

**2006 IEEE International Symposium
on Electromagnetic Compatibility**

EMC 2006

Proceedings Volume 1

14-18 August 2006

Portland, Oregon, USA

Table of Contents

Volume I: Tuesday—AM

Computational Electromagnetics I (TU-AM-I)

- Microwave Thawing Examinations of a Frozen Material (Tuna) in a Microwave Oven..... 1
Shinya Watanabe, Youichi Kakuta and Osamu Hashimoto
- A Comparative Study of Vector Fitting and Orthonormal Vector Fitting Techniques for EMC Applications 6
Giulio Antonini, Dirk Deschrijver and Tom Dhaene
- Rectangle Wave Propagation in Electromagnetic Field Analysis Using CIP and R-CIP Methods..... 12
Shinya Watanabe, Youichi Kakuta and Osamu Hashimoto
- Modeling of Hierarchical Power/Ground Network Based on Segmentation Method
for Package/Board Co-Design and Simulation..... 16
Jaemin Kim, Youchul Jeong, Jinguook Kim, Junho Lee, Jongjoo Shim and Jounggho Kim
- A Study on the Model of the Aperture Distribution for Cosecant-Squared Antennas..... 20
Dong-an Song and Xue-qing Yi

Signal Integrity I (TU-AM-II)

- Broadband Signal Integrity Characterization of a High Speed Differential Backplane Pair 24
A. Ciccimancini Scogna and F. Zanella
- Crosstalk Analysis for Nonparallel Transmission Lines Using PEEC
with a Dynamic Green's Function Formulation..... 29
Michael A. Cracraft and James L. Drewniak
- Using Via Fences for Crosstalk Reduction in PCB Circuits..... 34
Asanee Suntives, Arash Khajooeizadeh and Ramesh Abhari
- Analysis of the Effects of Series Filtering in Coupled-Strip Sections 38
Francisco-Javier Pajares, Pablo Rodriguez-Cepeda, Miquel Ribó, Joan-Ramon Regué and Lluís Pradell
- Partial EBG Power Distribution Network Using Remnants of Signal Layers in Multi-Layer PCB 43
Junho Lee, Youngwon Kim, Eakhwan Song and Jounggho Kim

ElectroMagnetic Environment (TU-AM-III)

- PCB to Chassis Grounding Graphic Architectures for Minimizing Radiated Emissions..... 47
Dheena Moongilan
- Proposal of Electromagnetic Environment-Aware Wireless Network
Using Multi-Hop Wireless Network System 53
Takashi Tamura, Shinichi Miyamoto and Seiichi Sampei
- High-Frequency RFID Tags: An Analytical and Numerical Approach
for Determining the Induced Currents and Scattered Fields 58
Benjamin D. Braaten, Yuxin Feng and Robert M. Nelson
- Analytical Expressions for Small Loop Antennas—With Application to EMC and RFID Systems..... 63
Yuxin Feng, Benjamin Braaten and Robert Nelson
- Influence of Magnetic Field of AC Transmission Lines on Parallel DC Transmission Systems..... 69
Jian Tang, Rong Zeng, Hongbin Ma and Jinliang He

Ben Franklin (TU-AM-SS)

Remembering Benjamin Franklin on His 300th Birthday.....	73
<i>Aziz S. Inan</i>	

Tuesday—PM

Computational Electromagnetics II (TU-PM-I)

Numerical and Experimental Investigation of PCB Ground-Fill on Radiated EMI.....	79
<i>Cyrous Rostamzadeh and Bruce Archambeault</i>	
Temperature Distribution of $\lambda/4$ Type EM-Absorber Using Resistive Film Under High Power Injection.....	84
<i>Shinya Watanabe, Kota Saito, Akitoshi Taniguchi, Osamu Hashimoto, Toshifumi Saito and Hiroshi Kurihara</i>	
Modeling Radiation Sources of Electronic Components.....	89
<i>Yolanda Vives Gilabert, Christian Arcambal, David Baudry, Anne Louis, Bélahcène Mazari, Sylvain Alves, Michel Stanislawiak and Philippe Eudeline</i>	
PEEC Modeling of Linear Magnetic Materials.....	93
<i>G. Antonini, M. Sabatini and G. Miscione</i>	
A Reciprocity-Based Methodology for the Expedient and Accurate Prediction of Electromagnetic Field Coupling to Multi-Conductor Transmission Lines.....	99
<i>Johannes Russer, Andreas Cangellaris and Peter Russer</i>	
Bounds on the Accuracy of the Measurement of Plane-Wave Coupling into Cavity Structures Using Near-Field Sources.....	102
<i>Mark L. Waller, Thomas H. Shumpert and Robert W. Scharstein</i>	

