Air Flame Impinging on a Flat Surface	23
<i>S. Chander, A. Ray, (1) National Institute of Technology, Punjab, India;</i> <i>(2) Indian Institute of Technology, New Delhi, India</i>	
Controlling Induction Heating Magnetic Fields with Flux Field Concentrators	33
<i>T. Learman, Alpha 1 Induction Service Center, Columbus, OH, USA</i>	
Thermodynamic and Kinetic Aspects of Endothermic Carburizing Atmospheres with Natural Gas Enrichment	40
<i>O. Karabelchtchikova, S.A. Johnston, H.F.M. DaCosta, R.D. Sisson, Jr.</i> <i>(1) Worcester Polytechnic Institute, Worcester, MA, USA;</i> <i>(2) Caterpillar, Inc., Mossville, IL, USA</i>	
<u>Emerging Technology</u>	
New Applications of EPM in Metal, Oxide and Semiconductor Processing	45
<i>B. Nacke, Leibniz University of Hannover, Hannover, Germany</i>	
An Attractive Materials Process: Exploring High Magnetic Field Processing for Developing Customized Microstructures with Enhanced Performance	52
<i>G. Mackiewicz-Ludtka, G.M. Ludtka, R.A. Jaramillo, J.B. Wilgen, R.A. Kisner</i> <i>Oak Ridge National Laboratory, Oak Ridge, TN, USA</i>	
Heat Treating Atmosphere Activation	62
<i>Z. Zurecki, Air Products and Chemicals, Inc., Allentown, PA, USA</i>	

Microwave Processing and Heat Treating of Metals69
*E.B. Ripley, R.L. Hallman, Jr., J.A. Oberhaus, B.C. Warren,
Y-12 National Security Complex, Oak Ridge, TN, USA*

Fluidized Bed: An Energy Efficient Heat Treating Technology for Cast Al Alloys 77
S.K. Chaudhury, D. Apelian, Worcester Polytechnic Institute, Worcester, MA, USA

Integrated Heat Treatment – System for Precise Die Hardening in Automotive Industries87
*S. Bonss, J. Hannweber, U. Karsunke, M. Seifert, B. Brenner, E. Beyer,
Fraunhofer IWS Dresden, Dresden, Germany*

**Effect of Post-Spray Heat Treatment on Mechanical Properties of Ni-TiC
Composite Coatings Produced by Cold Gas Dynamic Spray** 94
*K.Y. Sastry, M. Lubrick, V. Leshchynsky, R.Gr. Maev, University of Windsor,
Windsor, ON, Canada*

Dr. George E. Totten International Symposium on Quenching & Cooling

**Microstructure and Property Predictions by Using a Heat-Treatment
Planning System, CHT-q/t** 100
*L. Zhang, Y.M. Rong, R. Purushothaman, J.W. Kang
(1) Worcester Polytechnic Institute, Worcester, MA, USA;
(2) Tsinghua University, Beijing, China*

Modeling of Microstructure Evolution during the Rapid Heating of Hypoeutectoid Steels 108
B.J. Yang, W. Li, A. Hattiangadi, G. Zhou, N. Singh, M.L. Johnson, Caterpillar, Inc, Peoria, IL, USA

Assessing Heat Treatment Distortion Sensitivity 115
A.M. Freborg, Z. Li, B.L. Ferguson, Deformation Control Technology, Inc., Cleveland, OH, USA

**Optimal Spray Characteristics in the Air-Assisted Water Spray Cooling of a
Downward-Facing Heated Surface** 126
R.J. Issa, West Texas A&M University, Canyon, TX, USA

Some New Approaches in the Field of Quenching Fundamentals 134
N. Kobasko, IQ Technologies, Inc., USA, Intensive Technologies, Ltd., Ukraine

Intensive Quenching to Reduce the Carburizing Cycle for Automotive Cross Production 141
*L.C.F. Canale, E. Merheb, J.C. Vendramim, G.E. Totten, N.I. Kobasko, M.A. Aronov
J.A. Powell, (1) University of São Paulo, São Carlos, Brazil; (2) Isoflama Ind. E Com. Eq. Ltda.,
Indaiatuba, Brazil; (3) Portland State University, Portland, OR, USA; (4) IQ Technologies, Inc.,
Akron, OH, USA*

