

Proceedings

DASC 2007

Third IEEE International Symposium
on Dependable, Autonomic
and Secure Computing

25-26 September 2007
Columbia, Maryland

Sponsored by
IEEE Computer Society, Technical Committee on Autonomous
and Autonomic Systems
Indiana University, Purdue University, Indianapolis

Los Alamitos, California
Washington • Tokyo

DASC 2007

Third IEEE International Symposium on Dependable, Autonomic and Secure Computing

Table of Contents

Message from the DASC 2007 Chairs	viii
Organizers.....	ix
International Advisory Committee	xi
Program Committee	xiii
Steering Committee.....	xix

Session 1: Self-*

Building a Self-Healing Operating System.....	3
<i>Francis M. David and Roy H. Campbell</i>	
Self-Configuration Techniques for MuniSocket	11
<i>Nader Mohamed and Jameela Al-Jaroodi</i>	

Session 2: Dependability

Incorporating Modular Imperfect Coverage into Dynamic Hierarchical Systems Analysis	21
<i>Prashanthi Boddu and Liudong Xing</i>	
A Coarse-Grained Pessimistic Message Logging Scheme for Improving Roll-Back Recovery Efficiency	29
<i>Jin-Min Yang, Kin Fun Li, Da-Fang Zhang, and Jing Cheng</i>	
A Byzantine Fault Tolerant Distributed Commit Protocol	37
<i>Wenbing Zhao</i>	

Session 3: Security

Compiler-Directed Region-Based Security for Low-Overhead Software Protection.....	47
<i>Vijay Kongubangaram, Olga Gelbart, Rahul Simha, and Bhagirath Narahari</i>	
Towards a Proactive Fraud Management Framework for Financial Data Streams	55
<i>Michael E. Edge, Pedro R. Falcone Sampaio, and Mohammed Choudhary</i>	

Session 4: Autonomic Computing Systems

Challenges and Best Practices in Policy-Based Autonomic Architectures.....	65
<i>Radu Calinescu</i>	
Using Atoms to Simplify Distributed Programs Checking.....	75
<i>H. F. Li, Eslam Al Maghayreh, and D. Goswami</i>	
An Inference-Based Collaborative Filtering Approach.....	84
<i>Jin-Min Yang and Kin Fun Li</i>	

Session 5: Performance and Reliability

How to Update Dependable Secure Computing Systems from a Survivability Assessment Perspective?	95
<i>Li Bai, Saroj Biswas, and Musoke Sendaula</i>	
Performance Analysis of CORBA Replication Models.....	100
<i>Swapna S. Gokhale and B. Dasarathy</i>	
Byzantine Fault Tolerance for Nondeterministic Applications.....	108
<i>Wenbing Zhao</i>	

Session 6: Self-Improvement Based on Software and Hardware

Employing Expert Opinion and Software Metrics for Reasoning about Software.....	119
<i>Norita Ahmad and Phillip A. Laplante</i>	
Hybrid Trust Information Exchange for Federated Systems.....	125
<i>Zhengping Wu and Alfred C. Weaver</i>	
iKernel: Isolating Buggy and Malicious Device Drivers Using Hardware Virtualization Support	134
<i>Lin Tan, Ellick M. Chan, Reza Farivar, Nevedita Mallick, Jeffrey C. Carlyle, Francis M. David, and Roy H. Campbell</i>	

Session 7: Networks and Systems

On TCP Performance in Flow-Based Mix Networks.....	145
<i>Xinwen Fu, Shu Jiang, Wei Yu, Steve Graham, and Yong Guan</i>	
FileWall: A Firewall for Network File Systems	153
<i>Stephen Smaldone, Aniruddha Bohra, and Liviu Iftode</i>	
Secure Multipath Routing Scheme for Mobile Ad Hoc Network.....	163
<i>Binod Vaidya, JaeYoung Pyun, JongAn Park, and SeungJo Han</i>	

MBDD versus MMDD for Multistate Systems Analysis172
Akhilesh Shrestha, Liudong Xing, and Yuanshun Dai

Author Index181