EMC Measurements I (TU-PM-II)

IEEE P1302: Characterisation of Shielding Gaskets.....	105
<i>Johan Catrysse</i>	
Near Electric Field in Microstrip/Coplanar Circuits and Antennas—Simulation and Measurement.....	108
<i>C. P. Chen, N. Nagaoka, T. Anada, Keren Li, Z. W. Ma and C. Christopoulos</i>	
A Method for Charactering EMI Coupling Paths and Source Properties in Complex Systems.....	114
<i>Shishuang Sun, Gang Feng, Chong Ding, David J. Pommerenke and James L. Drewniak</i>	
Calibration of Electric Probes for Post-Processing of Near-Field Scanning Data.....	119
<i>Adam Tankielun, Heyno Garbe and Werner John</i>	
Proposal of a New Compact Isotropic Antenna.....	125
<i>E. da S. Pires, G. Fontgalland, R. M. do Valle, G. F. Aragão, W. R. N. Santos and T. P. Vuong</i>	
Numerical and Experimental Analysis of Boundary Fields in Reverberation Chambers.....	129
<i>Valter Mariani Primiani, Franco Moglie, Anna Pia Pastore and Alessio Pignotti</i>	
Method of Evaluating Shielding Effect for Electronic Equipment Case Using Wire Grid Model and Radiation Source from 1 GHz to 3 GHz.....	133
<i>Ryo Ishikawa, Fujio Amemiya, Naoya Nakashio, Toshiro Nishimura and Nobuo Kuwabara</i>	

ElectroMagnetic Interference I (TU-PM-III)

A New Technique to Improve Gasket Performance that Uses Elastomer or Rubber Material.....	139
<i>Youn M. Lee and Theodore K. Anthony</i>	
Impact of Common-to-Differential Mode Conversion on Crosstalk in Balanced Twisted Pairs.....	145
<i>Giordano Spadacini and Sergio A. Pignari</i>	

Wideband SSN Suppression and EMI Reduction from Printed Circuit Boards Using Novel Planar Electromagnetic Bandgap Structure.....	151
<i>Jie Qin and Omar M. Ramahi</i>	
Novel Design Technique for Reducing Common-Mode Current on Wire Harness Connected to ECUs.....	156
<i>Yuichi Mabuchi, Atsushi Nakamura, Tohru Hayashi, Takanori Uno, Koji Ichikawa, Hiroshi Mizuno and Takeshi Matsui</i>	
Properties of Ferroelectric/Antiferroelectric Materials in the Application of EMC.....	161
<i>Huadong Li</i>	
An Equivalent Circuit Model for Predicting EM Radiation from a PCB Driven by a Connected Feed Cable ..	166
<i>Yoshiki Kayano, Motoshi Tanaka and Hiroshi Inoue</i>	
Influence of an Extended Stub at Connector Ports on Signal Launches and TRL De-Embedding	172
<i>Jianmin Zhang, James L. Drewniak, David J. Pommerenke, Zhiping Yang, Bruce Archambeault, Wheling Cheng, John Fisher and Sergio Camerlo</i>	
TU-PM-CFP	
Closed-Loop Method to Assess RF Interference Impact on Wireless Transceivers.....	178
<i>Michael Schaffer</i>	
Some Simple Spacecraft Considerations.....	182
<i>Edward R. Heise and Robert E. Heise</i>	
The EMC Analyzing and Optimizing with High-Frequency Interference in PCB Design.....	187
<i>Jie Liu and Lanfen Qi</i>	
Correlation of Radio Frequency Interference Tests with Low Dropout Voltage Regulators.....	191
<i>Cyrous Rostamzadeh</i>	
Impedance Analysis of Overhead Medium Voltage Power Lines for Broadband PLC.....	196
<i>Dong-wan Chun, Chull-chai Shin, Young-song Cho, Young-jin Park, Kwan-ho Kim, Gi-deok Yang and Young-chul Rhee</i>	
Time Domain Gating of Frequency Domain S-Parameter Data to Remove Connector End Effects for PCB and Cable Applications	199
<i>Bruce Archambeault, Samuel Connor and Joseph C. Diepenbrock</i>	
Extreme EMC (TU-PM-SS)	
A Stable CS01 Tester for Switch Mode Power Supplies.....	203
<i>Albert Whittlesey and Ken Erickson</i>	
Extreme EMC: The Electromagnetic Environmental Effects Program for an Advanced Tactical Fighter	208
<i>Briand Lessard and Manny Rodriguez</i>	
Modern Spacecraft—Antique Specifications	213
<i>Ron Brewer and Dawn Trout</i>	
The EMC Program for NASA’s Mars Reconnaissance Orbiter	219
<i>Albert Whittlesey, Larry Campbell and Thomas Pierce</i>	
Radio Frequency (RF) Attenuation Measurements of the Space Shuttle Vehicle	224
<i>R. C. Scully, B. M. Kent, K. A. Brezinski, D. R. Kempf and R. T. Johnk</i>	
Passenger Transmitters as a Possible Cause of Aircraft Fuel Ignition: In Support of an Aircraft Accident Investigation.....	228
<i>Truong X. Nguyen, Jay J. Ely, Kenneth L. Dudley, Stephen A. Searce, Michael O. Hatfield and Robert E. Richardson</i>	
The Onboard Commercial Aircraft In-Flight RF Environment: Measurements and Implications	234
<i>Bill Strauss</i>	

