Committees.....	xi
Welcome Message	xv

Session 1.1 - Wind Technologies

Wind Tunnel Tests on a Wind Turbine with Contractor and Diffuser Arrangement. J Fletcher, F Wang, L Bai, J Whiteford, D Cullen	1
An analytical method to minimize dynamic foundation forces caused by transient torques in the air gap of an asynchronous machine. Ulrich Werner.....	6
Unit Commitment and Dispatch Strategies for a Wind Park. C.F.Moyano, J.A.Peças Lopes.....	12
Transient Analysis of Crete's Power System with Increased Wind Power Penetration. Emmanuel S. Karapidakis	18
Use of Simulated Annealing for optimizing capacity and location of STATCOM in Grids with Large Scale Wind Generation. Pedro J. Franco Marques, J. A. Peças Lopes.....	23

Session 1.2 - Power electronics (Active Filters)

System Integrated Active Power Filter for Three Phase Rectifier Application. Han Yang, Muhammad Mansoor Khan, Chen Chen.....	29
A New Control Scheme of Hybrid Active Filter Using Self-Tuning-Filter. Mohamed Abdusalam, Philippe Poure, Shahrokh Saadate.....	35
Optimization of an Improved Sliding Mode Controller for Shunt Active Power. Majid Nayeripour, Ali Yazdian, Mostafa Mohamadian, Reza khorshidi.....	42
Parameters of Active Power Filter Controllers in an Industrial Power System. Tomáš Sýkora, Josef Tlustý, Viktor Valouch.....	48
A Combined Series Active Filter and Passive Filters for Harmonics, Unbalances and Flicker Compensation. J. G. Pinto, R. Pregitzer, Luís. F. C. Monteiro, Carlos Couto, João. L. Afonso.....	54

Session 1.3 - Power Electronics (Converters)

A new space vector current control of the three phase PWM rectifier. L. Belhadji, K. Aliouane, T. Ghennam, A. Kheloui.....	60
Three-Phase Four-Switch PFC and Its Analytical Model. Jiri Klima, Jiri Skramlik, Viktor Valouch.....	66
Temperature Controller of the Sample of a Fast Field Cycling NMR Spectrometer. Duarte Sousa.....	72
Direct Active and Reactive Power Control of AC/DC/AC Converter with Permanent Magnet Synchronous Generator for Sea Wave Converter. Marek Jasinski, Dariusz Swierczynski, Marian P. Kazmierkowski.....	78

Session 1.4 - Induction Machines Fault Detection

The remote surveillance device in monitoring and diagnosis of induction motor by using a PDA. H. Razik, G. Didier, M.B.R. Corrêa, E.R.C. da Silva.....	84
Induction Motors Modeling and Fuzzy Logic Based Turn-To-Turn Fault Detection and Location. Daniel F. Leite, Marcus Vinícius Araújo, Luiz Secco, Pyramo Costa Jr.....	90
Protection of Induction Motor Using PLC. I. Çolak, BSc, MPhil, R. Bayindir, A. Bektaş, İ. Sefa, G. Bal.....	96
The Use of Instantaneous Phase-Angle Signature Analysis for Airgap Eccentricity Diagnosis in Three-Phase Induction Motors. M'hamed Drif, A. J. Marques Cardoso.....	100
Statistic Moment Based Method for the Detection and Diagnosis of Induction Motor Stator Fault. Tito G. Amaral, V. Fernão Pires, J. F. Martins, A. J. Pires, Manuel M. Crisóstomo.....	106

Session 1.5 - Energy Storage

Storage Electrical Energy Assessment in Real Time of Lead-acid Batteries. V. Fernao Pires, O. Páscoa Dias.....	111
Charge-Pump Phase-Locked-based Battery Pulse Charge System. L. R. Chen, T. R. Chen and C. S. Liu.....	116
Batteries and Ultracapacitors Set in Hybrid Propulsion Systems. Antoni Szumanowski, Piotr Piórkowski, Yuhua Chang.....	122
Electric Bicycle Supplied by an Electronic Converter Using Distinct Forms of Energy Storage. D. M. Sousa, P. J. Costa Branco, J. A. Dente.....	128
Study and control of a magnetic bearing for flywheel energy storage. Adrien Schouleur, Julien Sapin, Virginie Kluyskens, Francis Labrique, Bruno Dehez.....	134

