

# **2007 International Workshop on the Analysis of Multi-temporal Remote Sensing Images**

**Leuven, Belgium  
18-20 July 2007**

**IEEE Catalog Number: CFP07608-PRT**  
**ISBN 10: 1-4244-0845-8**  
**ISBN 13: 978-1-4244-0845-0**

# Table of Contents

<b>Characterization of the Temporal and Spatial Variability of Soil Moisture through Multi-Temporal Analysis of ASAR Observations .....</b>	<b>1</b>
<i>Rogier van der Velde, Tom Rientjes, Yao-ming Ma, Yizhou Zhao and Bob Su</i>	
<b>Multi-Temporal Classification of Abandoned Agricultural Land in Gadarif Region, Sudan, Using Original Bands, Indices and Feature Components of Spaceborne Imagery.....</b>	<b>7</b>
<i>Hussein M. Sulieman, Manfred F. Buchroithner</i>	
<b>Integrating Remote Sensing and Wetland Ecology: a Case Study on South African Wetlands.....</b>	<b>12</b>
<i>Els De Roeck, Mtemi Miya, Niko Verhoest, Okke Batelaan and Luc Brendonck</i>	
<b>Sequence Similarity and Multi-Date Image Segmentation .....</b>	<b>17</b>
<i>Alain Ketterlin, Pierre Ganarski</i>	
<b>A Multiscale Technique for Reducing Registration Noise in Change Detection on Multitemporal VHR Images.....</b>	<b>21</b>
<i>Francesca Bovolo, Lorenzo Bruzzone and Silvia Marchesi</i>	
<b>Integration of Heterogenous Land Cover Maps for Forest Cover Change Detection at National Scale:the Case of Vietnam. ....</b>	<b>27</b>
<i>Patrick Meyfroidt</i>	
<b>Temporal Signatures of Mediterranean Irrigated Crops Using Satellite Image Time Series.....</b>	<b>32</b>
<i>Pere Serra and Xavier Pons</i>	
<b>Crop Area Assessment Using Sub-pixel Classification with a Neural Network Trained for a Reference Year.....</b>	<b>36</b>
<i>Bert Bossyns, Herman Eerens and Jos Van Orshoven</i>	
<b>Object-based Monitoring of Land Cover Changes in Mangrove Ecosystems of Senegal.....</b>	<b>44</b>
<i>Giulia Conchedda, Laurent Durieux and Philippe Mayaux</i>	
<b>Robust Satellite Techniques (RST) for Oil Spill Detection and Monitoring.....</b>	<b>50</b>
<i>Daniele Casciello, Teodosio Lacava, Nicola Pergola and Valerio Tramutoli</i>	
<b>Robust Satellite Techniques (RST) for Pipeline Network Monitoring.....</b>	<b>56</b>
<i>Filizzola C., Cerra D., Corrado R., De la Cruz A., Pergola N., Tramutoli V.</i>	
<b>Robust Satellite Techniques (RST) for Seismically Active Areas Monitoring: the Case of 21st May, 2003 Boumerdes/Thenia (Algeria) Earthquake .....</b>	<b>61</b>
<i>Aliano C., Corrado R., Filizzola C., Pergola N., Tramutoli V.</i>	
<b>Monitoring Soil Wetness Variation by a Multi-Temporal Passive Microwave Technique.....</b>	<b>67</b>
<i>Teodosio Lacava, Vita Elena Di Leo, Nicola Pergola and Valerio Tramutoli</i>	
<b>Influence of Using Date-Specific Values when Extracting Phenological Metrics from 8-day Composite NDVI Data.....</b>	<b>72</b>
<i>Asheer Bachoo and Sally Archibald</i>	
<b>Linking Changes in Landscape Composition and Configuration with Sandfly Occurrence in Southwest France .....</b>	<b>76</b>
<i>Susana Martínez, Sophie O. Vanwambeke and Paul Ready</i>	
<b>Hyperspectral Airborne Remote Sensing for Multi-Temporal Assessment about Urban Changes in Naples Area.....</b>	<b>81</b>
<i>Daniela Guglietta, Pasquale Merola, Simone Sampieri and Alessia Allegrini</i>	
<b>Point Based Matching Algorithm for Damaged Area Detection .....</b>	<b>86</b>
<i>Mitsuyoshi Ishihara, Hitoshi Saji</i>	
<b>Wavechange: a Procedure for Change Detection Based on Wavelet Product Spaces.....</b>	<b>90</b>
<i>Luis M. T. de Carvalho, Fausto W. Acerbi Junior, José R. Scolforo, José M. de Mello, Antonio D. de Oliveira</i>	