Volume II: Wednesday—AM

EMC Measurements II (WE-AM-I)

Poynting Vector from Measured Distributions of Adjacent Vector Electric and Magnetic Field	240
<i>Satoshi Kazama, Masahiko Sakurada and Hiroshi Tutagaya</i>	
Measurement of Electric Field Probe Error for Pulsed Signals	244
<i>Antonio Sarolic, Vesna Roje and Borivoj Modlic</i>	
Narrowband and Broadband Discrimination with a Spectrum Analyzer or EMI Receiver.....	249
<i>Werner Schaefer</i>	
An Off-Vehicle Measurement Procedure for Predicting On-Vehicle Tire Pressure Transmitter Performance	256
<i>Joseph D. Brunett and Valdis V. Liepa</i>	
Detectors Correlation Factor of Broadband Measurements Used in Automotive EMC	259
<i>Heritianarisoa Rakouth, Robert Hozeska and Clane Cammin</i>	
Design Parameters for Efficient Stirring of Reverberation Chambers.....	263
<i>Niklas Wellander, Olof Lundén and Mats Bäckström</i>	
Cable Shielding Measurements Based on a Reference Unshielded Cable: Or, Do You Really Want to Base Your Results on a Naked Cable?	269
<i>Jason B. Coder and John M. Ladbury</i>	

ElectroMagnetic Interference II (WE-AM-II)

An Investigation of the Effect of Chassis Connections on Radiated EMI from PCBs	275
<i>N. Kobayashi, T. Harada, A. Shaik and T. Hubing</i>	
EMI Antenna Model Based on Common-Mode Potential Distribution for Fast Prediction of Radiated Emission	280
<i>Youhei Sakai, Tetsushi Watanabe, Osami Wada, Tohlu Matsushima, Kengo Iokibe, Yoshitaka Toyota and Ryuji Koga</i>	
High Added-Value EM Shielding by Using MetalFoams: Experimental and Numerical Characterization	285
<i>L. Catarinucci, O. Losito, L. Tarricone and F. Pagliara</i>	
A Differential-Signaling Analysis with the Decoupling-Capacitor Loaded Rectangular Power-Bus by a Fast Calculation Method	290
<i>Sungtek Kahng</i>	
Interference in Unshielded Twisted Pair Cables Due to ESD	293
<i>Spartaco Caniggia and Francescaromana Maradei</i>	
Common-Mode Radiation Resulting from Hand-Assembled Cable Bundles on Automotive Platforms.....	298
<i>Shishuang Sun, James Drewniak and David Pommerenke</i>	
Analysis of Noise Coupling Result from Overlapping Power Areas within Power Delivery Networks	304
<i>Gang Feng, Giuseppe Selli, Kundan Chand, Mauro Lai, Liang Xue, James L. Drewniak, Bruce Archambeault, Samuel Connor and Erdem Matoglu</i>	

