

Conference Record of

The Forty-First
Asilomar Conference on
Signals, Systems & Computers

November 4–7, 2007

Pacific Grove, California

In Cooperation With

The Naval Postgraduate School, Monterey, California
ATK Mission Research, Monterey, California

And Technical Co-Sponsor

The IEEE Signal Processing Society

Table of Contents

Student Paper Contest	xxvi
Foreword	xxvii

Session: MA1b - Signal Separation

Session Chair: Chong-Yung Chi - National Tsing Hua University, Taiwan

Non-cancellation Multistage Kurtosis Maximization with Prewhitening for Blind Source Separation	3
<i>Xiang Chen, Tsinghua University; Chong-Yung Chi, Chon-Wa Wong, National Tsing Hua University; Shidong Zhou, Yan Yao, Tsinghua University</i>	
Separating composite signals in multi-probe dynamic biomedical imaging	9
<i>Li Chen, Yue Wang, Virginia Tech; Chong-Yung Chi, National Tsing Hua University; Zsolt Szabo, Johns Hopkins University; Peter L. Choyke, National Institutes of Health</i>	
Blind Separation and Equalization Using Novel Hill-Climbing Optimization	13
<i>Dongxin Xu, Infoture Inc.; Hsiao-Chun Wu, Louisiana State University; Chong-Yung Chi, National Tsing Hua University</i>	
An Improved L1-Norm Algorithm for Underdetermined Blind Source Separation Using Sparse Representation	17
<i>Shuzhong Bai, Ju Liu, Shandong University; Chong-Yung Chi, National Tsing Hua University</i>	
Variable Tap Length Convolutional Blind Source Separation	22
<i>Clive Cheong Took, Saeid Sanei, Cardiff University</i>	

Session: MA2b - Genomic Signal Processing

Session Chairs: P.P. Vaidyanathan and Byung-Jun Yoon

Robust Intervention in Probabilistic Boolean Networks	29
<i>Ranadip Pal, Texas Tech University; Aniruddha Datta, Edward Dougherty, Texas A&M University</i>	
Probabilistic Methods for Improving Efficiency of RNA Secondary Structure Prediction Across Multiple Sequences	34
<i>Gaurav Sharma, A. Ozgun Harmanci, David Mathews, University of Rochester</i>	
Framework for The Identification of Common variations in Multiple DNA copy number Samples	39
<i>Abdullah Alqallaf, Ahmed Tewfik, University of Minnesota</i>	
Fast Structural Similarity Search of Noncoding RNAs Based on Matched Filtering of Stem Patterns	44
<i>Byung-Jun Yoon, P. P. Vaidyanathan, California Institute of Technology</i>	
A deterministic method for haplotype inference	49
<i>Kuo-ching Liang, Xiaodong Wang, Columbia University</i>	

Session: MA3b - Analysis of Large Scale Communication Systems

Session Chair: Ralf R. Müller - Norwegian University of Science and Technology (NTNU)

Asymptotic Capacity of Orthogonal Multi-Level Amplify-and-Forward Relay Networks	57
<i>Shu-Ping Yeh, Stanford University; Olivier Leveque, Ecole Polytechnique Federale de Lausanne; John Cioffi, Stanford University</i>	
Asymptotic Spectral Efficiency Analysis of the DS/CDMA Amplify and Forward Relay Channel	62
<i>David Gregoratti, Xavier Mestre, CTTC</i>	
On the capacity of asynchronous CDMA systems	67
<i>Laura Cottatellucci, Institute Eurecom; Ralf Müller, Norwegian University of Science and Technology (NTNU); Mérouane Debbah, Supelec</i>	
Free Deconvolution for MIMO Capacity Estimation	72
<i>Øyvind Ryan, University of Oslo; Mérouane Debbah, Supelec</i>	
Second-order statistics of large isometric matrices and applications to MMSE SIR	77
<i>Aris Moustakas, University of Athens; Mérouane Debbah, Supelec</i>	

Session: MA4b - Challenges and Opportunities in MIMO Communication

Session Chair: Angel Lozano - Bell Labs

Network MIMO: Overcoming Inter-cell Interference in Indoor Wireless Systems	83
<i>Sivarama Venkatesan, Angel Lozano, Reinaldo Valenzuela, Bell Labs (Alcatel-Lucent)</i>	
Decision Feedback Based Transceiver Optimization for MIMO Intersymbol Interference Channels.....	88
<i>Yi Jiang, NextWave Broadband; Mahesh Varanasi, University of Colorado, Boulder; Daniel Palomar, Hong Kong University of Science and Technology</i>	
Capacity Scaling of Multi-User MIMO with Limited Feedback in a Multi-Cell Environment	93
<i>Lars Thiele, Fraunhofer Institute for Telecommunications - Heinrich-Hertz-Institut; Malte Schellmann, Technical University of Berlin; Wolfgang Zirwas, Nokia Siemens Networks GmbH & Co. KG; Volker Jungnickel, Fraunhofer Institute for Telecommunications - Heinrich-Hertz-Institut</i>	
Impact of CSI on Distributed Space-Time Coding in Wireless Relay Networks.....	101
<i>Mari Kobayashi, Xavier Mestre, Centre Tecnològic de Telecomunicacions de Catalunya</i>	
MIMO Precoding and Power Control based on 1-bit Feedback.....	106
<i>Filippo Zuccardi Merli, University of Modena and Reggio Emilia; Xiaodong Wang, Columbia University; Giorgio Vitetta, University of Modena and Reggio Emilia</i>	

Session: MA5b - Integrated Algorithm and Architecture Implementation

Session Chair: Brian Evans - University of Texas at Austin

Jointly Optimized Software Radios for Low Power 4G Cellular Systems	113
<i>Brian Kelley, University of Texas at San Antonio</i>	
Digital Video Broadcast Transceiver Deployment to Xilinx FPGAs using LabVIEW.....	118
<i>John Ammerman, Newton Petersen, Hugo A. Andrade, National Instruments Corporation; Adnan Aziz, University of Texas at Austin</i>	
Real-Time MIMO Discrete Multitone Transceiver Testbed	126
<i>Alex Olson, Aditya Chopra, Yousof Mortazavi, Ian Wong, Brian Evans, University of Texas at Austin</i>	

Session: MA6b - Adhoc Network Capacity

Session Chairs: Jeff Andrews - University of Texas at Austin and Martin Haenggi - University of Notre Dame

Degrees of Freedom of Wireless Networks - What a difference delay makes	133
<i>Viveck Cadambe, University of California Irvine; Syed Jafar, University of California, Irvine</i>	
Capacity of wide-band MIMO channels via space-time diversity of scattered fields	138
<i>Anna Martini, University of Trento; Massimo Franceschetti, University of California, San Diego; Andrea Massa, University of Trento</i>	
Dynamic Connectivity and Packet Propagation Delay in ALOHA Wireless Networks	143
<i>Radha Krishna Ganti, Martin Haenggi, University of Notre Dame</i>	
Energy-Limited vs. Interference-Limited Ad Hoc Network Capacity	148
<i>Nihar Jindal, University of Minnesota; Jeffrey Andrews, University of Texas at Austin; Steven Weber, Drexel University</i>	

Session: MA7b - Genomic Data Processing

Session Chair: Xiaodong Wang - Columbia University

Connecting Seed Lists of Mammalian Proteins Using Steiner Trees	155
<i>Amelia White, Rutgers, The State University of New Jersey; Avi Ma'ayan, Mount Sinai School of Medicine</i>	
Processing single-cell single-molecule genomic information: New methods for new data	160
<i>Michael Samoilov, Adam Arkin, University of California at Berkeley / Lawrence Berkeley National Laboratory</i>	
Bits and Bases: An analysis of Genetic Information Paradigms	165
<i>Elebeoba May, Sandia National Laboratories</i>	
Signal processing for real-time DNA microarrays	170
<i>Haris Vikalo, University of Texas at Austin; Babak Hassibi, California Institute of Technology; Arjang Hassibi, University of Texas at Austin</i>	

Session: MP1 - MIMO Radars

Session Chairs: Jian Li - University of Florida, USA and Petre Stoica - Uppsala University, Sweden

Parameter Estimation and Number Detection of MIMO Radar Targets	177
<i>Luzhou Xu, University of Florida; Petre Stoica, Uppsala University; Jian Li, University of Florida</i>	
Signal Covariance Matrix Optimization for Transmit Beamforming in MIMO Radars	182
<i>Tuomas Aittomäki, Visa Koivunen, Helsinki University of Technology</i>	
On Data-Adaptive Waveform Design for MIMO Radar	187
<i>Benjamin Friedlander, University of California, Santa Cruz</i>	
MIMO Radar Ambiguity Optimization Using Frequency-Hopping Waveforms.....	192
<i>Chun-Yang Chen, P. P. Vaidyanathan, California Institute of Technology</i>	
Coverage in radar networks	197
<i>Pier Francesco Sannmartino, Christopher Baker, University College London; Muralidhar Rangaswamy, Air Force Research Laboratory Sensors Directorate</i>	
Slow-Time MIMO STAP with Improved Power Efficiency	202
<i>Vito Mecca, Jeffrey Krolik, Duke University</i>	
MIMO Radar: Joint Array And Waveform Optimization	207
<i>Daniel Bliss, Keith Forsythe, MIT Lincoln Laboratory</i>	

