Innovative Architecture for Future Generation High-Performance Processors and Systems

IWIA 2007

Message from the Editors	vii
Committees	viii

Parallel and Distributed Systems

Some Initial Explorations into the Hierarchical Multi-core Chip Design Space for HPC Systems.....	3
<i>Peter M. Kogge</i>	
Impact of Predictive Switching in 2-D Torus Networks.....	11
<i>Tsutomu Yoshinaga, Hirokazu Murakami, and Michihiro Koibuchi</i>	
<i>Responsive Link</i> for Distributed Real-Time Processing.....	20
<i>Nobuyuki Yamasaki</i>	

Applications, Algorithms, and Compilers

Accelerating Brain Circuit Simulations of Object Recognition with CELL Processors.....	33
<i>Andrew Felch, Jayram Moorkanikara Nageswaran, Ashok Chandrashekar, Jeff Furlong, Nikil Dutt, Richard Granger, Alex Nicolau, and Alex Veidenbaum</i>	
Improving Search Speed on Pointer-Based Large Data Structures Using a Hierarchical Clustering Copying Algorithm	43
<i>Masahiro Yasugi and Taiichi Yuasa</i>	
Implementation and Evaluation of Parallel FFT Using SIMD Instructions on Multi-core Processors	53
<i>Daisuke Takahashi</i>	
Design Assists for Embedded Systems in the COINS Compiler Infrastructure	60
<i>Tan Watanabe, Tetsuro Fujise, Koichiro Mori, Kyoko Iwasawa, and Ikuo Nakata</i>	

Energy and Temperature-Aware Architectures

Cache Memory Architecture for Leakage Energy Reduction.....	73
<i>Kiyofumi Tanaka</i>	
Exploring Temperature-Aware Design of Memory Architectures in VLIW Systems.....	81
<i>José L. Ayala, Anya Apavatjirut, David Aienza, and Marisa López-Vallejo</i>	

Processor Design

A Reconfigurable Processor PARS and its Compiler	91
<i>Kazuya Tanigawa, Ryuji Hada, Tetsuo Hironaka, and Akira Kojima</i>	
An Embedded Processor: Is It Ready for High-Performance Computing?	101
<i>Fumio Arakawa</i>	
Outline of OROCHI: A Multiple Instruction Set Executable SMT Processor	110
<i>Hajime Shimada, Takashi Shimada, Takekazu Tabata, Toshiaki Kitamura, Tomoya Kojima, Yasuhiko Nakashima, and Kenji Kise</i>	
Author Index.....	118