High Power ElectroMagnetics (WE-AM-III)

Direct Lightning on Grounding Grids aynd EMC Problems	310
<i>F. Zago, J. Pissolato Filho, M. H. Mesa and G. P. Caixeta</i>	
A Study of Zero Reference Effects on Electromagnetic Transient Measurements of a Grounding Electrode.....	314
<i>M. Nayel, J. Zhao, A. Ametani, J. He, Z. Cai and Q. Wang</i>	

A Novel Method for the Analysis of ESD Generators and Coupling Using Frequency Domain.....	319
<i>Qing Cai, Jayong Koo, Giorgi Muchaidze, Andy Martwick, Kai Wang and David Pommerenke</i>	
Experimental Study of Induced Voltage Between Two Bare Horizontal Electrodes in Ground	324
<i>M. Nayel, J. Zhao, A. Ametani, J. He, Z. Cai and Q. Wang</i>	
Study of EMC Problems Caused by Lightning Using Cartesian Analytical Expressions	329
<i>F. Zago, J. Pissolato Filho and G. P. Caixeta</i>	
Corona Onset Voltage at 60 Hertz for an Isolated, Cylindrical Electrode	333
<i>William O. Price, John Drapala, David V. Thiel and Robert G. Olsen</i>	
Novel Integrated Electro-Optic Sensor for Intensive Transient Electric Field Measurement	337
<i>Rong Zeng, Weiyuan Chen, Jinliang He and Wenlie Liang</i>	

WE-AM-CFP

A Size-Reduced Trapezoid Ground Plane for the Antenna Calibrations in Standard Site Method.....	341
<i>Hsing-Feng Chen, Kai-Wen Kevin Tien, Ken-Huang Lin and Han-Chang Hsieh</i>	
Application of the Statistical Method and Quality Factor Decomposition to Determine Microwave Fields Inside an Equipment Cavity	345
<i>R. Bendel</i>	
Immunity Research of Wireless Communication in Switch Cabinet Monitoring and Control	351
<i>Zhiqiu Li, Yulong Huang, Xiaozhe Wang, Rong Zeng, Liangzhong Yao and Christian Sasse</i>	
Signal Link-Path Characterization Up to 20 Ghz Based on a Stripline Structure.....	356
<i>Jianmin Zhang, James L. Drewniak, David J. Pommerenke, Richard E. DuBroff, Zhiping Yang, Wheling Cheng, John Fisher and Sergio Camerlo</i>	
Enhancing Feature Selective Validation (FSV) Interpretation of EMC/SI Results with Grade-Spread	362
<i>A. Orlandi, G. Antonini, C. Ritota and A. P. Duffy</i>	
Reduction of Radiated Emission from Signal Traces Using Modified and Small-Sized Ground Patterns	368
<i>Phil-Sung Park, Jae W. Lee, Taek K. Lee, Choon Sik Cho and Jaeheung Kim</i>	

SI and PDN Design for Next Generation 5-10 Gb/s Systems (WE-AM-SS)

The Importance of Using Time Domain to Analyze the Effect of Decoupling Capacitor Performance on Printed Circuit Boards.....	372
<i>Bruce Archambeault, Jay Diepenbrock, Samuel Connor, Liang Xue and Giuseppe Selli</i>	
Analyzing FPGA Simultaneous Switching Noise in Printed Circuit Boards.....	377
<i>Geping Liu, Hong Shi, San Wong and Alan Chang</i>	
Frequency-Domain Figures-of-Merit for the Design of Interface Supply Networks	383
<i>Ralf Schmitt, Joong-Ho Kim and Chuck Yuan</i>	
An Analysis of Gb/s Digital Display Symbols and Clocks and Their EMI Impact: Part I	389
<i>Kevin P. Slattery</i>	
A Novel Procedure for Characterization of Multiport High-Speed Balanced Devices	395
<i>Vahé Adamian and Brad Cole</i>	
Signal Integrity and Dispersion Control for Ultra-High Speed Multi-Gigabit - 10-40 Gb/s - PCB Designs	399
<i>J. Ted DiBene II, Kevin B. Quest and James L. Knighten</i>	

Wednesday—PM

EMC Measurements III (WE-PM-I)