# Table of Contents

<b>The Assessment of Vegetation Seasonal Dynamics using Multitemporal NDVI and EVI images derived from MODIS .....</b>	<b>95</b>
<i>Eduarda M. de O. Silveira, Luis M. T. de Carvalho, Fausto W. Acerbi Junior, Jose M. de Mello</i>	
<b>Assessing Vegetation Regrowth after Fire Based on Time Series of SPOT-VEGETATION Data.....</b>	<b>100</b>
<i>Stefaan Lhermitte, Jan Verbesselt, Willem W. Verstraeten and Pol Coppin</i>	
<b>Cumulative Sum Charts - A Novel Technique for Processing Daily Time Series of MODIS Data for Burnt Area Mapping in Portugal .....</b>	<b>107</b>
<i>Jan Kuera, Paulo Barbosa, Peter Strobl</i>	
<b>Change Analysis for Hyperspectral Imagery .....</b>	<b>113</b>
<i>Qian Du, Nicholas Younan, Roger King</i>	
<b>The use of the Airborne Thermal/Visible Land Application Sensor (ATLAS) to Determine the Thermal Response Numbers for Urban Areas.....</b>	<b>117</b>
<i>Jeffrey C. Luvall, Doug Rickman, and Jorge Gonzalez</i>	
<b>Changes in Land Surface Conditions on the Iberian Peninsula (1989 to 2004) Detected by Means of Time Series Analysis from Hypertemporal Remote Sensing Data.....</b>	<b>122</b>
<i>Thomas Udelhoven and Marion Stellmes</i>	
<b>Identifying Forest Dynamics for Change Detection Using Multitemporal SPOT Imagery .....</b>	<b>128</b>
<i>Baudouin Desclee, Pierre Defourny and Patrick Bogaert</i>	
<b>A Robust Multitemporal Satellite Technique for Volcanic Activity Monitoring: Possible Impacts on Volcanic Hazard Mitigation.....</b>	<b>134</b>
<i>Marchese F., Malvasi, G., Ciampa M., Filizzola C., Pergola N., Tramutoli V.</i>	
<b>Robust Satellite Techniques (RST) for Natural and Environmental Hazards Monitoring and Mitigation: Theory and Applications.....</b>	<b>139</b>
<i>Valerio Tramutoli</i>	
<b>Bayesian Data Fusion: Spatial and Temporal Applications.....</b>	<b>145</b>
<i>Dominique Fasbender, Val'erie Obsomer, Julien Radoux, Patrick Bogaert and Pierre Defourny</i>	
<b>Integrating MODIS Surface Reflectance Products into the Processing of Medium and High-resolution Satellite Images: Difficulties and Solutions through Two Hungarian Case Studies .....</b>	<b>151</b>
<i>Dániel Kristóf, Dóra Neidert, Zoltán Nagy and Krisztina Pintér</i>	
<b>A Multi-temporal Robust Satellite Technique (RST) for Forest Fire Detection .....</b>	<b>157</b>
<i>Giuseppe Mazzeo, Francesco Marchese, Carolina Filizzola, Nicola Pergola, Valerio Tramutoli</i>	
<b>An Unsupervised Approach for Subpixelic Land-Cover Change Detection .....</b>	<b>163</b>
<i>Amandine Robin, Lionel Moisan and Sylvie Le Hegarat-Masclé</i>	
<b>Mapping Forest Change in Borneo in 2000-2006 by a Multispectral Statistically-Based Detection Technique with SPOT-VEGETATION .....</b>	<b>169</b>
<i>Sophie Bontemps and Pierre Defourny</i>	
<b>Comparison of Several Change Detection Methods for Monitoring Land Cover Dynamics in Belarus.....</b>	<b>175</b>
<i>Maryna Rymasheuskaya</i>	
<b>Multi-source Information Fusion: Monitoring Sugarcane Harvest Using Multi-temporal Images, Crop Growth Modelling, and Expert Knowledge.....</b>	<b>178</b>
<i>Mahmoud El Hajj, Agnès Bégué, Serge Guillaume</i>	
<b>Appropriate Methods for Monitoring and Mapping Land Cover Changes in Semi-arid Areas in North Kordofan (Sudan) by Using Satellite Imagery and Spectral Mixture Analysis.....</b>	<b>184</b>
<i>Manal Awad Khiry, Elmar Csaplovics</i>	
<b>Change Detection Analysis on Time Series of Satellite Images with Variable Illumination Conditions and Spatial Resolution .....</b>	<b>188</b>
<i>G. Laneve, E. G. Cadau, D. De Rosa</i>	

