

2007 iREP Symposium- Bulk Power System Dynamics and Control - VII Revitalizing Operational Reliability

**Charleston, SC
19-24 August 2007**

Pages 1-328

IEEE Catalog Number:	CFP0708D-PRT
ISBN 10:	1-4244-1518-7
ISBN 13:	978-1-4244-1518-2

Table of Contents

Electricity Producer Offering Strategies in Day-ahead Energy Markets	1
<i>A. G. Bakirtzis, C. K. Simoglou, N. P. Ziogos, A. C. Tellidou, G. A. Bakirtzis</i>	
Transmission Line Distance Protection Using ANFIS and Positive Sequence Components	19
<i>Hassan Khorashadi-Zadeh, Zuyi Li</i>	
Coordinated Control of FACTS Devices in Power Systems for Security Enhancement	28
<i>Gabriela Hug-Glanzmann, Goran Andersson</i>	
Multichoice Control Strategy for VSC-HVdc	38
<i>H.F. Latorre, M. Ghandhari, L. Soder</i>	
Comparative Study Of The Symmetric And Asymmetric Approaches To Increase Power Transfer Capacity Of A Corridor	45
<i>R. Mohamedi, S. Lefebvre, A-O. Ba, A. Houle</i>	
Changes in the market situation and the need for efficient maintenance strategies	52
<i>Torben Dietermann, Gerd Balzer</i>	
On the assessment of the impact of a conventional HVDC on a test power system	58
<i>R. Eriksson, V. Knazkins, L. Soder</i>	
Dynamic Power Flow Controllers for Transmission Corridors	63
<i>Christian Rehtanz</i>	
Denosing Electrical Signal via Empirical Mode Decomposition	72
<i>Vivek Agarwal, Lefteri H. Tsoukalas</i>	
Optimal Energy Flow of Integrated Energy Systems with Hydrogen Economy Considerations	78
<i>A. Hajimiragha, C. Canizares, M. Fowler M. Geidl, G. Andersson</i>	
Voltage Security Constrained Reactive Power Planning Considering the Costs and Performance of VAR Devices	89
<i>Naoto Yorino, Mehdi Eghbal, E.E.El-Araby, Yoshifumi Zoka</i>	
E-SIME - A Method for Transient Stability Closed-Loop Emergency Control: Achievements and Prospects	100
<i>Mevludin Glavic, Damien Ernst, Daniel Ruiz-Vega, Louis Wehenkel, Mania Pavella</i>	
Steady-state Behavior of a System under Market Environment Near the Maximum Loading Limit	110
<i>K.C. Almeida</i>	
Optimal Scheduling of Generator Maintenance using Modified Discrete Particle Swarm Optimization	118
<i>Yusuf Yare, Ganesh K. Venayagamoorthy</i>	
System Integrity Protection Schemes (SIPS)	126
<i>Miroslav Begovic, Vahid Madani, Damir Novosel</i>	
Contribution of Loads to Low Frequency Oscillations in Power System Operation	132
<i>Chandrabhan Sharma, Parasnath Singh</i>	
Modal Analysis of Power Systems with Doubly Fed Induction Generators	140
<i>K. Elkington, V. Knazkins, M. Ghandhari</i>	
Insert Impact of Large-Scale Wind Power Generation on the Dynamic Behaviour of Interconnected Systems	148
<i>I. Erlich, F. Shewarega</i>	
The Economic Aspects of Operational Reliability in Electricity Markets	155
<i>Teoman Guler, George Gross, Rajesh Nelli</i>	
Opening a larger window on network flows to enhance the cross border capacity allocation in bulk interconnected systems	165
<i>C. Genesi, G. Granelli, P. Marannino, M. Montagna, F. Zanellini</i>	