An Electric-Field Uniformity Study of an Outdoor Vehicular Test Range	404
<i>Robert Johnk, David Novotny, Chriss Grosvenor, Nino Canales, Janalee Graham, Doug Martin, Scott Yencer, Donald Hibbard, Tyrone Roach and Louis Nagy</i>	
Anechoic and Reverberation Chamber Shielding Measurement at Frequencies Above 1 GHz	410
<i>Andrew Marvin and Yong Cui</i>	
Influence of H-Plane Pattern Performance of the Omnidirectional Transmit Antenna to the Site VSWR Result.....	416
<i>Alexander Kriz</i>	
Quantifying Electric and Magnetic Field Coupling from Integrated Circuits with TEM Cell Measurements	422
<i>V. Kasturi, S. Deng, T. Hubing and D. Beetner</i>	
Fully Integrated Active Magnetic Probe for High-Definition Near-Field Measurement.....	426
<i>Satoshi Aoyama, Masahiro Yamaguchi and Shoji Kawahito</i>	
Shielding Measurements of the Space Shuttle (Part I—Meeting the Test Challenge)	430
<i>Buzz Brezinski, Diane Kempf and Robert Scully</i>	
Shielding Measurements of the Space Shuttle (Part II—Testing the NASA Endeavour)	436
<i>Diane Kempf, Buzz Brezinski and Robert Scully</i>	

ElectroMagnetic Interference III (WE-PM-II)

Polyaniline and Polypyrrole with PVC Content for Effective EMI Shielding	443
<i>K. T. Mathew, A. V. Praveen Kumar and Honey John</i>	
Broadband Multicarrier Channel on Distribution Networks Constrained by Source Power and Radiated Emission	446
<i>Marcello D'Amore and Maria Sabrina Sarto</i>	
Effects of Skew on EMI for HDMI Connectors and Cables	452
<i>Chaitanya Sreerama</i>	
Improvement of Mode Conversion for LTCC Multi-Layer Common Mode Filter by Twisted Differential Lines Structure	456
<i>Bin-Chyi Tseng, Zhi-Hui Chen and Lin-Kun Wu</i>	
A Potential Effect of Decoupling Capacitor Placement on Radiated Emissions: The Rerouting of Current	460
<i>Rodney D. Slone</i>	
Multiconductor Transmission Line Modeling of SWCNT Bundles in Common-Mode Excitation	466
<i>Maria Sabrina Sarto and Alessio Tamburrano</i>	
Prediction of Low-Frequency Electromagnetic Interferences from SMPS	472
<i>Gian Lorenzo Giuliattini Burbui, Ugo Reggiani and Leonardo Sandrolini</i>	

EMC Managements and Product Safety (WE-PM-III)

Transposing the European EMC Directive into National Legislation.....	478
<i>Brian Jones</i>	
The New EMC Directive 2004/108/EC	482
<i>C. A. Marshman and A. C. Marvin</i>	
Prediction of System-Level Emissions Performance via Equipment Shelf Primary Power Bus Frequency Response Characteristics	486
<i>Hirayr M. Kudyan</i>	

Approaches and Particularities for Achieving EMC with Regard to Functional Safety	492
<i>Bernd W. Jaekel</i>	
Effect of the Dielectric Properties of Tissue-Equivalent Liquid on SAR-Probe Calibration	498
<i>Lira Hamada, Soichi Watanabe, Jisun Ryu and Takashi Iwasaki</i>	
Design and Mitigation Techniques for EMC for Functional Safety	501
<i>Keith Armstrong</i>	
High Power EMI on Digital Circuits within Automotive Structures	507
<i>Yakup Bayram, Paul C. Chang, John L. Volakis, Kyechong Kim and Agis Iliadis</i>	

WE-PM-CFP

Novel Calibration Technique for EMI Antenna Using Reverberation Chamber	513
<i>Katsushige Harima</i>	
Numerical Calculation of Grounding Current through Capacitive Voltage Transformer Due to Substation Switching Operation	518
<i>Lei Liu, Xiang Cui, Lei Qi, Lin Li and Changzheng Gao</i>	
A New Composite Absorbing Material which is Highly Effective at the Lower Frequencies of the VHF Range, and Its Applications	522
<i>Andrzej A. Vogt, Hubert A. Kolodziej and Andrzej E. Sowa</i>	
The Transient Response Analysis of EMP Coupling Through Apertures	526
<i>Yan Zhe, Yang Xin, Bi Xiaoliang and Yang Jiaxiang</i>	
Experimental Investigation of PCB Guard Traces on Radiated EMI	529
<i>Cyrous Rostamzadeh</i>	