Session: MP2a - Registration in Biomedical Imaging

Session Chair: Gustavo Rohde

Multiframe Registration of Aliased X-Ray Images	215
<i>Dirk Robinson, Ricoh Innovations; Sina Farsiu, Joseph Y. Lo, Duke University; Peyman Milanfar, University of California, Santa Cruz; Cynthia Toth, Duke University</i>	
Sampling and Reconstruction for Biomedical Image Registration.....	220
<i>Gustavo Rohde, Carnegie Mellon University; Dennis Healy Jr., University of Maryland; Akram Aldroubi, Vanderbilt University</i>	
Locating Brain Tumor from MR Imagery Using Symmetry	224
<i>Nilanjan Ray, Baidya Saha, Matthew Brown, University of Alberta</i>	

Session: MP2b - Image and Video Coding I

Session Chair: Koohyar Minoo - UCSD

Inter-layer motion vector interpolation for low-complexity and very low bitrate scalable video	231
coding <i>Min Li, University of California, San Diego; Preethi Chandrasekhar, Gokce Dane, Qualcomm Inc; Truong Nguyen, University of California, San Diego</i>	
Rate Estimation, Using Forward Adaptive Quantization: H.264 Fast Intra Mode Selection at High	235
Data Rates <i>Koohyar Minoo, Truong Nguyen, University of California, San Diego</i>	
An Adaptive Block Size Phase Correlation Motion Estimation Using Smart Multireference Frames	239
Selection in Frequency Domain <i>Yasser Ismail, Mohamed Elgamel, The Center for Advanced Computer Studies (CACs); Jose TecpanecatI-Xihuitl, The Center for Advanced Computer Studies; Magdy Bayoumi, The Center for Advanced Computer Studies (CACs)</i>	
Multiple Description Image Coding Based on Multi-Stage Vector Quantization.....	243
<i>Tomas Andersson, Mikael Skoglund, Royal Institute of Technology (KTH)</i>	

Session: MP3 - Cross-Layer Optimization in Wireless Resource Allocation

Session Chair: Randall Berry - Northwestern University, USA

Towards Throughput and Delay Optimal Routing for Wireless Ad-Hoc Networks	249
<i>Parul Gupta, Tara Javidi, University of California, San Diego</i>	
Spectrum Allocation, Power Control, Routing, and Congestion Control for Wireless Networks	255
with Duplexing Constraints <i>Yufang Xi, Edmund Yeh, Yale University</i>	
Channel Aware Distributed Scheduling for Ad-Hoc Communications with Capture.....	260
<i>Weiyang Ge, Junshan Zhang, Arizona State University; Jeffrey E. Wieselthier, Naval Research Laboratory</i>	

Joint Scheduling and Resource Allocation in Uplink OFDM Systems	265
<i>Jianwei Huang, Chinese University of Hong Kong; Vijay Subramanian, Hamilton Institute; Randall Berry, Northwestern University; Rajeev Agrawal, Motorola</i>	
Cross Layer Optimized Iterative ARQ Receivers for OFDM with Carrier Frequency Offset	270
<i>Thomas Ketseoglou, California State Polytechnic University, Pomona</i>	
Fairness vs. Efficiency: Comparison of Game Theoretic Criteria for OFDMA Scheduling.....	275
<i>Andreas Ibing, Fraunhofer Institute for Telecommunications - Heinrich-Hertz-Institut; Holger Boche, Technical University of Berlin / Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institut; Fraunhofer German-Sino Lab for Mobile Communications</i>	
Persistent Resource Allocation in OFDMA Networks for Real-Time and Non-Real Time Traffic	280
<i>Vinay Majjigi, Rajiv Agarwal, Stanford University; Rath Vannithamby, Intel Corporation; John Cioffi, Stanford University</i>	

Session: MP4 - Multi-User MIMO Communications I

Session Chair: Nihar Jindal - University of Minnesota

On the Required Accuracy of Transmitter Channel State Information in Multiple Antenna	287
Broadcast Channels	
<i>Giuseppe Caire, University of Southern California; Nihar Jindal, University of Minnesota; Shlomo Shamai (Shitz), Technion</i>	
Throughput Scaling of Uplink SDMA with Limited Feedback.....	292
<i>Kaibin Huang, Jeffrey Andrews, Robert Heath, University of Texas at Austin</i>	
Rank-Independent Codebook Design from a Quaternary Alphabet	297
<i>Bishwarup Mondal, Motorola; Timothy Thomas, Motorola Labs; Mark Harrison, Wavetrix</i>	
Antenna Combining and Codebook Design for the MIMO Broadcast Channel with Limited	302
Feedback	
<i>Matteo Trivellato, University of Padova; Howard Huang, Federico Boccardi, Alcatel-Lucent</i>	
On optimization of multiuser systems using interference calculus	309
<i>Gerhard Wunder, Thomas Michel, Heinrich-Hertz-Institut Berlin</i>	
Jointly Optimized Downlink Multiuser MIMO OFDM Precoding System	314
<i>Kyeong Jin Kim, Nokia Inc.; Jianzhong Zhang, Samsung Telecom America</i>	
Efficient MSE Balancing for the Multi-User MIMO Downlink	319
<i>Raphael Hunger, Michael Joham, Wolfgang Utschick, Technische Universitaet Muenchen</i>	
Robust MAC MIMO Transceiver Design with Partial CSIT and CSIR.....	324
<i>Xi Zhang, Royal Institute of Technology (KTH); Daniel Palomar, Hong Kong University of Science and Technology; Björn Ottersten, Royal Institute of Technology (KTH)</i>	

Session: MP5 - Computer Arithmetic

Session Chair: Milos Ercegovac - UCLA

Floating-Point Fused Multiply-Add Architectures	331
<i>Eric Quinell, AMD; Earl Swartzlander, University of Texas at Austin; Carl Lemonds, AMD</i>	
On Digit-by-Digit Methods for Computing Certain Functions	338
<i>Milos D. Ercegovac, University of California, Los Angeles</i>	
Computing Integer Powers in Floating-Point Arithmetic.....	343
<i>Peter Kornerup, Southern Danish University; Vincent Lefevre, Jean-Michel Muller, ENS Lyon</i>	
Performance Impact of Using Denormalized Numbers in Basic Floating-point Operations	348
<i>Alexandre Tenca, Kyung-Nam Han, David Tran, Synopsys, Inc.</i>	
A Binary Integer Decimal-based Multiplier for Decimal Floating Point Arithmetic.....	353
<i>Sonia Gonzalez Navarro, University of Malaga; Charles Tsen, Michael Schulte, University of Wisconsin</i>	
A Residue Approach of the Finite Fields Arithmetics.....	358
<i>Jean-Claude Bajard, Arith - LIRMM Univ. Montpellier 2 CNRS</i>	
Retiming the ARM VFP-11 Divide and Square Root Architecture	363
<i>Neil Burgess, Icera Inc.</i>	

Session: MP6 - System Theory for Sensor Networks

Session Chair: Michael Gastpar - University of California, Berkeley

Sampling and Reconstruction of Polyhedra Observed in Noise.....	369
<i>Mingbo Zhao, Sergio Servetto, Cornell University</i>	
Separation Theorems and Partial Orderings for Sensor Network Problems.....	374
<i>Michael Gastpar, University of California, Berkeley</i>	
The Nose of a Bloodhound: Target Chasing Aided by a Static Sensor Network.....	376
<i>Oliver Kosut, Lang Tong, Cornell University</i>	
Decentralized Detection with Correlated Observations.....	381
<i>Jayakrishnan Unnikrishnan, Venugopal Veeravalli, University of Illinois at Urbana-Champaign</i>	
Consensus-Based Distributed Recursive Least-Squares Estimation using Ad Hoc Wireless Sensor Networks.....	386
<i>Ioannis Schizas, Gonzalo Mateos, Georgios Giannakis, University of Minnesota</i>	
Diffuse Field Estimation with Asynchronous Sensor Networks.....	391
<i>Sriram Narayanan, Douglas L. Jones, University of Illinois at Urbana-Champaign</i>	
Recent Progress on a 60-GHz Imaging Sensor Network.....	396
<i>Munkyo Seo, Bharath Ananthasubramaniam, Upamanyu Madhow, Mark J. W. Rodwell, University of California, Santa Barbara</i>	