Session 1.6 - Modelling and Control of Electrical Machines I

A High Performance Decoupling Control of Induction Motor with Efficient Flux Estimator. Manoj Datta.....	140
Genetic Algorithm Based Fast Speed Response Induction Motor Drive without Speed Encoder. Manoj Datta.....	146
Aspects Regarding Dynamic Regimes of Induction Motor Control by the Stator Flux. S. Enache, I. Vlad, M. A. Enache.....	152
A Saturated Induction Machine Model with Series Iron Losses Resistance. Samir Moulahoum, Omar Touhami.....	156
Experimental evaluation on parameter identification of induction motor using continuous-time approaches. Nuno Miguel Cerqueira, José Ricardo Soares, Ricardo Pinto de Castro, Hugo Santos Oliveira, Rui Esteves Araújo.....	162

Session 1.7 - Electrical Machines Design

Homopolar Inverter Design Study. Michael Owen.....	168
Analytical Design of a Claw-Pole Motor for Electrical Water Pump Applications. H. Hembach, D. Gerling, E. Nipp.....	174
Permanent Magnet Generator Designing Guidelines. Tuomo Lindh, Pia Salminen, Juha Pyrhönen, Markku Niemelä, Janne Kinnunen, Jorma Haataja.....	180
Case Study in the Design of HTS Machines: an All Superconducting Linear Synchronous Motor. J. Murta Pina, M. Ventim Neves, A. Leão Rodrigues.....	185

Guidelines for Designing Concentrated Winding Fractional Slot Permanent Magnet Machines. H. Jussila, P. Salminen, M. Niemelä, J.Pyrhönen.	191
---	-----

Session 1.8 - Energy and Storage Resources

Increasing Renewable Energy Penetration in Isolated Grids Using a Flywheel Energy Storage System. N. Hamsic, A. Schmelter, A. Mohd, E. Ortjohann, E. Schultze, A. Tuckey, J. Zimmermann.....	195
A Systematic Computational Procedure for Assessing Small-Scale Cogeneration Application Schemes. Panagiotis A. Katsigiannis, Demetrios P. Papadopoulos.....	201
Modeling the Probability of Fuel Desulfurization. Kimberly Drake, John Heinzl.....	207
Estimating future power generation unbalance in the Portuguese power system due to increasing integration of renewable sources. Sérgio Faias, Jorge Sousa, Rui Castro.....	213
Beyond the Electricity-only Production: Towards a Distributed Multi-Generation World. Gianfranco Chicco, Pierluigi Mancarella.....	219

Session 1.9 - Power System Computation Techniques I

New Methods for Distribution Network Reconfiguration from Multicriteria Decision-Making. D. P. Bernardon, L. Comassetto, A.R. Abaide, L.N. Canha, M.A.T. Gobbo.....	225
Online Management of MicroGrid with Battery Storage Using Multiobjective Optimization. Faisal Mohamed, Heikki Koivo.....	231
Automatic priority of the maintenance activities in distribution systems using multicriterial analysis and fuzzy techniques. Luciane Canha, Alzenira Abaide, Felix Farret, Eric Da.....	237
Analyze of Multi-Objective Methods Applied to Distributed Generation Systems. Alexandre Barin, Luis Pozzatti, Luciane Canha, Ricardo Machado, Alzenira Abaide, Felix Farret, Cássio Carvalho.....	243
A Multi-Agent Differential Evolution Algorithm for Optimal Reactive Power Dispatch in Electricity Markets. Alireza Abbasy, Iman Tabatabaie, Seyyed Hamid Hosseini.....	249

Session 2.1 – Education

An Object-Oriented Graphical Framework for Power System Analysis. Izudin Dzafic.....	255
A Novel Integrated Web Based Learning System for Electric Machines Education. I. Çolak, MPhil, E. Irmak, S. Demirbas, S. Sagiroglu.....	265
Teaching Analog Electronics by PBL. Miia Koski, Mikko Kuisma.....	270
Fuel Cell and On-Demand Hydrogen Production: Didactic Demonstration Prototype. Carmen M. Rangel, R. A, Silva, A.M.F.R. Pinto.....	274
The Discipline and the Energy Efficiency Laboratory (LEENER): Formation, Development and Transference of Technology for the Combat to the Energy Waste. Danilo Pinto, Henrique Braga, Vladimiro Miranda, André Moreira, Jorge Pereira.....	279