Advancements in Electromagnetic Modeling Techniques for SI/P (WE-PM-SS)

An Integrated Hybrid Solver and Measurements for EMI/EMC Analysis of Cables and PCBs Enclosed within Metallic Structures	534
<i>Zulfiqar A. Khan, Yakup Bayram and John L. Volakis</i>	
3D Accelerated Electromagnetic Integral Equation Solvers on Parallel Processors for Microelectronic Simulation	539
<i>Chuanyi Yang, Swagato Chakraborty, Dipanjan Gope and Vikram Jandhyala</i>	
Toward Improved Time Domain Stability and Passivity for Full-Wave PEEC Models	544
<i>J. Ekman, G. Antonini and A. E. Ruehli</i>	
Characterizing Package/PCB PDN Interactions from a Full-Wave Finite-Difference Formulation	550
<i>Shishuang Sun, David Pommerenke, James Drewniak, Kai Xiao, Sin-Ting Chen and Tzong-Lin Wu</i>	
Fast EMC Analysis High-Speed Interconnects with Frequency-Dependent Parameters	556
<i>Gurpreet Shinh, Natalie Nakhla, Ram Achar, Michel Nakhla and Ihsan Erdin</i>	

Volume III: Thursday—AM

ElectroMagnetic Measurements and Computation (TH-AM-I)

Predicting TEM Cell Measurements from Near Field Scan Data	560
<i>Haixiao Weng, Daryl G. Beetner and Richard E. DuBroff</i>	
A Generation Method of Rotating-EM Field Using Four-Septum TEM Cell and Its Basic Characteristics	565
<i>Kimotoshi Murano, Majid Tayarani and Hiroko Kawahara</i>	
Laser Optical In-Circuit Measurement System for Immunity Applications	569
<i>Chong Ding and David Pommerenke</i>	

Investigation of Radiated Emissions Test Site Validation Method Above 1 GHz.....	575
<i>Chiharu Miyazaki, Katsuyuki Tanakajima, Hidenori Muramatsu and Jiro Kawano</i>	
PEEC Modeling of Antenna Characteristics	580
<i>Sofia Sundberg and Jonas Ekman</i>	
Modeling Complex EMC Problems Using Finite Element Tearing and Interconnecting Algorithm.....	586
<i>Kezhong Zhao and Jin-Fa Lee</i>	
Estimate Method on Daily Radio Usage Concerning Ambient Noise.....	591
<i>Sungwon Park and Jongsung Choi</i>	

ElectroMagnetic Interference IV (TH-AM-II)

The Measurement of Radiated Electromagnetic Field from a Coaxial Cable with Connector Contact Failure	594
<i>Yu-ichi Hayashi and Hideaki Sone</i>	
Engineering of Ferrite-Graphite Composite Media for Microwave Shields	598
<i>Marina Koledintseva, Poorna Chander Ravva, James Drewniak, Alexander A. Kitaitsev and Andrey A. Shinkov</i>	
RCS Frequency Response of Printed-Circuit-Boards in a GTEM Cell Using the Method of Moments	603
<i>David Pouhè</i>	
Using Reciprocating Duty Cycles to Create Reduced EMI Clock Signals	609
<i>Gregory L. Ebert</i>	
Reduction in Radio Interference Through PWM Frequency Dithering	615
<i>Luke Comstock, Heri Rakouth and Joseph Ruiz</i>	
An Iterative Method to Calculate Absorption Loss in Conductive Dielectrics.....	620
<i>Mihai Badic, Mihai-Jo Marinescu, Maria Stefan and Lia-Elena Aciu</i>	
A Study of Platform EMI from LCD Panels: Impact on Wireless, Root Causes and Mitigation Methods.....	626
<i>Jin Shi, Al Bettner, Gordon Chinn, Kevin Slattery and Xiaopeng Dong</i>	

Signal Integrity II (TH-AM-III)