Session: MP7 - Adaptive Signal Processing Using Higher-Order Arrays

Session Chair: Martin Haardt - Ilmenau University of Technology, Germany

Blind Receivers based on Tensor Decompositions. Application in DS-CDMA and over-sampled systems.....	403
<i>Dimitri Nion, Lieven De Lathauwer, ETIS CNRS UMR 8051</i>	
Canonical Decomposition of scalp EEG in epileptic seizure localisation.....	408
<i>Maarten De Vos, Katholieke Universiteit Leuven; Lieven De Lathauwer, CNRS-ENSEA-ETIS; Sabine Van Huffel, Wim Van Paesschen, Katholieke Universiteit Leuven</i>	
Enhanced Model Order Estimation Using Higher-Order Arrays.....	412
<i>Joao Paulo C. L. da Costa, Martin Haardt, Florian Roemer, Giovanni Del Galdo, Ilmenau University of Technology</i>	
Joint Diagonalization of Third Order Complex Symmetric Tensors and Application to Blind Separation of Non-Circular Sources.....	417
<i>Eric Moreau, LSEET, University of Toulon</i>	
Set-Theoretic Reduced-Rank Adaptive Filtering by Adaptive Projected Subgradient Method.....	422
<i>Masahiro Yukawa, RIKEN; Rodrigo de Lamare, University of York; Isao Yamada, Tokyo Institute of Technology</i>	
Efficient Algorithms for Computing the Capon and APES Filters.....	427
<i>Erik Gudmundson, Uppsala University; Andreas Jakobsson, Karlstad University</i>	
Fast RLS algorithm using dichotomous coordinate descent iterations.....	431
<i>Yuriy V. Zakharov, University of York; George White, QinetiQ; Jie Liu, University of York</i>	
The Multitaper Method for Accurate Spectrum Sensing in Cognitive Radio Environments.....	436
<i>Simon Haykin, McMaster University</i>	

Session: MP8a1 - Cooperative Communications

Session Chair: Rick Brown - WPI

Auction-Theoretic Partner Selection in Cooperative Diversity Wireless Networks.....	443
<i>Amitav Mukherjee, Hyuck Kwon, Wichita State University</i>	
Multi-Cell Cooperative Transmission.....	448
<i>Younsun Kim, Hui Liu, University of Washington</i>	
Joint Beamforming and Power Control for MIMO Relay Broadcast Channel with QoS Constraints.....	453
<i>Rui Zhang, Chin Choy Chai, Ying Chang Liang, Institute for Infocomm Research</i>	
Dynamic Resource Allocation For The Broadband Relay Channel.....	458
<i>Kagan Bakanoglu, Polytechnic University; Deniz Gunduz, Princeton University; Elza Erkip, Polytechnic University</i>	

Session: MP8a2 - Precoding for MIMO

Session Chair: Youjian (Eugene) Liu - University of Colorado

Pre-Coding for Rapidly Time Varying MIMO Communication Channels	465
<i>Meriam Rezk, Benjamin Friedlander, University of California, Santa Cruz</i>	
Space-Time Spreading MIMO System Using Canonical Precoding Tensor Model	470
<i>André de Almeida, Gérard Favier, Carlos Fernandes, I3S Laboratory; João Cesar Mota, Wireless Telecom Research Group (GTEL)</i>	
Precoder Design for V-BLAST Schemes Based on Pre-Whitening Detector	475
<i>Linyang Song, Are Hjørungnes, Pradeepa Yahampath, Manav R. Bhatnagar, University of Oslo</i>	
Precoding of Differential OSTBC in Arbitrarily Correlated MIMO Channels	479
<i>Manav R. Bhatnagar, Are Hjørungnes, Linyang Song, University of Oslo</i>	

Session: MP8a3 - Image and Video Coding and Processing

Session Chair: Jerry Gibson - UCSB

Automatic region of interest determination in music videos	485
<i>Wonjun Kim, Changick Kim, Information and Communications University</i>	
Ground Color Customization of Soccer Videos	490
<i>Ilkoo Ahn, Changick Kim, Information and Communications University</i>	
Adaptive thresholding for motion detection in a CMOS image sensor	495
<i>Arnaud Verdant, CEA; Antoine Dupret, Hervé Mathias, Université Paris Sud 11; Patrick Villard, CEA</i>	
Statistical modeling and ML parameter estimation of complex SAR imagery	500
<i>Michael Davis, General Dynamics - Advanced Information Systems; Patrick Bidigare, BBN Technologies; Daniel Chang, General Dynamics</i>	
Improving Robustness of Image Quality Measurement with Degradation Classification and	503
Machine Learning	
<i>Tiago H. Falk, Yingchun Guo, Wai-Yip (Geoffrey) Chan, Queen's University</i>	
Fast implementation of a l_1 -penalized sparse representations algorithm: Applications in	508
image denoising and coding.	
<i>Jean Jacques Fuchs, IRISA / Univ. de Rennes 1; Christine Guillemot, IRISA / INRIA</i>	
Denoising Noisy Images with Noise.....	513
<i>Hao Chen, Pramod Varshney, Syracuse University; James Michels, JHM Technologies LLC</i>	
A Comparison of Some State of the Art Image Denoising Methods.....	518
<i>Hae Jong Seo, Priyam Chatterjee, Hiroyuki Takeda, Peyman Milanfar, University of California, Santa Cruz</i>	

Session: MP8a4 - Topics in Speech, Image, and Signal Processing and Coding

Session Chair: Jerry Gibson - UCSB

Perceptual Pre-weighting and Post-inverse weighting for Speech Coding	525
<i>Niranjan Shetty, Jerry Gibson, University of California, Santa Barbara</i>	
Tree Partitioning Compression of Piecewise Polynomial Functions.....	530
<i>Arian Maleki, Morteza Shahram, Stanford University</i>	
Flexible Quantization of Audio and Speech Based on the Autoregressive Model.....	535
<i>Alexey Ozerov, W. Bastiaan Kleijn, Royal Institute of Technology (KTH)</i>	
Wiener filter for isotropic signal fields.....	540
<i>Raman Arora, University of Wisconsin-Madison; Harish Parthasarathy, Netaji Subhas Institute of Technology</i>	
Rate-adaptive turbo-syndrome scheme for Slepian-Wolf Coding.....	545
<i>Aline Roumy, Khaled Lajnef, Christine Guillemot, IRISA-INRIA</i>	
The Cyclic Matching Pursuit and Its Application to Audio Modeling and Coding	550
<i>Mads Christensen, Søren Holdt Jensen, Aalborg University</i>	
Constrained Monotone Regression and Outlier Detection for Searching Occlusion Objects	555
<i>Dong Sik Kim, Hankuk University of Foreign Studies; Kiryung Lee, University of Illinois at Urbana-Champaign</i>	
Optimal Bit Layering for Scalable Audio Compression Using Objective Audio Quality Metrics	560
<i>Srivatsan Kandadai, Charles Creusere, New Mexico State University</i>	
Feature Frame Watermarking	565
<i>Hedley Morris, Imad Muhi El-Ddin, Claremont Graduate University</i>	

Session: MP8b1 - Statistical Signal Processing**Session Chair: Andreas Jakobsson - Karlstad University, Sweden**

