2006 International Conference on Applied Electronics

Pilsen, Czech Republic
6-7 September 2006

IEEE Catalog Number:	**CFP0669A-PRT**
ISBN 10:	**80-7043-442-2**
ISBN 13:	**978-80-7043-442-0**

Contents

Ludanek Harald Patuschka Sven	Improved Safety and Security through Vehicle Electronics	1
Altun Mustafa Kuntman Hakan	A Wideband CMOS Current-mode Operational Amplifier and its Use for Band-pass Filter Realization	3
Amiri Farahani Eshghi Mohammad	Architecture of a Wavelet Packet Transform Using Parallel Filters	7
Anjam Riaz Maaruf Ali	Fractal Antenna and their Multi-band Performance Evaluation	11
Bilgin Gökhan Altun Oğuz	Cardiac Problem Diagnosis with Statistical Neural Networks and Performance Evaluation by ROC Analysis	15
Cizek Martin Vaclavik Vlastimil	Blood Flow Detector Output Signal Digitalization	19
Corina Botoca Georgeta Budura	Complex Data Clustering Using a New Competitive Learning Algorithm	23
Doležal Jaromír Šťastný Jakub Sovka Pavel	Modelling and Recognition of Movement Related EEG Signal	27
Dosek Petr Zelinka Ondrej Matela Lukas	Detection of Spots on Materials Using the FPGA Circuit	31
Draxler Karel Styblíková Renata	Determination of Rogowski Coil Constant	241
Duraj Aleš Mach Pavel	Stability of Electrical Resistance of Isotropic Conductive Adhesives within Mechanical Stress	35
Dušek Karel Urbánek Jan	Study of Influences on the Changes of the Surface Tension	39
Fazakas Albert Neag Marius Feştilă Lelia	Block RAM versus Distributed RAM Implementation of SVM Classifier on FPGA	43
Grajciar Branislav Ondracek Oldrich	Full Field Fourier Domain Optical Coherence Tomography	47
Hála Aleš	Permanent Magnet Using for Reed Switches Control	51
Havlík Jan Uhlíř Jan Horčík Zdeněk	Thumb Motion Classification Using Discrimination Functions	55
Hospodka Jiri Struhovsky Petr	New Method for Measuring of Natural Frequency of Tensometrical String Sensors	59
Hrzina Pavel Kuba Jan	Pulse Source for Pover Supply of Magnetotherapeutic Devices	63
Jilek Jiri Stork Milan	Bench Testing of Oscillometric Blood Pressure Monitors	67
Kadlecová Eva Fiala Pavel Vojtek Tomáš	Design and Tests of Vibrational Minigenerators	71
Kadlecová Eva Fiala Pavel Zeman Miroslav	Numerical Analysis and Test of Pyramidal HF Absorber	75
Kadlecová Eva Kubásek Radek Kolářová Edita	RL Circuits Modeling with Noisy Parameters	79
Kadlecová Eva Steinbauer Miloslav	The Source of Light with Higher Power LED Diodes	83