Electromagnetic Topology Simulations for Cable Coupling with a Radiating Dipole at an Aperture	632
<i>Phumin Kirawanich, Naz E. Islam and S. Joe Yakura</i>	
Signal Integrity Constrained Optimization of Flexible Printed Interconnects for Mobile Devices.....	636
<i>S. Grivet-Talocia, S. Acquadro, M. Bandinu, F. G. Canavero, I. Kelander and M. Rouvala</i>	
Design and Analysis of Improved Multi-Module Memory Bus Using Wilkinson Power Divider.....	642
<i>Jingook Kim, Eakhwan Song, Jaemin Kim, Joungho Kim, Myunghee Sung, Jonghoon Kim and Byungse So</i>	
Modeling of Multilayered Packages and Boards Using Modal Decomposition and Finite Difference Methods.....	646
<i>A. Ege Engin, Krishna Bharath, Krishna Srinivasan and Madhavan Swaminathan</i>	
Damping of Cavity-Mode Resonances in PCB Power-Bus Structures Using Lossy Slot Resonators	651
<i>Matthias Hampe and Stefan Dickmann</i>	
TDR/TDT Analysis by Crosstalk in Single and Differential Meander Delay Lines for High Speed PCB Applications.....	657
<i>Gawon Kim, Dong Gun Kam and Joungho Kim</i>	

TH-AM-CFP

Complex Random Excitation of Electrically-Short Transmission Lines.....	663
<i>Diego Bellan and Sergio A. Pignari</i>	

Transient Plane Wave Coupling to Overhead Line Above a Multi-Layer Soil	669
<i>Lei Qi, Xiang Cui and Lin Li</i>	
Electromagnetic Interferences on Implantable Medical Devices Onboard of High Speed Trains.....	674
<i>R. Rizzi, A. Orlandi, G. Antonini and V. Ricchiuti</i>	
EM Modeling and Design of Electrically Thin Laminated Absorbers.....	680
<i>Sandra Greco and Maria Sabrina Sarto</i>	
Crosstalk and Delay Time Analysis of High Density Interconnects on LTCC Substrate.....	686
<i>A. Orlandi, G. Antonini, C. Moca and A. Ciccomancini Scogna</i>	

High Speed Packages and IC EMC Modeling (TH-AM-SS)

Experimental Characterization of Relationship Between S Parameters and Radiated Emission for Solid and EBG Types of Power Bus Structures	692
<i>Toshio Sudo, Toshimi Kato and Seiju Ichijo</i>	
Modeling and Simulation of IC and Package Power/Ground Network.....	696
<i>Hyunjeong Park, Dong Gun Gam, Joungho Kim and Hyungsoo Kim</i>	
Comparison of Two Compact 2D-FDFD Methods and their Application to Extraction of Circuit Parameters.....	702
<i>En-Xiao Liu and Er-Ping Li</i>	
EMI Model Improvement Taking LSI Package Structure into Consideration	707
<i>Kouji Ichikawa, Takanori Unou, Takahiro Tsuda, Makoto Nagata and Yuichi Mabuchi</i>	
Prediction of RF Ground Voltage Drop Using a Full-Wave Approach.....	712
<i>Kye Yak See, Eng Kee Chua and Zhihong Liu</i>	
Differential Signaling Scheme for the Rectangular Power-Bus to Reduce the Edge Radiation.....	718
<i>Sungtek Kahng</i>	
Compensation of Undesired Channel Effects by Frequency Domain Optimization of Pre-Emphasis Filter for Over Gbps Signaling.....	721
<i>Jingook Kim, Jiwang Lee, Eakhwan Song, Jeonghyeon Jo and Joungho Kim</i>	

Thursday—PM

Computation Electromagnetics III (TH-PM-I)

Comparing Numerical and Experimental Results for the Shielding Properties of a Doubly-Periodic Array of Apertures in a Thick Conducting Screen.....	727
<i>Derik C. Love, John M. Ladbury and Edward J. Rothwell</i>	
A Simple Implementation of PEC Structures in the FDTD Technique	732
<i>Barbara Cottone, Franco Moglie and Anna Pia Pastore</i>	
Statistical Electromagnetics: An End-Game to Computational Electromagnetics.....	736
<i>Darren Carpenter</i>	
Numerical Analysis of Sandwiched Composite-FSS Structures	742
<i>Rui Qiang, Ji Chen, Jingyu Huang, Maria Koledintseva, Richard Dubroff, James Drewniak and Fan Yang</i>	
Modeling Radiated Emissions from Cables Attached to Printed Circuit Boards Driven by Power Bus Noise	747
<i>K. Morishita, N. Kobayashi, T. Harada, H. Ke and T. Hubing</i>	
New Extraction Procedure of Shielded Cable SPICE Macro-Model for the Prediction of Signal Integrity and Conducted Immunity.....	751
<i>Rodolfo Araneo, Spartaco Caniggia and Francescaromana Maradei</i>	