Applying CFD to Characterize Gear Response during Intensive Quenching Process 147
*A. Banka, J. Franklin, Z. Li, B.L. Ferguson, M. Aronov
(1) Airflow Sciences Corporation, Livonia, MI, USA ; (2) Deformation Control Technology, Inc.,
Cleveland, OH, USA ; (3) IQ Technologies, Inc., Akron, OH, USA*

Improving Gear Performance by Intensive Quench 156
B.L. Ferguson, A.M. Freborg, Z. Li, Deformation Control Technology, Inc., Cleveland, OH, USA

Historical Review of Residual Stress in Quenched Fe-Ni Alloy Cylinders and Explanation of Its Origin Using Computer Simulation	163
<i>K. Arimoto, K. Funatani, (1) Arimotech, Ltd., Osaka, Japan, (2) IMST Inst., Nagoya, Japan</i>	
Effect of Quenching on the Dimensional Stability of SAE 52100 Make Bearing Components ..	173
<i>S. Bhattacharya, M.B.N. Raju, Tata Steel, Jamshedpur, India</i>	
George E. Totten, Ph.D., FASM: A Biographical Overview of His Life and a Brief Overview of His Impact on Global Quenching Technology	183
<i>L.C.F. Canale, A.C. Canale, University of São Paulo, São Carlos, Brazil</i>	
The Contribution of Dr. George E. Totten to Unitize World Heat Treatment R&D, and Update State of the Quenching and Control of Distortion	191
<i>K. Funatani, IMST Institute, Nagoya, Japan</i>	
History of Quenching	196
<i>D.S. MacKenzie, Houghton International, Inc., Valley Forge, PA, USA</i>	
Effective Design of Heat Treat Processes Using Computer Simulations.....	205
<i>Z. Li, A.M. Freborg, B.L. Ferguson, Deformation Control Technology, Inc., Cleveland, OH, USA</i>	
Using Wave Technology for Heat Treatment	214
<i>A. Sverdlin, A. Ness, R. Ganiev, (1) Bradley University, Peoria, IL, USA; (2) Research Scientific Center, Moscow, Russia</i>	
The Analysis of Gas Flow in the Wind Tunnel of High Pressure Gas Quenching Furnace	220
<i>Y. Luo, J. Kang, B. Liu, Y. Rong, (1) Tsinghua University, Beijing, China; (2) Worcester Polytechnic Institute, Worcester, MA, USA</i>	
Fluidized Bed Quenching Performance and Its Application for Heat Treating Aluminum Alloys	225
<i>J. Keist, S. Chaudhury, D. Apelian, (1) Arizotah, LLC, Plymouth, MN, USA; (2) Metals Processing Institute, Worcester, MA, USA</i>	
Mathematical Model of the Microstructural Response of a Medium-Carbon, Low-Alloy Steel Quenched in a Fluidized Bed	231
<i>J.B. Hernández-Morales, A.M. Dueñas-Pérez, M. Díaz-Cruz, R. Yates (1) Universidad Nacional Autónoma de México, México; (2) ESIQIE-Instituto Politécnico Nacional, México; (3) Alternativas en Computación, México</i>	
<u>Processes & Applications</u>	
The Nitrocarburizing of Plain Carbon Steel Automotive Components	239
<i>V. Campagna, R. Bowers, D.O. Northwood, X. Sun, P. Bauerle (1) University of Windsor, Windsor, ON, Canada; (2) DaimlerChrysler Corporation, Auburn Hills, MI, USA</i>	
Optimization of Oxygen-Free Heat Treating	245
<i>K. Connery, S. Ho, Praxair, Inc., Burr Ridge, IL, USA</i>	

