

**2007 22nd International Congress on  
Instrumentation in Aerospace Simulation Facilities**

**10 - 14 June 2007**

**Pacific Grove, CA**

# TABLE OF CONTENTS

## **Session 1: Measurements at or near Surfaces**

*Chaired by Rolf Engler*

An Approach to Measuring the Effects of Surface Steps on Transition Using a Propelled-Model . . . . .	1
<i>A. Bender, A. Drake, R.V. Westphal, and S. Yoshioka</i>	
Velocity Measurements Near Walls, Cavities, and Model Surfaces Using Particle Shadow Velocimetry (PSV) . . . . .	7
<i>L. Goss, J. Esteveordal, and J. Crafton</i>	
Photogrammetric Recession Measurements of Ablative Materials in the NASA Ames Sixty-Megawatt Arcjet . . . . .	15
<i>E. Schairer and J. T. Heineck</i>	
Experimental Investigations of a Shear Driven Liquid Wall Film in a Low Speed Wind Tunnel . . . . .	25
<i>T. J. Möeller, H. G. Büsing, S. Zhang, R. Radespiel</i>	
Model Deformation Measurement in the ONERA F1 Wind Tunnel . . . . .	29
<i>A. Mignosi, Y. Le Sant, G. Touron, and G. Bourgignon</i>	

## **Session 2: PIV**

*Chaired by Andre Mignosi*

Determination of Velocity and Skin Friction Fields from Images by Solving Projected Motion Equations . . . . .	37
<i>T. Liu and L. Shen</i>	
Using Surface Stress Sensitive Films for Pressure and Friction Measurements in Mini- and Micro-Channels . . . . .	55
<i>S. D. Fonov, E.G. Jones, J. W. Crafton, and L. P. Goss</i>	
CleanSeeding for Particle Image Velocimetry . . . . .	62
<i>C.M. McNiel, M.F. Reeder, D.W. Peltier and J. W. Crafton</i>	
A Combined PIV/Force Balance Study of a Fin-Wake Aerodynamic Interaction. . . . .	68
<i>S.J. Beresh, J.A. Smith, J.F. Henfling, T.W. Grasser, and R.W. Spillers</i>	
Time-Resolved PIV for Measuring Flow Field Spectral Properties . . . . .	77
<i>M. P. Wernet</i>	

## **Session 3: PSP**

*Chaired by Keisuke Asai*

Lifetime Based Pressure Sensitive Paint Systems: Issues and Solutions . . . . .	88
<i>L. P. Goss, J. W. Crafton, E. G. Jones and R. A. Forlines</i>	
Evaluation of Lifetime-based Pressure-Sensitive Paint Measurement in Low-speed Flow . . . . .	100
<i>T. Yamashita, H. Nagai, and K. Asai</i>	
Development of Bi-Luminophore Pressure-Sensitive Paint Systems . . . . .	110
<i>Kazunori Mitsuo, Mitsuru Kurita, Kazuyuki Nakakita, Keisuke Fujii, Shigeya Watanabe, Shinya Katagiri, Yuji Wada</i>	
Development of Pressure-Sensitive Paint Technique in a Supersonic Blowdown Wind Tunnel and its Application to a Busemann Biplane . . . . .	119
<i>K. Saito, T. Ogawa, H. Nagai, K. Asai</i>	
Application of Pressure-Sensitive Paint for Determination of Dynamic Surface Pressures on a Rotating 65° Delta Wing and an Oscillating 2D profile in Transonic Flow. . . . .	127
<i>C. Klein, U. Henne, W. E. Sachs, R. H. Engler, Y. Egami, V. Ondrus, U. Beifuss, H. Mai</i>	
Development of a Pressure Sensitive Paint System for Measuring Global Surface Pressures on Rotorcraft Blades. . . . .	134
<i>A. Neal Watkins, Bradley D. Leighty, William E. Lipford, Oliver D. Wong, Donald M. Oglesby and JoAnne L. Ingram</i>	
Investigation of Pressure and Friction Force Distributions on a Model Tail Wing Using Pressure Sensitive Paint and Surface Stress Sensitive Film . . . . .	143
<i>S.D. Fonov, J.W. Crafton, L.P. Gos,d G.E. Jones, B.R.F. Schulze</i>	