Low-Complexity Carrier Frequency Offset Estimation For Frequency-Selective Channels	573
<i>Jeffrey D. Klein, ATK Mission Research</i>	
Correlation coefficients for complex random vectors	577
<i>Peter J. Schreier, University of Newcastle</i>	
Stochastic Incremental Gradient Descent for Estimation in Sensor Networks.....	582
<i>Sundhar Ram S, Angelia Nedich, Venugopal Veeravalli, University of Illinois at Urbana-Champaign</i>	
Estimating the mode of a phase distribution.....	587
<i>Barry Quinn, Macquarie University</i>	
An Efficient Dimensional Reduction of the Blocking Matrix for the Multistage Wiener Filter	592
<i>Junichiro Suzuki, Yoshikazu Shoji, Toshiba Corporation; Hiroyoshi Yamada, Yoshio Yamaguchi, Niigata University; Masahiro Tanabe, Toshiba Corporation</i>	
Signal estimation based on mutual information maximization.....	597
<i>Gustavo Rohde, Carnegie Mellon University; Jonathan Nichols, Frank Bucholtz, Joseph V. Michalowicz, Naval Research Laboratory</i>	
Moment-Based SNR Estimation for SIMO Wireless Communication Systems Using Arbitrary	601
QAM <i>Alex Stéphenne, Ericsson Canada Inc.; Faouzi Bellili, Sofiène Affes, INRS-ÉMT</i>	
A Distributed Approach to Beamforming in a Wireless Sensor Network.....	606
<i>Nikolaos Papalexidis, Owens Walker, Charalampos Gkionis, Murali Tummala, John McEachen, Naval Postgraduate School</i>	
Model Distribution For Distributed Kalman Filters: A Graph Theoretic Approach	611
<i>Usman Khan, José M. F. Moura, Carnegie Mellon University</i>	
Blind MIMO channel identification using cumulant tensor decomposition.....	616
<i>Carlos Estêvão Fernandes, Gérard Favier, Carlos Alexandre R. Fernandes, University of Nice Sophia Antipolis; João Cesar Mota, Federal University of Ceará</i>	
Further Results on Performance Analysis for Compressive Sensing Using Expander Graphs	621
<i>Weiyu Xu, Babak Hassibi, California Institute of Technology</i>	
Blind Source Separation with a Time-Varying Mixing Matrix	626
<i>Marcus DeYoung, Brian Evans, University of Texas at Austin</i>	
Fundamental Frequency Estimation using the Shift-Invariance Property	631
<i>Mads Christensen, Aalborg University; Andreas Jakobsson, Karlstad University; Søren Holdt Jensen, Aalborg University</i>	
Efficient estimation of the parameters in a sum of complex sinusoids in complex autoregressive	636
noise <i>Barry Quinn, Macquarie University</i>	
A Modulation Code-Based Blind Receiver for Memoryless Multiuser Volterra Channels	641
<i>Carlos Alexandre Rolim Fernandes, Gérard Favier, I3S Laboratory; João Cesar Moura Mota, GTEL Laboratory</i>	
Distributed Iteratively Quantized Kalman Filtering for Wireless Sensor Networks	646
<i>Eric J. Msechu, Stergios I. Roumeliotis, Alejandro Ribeiro, Georgios Giannakis, University of Minnesota</i>	
Sinusoidal Order Estimation using the Subspace Orthogonality and Shift-Invariance Properties	651
<i>Mads Christensen, Aalborg University; Andreas Jakobsson, Karlstad University; Søren Holdt Jensen, Aalborg University</i>	
Phase Noise Mitigation in Channel Parameter Estimation for TDM MIMO Channel Sounding	656
<i>Attaphongse Taparugssanagorn, Centre for Wireless Communications / University of Oulu; Xuefeng Yin, Aalborg university; Juha Ylitalo, Elektrotib; Bernard Fleury, Aalborg university</i>	
Separation of One-dimensional Waves - a Stochastic Systems Approach	661
<i>Peter Nauckér, Torsten Söderström, Uppsala University</i>	
Tracking of MIMO Propagation Parameters under Spatio-Temporal Scattering Model	666
<i>Jussi Salmi, Andreas Richter, Visa Koivunen, Helsinki University of Technology</i>	
Efficient Line Search Methods for Riemannian Optimization Under Unitary Matrix Constraint	671
<i>Traian Abrudan, Jan Eriksson, Visa Koivunen, Helsinki University of Technology</i>	
Distributed Average Consensus in Sensor Networks With Random Link Failures and	676
Communication Channel Noise <i>Soumya Kar, José M. F. Moura, Carnegie Mellon University</i>	

On Side-Informed Coding of Noisy Sensor Observations.....	681
<i>Chao Yu, Gaurav Sharma, University of Rochester</i>	
Fundamental limit of sample eigenvalue based detection of signals in colored noise using relatively few samples	686
<i>Raj Rao Nadakuditi, Massachusetts Institute of Technology; Jack Silverstein, North Carolina State University</i>	
Session: MP8b2 - Biomedical and Genomic Signal Processing	
Session Chair: Babak Hassibi - California Institute of Technology	
On recovery of sparse signals in compressed DNA microarrays	693
<i>Haris Vikalo, University of Texas at Austin; Farzad Parvaresh, Babak Hassibi, California Institute of Technology</i>	
Session: TA1 - Non-Gaussian and Nonlinear Methods in Statistical Signal Processing	
Session Chair: Pramod K. Varshney - Syracuse University, USA	
Noise Enhanced Signal Detection and Estimation.....	701
<i>Hao Chen, Pramod Varshney, Syracuse University; James Michels, JHM Technologies</i>	
Performance Analysis of the NAMF Test in Heterogeneous Non-Gaussian Radar Clutter Scenarios	706
<i>Muralidhar Rangaswamy, Freeman Lin, Air Force Research Laboratory</i>	
A new approach to cost-reference particle filtering	711
<i>Zejie Zhang, Monica F. Bugallo, Petar M. Djuric, Stony Brook University</i>	
Joint state monitoring and fault detection using distributed particle filtering	715
<i>Qi Cheng, Oklahoma State University; Pramod Varshney, Syracuse University</i>	
Particle Filter with Efficient Importance Sampling and Mode Tracking (PF-EIS-MT) and its	720
Application to Landmark Shape Tracking	
<i>Namrata Vaswani, Samarjit Das, Iowa State University</i>	
A Bayesian Framework for Abundance Estimation in Hyperspectral Data using Markov Random	725
Fields	
<i>Matthew Stites, Todd Moon, Jacob Gunther, Utah State University; Gustavious Williams, Brigham Young University</i>	
A robust detector for impulsive noise environment.....	730
<i>Tonu Trump, Tallinn University of Technology</i>	
Session: TA2 - Spatio-Temporal Processing in Biomedical Imaging	
Session Chair: Yongyi Yang	
Murine Spatiotemporal Cardiac Segmentation.....	737
<i>Andrew D. Gilliam, Scott T. Acton, University of Virginia</i>	
Multimodal Imaging of Myocardial Infarction in Mice	741
<i>Brent A. French, Frederick H. Epstein, John A. Hossack, Stuart S. Berr, Christopher M. Kramer, University of Virginia</i>	
An AM-FM model for Motion Estimation in Atherosclerotic Plaque Videos	746
<i>Victor Murray, Sergio E. Murillo, Marios S. Pattichis, University of New Mexico; Christos P. Loizou, Intercollege; Costantinos S Pattichis, Efthymoulos Kyriacou, University of Cyprus; Andrew Nicolaidis, University of Cyprus / Vascular Screening and Diagnostic Center</i>	
Spatio-temporal approaches to inverse electrocardiography	751
<i>Dana Brooks, Andrew Keely, Northeastern University; Alireza Ghodrati, Draeger Medical; Gilead Tadmor, Northeastern University; Rob MacLeod, University of Utah</i>	
Reconstruction of gated cardiac SPECT using DFT basis functions.....	756
<i>Xiaofeng Niu, Illinois Institute of Technology; Mingwu Jin, University of Colorado Health Sciences Center; Yongyi Yang, Illinois Institute of Technology</i>	
Surface ECG reconstruction from intracardiac EGM: a PCA-vectocardiogram method	761
<i>Amar Kachenoura, Fabienne Porée, Alfredo Hernandez, Guy Carrault, INSERM, U642, Rennes</i>	

Session: TA3 - Recent Advances in Cognitive Radio**Session Chair: Erik G. Larsson - Royal Institute of Technology (KTH), Sweden**

Spectrum Opportunity Detection: How Good Is Listen-Before-Talk?.....	767
<i>Qing Zhao, Wei Ren, University of California, Davis; Ananthram Swami, Army Research Lab</i>	
Censoring for Collaborative Spectrum Sensing in Cognitive Radios.....	772
<i>Jarmo Lunden, Visa Koivunen, Helsinki University of Technology; Anu Huttunen, Nokia Research Center; H. Vincent Poor, Princeton University</i>	
Sensor-Network-Aided Cognitive Radio: On the Optimal Receiver for Estimate-and-Forward Protocols applied to the Relay Channel	777
<i>Ragnar Thobaben, Erik G. Larsson, Royal Institute of Technology (KTH)</i>	
Cognitive radio Research and Implementation Challenges.....	782
<i>Aawatif Menouni Hayar, Eurecom Institute; Renaud Pacalet, GET/ENST, SoC laboratory; Raymond Knopp, Eurecom Institute</i>	
Stability analysis of a cognitive multiple access channel with primary QoS constraints.....	787
<i>Jonathan Gambini, New Jersey Institute of Technology / Politecnico di Milano; Osvaldo Simeone, New Jersey Institute of Technology; Umberto Spagnolini, Politecnico di Milano; Yeheskel Bar-Ness, New Jersey Institute of Technology; Yungsoo Kim, 4G Wireless Technology Lab, Samsung Electronics Co., Ltd</i>	
Distributed Transmit Power Allocation for Relay-Assisted Cognitive-Radio Systems	792
<i>Jan Mietzner, Lutz Lampe, Robert Schober, University of British Columbia</i>	
A price based dynamic spectrum allocation scheme	797
<i>Joydeep Acharya, Roy Yates, WINLAB, Rutgers University</i>	