# Table of Contents

<b>A Novel Methodology for Parameter Retrieval from Multi-temporal Data Demonstrated for Forest Biomass Retrieval from C-band SAR Backscatter .....</b>	<b>194</b>
<i>Urs Wegmüller, Maurizio Santoro and Andreas Wiesmann</i>	
<b>Seasonal Reflectance Course of Some Forest Types in Estonia from Multi-Year Landsat TM and SPOT Images and via Simulation .....</b>	<b>200</b>
<i>Sandra Suviste, Tiit Nilson, Tõnu Lükki and Alo Eenmäe</i>	
<b>Dynamics of MODIS Time Series for Ecological Applications in Southern Africa .....</b>	<b>205</b>
<i>René R. Colditz, Ursula Gessner, Christopher Conrad, Dawie van Zyl, Johan Malherbe, Terry Newby, Tobias Landmann, Michael Schmidt, Stefan Dech</i>	
<b>Performance Estimation of Similarity Measures of Multi-Sensor Images for Change Detection Applications.....</b>	<b>211</b>
<i>V. Alberga, M. Idrissa, V. Lacroix, J. Inglada</i>	
<b>Segmentation of Multi-Temporal Earthquake Density Imagery for the Detection of Geophysically Related Geothermal Activity .....</b>	<b>216</b>
<i>George Ch. Miliareisis</i>	
<b>Correcting NOAA-AVHRR Orbital Drift: a Simple and Automatic Methodology.....</b>	<b>222</b>
<i>Yves Julien, José A. Sobrino, Françoise Nerry</i>	
<b>Changes in the Global Vegetal Cover Through a Phenological Analysis of GIMMS Data.....</b>	<b>228</b>
<i>Yves Julien, José A. Sobrino</i>	
<b>Land Use/Cover Change in Mining Areas Using Multi-source Remotely Sensed Imagery .....</b>	<b>233</b>
<i>Peijun Du, Huapeng Zhang, Pei Liu, Kun Tan and Zuoxia Yin</i>	
<b>Analysis to Urban Landscape Pattern Change Based on Multi-Temporal CBERS Imagery.....</b>	<b>240</b>
<i>Peijun Du, Linshan Yuan, Huapeng Zhang, Kun Tan and Zuoxia Yin</i>	
<b>Dynamical Analysis of Hydrological Indexes Extracted from Remote Sensing Imagery: An Introductory Study .....</b>	<b>249</b>
<i>Ivan E. Villalon-Turrubiates</i>	
<b>Radiometric Normalisation of Multisensor/Multitemporal Satellite Images with Quality Control for Forest Change Detection .....</b>	<b>253</b>
<i>Nikolaos Galiatsatos, Daniel N.M. Donoghue, Douglas Knox and Keir Smith</i>	
<b>Complex Wishart Distribution Based Analysis of Polarimetric Synthetic Aperture Radar Data.....</b>	<b>259</b>
<i>Allan A. Nielsen, Henning Skriver and Knut Conradsen</i>	
<b>Estimating Fuzzy Membership Function Based on RMSE for the Positional Accuracy of Historical Maps .....</b>	<b>265</b>
<i>Eva M. De Clercq and Robert R. De Wulf</i>	
<b>Combined use of NDVI Time Courses at Low and High Spatial Resolution to Estimate Land Cover and Crop Evapotranspiration in Semi-arid Areas .....</b>	<b>270</b>
<i>I. Benhadj, B. Duchemin, V. Simonneaux, P. Maisongrande, S. Khabba, AG. Chehbouni</i>	
<b>High Spatial and Temporal Resolution FORMOSAT-2 Images: First Results and Perspectives for Land Cover Mapping of Semiarid Areas (Marrakech/Ai Haouz plain) .....</b>	<b>276</b>
<i>I. Benhadj, R. Hadria, B. Duchemin, V. Simonneaux, M. Le Page, B. Mougnot, O.Hagolle, G. Dedieu</i>	
<b>Derivation of Soil Surface Roughness Dynamics from Multi-temporal and Multi-parametric Airborne PolSAR-data.....</b>	<b>281</b>
<i>Philip Marzahn, Karsten Krüger and Ralf Ludwig</i>	
<b>An Integrated Long Time Series of 1km Resolution NDVI for Europe from the NOAA-AVHRR and SPOT-VEGETATION Sensors.....</b>	<b>286</b>
<i>Else Swinnen, Patrick Claes, Herman Eerens, Walter Heyns, Isabelle Piccard and Peter Viaene</i>