Table of Contents

Risk Assessment Approach for Re-regulated Distribution Systems.....	174
<i>A. A. Chowdhury, D. O. Koval</i>	
Pondering Proper PAR Pricing	182
<i>Bernard C. Lesieutre, Fernando L. Alvarado</i>	
Globally Convergent State Estimation Based on Givens Rotations	189
<i>Antonio Simões Costa, Roberto Salgado, Paulo Haas</i>	
MISO Damping Controller Design for a TCSC using Particle Swarm.....	198
<i>Swakshar Ray, Ganesh K. Venayagamoorthy, Balarko Chaudhuri, Rajat Majumder</i>	
Application of an ANN Based Voltage Stability Assessment Tool to Restructured Power Systems	205
<i>Bhavik Suthar, R. Balasubramanian</i>	
Tracking Maximum Loadability Conditions in Power Systems.....	213
<i>C. D. Vournas, N. G. Sakellariadis</i>	
Optimized Fault Location	225
<i>Mladen Kezunovic, Ergun Akleman, Maja Knezev, Ozgur Gonen, Satish Natti</i>	
Impact of Wind Turbines on Power System Stability	232
<i>Feng Wu, Xiao-Ping Zhang, Ping Ju</i>	
Information Impact on the Risk Analysis of the Malicious Attack against Power System	239
<i>Ettore Bompard, Ciwei Gao, Roberto Napoli, Angela Russo, Marcelo Masera, Alberto Stefanini</i>	
Screening of Load Patterns and Transmission Planning Alternatives Using Decision Trees	247
<i>Srijib Mukherjee, Bartosz Wojszczyk</i>	
Evaluating the Impact of Plug-in Hybrid Electric Vehicles on Regional Electricity Supplies.....	251
<i>Stanton W. Hadley</i>	
Electric Power Control Center Visualization using Geographic Data Views.....	263
<i>Thomas J. Overbye, Esa M. Rantanen, Steve Judd</i>	
Reliability Implications of Increased Fault Currents and Breaker Failures.....	271
<i>Q. Binh Dam, A. P. Sakis Meliopoulos</i>	
Dynamic Voltage Stability Improvement Using Coordinated Control of Dynamic VAR-Sources	279
<i>Ghadir Radman, Alex Pama, Jeff Powell, David Gao</i>	
Tieline Controls in Microgrid Applications.....	285
<i>S. Bose, Y. Liu, K. Bahei-Eldin, J. de Bedout, M. Adamiak</i>	
The Effect of Improved System Modeling in the Continuation Power Flow Method.....	294
<i>E. López-Luis, M. A. García-Domínguez, D. Ruiz-Vega</i>	
Relay Margin Trajectory Based Identification of Transmission Vulnerability for Power System Security Assessment.....	304
<i>Hua Bai, Venkataramana Ajjarapu</i>	
DG and Protection Systems in Distribution Network: Failure Monitoring System based on Petri Nets.....	313
<i>V. Calderaro, V. Galdi, A. Piccolo, P. Siano</i>	
A Hybrid On-line Slow Voltage Control Scheme for Large Power Systems	320
<i>Jingdong Su, Vaithianathan Mani Venkatasubramanian</i>	
Real-Time Detection of Angle Instability using Synchrophasors and Action Principle	329
<i>Michael Sherwood, Dongchen Hu, Vaithianathan Mani Venkatasubramanian</i>	
Oscillation Monitoring System Based on Wide Area Synchrophasors in Power Systems	340
<i>Guoping Liu, Jaime Quintero, Vaithianathan Mani Venkatasubramanian</i>	
Complementary Limit Induced Bifurcation Theorem and Analysis of Q limits in Power-Flow Studies.....	353
<i>Xunning Yue, Vaithianathan Mani Venkatasubramanian</i>	