Session: TA4 - Cooperative Diversity**Session Chair: J. Nicholas Laneman - University of Notre Dame**

On Achievable Rates for Interference Relay Channel with Interference Cancellation	805
<i>Onur Sahin, Elza Erkip, Polytechnic University</i>	
DMT achieving Distributed Space Time Codes for the Multiple Access Channel	810
<i>Jean-Claude Belfiore, Maya Badr, Sheng Yang, Ghaya Rekaya, ENST</i>	
Antenna Selection, Diversity Coding and Spatial Multiplexing in Cooperative Wireless Networks	814
<i>Ozgun Oyman, Feng Xue, Intel Research</i>	
Cooperative Transmission of Correlated Gaussian Sources.....	819
<i>Ozgu Alay, Elza Erkip, Yao Wang, Polytechnic University</i>	
Distributed Decoding in Cooperative Communications.....	824
<i>Marjan Karkooti, Joseph R. Cavallaro, Rice University</i>	
Distributed Multiuser Cooperative Network with Heterogenous Relay Clusters.....	829
<i>Celal Esli, Armin Wittneben, ETH Zurich</i>	
Energy Efficient Relaying Games in Cooperative Wireless Transmission Systems.....	835
<i>Jie Yang, Donald Brown, Worcester Polytechnic Institute</i>	

Session: TA5 - Signal Processing for Structural Health Monitoring**Session Chairs: Antonia Papandreou-Suppappola - Arizona State University and Doug Cochran - Arizona State University**

Signal Processing Issues Related to Structural Health Monitoring	843
<i>Martin P. DeSimio, ATK Mission Systems; Steven E. Olson, University of Dayton Research Institute; Jose A. Montes de Oca, ATK Mission Systems; Mark Derriso, Air Force Research Laboratory</i>	
Damage Classification for Structural Health Monitoring Using Time-Frequency Feature	848
Extraction and Continuous Hidden Markov Models	
<i>Wenfan Zhou, Debejyo Chakraborty, Narayan Kovvali, Antonia Papandreou-Suppappola, Douglas Cochran, Aditi Chattopadhyay, Arizona State University</i>	
Optimal Sub-band Beamforming with Frequency Masking for SHM.....	853
<i>Alessio Medda, Victor DeBrunner, Florida State University</i>	
Time-Frequency Based Feature Extraction and Classification for Fault Diagnosis in Electric Drives	857
<i>Selin Aviyente, Sajjad Zaidi, Elias Strangas, Michigan State University</i>	

Session: TA6 - Network Information Theory**Session Chair: Aylin Yener - Penn State**

On the duality of MIMO MAC and BC with AF relays.....	863
<i>Krishna Gomadam, Syed Jafar, University of California, Irvine</i>	
On dependence balance bounds for two-way channels	868
<i>Ravi Tandon, Sennur Ulukus, University of Maryland</i>	
The Scaling of the Broadcast Capacity of Extended Wireless Networks with Cooperative Relays	873
<i>Birsen Sirkeci-Mergen, San Jose State University; Michael Gastpar, University of California, Berkeley</i>	
Resource Allocation in Multiple Access Channels.....	878
<i>Ali ParandehGheibi, Atilla Eryilmaz, Asuman Ozdaglar, Muriel Medard, Massachusetts Institute of Technology</i>	
On the Equivocation Region of Relay Channels with Orthogonal Components.....	883
<i>Xiang He, Aylin Yener, Pennsylvania State University</i>	
An Achievable Rate Region for the Interference Channel with a Cognitive Transmitter	888
<i>Ivana Maric, Andrea Goldsmith, Stanford University; Gerhard Kramer, Bell Labs (Alcatel-Lucent); Shlomo Shamai (Shitz), Technion</i>	
Wiretap Channel With Two-Sided Channel State Information	893
<i>Wei Liu, Biao Chen, Syracuse University</i>	

Session: TA7 - Image and Video Coding II**Session Chairs: Michael Marcellin - University of Arizona and Ali Bilgin - University of Arizona**

Security of Compressing Encrypted Sources.....	901
<i>Goce Jakimoski, K. P. Subbalakshmi, Stevens Institute of Technology</i>	
Channel Coding for Progressive Multimedia in a 2-D Time-Frequency Block of an OFDM System.....	904
<i>Yee Sin Chan, Verizon Wireless; Laura Toni, University of Bologna; Pamela Cosman, Laurence Milstein, University of California, San Diego</i>	
Distance quantization method for fast nearest neighbor search computations with applications to	909
motion estimation <i>Hye-Yeon Cheong, Antonio Ortega, University of Southern California</i>	
A Layered Hybrid-ARQ Scheme for Scalable Video Multicast over Wireless Networks	914
<i>Zhengye Liu, Polytechnic University; Zhenyu Wu, Hang Liu, Mingquan Wu, Alan Stein, THOMSON</i>	
JPEG2000: Quality Scalability and Windows of Interest Transmission	920
<i>Joan Serra-Sagrista, Francesc Auli-Llinas, Universitat Autònoma de Barcelona</i>	
Multiple description image coding using regions of interest.....	925
<i>Marcus Nystrom, Lund University; Jerry Gibson, University of California, Santa Barbara; John B. Anderson, Lund University</i>	
Multistage Lattice Vector Quantization for Hyperspectral Image Compression.....	930
<i>Ying Liu, William Pearlman, Rensselaer Polytechnic Institute</i>	
Rate-Distortion Optimized Vector SPIHT for Wavelet Image Coding	935
<i>Yongqing Liang, Scott Budge, Utah State University</i>	

Session: TA8a1 - Architectures**Session Chair: Graham Jullien - Atips**

Application-Specific Instruction Set Processor Implementation of List Sphere Detector	943
<i>Juho Antikainen, University of Oulu; Perttu Salmela, Tampere University of Technology; Olli Silvén, Markku Juntti, University of Oulu; Jarmo Takala, Tampere University of Technology; Markus Myllylä, University of Oulu</i>	
Distributed Phased Arrays With Wireless Beamforming	948
<i>David Jenn, Yong Loke, Mathew Tong, Eng Choon Yeo, Robert Broadston, Naval Postgraduate School</i>	
A Handheld Texel Camera for Acquiring Near-Instantaneous 3D Images	953
<i>Brandon Boldt, Scott Budge, Robert Pack, Paul Israelsen, Utah State University</i>	
Efficient Multiplierless Polyphase FIR Filter based on New Distributed Arithmetic Architecture	958
<i>Jose TecpanecatI-XihuítI, Ruth Aguilar-Ponce, Yasser Ismail, Magdy Bayoumi, University of Louisiana at Lafayette</i>	