Statistical Process Control and Process Validation in Gas Carburizing of Gears	249
<i>C.R. Kinser, TRW Automotive, LLC, Lebanon, TN, USA</i>	
Case Histories Involving Embrittlement of Steel	254
<i>S. Suess, Stork Technimet, Inc., New Berlin, WI, USA</i>	
A Probabilistic Modeling Approach for Industrial Carburizing Operation	261
<i>S.S. Sahay, Tata Research Development and Design Centre, Pune, India</i>	
Heat Treatment of Cr-Mo Powder Metallurgy Steels for High Performance Applications	265
<i>A. Klekovkin, N. Nandivada, D. Milligan, North American Höganäs, Hollsopple, PA, USA</i>	
Fatigue Studies and Characterization of Induction Tempered Welded Steel Tubes	275
<i>P. Shanmugam, M. Preethi, R. Natarajan, Tube Investments of India, Avadi, Chennai, India</i>	
Non-Contact Ultrasonic Treatment of Metals in a Magnetic Field	281
<i>G.M. Ludtka, J.B. Wilgen, R.A. Kisner, R.A. Jaramillo, G. Mackiewicz-Ludtka, Oak Ridge National Laboratory, Oak Ridge, TN, USA</i>	
Evaluation of Aging Response of Al-Cu-Mg-Si Based Cast Aluminum Alloy and Its Effect on Tensile Property	288
<i>M. Maniruzzaman, E. Wallhagen, R.D. Sisson, Jr., Worcester Polytechnic Institute, Worcester, MA, USA</i>	
The Aging Behavior of AA7136 Wrought Aluminum Alloy	294
<i>C. Nowill, M. Maniruzzaman, R.D. Sisson, Jr., D.S. MacKenzie2</i>	
<i>(1) Worcester Polytechnic Institute, Worcester, MA, USA;</i>	
<i>(2) Houghton International, Inc., Valley Forge, PA, USA</i>	
Special Heat Treatment Practices for Aerospace Aluminum Alloys	299
<i>P. Dungore, A. Agnihotri, Jawaharlal Nehru Aluminum Research Development and Design Centre, India</i>	
The Effect of Aluminum on Isothermal Oxidation Resistance of Austenitic Heat Resistant Steels	303
<i>M.O. Aminian, J. Hedjazi, Y.Kharazi, (1) Delta Advanced Ceramics Co., Tehran, Iran;</i>	
<i>(2) Iran University of Science and Technology, Tehran, Iran</i>	
Effects of Quenching Variables on the Impact Resistance of 0.3C Hypo-Eutectoid Plain Carbon Steel	313
<i>M.O.H. Amuda, B.U. Amaechi, D.E. Esezobor, G.I. Lawal, University of Lagos, Lagos, Nigeria</i>	
Effect of Heat Treatment Cycle on the Mechanical Properties of Machinable Austempered Ductile Iron	323
<i>M. TadayonSaidi, N. Baghersaee, N. Varahram, M.H. Rao, G.V.S.N. Rao</i>	
<i>(1) National Institute of Technology, Warangal, India; (2) RWTUV Iran Joint Venture Co., Iran;</i>	
<i>(3) Sharif University of Technology, Tehran, Iran</i>	
Tribology of Conformal Gears with Advanced Material Systems	328
<i>A.T. Wilder, J.G. Wilder, (1) University of Texas, Austin, TX, USA;</i>	
<i>(2) Process Science, Inc., Leander, TX, USA</i>	