Session 2.2 - Power System Computation Techniques II

A Flexible Methodology Based in Fuzzy Logic Rules for Reactive Power Planning of Multiple Shunt FACTS Devices to Enhance System Loadability. Belkacem Mahdad, Tarek Bouktir, Kamel Srairi.....	285
Fuzzy stabilizers tuned by genetic algorithm in order to improve Power System oscillation damping. Daniele Menniti, Alessandro Burgio, Anna Pinnarelli, Nicola Sorrentino.....	291

A Concept for an Operative Platform to Manage Intelligent Buildings. João Figueiredo, Jose Sá da Costa.....	300
An Improved Fuzzy Inference System for Voltage/VAR Control. Vladimiro Miranda, André Moreira and Jorge Pereira.....	306
A Dynamic Methodology Based in Hybrid Genetic and Fuzzy Logic Rules with Multi Shunt FACTS Devices to Enhance the Optimal Power Flow. Belkacem Mahdad, Tarek Bouktir, Kamel Srairi.....	312

Session 2.3 - Modelling and Control of Electrical Machines II

Synchronous Generator Model Identification using Hook and Jeeves Optimization method. Mahdi pourgholi, Mohammad taghi Nabavi, Vahid Johari Majd, Mohammad Reza Aghamohammadi.....	318
Iron Losses and Eddy-Current Component Losses in a Three-Phase Three-Limb Transformer Core Subjected to PWM Voltage Excitations. Xiao Guang Yao.....	324
Hammerstein modeling of electrical drives: identification by multiple integrators. Alessandro Burgio, Alfredo Eisinberg, Giuseppe Fedele.....	330
Power Converter For a Linear Switched Reluctance Actuator With Hysteresis Current Controller. António Espírito Santo, Maria do Rosário Calad, Carlos Manuel Cabrita.....	336
Design of Line Start PM Motors with High Power Factor. Danut Ilea, Dan Stoia, Mihai Cernat, Maria Antonoaie.....	342

Session 2.4 - Fuel Cells

A Reformer Model for Fuel Cell Power Systems. Chiara Boccaletti, Gianluca Fabbri and Ezio Santini.....	347
Simulation for Technical and Economic Analysis of a Hybrid-Fuel-Cell System. Juergen Schlabbach, Markku Rissanen, Lars Strupeit.....	353
Interaction between PEM Fuel Cells and Converters for AC Integration. Diego Dias Marquezini, Ricardo Quadros Machado, Felix Alberto Farret.....	359
Passive Direct Methanol Fuel Cell System with Adaptive Fuel Concentration Control based on Liquid Surface Tension. Yuming Yang and Yung C. Liang.....	365
Water and Heat Conservation modelling for a Reformate Supplied Fuel Cell System. Fehd Benaicha, Karim Bencherif, Jean-Claude Vivalda, Michel Sorine.....	371

Session 2.5 - Power System Protection

A Novel Voltage Transients Base Protection Criterion for T-Type High Voltage Transmission Lines. Mingchao Xia, Yong Lin.....	377
Determination of Power System Voltage Stability using Modal Analysis. Chandrabhan Sharma, Marcus G. Ganness.....	381
Automated Coordination and Optimization Tool of Protection Devices for Distribution Systems. Lorenzo Comassetto, Daniel Bernardon, Luciane Canha, Alzenira Abaide.....	389
Ground-Fault Current Transfer at the Transition Station of a Combined Overhead- Cable Line. A Parametric Analysis. Stefano Mangione.....	394
A Transformer Differential Relay Based on a Multiple Park Transformation. Manuel Guerreiro, V. Fernao Pires.....	400

Session 2.6 - Power devices and Power Converter Circuits

Comprehensive Electro-Thermal Compact Model of a 3.3kV-1200A IGBT-module. Alberto Castellazzi, Mauro Ciappa, Wolfgang Fichtner, Guillaume Lourdel, Michel	
--	--