Signal Integrity III (TH-PM-II)

Package-to-Board Transition via Parasitic Effects on Simultaneous Switching Noise.....	756
<i>Xin Wu and Steve Schicht</i>	
Study on Delay Time Characteristics of Multilayered Hyper-Shielded Meander Line.....	760
<i>S. Nara and K. Koshiji</i>	
Time Domain Simulation of the Effect of Decoupling Capacitor Location on Printed Circuit Boards.....	764
<i>Bruce Archambeault, Samuel Connor and Joseph Diepenbrock</i>	
Power Integrity Considerations for CPU EMI-Reducing Interconnect Design.....	770
<i>David M. Hockanson</i>	
Modeling and Measurement of Radiated Emission through a Cutout on the Power/Ground Plane	776
<i>Junwoo Lee, Jongho Kang, Kunwoo Park and Joungho Kim</i>	
Model-to-Hardware Correlation of Physics Based Via Models with the Parallel Plate Impedance Included ..	781
<i>Giuseppe Selli, Christian Schuster and Young Kwark</i>	

Time Domain, Inteference, and Signal Integrity (TH-PM-III)

Applicability of GTEM Cells for Transient Testing	786
<i>Sven Fisahn</i>	
Measurements of Spurious Emission with a Time-Domain EMI Measurement System Using Multi-Sampling Techniques	792
<i>Stephan Braun and Peter Russer</i>	
A Discussion of the Susceptibility of a Brokaw Bandgap to EMI.....	796
<i>N. Montemezzo, E. Orietti, S. Buso, G. Meneghesso, A. Neviani and G. Spiazzi</i>	
Design and Optimization of LTCC Digital Demodulator Used for Aerospace Satellite Applications.....	802
<i>A. Ciccomancini Scogna and F. Zanella</i>	
Stopband Prediction with Dispersion Diagram for Electromagnetic Bandgap Structures in Printed Circuit Boards	807
<i>Yoshitaka Toyota, Arif Ege Engin, Tae Hong Kim, Madhavan Swaminathan and Kazuhide Uriu</i>	

Automotive EMC (TH-PM-SS)

An Overview of Automotive EMC Standards.....	812
<i>Poul Andersen</i>	
Achieving Correlation of Radiated RF Immunity Testing Performed in an Absorber Lined Shielded Enclosure and a Mode Tuned Reverberation Chamber.....	817
<i>Craig W. Fanning</i>	
Determination of Frequency Range Limit when Using Stripline as Emission or Immunity Test Methods.....	823
<i>Jean-Roger K. Kuvedu-Libla</i>	
Design and Performance Evaluation of DUT Support Equipment for Automotive EMC Testing	829
<i>S. Mee, S. Ranganathan, C. Harder, S. Mainville, J. Muccioli and D. Sanders</i>	
Automotive Audio Noise Assessment: Human Hearing Factors and Complexity	836
<i>Richard Wiese</i>	
EMC Expert Systems for Evaluating Automotive Designs	840
<i>Todd Hubing</i>	
Application of Chip-Level EMC in Automotive Product Design	842
<i>K. Hu, H. Weng, D. Beetner, D. Pommerenke, J. Drewniak, K. Lavery and J. Whiles</i>	
Experimental Definition of the Lowest Usable Frequency (LUF) of an Aluminum Made Reverberation Chamber with Reference to the IEC 61000-4-21 Standard.....	849
<i>Mario Pocaí, Ivan Dotto, Garth D'Abreu, and Domenico Festa</i>	

Matched Filter Detection and Identification of Electronic Circuits
Based on their Unintentional Radiated Emissions 853
Ahmed Shaik, Haixiao Weng, Xiaopeng Dong, Todd H. Hubing and Daryl G. Beetner

Author Index