Instruction Set Extensions for AES Processing on a Multithreaded Software Defined Radio Platform	963
<i>Christopher Jenkins, Suman Mamidi, Michael Schulte, University of Wisconsin-Madison; John Glossner, Sandbridge Technologies</i>	
Combined radix-10 and radix-16 division unit	967
<i>Tomas Lang, University of California, Irvine; Alberto Nannarelli, Technical university of Denmark</i>	
A Comparative Analysis of Data-Driven Architectural Techniques for Low-Power Array Multipliers	972
<i>Vasily Moshnyaga, Fukuoka University</i>	
Iterative Radix-8 Multiplier Structure Based on a Novel Real-time CSD Recoding	977
<i>Yunhua Wang, University of Oklahoma; Linda DeBrunner, Florida State University; Joseph Havlicek, Dayong Zhou, University of Oklahoma</i>	
A solution for memory collision in semi-parallel FPGA-based LDPC decoder design	982
<i>Radivoje Zarubica, Stephen Wilson, University of Virginia</i>	
Hardware implementation of an Echo-Canceller for DVB-T On-Channel Repeaters	987
<i>Paolo Altamura, Gian Carlo Cardarilli, Marco Re, University of Rome; Andrea Del Re, Skytechnology S.r.l.</i>	
Design of Low-Pass Tunable Complex Heterodyne Filters	990
<i>Michael Soderstrand, Univesity of California; Grace Yoona Cho, Telabs</i>	
Session: TA8a2 - Modulation, Detection, and Error Control Coding	
Session Chair: Tor A. Ramstad - Norwegian University of Science and Technology	
Analytical Bit Error Rate Calculation for BICM(-ID) Assuming Imperfect CSI.....	995
<i>Susanne Godtmann, RWTH Aachen University; I-Wei Lai, Tzi-Dar Chiueh, National Taiwan University; Gerd Ascheid, Heinrich Meyr, RWTH Aachen University</i>	
Hyper Phase Shift Keying (HPSK) Modulation	1000
<i>James Caldwell, Murali Tummala, Naval Post-Graduate School</i>	
Fast Noncoherent Decoding of Block Transmissions over Doubly Dispersive Channels.....	1005
<i>Sungjun Hwang, Philip Schniter, The Ohio State University</i>	
Data-Dependent Superimposed Training for Noncoherent Channels	1010
<i>Jingnong Yang, Amicus Wireless Technology; Douglas B. Williams, Georgia Institute of Technology; John Cioffi, Stanford University</i>	
Space Time Serial Concatenated Turbo Coded Modulation.....	1015
<i>Daniel Liu, Michael Fitz, University of California, Los Angeles</i>	
Expanding Window Fountain Codes for Unequal Error Protection	1020
<i>Dino Sejdinovic, University of Bristol; Dejan Vukobratovic, University of Novi Sad; Angela Doufexi, University of Bristol; Vojin Senk, University of Novi Sad; Robert J. Piechocki, University of Bristol</i>	
Analog Source-Channel Codes Based on Orthogonal Polynomials	1025
<i>Niklas Wernersson, Mikael Skoglund, Royal Institute of Technology (KTH); Tor Ramstad, Norwegian University of Science and Technology (NTNU)</i>	
Space-Time Coding versus Repetition Coding for Free-Space Optical Communication.....	1030
<i>Majid Safari, Murat Uysal, University of Waterloo</i>	
Architecture and Algorithm for a Stochastic Soft-output MIMO Detector	1034
<i>Kiarash Amiri, Predrag Radosavljevic, Joseph R. Cavallaro, Rice University</i>	
Session: TA8a3 - Interference Handling in Wireless Communications	
Session Chair: Geir E. Oien - Norwegian University of Science and Technology	
Interference Suppression in Wireless Cellular Networks through Picocells	1041
<i>Yifan Liang, Stanford University; Reinaldo Valenzuela, Gerard Foschini, Dmitry Chizhik, Bell Labs (Alcatel-Lucent); Andrea Goldsmith, Stanford University</i>	
Interference Avoidance With Limited Feedback	1046
<i>Dimitrie Popescu, Sirisha Koduri, Danda Rawat, Old Dominion University</i>	
Extrinsic Information Transfer in Cellular MC-CDMA for Inter-Cell Interference Cancellation	1050
<i>Simon Plass, Stephan Sand, German Aerospace Center (DLR)</i>	
Low-Complexity Variable Step Size Mechanism for Code-Constrained Constant Modulus	1055
Stochastic Gradient Algorithms applied to CDMA Interference Suppression	
<i>Yunlong Cai, Rodrigo de Lamare, University of York</i>	

Gradient Descent Interference Avoidance for Uplink CDMA Systems with Multipath	1060
<i>Dimitrie Popescu, Danda Rawat, Otilia Popescu, Old Dominion University</i>	
The Simple Near-Optimal Pairing Scheme of Superposition Coding in Downlink DS-CDMA	1065
Multi-path Channel	
<i>Seungyeon Eom, Janghoon Yang, Dong Ku Kim, Yonsei University</i>	
An Ultra Wideband Transmitted Reference Scheme Gaining from Intersymbol Interference	1070
<i>Florian Troesch, Armin Wittneben, ETH Zurich</i>	
Joint Adaptive Modulation, Diversity Combining, and Power Control for Downlink Transmission	1075
in Two-cell Wireless Networks	
<i>Anders Gjendemsjo, Norwegian University of Science and Technology (NTNU); Hong-Chuan Yang, University of Victoria; Geir Egil Oien, Norwegian University of Science and Technology (NTNU); Mohamed-Slim Alouini, Texas A&M University at Qatar</i>	
 Session: TA8b1 - Multirate and Digital Signal Processing	
Session Chair: Victor DeBrunner - FAMU-FSU College of Engineering	
A Generalized Lapped Transform with Unequal Length Filters Based on First-Order Linear-Phase	1083
Filter Banks	
<i>Taichi Yoshida, Yuichi Tanaka, Masaaki Ikehara, Keio University</i>	
Design and Implementation of Discrete-Time Filters for Efficient Rate-Conversion Systems	1088
<i>Thomas Baran, Alan Oppenheim, Massachusetts Institute of Technology</i>	
Frequency-domain properties of locally stationary improper second-order stochastic processes.....	1093
<i>Patrik Wahlberg, Peter J. Schreier, University of Newcastle</i>	
On the Design of Sparse Half-Band Like FIR Filters.....	1098
<i>Oscar Gustafsson, Linköping University; Linda DeBrunner, Victor DeBrunner, Florida State University; Håkan Johansson, Linköping University</i>	
Sampling Based on Local Bandwidth.....	1103
<i>Dennis Wei, Alan Oppenheim, Massachusetts Institute of Technology</i>	
Signal Adapted Filter Bank Design Using Markov Parameters	1108
<i>Peter Vouras, Trac Tran, Johns Hopkins University</i>	
A Simple Proof of the Alternation Theorem.....	1111
<i>P. P. Vaidyanathan, California Institute of Technology; Truong Nguyen, University of California, San Diego</i>	
Three-Dimensional Cone FIR Filters Design using the McClellan Transform.....	1116
<i>Guergana Mollova, Wolfgang Mecklenbräuker, Vienna University of Technology</i>	
Design of FIR LS Hilbert Transformers Through Fullband Differentiators.....	1121
<i>Guergana Mollova, Vienna University of Technology</i>	
A Short-Term Measure of Dark Energy in Sparse Atomic Estimations.....	1126
<i>Bob L. Sturm, John J. Shynk, University of California, Santa Barbara; Laurent Daudet, Universite Pierre et Marie Curie - Paris 6</i>	
Reconstruction Convergence of an Impulse-doublet Sampled Random Processes.....	1130
<i>Jim Schroeder, Harris Corporation; Muralidhar Rangaswamy, Air Force Research Laboratory; Bob Kubichek, University of Wyoming</i>	
A Novel Spectral Estimation Method By Using Periodic Nonuniform Sampling	1134
<i>Dongdong Qu, Andrzej Tarczynski, University of Westminster</i>	
Implementation Considerations and Performance Comparison of Variable Bandwidth FIR Filter	1139
and Phase Equalized IIR Filter	
<i>fredric harris, San Diego State University; Wade Lowdermilk, Signum Concepts</i>	
Spectrum analysis at the output of a nonlinear power amplifier with multicarrier signals	1144
<i>Emmanuel Cottais, Yide Wang, IREENA</i>	
Implementing Recursive Filters with Large Ratio of Sample Rate to Bandwidth	1149
<i>fredric harris, San Diego State University; Wade Lowdermilk, BAE systems</i>	
High-Performance Low-Cost DFE Using IFIR Filters.....	1154
<i>Chen Meng, Jamal Tuqan, University of California, Davis</i>	
Diversity in Shallow Water Environments Using Blind Time-Frequency Separation Techniques.....	1159
<i>Bertrand Gottin, GIPSA-LAB; Jun Zhang, Antonia Papandreou-Suppappola, Arizona State University; Cornel Ioana, GIPSA-LAB</i>	
Hyperspectral Image Unmixing via Alternating Projected Subgradients.....	1164
<i>Argyris Zymnis, Seung-Jean Kim, Joelle Skaf, Mario Parente, Stephen Boyd, Stanford University</i>	

Session: TA8b2 - Performance Bounds

Session Chair: Slawomir Stanczak - Fraunhofer Institute, Germany

Opportunistic Scheduling for Multiantenna Cellular: Interference Limited Regime	1171
<i>Stephanie Pereira, Arogyaswami Paulraj, George Papanicolaou, Stanford University</i>	
On the Network Outage Probability with a Common SIR Requirement.....	1176
<i>Slawomir Stanczak, Fraunhofer German-Sino Lab for Mobile Communications; Holger Boche, Marcin Wiczanski, Technical University of Berlin</i>	
Impact of User Mobility and Asymmetry on Multiuser Scheduler Performance.....	1181
<i>Pengcheng Zhan, Brigham Young University; Ramesh Annavajjala, ArrayComm LLC; A. Lee Swindlehurst, The University of California, Irvine</i>	
Multicarrier Broadcast and Unicast Hybrid Systems.....	1186
<i>Hongxiang Li, Bin Liu, Hui Liu, University of Washington</i>	