Mermet-Guyennet.....	405
Analysis of a boost converter with low step-up ratios and reduced voltage stress across the buffer capacitor.	
Josef Fohringer and Felix Himmelstoss.....	411
Operation of Three- and Five-phase Diode-clamped Three-level Inverters under Open-circuit Fault Conditions.	
Liliang Gao, John Fletcher and Donald Reay.....	417
Dead-Time Control System for a Synchronous Buck dc-dc Converter.	
F. Lima, Marcelino Santos, José Barata and João Aguiar.....	423
4.2V Tolerant Buck Converter in a Standard 3.3V 0.13 μ m CMOS Technology.	
José Rocha, Marcelino Santos, J. M. Dores Costa and F. Lima.....	429

Poster Session

Network Power Flow Control of Variable Speed Wind Turbine.	
Djamal Aouzellag, Kaci Ghedamsi, El Mjdjid Berkouk.....	435
Anti-Islanding Protection of Distributed Generation Resources Using Negative Sequence Component of Voltage.	
Amin Helmzadeh, Omid Alizadeh-Mousavi, Javad Sadeh.....	440
Intelligent Control for DC-Bus Voltage of Three-Phase AC/DC PWM Converters.	
Mahmoud Neam, Fayez El-sousy, Mohmed Ghazy, Maged Aboadma.....	444
Analysis and Simulation of the AVR System and Parameters Variation Effects.	
Jawad Faiz, Ghazanfar Shahgholian, M Arezoomand.....	450
Determination and Allocation of Reactive Power Loss in Deregulated Power Systems in The Presence of Multilateral Multiple Contracts.	
Pejman bayat, A Kazemi.....	454
Life Assessment of Power Transformers via Paper Ageing Analysis.	
Zalizah Poniran.....	460
Survey Cycle of Linear Parabolic Solar Power Plant Design and Control of Collectors Efficiency.	
Houtan Moaveni.....	466
Transmission System Loss Allocation in Hybrid Electric Power Markets.	
Hooman Andami.....	471
Inverter Switching Frequency Effects on the Rotor Losses of an Axial-Flux Solid-Rotor Core Induction Motor.	
Mikko Valtonen, Asko Parviainen.....	476
Distance Relay Over-Reaching due to TCSC Presence on Second Circuit of Double Circuit Line.	
Ahad Kazemi, Sadegh Jamali and Hossein Shateri.....	481
Distance Relay Tripping Characteristic in Presence of SSSC on Next Line	
Sadegh Jamali, Ahad Kazemi, Hossein Shateri.....	487
Improved Functional Dependency Method to Break-Point Determination for Protective System Coordination.	
Hossein Shateri, Sadegh Jamali.....	493
Development and Analysis of New Type of Switchgear for High Voltage Gas Circuit Breaker.	
Jong-Ho Kang, Sang-Min Choi.....	499
Interactive e-learning: Simulation of Power Electronic Circuits for Effective Understanding of its Performance.	
Sanjay Dabadgaonkar, kanhayyalal Barbole, Ram Mishra.....	504
Realistic Simulation of Reverse Characteristics of 4H-SiC Power Diode.	
Guannan Wei, Yung C. Liang, Ganesh S. Samudra.....	508
Concentrated Wound Permanent Magnet Machines with Different Rotor Designs.	
Pia Salminen, Juha Pyrhönen, Hanne Jussila, Markku Niemelä.....	514
Analysis and Selection of Neutral Grounding modes in cable distribution Network.	
Yundong Song, Shun Yuan, Chunfang Zhao, Yanfeng Jia.....	518
Correct Prediction of the Vibration Behavior of the High Power Ultrasonic Transducers by FEM Simulation.	
Abbas Pak, Amir Abdullah.....	522
Predictive Optimal Control of Input and Output Currents in Matrix Converters.	
Paulo Gamboa, S. Ferreira Pinto, J. Fernando Silva, Elmano Margato.....	529
Fuzzy modeling of electric equipment for estimation of technical state and taking	

the decisions about strategy of further exploitation. Nikolay Kosterev, Eugen.Bardik.....	534
Multi-Objective Evolutionary Algorithms (MOEA) for Reactive Power Planning in Electrical Networks - an Overview. Dulce Pires, Carlos Henggeler Antunes, António Gomes Martins.....	539