## **Session 4: PIV**

*Chaired by Mark Wernet*

Filtered Rayleigh Scattering Based Concentration Measurements for a Horizontal Buoyant Jet. . . . .	147
<i>C. C. McGaha and M. F. Reeder</i>	
Mobile CARS-Rayleigh Instrument for Simultaneous Measurement of Multiple Properties in Gaseous Flows. . . . .	154
<i>D. Bivolaru, J. W. Lee, S. B. Jones, S. Tedder, P. M. Danehy, M. C. Weigl, G. Magnotti, A. D. Cutler</i>	
Development of a Rayleigh Scattering Diagnostic for Time-resolved Gas Flow Velocity, Temperature, and Density Measurements in Aerodynamic Test Facilities . . . . .	163
<i>A. F. Mielke, K. A. Elam, and C. J. Sung</i>	

Recent Progress Towards a High-Speed Three-Dimensional Flow Visualization Technique . . . . .	178
<i>B. S. Thurow</i>	
The Application of the Colored Background Oriented Schlieren Technique (CBOS) to Free-Flight and In-Flight Measurements . . . . .	185
<i>F. Leopold</i>	
Planar Doppler Velocimetry for Low-Speed Flows . . . . .	195
<i>T.P. Jenkins, K.I. Turner, and R.L. McKenzie</i>	
Conceptual Design of a Laser Light Sheet Flow Visualization System for a Pressurized Low Speed Wind Tunnel . . . . .	202
<i>K. Mejia and C. J. Jorgens</i>	

**Session 5: Miscellaneous Topics**

*Chaired by Rob Zwemmer*

Free-flight Force Measurement Technique in the Impulsive Facility HIEST . . . . .	215
<i>Hideyuki Tanno, Tomoyuki Komuro, Kazuo Sato, and Katsuhiko Itoh</i>	
Hypersonic Free Flight Measurement Techniques . . . . .	220
<i>A. K. Owen and F. K. Owen</i>	
Aerodynamic Interactions between Adjacent Slender Bodies Instrumentation and Wind Tunnel Testing . . . . .	231
<i>D. Weihs, M. Ringel and M. Victor</i>	
Object Oriented Programming in LabVIEW for Acquisition and Control Systems at the Aerodynamics Laboratory of the National Research Council of Canada . . . . .	259
<i>Michael Chen</i>	
Virtual Diagnostics Interface: Real Time Comparison of Experimental Data and CFD Predictions for a NASA Ares I Like Vehicle . . . . .	265
<i>Richard J. Schwartz and Gary A. Fleming</i>	

**Session 6: TSP**

*Chaired by James Bell*

Development of Luminophore-Pendant Temperature-Sensitive Paint and its Application to Pressure-Sensitive Paint for Aerodynamic Measurements . . . . .	277
<i>Yoshimi Iijima, Hiroataka Sakaue, Katsuaki Morita</i>	
Calculation of Mass Transfer Coefficients in a Crystal Growth Chamber through Heat Transfer Measurements . . . . .	283
<i>James H. Bell, Lawrence A. Hand</i>	
Temperature-Sensitive Paint Application in Cryogenic Wind Tunnels: Transition Detection at High Reynolds Numbers and Influence of the Technique on Measured Aerodynamic Coefficients . . . . .	304
<i>U. Fey, Y. Egami and C. Klein</i>	
Development of a Global Heat Transfer Measurement System at AEDC Hypervelocity Wind Tunnel 9 . . . . .	321
<i>Inna Kurits, Mark J. Lewis, Marvine. P. Hamner, Joseph D. Norris</i>
