Table of Contents

Organizers vi

Technical Program Committee vii

Session 1: Applications of Behavioral Modeling

System Design Oriented RF Block Modeling : When Top-Down Reaches Bottom-Up **1**
William Tatinian, Benjamin Nicolle and Gilles Jacquemod (LEAT/UMR CNRS-UNSA, Mentor Graphics)

Tracing SRAM Separatrix for Dynamic Noise Margin Analysis under Device Mismatch **6**
Garng Huang, Wei Dong, Yenpo Ho and Peng Li (Texas A&M)

Modeling Heterogeneous Systems Using SystemC-AMS Case Study: A Wireless Sensor Network Node **11**
Michel Vasilevski, Francois Pecheux, Hassan Aboushady, Laurent de Lamarre (U. Paris VI Pierre et Marie Curie)

An Efficient Bottom-Up Extraction Approach to Build the Behavioral Model of Switched-Capacitor Δ - Σ Modulator **17**
Wei-Hsiang Cheng, Chin-Cheng Kuo, Po-Jen Chen, Yi-Min Wang, Chien-Nan Jimmy Liu (National Central U. Taiwan)

Architecture-Level Behavioral Thermal Modeling for Quad-Core Microprocessors **22**
Duo Li, Sheldon Tan, Murlu Tirumala (UC Riverside, Intel)

Automatic Mixed-Signal Design Verification Instrumentation with Observation Specification Language **28**
Jonathan David (Scintera Networks)

Session 2: Behavioral Modeling Tools

High-Performance Model Compilation for Complex Behavioral Models **34**
Daniel Platte, Christoph Knoth, Ralf Sommer, Erich Barke (Qimonda, Infineon Technologies, TU Ilmenau, Leibnitz U.)

Certify - A Characterization and Validation Tool for Behavioral Models **40**
Weifeng Li, Omair Abbasi, Naveed Hingora, Yongfeng Feng, Alan Mantooth (U. Arkansas)

Event Driven Analog Modeling of RF Frontends <i>Stefan Joeres, Hans-Werner Groh, Stefan Heinen (RWTH Aachen, Atmel)</i>	46
RF Library based on Block Diagram and Behavioral Descriptions <i>Benjamin Nicolle, William Tatinian, Gilles Jacquemod, Jean-José Mayol, Jean Oudinot (Mentor Graphics, LEAT/UMR CNRS-UNSA)</i>	52
Circuit Reliability Simulation based on Verilog-A <i>Marq Kole (NXP Semiconductors)</i>	58
Statistical Eye Analysis Algorithm in VHDL-AMS <i>Arpad Muranyi (Mentor Graphics)</i>	64

Session 3: Poster and Vendor Exhibits

A Mixed-Mode Behavioral Model for a Controller-Area-Network Bus Transceiver: A Case Study <i>William Prodanov, Maurizio Valle, Roman Buzas, Hubert Pierscinski (U. Genoa, AMIS Semiconductor)</i>	67
Efficient Modeling of Single Event Transients Directly in Compact Device Models <i>Matt Francis, Marek Turowski, Jim Holmes, Alan Mantooth (U. Arkansas, CFD Research, Lynguent)</i>	73
A Mathematica-Based Approach to Designing Receiver and Transmitter Gain Tables <i>Jesse Chen (Qualcomm)</i>	78
Behavioral Modeling of a Charge Pump Voltage Converter for SoC Functional Verification Purposes <i>Dalia El-Ebiary, Mohamed Dessouky, Hassan El-Ghitani (Mentor Graphics, Misr Intl. U.)</i>	84
Modeling and Analysis of Biological Cells in DRAM Implementation <i>Jeffrey Fan, Guofen Yu, Jichang Tan, Sheldon Tan (Florida Intl. U., U. Findlay, St. John's U. Taiwan, UC Riverside)</i>	90
Simul'Elec, a Delphi Written Simulator for Power Electrical Engineering, Using VHDL-AMS Modeling <i>Fabien Legrand, Maria Azurmendi, Fernando Martin, Luis Fontán, Jean-Jacques Charlot, Nadine Couture (Algo'Tech Informatique, CEIT, TECNUN, Electronic Software, LIPSI-ESTIA)</i>	94

Session 4: Behavioral Models - Part 1

Behavioral Models of Frequency Pulling in Oscillators <i>Mohammad Heidari and Asad Abidi (UCLA)</i>	100
A Generic VHDL-AMS Behavioral Model Physically Accounting For Typical Analog Non-Linear Output Behavior <i>Kamal Sabet and Tamer Riad (Mentor Graphics)</i>	105
An Accurate PLL Behavioral Model for Fast Monte Carlo Analysis under Process Variation <i>Chin-Cheng Kuo, Meng-Jung Lee, I-Ching Tsai, Chien-Nan Liu, Ching-Ji Huang (National Central U. Taiwan, Industrial Technology RI Taiwan)</i>	110
AMS Modeling of Controlled Switch for Design Optimization of Capacitive Vibration Energy Harvester <i>Dimitri Galayko, Rodrigo Pizarro, Philippe Basset, Ayaz Paracha, Gilles Amendola (LIP6, ESYCOM-ESIEE)</i>	115
An Integrated Approach to Energy Harvester Modeling and Performance Optimization <i>Leran Wang, Tom Kazmierski, Bashir Al-Hashimi, Steve Beeby, Russel Torah (U. Southampton)</i>	121
Multilevel Modeling of Integrated Power Harvesting System using VHDL-AMS and SPICE <i>Hela Boussetta, Marcin Marzencki, Yasser Ammar, Skandar Basrour (MNS-TIMA)</i>	126

Session 5: Behavioral Models - Part 2

Macro-modeling of Liquid Crystal Cell with Verilog-A <i>Makoto Watanabe, Keiichiro Ishihara, Takeyuki Tsuruma, Yasuhiko Iguchi, Yoshiharu Nakajima, Yasuhito Maki (Sony)</i>	132
A Unified Electrical SPICE Model for Piezoelectric Transducers <i>Jean-Marc Galliere, Philippe Papet, Laurent Latorre (U. Montpellier 2)</i>	138
An Efficient and Accurate MEMS Accelerometer Model with Sense Finger Dynamics for Applications in Mixed-Technology Control Loops <i>Chenxu Zhao, Leran Wang, Tom Kazmierski (U. Southampton)</i>	143
Worst-Case Modeling and Simulation of an Automotive Throttle in VHDL-AMS <i>Anton Pirker-Frühauf, Karsten Schönherr, Arnaud Laroche, Georg Pelz (KAI-Kompetenzzentrum, Robert Bosch, Infineon Technologies)</i>	148
Behavioral Simulation of Biological Neuron Systems using VHDL and VHDL-AMS <i>Julian Bailey, Peter Wilson, Andrew Brown, John Chad (U. Southampton)</i>	153
Phase Change Memory Modeling Using Verilog-A <i>Yi-Bo Liao, Yan-Kai Chen, Meng-Hsueh Chiang (National Ilan U. Taiwan)</i>	159