Effects of T6 Heat Treatment with Residual Heat of Casting on Microstructure and Mechanical Properties of 319 Aluminum Alloy Castings	333
<i>L. He, J. Kang, T. Huang, Y. Rong, (1) Tsinghua University, Beijing, China;</i>	
<i>(2) Worcester Polytechnic Institute, Worcester, MA, USA</i>	
Plasma Nitriding of AISI H13 Tool Steel with Different Microstructures	338
<i>L.C. Casteletti, R.M.M. Riofano, C.K.N. de Oliveira, A.L. Neto, G.E. Totten</i>	
<i>(1) Escola Eng. São Carlos – USP, São Paulo, Brazil;</i>	
<i>(2) Universidade Regional do Cariri, Ceará, Brazil;</i>	
<i>(3) Portland State University, Portland, OR, USA</i>	
Three Point Bending Behavior of Orthodontic Thermo-Active Nitinol Wires	343
<i>A.I. Filho, C.A.R. Gouvêa, A.L. Neto, G.E. Totten, L.C. Casteletti</i>	
<i>(1) Departamento de Metalurgia do CEFET-ES, Vitória, ES;</i>	
<i>(2) Escola Eng. São Carlos – USP, São Paulo, Brazil;</i>	
<i>(3) Portland State University, Portland, OR, USA</i>	
Thermal Spray Coatings on an Aged 7475 Aluminum Alloy Substrate	346
<i>D.T. de Macedo, L.B. Cruvinel, A.L. Neto, G.E. Totten, L.C. Casteletti</i>	
<i>(1) Escola Eng. São Carlos – USP, São Paulo, Brazil;</i>	
<i>(2) Portland State University, Portland, OR, USA</i>	
Electric Resistivity Evaluation of the Fe-31Mn-7.5Al-1.5Si-1.0C Alloy	351
<i>L.C. Casteletti, A.L. Neto, G.E. Totten</i>	
<i>(1) Escola Eng. São Carlos – USP, São Paulo, Brazil;</i>	
<i>(2) Portland State University, Portland, OR, USA</i>	
On the Influence of the Process of Carbonitriding in Smoldering Discharge on the Properties of 25CrMnSiNiMo Steel	355
<i>A.Z.I. Ziumbilev, K. Nikolov, (1) TU Sofia, Plovdiv, Bulgaria;</i>	
<i>(2) DOC Dortmunder Oberflächencentrum GmbH, Dortmund, Germany</i>	
Effect of Nitriding on the Fatigue Properties of Continuously Cast Gray Irons	362
<i>P.R. Gangasani, Dura Bar, Woodstock, IL, USA</i>	
<u>Vacuum Technology</u>	
Hydrogen Pick-Up during Low Pressure Gas Carburizing Compared with Traditional Gas Carburizing Processes	369
<i>Ch. Laumen, B. Clausen, F. Hoffmann, (1) The Linde Group, Unterschleissheim, Germany;</i>	
<i>(2) Institut für Werkstofftechnik, Bremen, Germany</i>	
The Benefits of Using 3 Gas Mixture Low Pressure Carburizing (LPC) for High Alloy Steels	376
<i>R. Gorockiewicz, A. Adamek, M. Korecki, (1) University of Zielona, Góra, Poland;</i>	
<i>(2) Seco/Warwick S.A., Swiebodzin, Poland</i>	
Numerical Simulation of Gas Quenching Process of Workpieces	385
<i>Y. Luo, J. Kang, B. Liu, Y. Rong, (1) Tsinghua University, Beijing, China;</i>	
<i>(2) Worcester Polytechnic Institute, Worcester, MA, USA</i>	

Fast Track

- Demonstrations of Intensive Quenching Methods for Steel Parts**390
M.A. Aronov, N.I. Kobasko, J.A. Powell, J.H. Vanas, P. Ghorpade, D. Gopal
(1) IQ Technologies, Inc., Akron, OH, USA; (2) High Temp Furnaces Limited, Bangalore, India
- Modern Gas Quenching Chambers Supported by SimVaCPlus Hardness Application**398
P. Kula, R. Atraszkiewicz, E. Stańczyk-Wołowicz,
Institute of Materials and Engineering, Lodz, Poland
- Curtains in Continuous Furnaces**403
M.S. Stanescu, P.F. Stratton, L. Druga, (1) The Linde Group, Murray Hill, NJ, USA;
(2) The Linde Group, Huddersfield, UK; (3) UTTIS Industries, Bucharest, Romania
- How to Organize and Run a Low-Cost and Highly Effective Metallurgical/Processing Lab for Small- and Medium-Size Heat Treatment Facilities**419
A. Khersonsky
- The Role of Cleaning in the Heat Treatment Process**424