Kadlecová Eva Steinbauer Miloslav	Measurement of Weakly Magnetic Material Using New MR Technique	87
Klabačka Edvard Urbánek Jan	A Note on Some Limitations in the Wetting-balance Measurements and How to Deal with them	93
Kostka Frantisek Svacina Petr Aubrecht Ivo	Control System for Developing Holograms	97
Kukuča Peter Chlebovec Michal	Vehicle Location System	101
Lahoda Jiří	Discrete-time Tellegen's Theorem and its Using for Digital Filters Synthesis	105
Lekic Nedeljko Mijanovic Zoran Stojanovic Radovan Filipovic Dragan	A Multifunctional Microcontroller Device which Can Be Connected to RS232 Hub	109
Linhart Richard	A Three Axis Magnetometer for Use in a Small Satellite	113
Matoušek Zdeněk Ochodnický Ján	Optimization of Pulse-Modulated Signal Processig in Passive System	117
Neag Marius Fazakas Albert Feştilă Lelia	A Novel High-speed, Low-offset, Loading Condition-adaptable Voltage Buffer	121
Nedelea Liviu Neag Marius Topa Marina Feştilă Lelia Topa Vasile	Analog Filter Transfer Function Optimization Based on a Genetic Algorithm	125
Osmančík Lukáš Polák Martin Šimoník Petr Hrdina Libor Skotnica Petr Palacký Petr	Digital Signal Processor TMS320F2812 and its Application in Electric Drives	129
Özkan Kamil Çevik Ulus	Microcontroller-based Implementation of a Perspective View Module for Pixel-based CSG Renderers	133
Papež Václav Papežová Stanislava	Equipment for Noise Monitoring of Power Supply Units	137
Prokop Tomas	Design of Filters for SHDSL over POTS	141
Richterova Marie Juracek David Mazalek Antonin	Modulation Classifier of Analogue Modulated Signals Based on Method of Artificial Neural Networks	145
Ručkay Lukáš Šťastný Jakub Sovka Pavel	Movement-related EEG Decomposition Using Independent Component Analysis	149
Saied M. H. Mostafa M. Z. Abdel-Moneim T. M. Yousef H. A.	On Three-phase Six-switches Voltage Source Inverter: A 150° Conduction Mode	153
Sayginer Mustafa Kuntman Hakan	Realization of First-order All-pass Filter Using Four Terminal Floating Nullor	159
Şcheianu Dumitru Tutănescu Ion	Fractal Signals	163
Seborský Stanislav	Safety Related Systems and Electromagnetic Compatibility	169
Steinbauer Miloslav Fiala Pavel Drexler Petr	Measurement of Vircator Single-shot High Power EM Pulse	173

Steinbauer Miloslav Kubásek Radek	Equaripple Digital Filter Banks Design	**177**
Steinbauer Miloslav Vojtek Tomáš Drexler Petr	Methods of Air Ion Concentration Measurement	**181**
Stojanovic Radovan Tafa Zilbert Lekic Nedeljko	An Approach to Monitoring of Physiological Signals Using Bluetooth	**185**
Stork Milan Ruzicka Jiri	Artificial Lung Ventilator Working in the Hyperbaric Chamber	**189**
Stork Milan Hrusak Josef Mayer Daniel	Chaos in Simple Nonlinear Systems and Chaotic Systems Simulation and Implementation	**193**
Ševčík Peter	Implementation Design of Pulse Coded Neural Network Neuron into Field Programmable Gate Array Device	**197**
Šťastný Jakub Ručkay Lukáš	Teaching Field Programmable Gate Array Design of Digital Signal Processing Systems	**201**
Švarný Jiří	Thermal Stabilizer for Laser Diode	**205**
Tiponut Virgil Haraszy Zoltan Ianchis Daniel	Tools for Student's Project Development Acceleration	**209**
Tiponut Virgil Haraszy Zoltan Ianchis Daniel	Using a Mobile Robot as an Educational Tool	**213**
Tkac Jozef	Radar Range Modelling in Noise Jamming Conditions	**217**
Velickov Frantisek Bauer Gerhard	POFA Plastic Optical Fiber Attenuator	**221**
Vojtek Tomáš Steinbauer Miloslav Fiala Pavel Bartusek Karel	Gerdien Condenser Measuring and Numerical Modeling of Air Ion Fields	**225**
Vondrášek Martin Tichý Tomáš Sovka Pavel	Virtual Electrodes Discrimination in Nucleus® 24 Cochlear Implant	**229**
Wolfram Heiko Dötzel Wolfram	Stability Analysis of a MEMS Acceleration Sensor	**233**
Yamacli Serhan Özcan Sadri Kuntman Hakan	A Novel Active Circuit Building Block: Electronically Tunable Differential Difference Current Conveyor (EDDCC) and its Application to KHN Filter Design	**237**