Session 3.1 - PV Systems

Influence of Harmonic System Voltages on the Harmonic Current Emission of Photovoltaic Inverters. Juergen Schlabbach, Andreas Groß.....	545
Simplification Scheme Of Sun Tracking To Gain High Concentration Solar Energy. Omar Aliman, Ismail Daut, Rosnazri Ali, Muzamir Isa, Mohd Rafi Adzman.....	551
Validation of Photovoltaic Electrical Models against Manufacturers Data and Experimental Results. João Crispim, Micael Carreira, Rui Castro.....	556
A photovoltaic cell model based on nominal data only. Ernest Matagne, Rachid Chenni, Rachid El Bachtir.....	562
RenH2 – Stand-Alone Energy System Supported by Totally Renewable Hydrogen Production. João Martins, Antonio Joyce, Carmen Rangel, João Sotomayor, Rui Castro, A. J. Pires.....	566

Session 3.2 - Power Transmission

Decreasing The Right of Way of Transmission Lines By Using Towers With Polymer Insulation Arms. H.Jannat Alipour, S.Aminnejad, M.Jazaeri.....	571
Use of the ATP Draw Software for Studies of Parallelism in Distribution Networks Served by Different-Source Substations. Daniel Bernardon, Francisco Diuner.....	577
Improved and extended DG capability in voltage regulation by reactive and active power. Mariel Triggianese, Johan Morren, Sjoerd W.H. de Haan, Pompeo Marino.....	583
Investigation of Harmonic Effects on Unnderground Power Cable. Yusuf Gürçan Bahin, Faruk Aras.....	589
Experimental Investigation of Power Cable Performance. Mamdooh Al-Saud, Mohamed El-Kady, Raymond Findlay.....	595

Session 3.3 - Power Electronics (High Power Converters)

Research On neutral Point Potential Balance of three-level Inverter Based On Fuzzy Logic Control Strategy. Chen xinbing, He ligao.....	600
Three-Dimensional Space Vector Modulation Algorithm for Three-Leg Four-Wire Voltage. Egon Ortjohann, Alaa Mohd, Nedzad Hamsic, Ahmad Al-Daib.....	605
A Six-phase Multilevel Inverter for Medium Voltage Adjustable Speed Drive Systems. Jun Wen, Keyue Smedley.....	611
Predictive Optimal Control for Three-Phase Neutral Point Clamped Multilevel Converters. Dionísio Barros, Fernando Silva.....	618
An optimized control technique of PWM-Active Rectifiers with generic number of voltage levels. Gianluca Brando, Adolfo Dannier, Renato Rizzo.....	624

Session 3.4 - Wind Generators

Fuzzy logic based primary frequency control of variable speed wind generators. Vincent Courtecuisse, Benoit Robyns, Bruno Francois, Sophie Plumel.....	630
A New Space-Vector Based Hysteresis Current Control Applied on Three-Level Inverter to Control Active and Reactive Powers of Wind Generator. Tarak Ghennam, Ebd Elmadjid Berkouk, Bruno Francois.....	636
Mathematical Model of the Double Fed Induction Generator for Wind Turbines and its Control Quality. Ervin Spahic, Johan Morren, Gerd Balzer, Gabriele Michalke.....	642
Analysis three- and five-phase permanent magnet machines supplying diode bridge rectifiers for small scale wind generators. Nagmeldeen Abdo Mustafa Hassanain, John Fletcher.....	648
Direct Controlled Matrix Converters in Variable Speed Wind Energy Generation System. Sonia Pinto, L Aparicio, P Esteves.....	654