Session: TA8b3 - Selected Topics in Wireless Communications

Session Chair: Radha Poluri - Aware

Varying Power Integer Codes for CDMA Communications.....	1193
<i>Radha Poluri, Aware Incorporation; Ali Akansu, New Jersey Institute of Technology</i>	
Near-Far Resistance of Multirate CDMA Communications Systems	1198
<i>Xiaodong Yue, Songlin Tian, University of Central Missouri</i>	
Minimum Analog-Digital Quantization Resolution Requirements for Digital Communications	1202
Systems	
<i>Gareth Middleton, Behnaam Aazhang, Rice University</i>	
Comparison of Multimedia Transport Schemes over Markovian Wireless Channels.....	1207
<i>Syed Ali Khayam, National University of Sciences & Technology (NUST); Hayder Radha, Michigan State University</i>	
A novel stochastic model and fast generation method for Nakagami fading channels	1212
<i>James Ritcey, Chantri Polprasert, University of Washington</i>	
Simplified Eigenvalues Distributions of 2 x 2 Complex Noncentral Wishart.....	1215
<i>Mohamad Charafeddine, Arogyaswami Paulraj, Stanford University</i>	
MIMO Systems with Arbitrary Antenna Array Architectures: Channel Modeling, Capacity and	1219
Low-Complexity Signaling	
<i>Vasanthan Raghavan, Ada Poon, Venu Veeravalli, University of Illinois at Urbana-Champaign</i>	
A Tractable Method for Robust Downlink Beamforming in Wireless Communications	1224
<i>Almir Mutapcic, Seung-Jean Kim, Stephen Boyd, Stanford University</i>	

Session: TP1 - Underwater Acoustic Array Signal Processing

Session Chair: Hongya Ge - New Jersey Institute of Technology, USA

Performance of Line Arrays of Vector and Higher Order Sensors.....	1231
<i>Henry Cox, Hung Lai, Lockheed Martin Corporation</i>	
On the use of energy concentrating beamformers and filters for detection of wideband angularly	1237
spread signals	
<i>Ashwin Sarma, Naval Undersea Warfare Center; Donald Tufts, University of Rhode Island; William Comeau, Naval Undersea Warfare Center</i>	
Multitaper Array Processing	1242
<i>Kathleen Wage, George Mason University</i>	
Robust Adaptive Beamforming of Volumetric Arrays	1247
<i>Ivars P. Kirsteins, Naval Undersea Warfare Center; Hongya Ge, New Jersey Institute of Technology</i>	
A Frequency-Domain Multi-Band Matched-Filter Approach to Passive Diver Detection	1252
<i>Kil Woo Chung, Hongbin Li, Alexander Sutin, Stevnes Institute of Technology</i>	
Array Manifold Geometry and Sparse Array Design Optimization	1257
<i>Neil Malloy, Multisensor Science LLC</i>	
Cramer-Rao Lower Bound for DOA Estimation Using Vector and Higher-Order Sensor Arrays	1262
<i>Hung Lai, Lockheed Martin Corporation; Kristine Bell, George Mason University</i>	
Improved consistent estimation on Krylov subspaces	1267
<i>Francisco Rubio, Xavier Mestre, CTTC</i>	
A Matched Subspace Approach to Depth Discrimination in a Shallow Water Waveguide.....	1272
<i>Vincent E. Premus, Daniel Backman, OASIS, Inc.</i>	

Session: TP2 - Cellular Image Analysis

Session Chair: Scott Acton

Detection of linear structures in biological images.....1279
Sylvain Berlemont, Institut Pasteur / University of Paris 5 / Genomic Vision S.A.; Aaron Bensimon, Genomic Vision S.A.; Florence Cloppet, University of Paris 5; Jean-Christophe Olivo-Marin, Institut Pasteur

Breaking resolution limits: advances and challenges in single molecule microscopy1284
Sripad Ram, University of Texas Southwestern Medical Center; Jerry Chao, Prashant Prabhat, Anish Abraham, University of Texas at Dallas; E. Sally Ward, University of Texas Southwestern Medical Center; Raimund Ober, University of Texas at Dallas

Validation of in vivo Leukocyte Velocity Estimates Via Modeling and Simulation1288
Philip Morrow, Kurt Saetzler, University of Ulster

Using μ -PIV to interrogate the endothelial surface layer in arterioles in vivo1293
Michele Savery, Edward Damiano, Boston University

Shear field around adherent leukocytes as measured by Micro-PTV1298
John Pickard, Klaus Ley, University of Virginia

HDR-Microscopy of Cell Specimens: Imaging and Image Analysis1303
Andre Bell, Dietrich Meyer-Ebrecht, RWTH Aachen University; Alfred Boecking, Heinrich-Heine University Duesseldorf; Til Aach, RWTH Aachen University

Extracting Dynamic Microtubule Features from Image Sequences1308
Alphan Altinok, University of California, Santa Barbara; Mehmet Emre Sargin, ucsb; B. S. Manjunath, Kenneth Rose, University of California, Santa Barbara

Session: TP3 - Ultra-Wideband Communications

Session Chair: Ahmed Tewfik - University of Minnesota, USA

Transmitted-Reference UWB: A Digital Approach1315
Wenyi Zhang, Urbashi Mitra, University of Southern California

High-Speed and Low-Power UWB Radio System Design.....1320
Won Namgoong, University of Texas at Dallas

The Search for Efficient Digitally Generated Impulse-Like Ultrawideband Signals1324
Terry Lewis, Robert Scholtz, University of Southern California

Adaptive Overlap-and-Add Techniques for MB-OFDM Systems1331
June Chul Roh, Anuj Batra, Deric Waters, Texas Instruments

High Speed Frequency Hopping Using Injection Locked RF Front-ends1336
Ramesh Harjani, Narasimha Lanka, University of Minnesota

Balanced binary sequences for UWB OFDM systems1341
Syed Faisal Shah, Ahmed Tewfik, University of Minnesota

Clustering of Wireless Sensors based on Ultra-Wideband Geo-Regioning1345
Christoph Steiner, Armin Wittneben, ETH Zurich

Lower Bound on Time-Delay Estimation Error of UWB Signals1350
Hicham Anouar, Aawatif Menouni Hayar, Raymond Knopp, Christian Bonnet, Institut Eurecom

Session: TP4a - Estimation and Detection

Session Chair: Aleksandar Dogandzic - Iowa State University, USA

Signal Power Estimation Via Vector and Matrix Approaches1357
Lin Du, Jian Li, University of Florida; Petre Stoica, Uppsala University

Distributed Detection of Information Flows with Side-Information1362
Ting He, IBM; Lang Tong, Cornell University

Two-Dimensional Mixed Autoregressive Models for Space-Time Adaptive Processing1367
Yuri Abramovich, Defence Science and Technology Organisation; Ben Johnson, RLM Management Pty Ltd / University of South Australia; Nicholas Spencer, Adelaide Research & Innovation Pty. Ltd. (ARI)

Distributed Adaptive Quantization for Wireless Sensor Networks1372
Jun Fang, Hongbin Li, Stevens Institute of Technology

Session: TP4b - Array Signal Processing**Session Chair: Andreas Jakobsson - Karlstad University, Sweden**

- A Polynomial Matrix QR Decomposition with Applications to MIMO Channel Equalisation 1379
Joanne Foster, John McWhirter, Cardiff University; Jonathon Chambers, Loughborough University
- On the Energy-Efficiency of cooperative MIMO in Nakagami-Fading Wireless Sensor Networks 1384
Erik Björnemo, Anders Ahlén, Uppsala University; Mathias Johansson, Dirac Research
- Robust Multi-Sensor Detection of Polymorphic NQR Signals 1389
Naveed Razaq Butt, Andreas Jakobsson, Karlstad University

Session: TP5 - Low Power Methods**Session Chair: W. K. Jenkins - Pennsylvania State University**

- Sensor Networks-Inspired Low-Power Robust PN Code Acquisition 1397
Sriram Narayanan, Girish V. Varatkar, Douglas L. Jones, Naresh R. Shanbhag, University of Illinois at Urbana-Champaign
- Variation-Aware Low-Power Buffer Design..... 1402
Chrysostomos Nicopoulos, Aditya Yanamandra, Suresh Srinivasan, Vijaykrishnan Narayanan, Mary Jane Irwin, The Pennsylvania State University
- Reducing Complexity of FIR Filter Implementations for Low Power Applications..... 1407
Linda DeBrunner, Florida State University
- Residue Number System for Low Power DSP Applications..... 1412
Gian Carlo Cardarilli, University of Rome Tor Vergata; Alberto Nannarelli, Technical University of Denmark; Marco Re, University of Rome Tor Vergata
- Low Power Adaptive Filters Based on a Combination of Genetic Optimization and Residue 1417
 Number System Coding
Chandra Rhadakrishnan, The Pennsylvania State University; Dean Krusienski, North Florida State University; Kenneth Jenkins, The Pennsylvania State University
- Hybrid MCM Implementation for FIR Filters in FPGA Devices..... 1422
Charles D. Howard, Linda DeBrunner, Victor DeBrunner, Florida State University
- Impact of RNS Coding Overhead on FIR Filters Performance 1426
Gian Carlo Cardarilli, University of Rome Tor Vergata; Andrea Del Re, Skytechnology s.r.l.; Alberto Nannarelli, Technical University of Denmark; Marco Re, University of Rome Tor Vergata
- An RNS-Enhanced Microprocessor Implementation of Public Key Cryptography 1430
Zhining Lim, Braden Phillips, The University of Adelaide