Table of Contents

Neural-Network-Based Intelligent Control for Improving Dynamic Performance of FACTS Devices	361
<i>Wei Qiao, Ronald G. Harley, Ganesh K. Venayagamoorthy</i>	
Making the Power Grid More Intelligent	370
<i>Salman Mohagheghi, Ronald G. Harley, Ganesh K. Venayagamoorthy</i>	
Stability Enhancement through Reinforcement Learning: Load Frequency Control Case Study	380
<i>Sara Eftekharnjad, Ali Feliachi</i>	
Secure Economic Dispatch Determination through Integrated Tools and Fuzzy Inference Systems	388
<i>Tatiana M. L. Assis, Glauco N. Taranto, Djalma M. Falcão</i>	
Towards Quantifying Cascading Blackout Risk	394
<i>Ian Dobson, Kevin R. Wierzbicki, Janghoon Kim, Hui Ren</i>	
Circuit of the Future: Interoperability and SCE's DER Program	406
<i>Stephanie L. Hamilton, Charles K. Vartanian, Michael E. Johnson Jr., Ali Feliachi, Karl Schoder, Paul Hines</i>	
Impact of Recent Blackout: Return of Experience of Experience on Utility Operational IT Infrastructures	415
<i>Damien THOLOMIER, Laurent SCHMITT, Jay GIRI</i>	
Interregional Long Range Adequacy Overview	420
<i>Philip A. Fedora</i>	
Modified Algorithm to Trace Critical Eigenvalues of Power System with Sensitivities via Continuation of Invariant Subspaces	429
<i>Cheng Luo, Venkataramana Ajarapu</i>	
Advantages in Modern Communications as applied to Remedial Action Schemes and Control Centers	438
<i>V. Madani, W. Higinbotham</i>	
Advanced Distance Protection Applications for Dynamic Loading and Out-Of- Step Conditions	450
<i>Damien THOLOMIER, Simon RICHARDS, Alexander APOSTOLOV</i>	
CALIBRATION AND TESTING OF TESLA PHASOR MEASUREMENT UNIT (PMU) USING DOBLE F6150 TEST INSTRUMENT	458
<i>Krish Narendra, Zhiying Zhang, John Lane, Bill Lacke, Ed Khan</i>	
Lessons from the 2006 Illinois Electricity Auction	471
<i>Matias Negrete-Pincetic, George Gross</i>	
On an SVC Backstepping Damping Nonlinear Controller Design for Power Systems	479
<i>Ali Karimi, Ali Feliachi, Muhammad A. Choudhry</i>	
Dynamics of a Microgrid Supplied by Solid Oxide Fuel Cells	487
<i>Eric M. Fleming, Ian A. Hiskens</i>	
Identification of Critical Cutsets for Static Collapse Analysis	497
<i>Brian C. Raczkowski, Peter W. Sauer</i>	
PhasorNet A High Performance Network Communications Architecture for Synchrophasor Data Transfer in Wide Area Monitoring, Protection and Control Applications	505
<i>Fahid K A, Prasanth Gopalakrishnan, Sushil Cherian</i>	
Electrical Load Modeling with Considering Distribution Netwo	509
<i>Qian Chen, Ping Ju, Zheng-Yan Shao, Feng Wu</i>	
Characteristic Ellipsoid Method for Monitoring Power System Dynamic Behavior Using Phasor Measurements	515
<i>Yuri Makarov, Carl Miller, Tony Nguen, Jian Ma</i>	
Contingency Assessment for Voltage Dip and Short Term Voltage Stability Analysis	520
<i>Ashutosh Tiwari, V. Ajarapu</i>	

Table of Contents

A Fault Current Limiter Based on an LC Resonant Circuit: Design, Scale Model and Prototype Field Tests	528
<i>Hector G. Sarmiento</i>	
Cascading Failures in Electric Power Systems: What about prices?	533
<i>David Watts, Hui Ren</i>	
Satellite Based Communication Network for Large Scale Power System Applications	543
<i>Vahid Madani, Alfredo Vaccaro, Domenico Villacci, Roger L. King</i>	
The Power Angle and Phase Measurement Units Based Wide Area Measurement System and Its Application	550
<i>Yu-Qing JIN, Chuan QIN, Feng WU, Jing-Dong HAN, Qun XU, Deng-Jun YAN, Ping JU</i>	
Distributed State Estimation Based on the SuperCalibrator Concept - Laboratory Implementation	557
<i>Salman Mohagheghi, Ramiz H. Alaileh, George Cokkinides, A.P. Sakis Meliopoulos</i>	
The Role of Numerical Tools in Maintaining Reliability During Economic Transfers An Illustration Using the NPCC Equivalent System Model	566
<i>Marija D. Ilic, Jeffrey H. Lang, Eric H. Allen</i>	
Experiment and Simulation of Dynamic Voltage Regulation with Multiple Distributed Energy Resources	579
<i>Yan Xu, Fangxing Li, John D. Kueck, D. Tom Rizy</i>	
Experiment and Simulation of Dynamic Voltage Regulation with Multiple Distributed Energy Resources	586
<i>Yan Xu, Fangxing Li, John D. Kueck, D. Tom Rizy</i>	
Multiple Purpose Micro Hydro Electric Power Station	593
<i>Dan Basarab Guzun, Mircea Dimitrie Cazacu, Nicolae Nistor, Razvan Guzun</i>	
MODELLING OF THE HUMAN FACTOR USING PETRI NETS	601
<i>L. Bedreaga, B. D. Guzun, C. Constantinescu</i>	
Insert Impact of Large-Scale Wind Power Generation on the Dynamic Behaviour of Interconnected Systems	609
<i>I. Erlich, F. Shewarega</i>	
Bulk Power System Reliability Assessment Considering Protection System Hidden Failures	616
<i>Fang Yang, A. P. Sakis Meliopoulos, George J. Cokkinides, Q. Binh Dam</i>	
Voltage Instability - The Different Shapes of the Nose	624
<i>Sandro Corsi, Glauco N. Taranto</i>	
Voltage-Load Dynamics: Modeling and Control	640
<i>George K. Stefopoulos, A. P. Sakis Meliopoulos, George J. Cokkinides</i>