Session 3.5 – Renewable Energy Sources

Linear model identification of the Archimedes Wave Swing. Pedro Beirão, Duarte Valério, José Sá da Costa.....	660
Numerical Analysis & Experimental Study in Design & Operation Of Three Solar Parabolic Thermal Power Plants. Houtan Moaveni.....	666
Control of a run of river small hydro power plant. Jose Ignacio Sarasua, Jose Roman Wilhelmi, Jesus Fraile-Ardanuy, Juan Ignacio Perez, Jose Angel Sanchez.....	672
Strategy evolution of control of extensive district heating systems. Jaroslav B., Bronislav Chramcov, Pavel Navrátil, Michal Princ.....	678
Assessment of the Emissions due to Cogeneration Microturbines under Different Operation Modes. Aldo Canova, Gianfranco Chicco, Pierluigi Mancarella.....	684

Session 3.6 - Power Quality

Fast and Accurate Frequency and Harmonic Estimation Method for On-Line Application in Power System. Hamid Reza Mohammadi, Ali Yazdian Varjani, Hossein Mokhtari, Majid Nayeripour....	690
Harmonic analysis based on Kalman Filtering and Prony's method. Fabiano Fragoso Costa, António João Marques Cardoso, Darlan Alexandria Fernandes.....	696
Simulation of transient state impacts from low power DG aiming at improving power quality and reliability of distribution networks. Luis F. Pozzatti, Alexandre Barin, Luciane N. Canha, Ricardo Q. Machado, Alzenira R. Abaide.....	702
Lightning Strokes- Theoretical Model and Determination of Possible Striking Point. Arie Braunstein, Yuval Beck, David Berla.....	707
On-line Detection and Classification of Power Quality Disturbances in a Single- phase Power System. Tomáš Radil, Václav Matz, Fernando Janeiro, Pedro Ramos, Antonio Serra.....	713

Session 3.7 - Power Systems Fault Detection

Identification of Transformer Internal Faults by Using an RBF Network Based on Dynamical Principle Component Analysis. Okan Ozgonenel, Erdal Kilic, David Thomas, Ali Ekber Ozdemir.....	719
Analyzing Internal Single phase-to-Frame Faults in d-q Axis Model for Stator Windings of Synchronous Machines. Mansour Hosseini_firouz and Mahmud Fotuhi-Firuzabad.....	725
Detection of Inrush Currents from Fault Conditions in Power Transformers: A	

Neuro_Fuzzy Approach.	
Majid Delshad, Mohamadreza Ahmadzadeh, Bahador Fani.....	731
Joint faults detection in LV switchboard and its global diagnosis, through a Temperature Monitoring System.	
Kahan N'gouan N'guessan, Eric Jouseau, Gilles Rostaing, Florence François.....	736

Session 3.8 - Control of AC Drives

Nonlinear Control for Speed-Sensorless Synchronous Motors with Damping Windings.	
Riccardo Marino, Patrizio Tomei, Cristiano Maria Verrelli.....	742
Hybrid Electric Vehicle Drive with Synchronized PWM.	
Valentin Oleschuk, Radu Bojoi, Francesco Profumo, Alberto Tenconi.....	748
Extended Direct Voltage Control of the Stand-Alone Double Fed Induction Generator.	
Grzegorz Iwanski, Wlodzimierz Koczara.....	754
Digital Control of a Two Phase Motor.	
Dorin Petreus, Niculaie Palaghita, Cristian Farcas, Ionut Ciocan, Zoltan Orban.....	760
Active Stabilization Method for the Doubly-Fed Induction Generator Using a Quadrature Inner Control Loop.	
Gil Marques.....	765

Session 3.9 - Power System Computation Techniques III

Demand Forecasting Using Time Series Modelling And Anfis Estimator.	
H. Keyvani ,A. Mohammadi, M. Ghanbarian, M. R. Askari, F. Kavehnia.....	769
Comparing Power Flow Equations on a Local Basis for Distribution Networks.	
Celia MSC de Jesus and Luis AFM Ferreira.....	774
Modeling/Simulation of Power Distribution in Hybrid Power Systems Using Dynamic-RMS Technique.	
Egon Ortjohann, Worpong Sinsukthavorn, Alaa Mohd, Nedzad Hamsic, Andreas Schmelter.....	779
Estimation and Prediction in Load-frequency Control.	
Kresimir Vrdoljak, Nedjeljko Peric, and Ivan Petrovic.....	785
Implementation of different methods for PTDF matrix calculation.	
Milan Vukasovic.....	791