Session: TP6a - Network Pricing**Session Chair: John Musacchio - UC Santa Cruz**

- Network Neutrality and Provider Investment Incentives..... 1437
John Musacchio, University of California, Santa Cruz; Jean Walrand, Galina Schwartz, University of California, Berkeley
- Competition with Atomic Users 1445
Kostas Bimpikis, Asuman Ozdaglar, Massachusetts Institute of Technology
- The Price of Simplicity 1450
Srinivas Shakkottai, Stanford Univeresity; Rayadurgam Srikant, University of Illinois at Urbana-Champaign; Asuman Ozdaglar, Daron Acemoglu, Massachusetts Institute of Technology
- On Pricing Methods to Address Preference Revelation and Distributed Control in Random Access 1455
 Networks
Pavan Nuggehalli, University of California, San Diego; Jennifer Price, University of Colorado at Colorado Springs; Tara Javidi, University of California, San Diego

Session: TP6b - Relay Channels**Session Chair: Youjian Liu - University of Colorado, Boulder**

- Dimension Expansion Relaying for Slow Fading Channels based on Hybrid Digital-Analog 1463
 Source-Channel Coding
Sha Yao, Mikael Skoglund, Royal Institute of Technology (KTH)
- Achievable rates for the restricted half-duplex two-way relay channel 1468
Clemens Schnurr, Tobias J. Oechtering, Slawomir Stanczak, Fraunhofer German-Sino Lab for Mobile Communications

Session: TP7a - Speech Coding, Processing and Transport

Session Chair: Sean Ramprashad - DoCoMo

Steganographic Wideband Telephony using Narrowband Speech Coders	1475
<i>Peter Vary, Bernd Geiser, RWTH Aachen University</i>	
Classification-based techniques for improving the robustness of CELP coders	1480
<i>Milan Jelinek, Vaclav Eksler, Catherine Lemyre, Roch Lefebvre, Université de Sherbrooke</i>	
Least Significant Bit Coding of Speech.....	1485
<i>W. Bastiaan Kleijn, Minyue Li, Royal Institute of Technology (KTH)</i>	
Perceptual Bit-Patterns based on Partial-Order Allocation Schemes with application to Subband	1491
Speech and Audio Coding	
<i>Sean Ramprashad, DoCoMo USA Labs; Soo Hyun Bae, Georgia Institute of Technology</i>	

Session: TP7b - Plenoptic Signal Processing

Session Chair: Dan Lelescu - Micron

Shared Interactive Image/Video and their Meeting Applications.....	1501
<i>Qiong Liu, Don Kimber, Eleanor Rieffel, Francine Chen, FX Palo Alto Lab</i>	
Multi-view video compression for 3D displays.....	1506
<i>Matthias Zwicker, University of California, San Diego; Sehoon Yea, Anthony Vetro, Clifton Forlines, Mitsubishi Electric; Wojciech Matusik, Adobe Systems, Inc.; Hanspeter Pfister, Harvard University</i>	
Experiential Signal Processing (ESP) and Experiential Telecommunications (ET)	1511
<i>Jerry Gibson, JoAnn Kuchera-Morin, Alex Norman, University of California, Santa Barbara</i>	

Session: TP8a1 - Advances in MIMO Communications

Session Chair: James Ritcey - University of Washington

Communications through Time-Varying Subspace Channels	1519
<i>Benjamin Friedlander, University of California, Santa Cruz</i>	
A Selective Decision-Feedback Detector for Space-Time Block Code with Combined Diversity	1524
and Spatial Multiplexing	
<i>Shouxing Qu, Research In Motion Limited</i>	
A Comparison of MIMO and Phased Array Radar with the Application of MUSIC.....	1529
<i>Dave Wilcox, Mathini Sellathurai, Tharmalingam Ratnarajah, Queen's University Belfast</i>	
On the Performance of Lattice Reduction Schemes for MIMO Data Detection	1534
<i>Dirk Wuebben, University of Bremen; Dominik Seethaler, Vienna University of Technology</i>	
MIMO Mobile Terminal Tracking Using Bayesian Probability Estimation	1539
<i>Konstantinos Papakonstantinou, Eurecom Institute; Merouane Debbah, Supelec; Dirk Slock, Eurecom Institute</i>	
On the performance of the Golden code in BICM-MIMO and IEEE 802.11n cases	1544
<i>Lina Mroueh, Motorola Labs - ENST Paris; Stéphanie Rouquette-Léveil, Motorola Labs; Ghaya Rekaya-Ben Othman, Jean-Claude Belfiore, ENST Paris</i>	
Extended Uniform Channel Decomposition for MIMO Communications with Intersymbol	1549
Interference	
<i>Yi Jiang, NextWave Broadband; Mahesh Varanasi, University of Colorado, Boulder</i>	
Lattice Reduction Aided Detection with Reduced Complexity for Time-Correlated MIMO	1554
Channel	
<i>Chan-ho An, Janghoon Yang, Seung-hoon Jang, Dong Ku Kim, Yonsei University</i>	
The effect of LLR clipping to the complexity of list sphere detector algorithms.....	1559
<i>Markus Myllylä, Juho Antikainen, Markku Juntti, Centre for Wireless Communications; Joseph R. Cavallaro, Rice University</i>	
Copula Models for Wireless Fading and their Impact on Wireless Diversity Combining	1564
<i>James Ritcey, University of Washington</i>	
Out-sphere decoder for non-coherent ML SISO detection and its expected complexity	1568
<i>Mihailo Stojnic, Babak Hassibi, California Institute of Technology</i>	
Maximizing mutual information in general MIMO fading AWGN channels under a rank constraint	1573
<i>Harish Venkatachari, Qualcomm Inc; Mahesh Varanasi, University of Colorado, Boulder</i>	

Session: TP8a2 - MIMO Communication over Frequency Selective Channels

Session Chair: Volker Jungnickel - Technical University of Berlin

An Iterative Receiver for Joint Detection, Decoding, and Channel Estimation in Turbo Coded MIMO OFDM	1581
<i>Jari Ylioinas, Markku Juntti, Centre for Wireless Communication</i>	
Adaptive Bit Loading for OFDM Systems with Imperfect Channel State Information.....	1586
<i>Stephan Sand, Armin Dammann, German Aerospace Center (DLR); Carlo Mutti, ETH Zürich</i>	
A Practical Approach for Weighted Rate Sum Maximization in MIMO-OFDM Broadcast Channels	1591
<i>Mari Kobayashi, SUPELEC; Giuseppe Caire, University of Southern California</i>	
Optimal Noncoherent MIMO-OFDM Constellations at Low SNR.....	1596
<i>Shivratna Srinivasan, Mahesh Varanasi, University of Colorado, Boulder</i>	
Adaptive Space-Time Multiband-OFDM UWB Scheme with OFDM-Based Channel Models.....	1601
<i>Jiqun Qi, Cao Lei, University of Mississippi</i>	
Interference Cancellation and Space-Time Block Codes in Frequency Selective Multiple-Access Channels	1606
<i>Debasish Chowdhury, Qualcomm Inc</i>	
Robust Minimax Equalization of Imperfectly Known Frequency Selective MIMO Channels.....	1611
<i>Nikola Vucic, Fraunhofer HHI; Holger Boche, TU Berlin</i>	
A Design of Precoding and Equalisation for Broadband MIMO Systems	1616
<i>Chi Hieu Ta, Stephan Weiss, University of Strathclyde</i>	

Session: TP8a3 - Adaptive Systems and Processing

Session Chair: George Karistinos - Technical University of Crete, Greece

Detecting Instability Potentials in Regularization for Fast Affine Projection Algorithms	1623
<i>Heping Ding, National Research Council</i>	
Maximum a Posteriori based Adaptive Algorithms.....	1628
<i>Dong-Yan Huang, Susanto Rahardja, Haibin Huang, Institute for Infocomm Research</i>	
Robust Notch Filtering by Combining Adaptation in Both Time and Frequency	1633
<i>Minh Ta, Victor DeBrunner, Florida State University</i>	
Adapting a Frequency-Domain Optical Equalizer without Regressor Access	1638
<i>Andrew Klein, Worcester Polytechnic Institute; Benjamin Evans, C. Richard Johnson, Jr., Cornell University; Glenn Collins, Michael Larimore, Jeffrey Harp, John Treichler, Applied Signal Technology</i>	
Self Localization Method for Mobile Sensor in Navigation Applications	1643
<i>Yuntai Kyong, Shung Han Cho, Sangjin Hong, Stony Brook University; Peom Park, We-Duke Cho, Ajou University</i>	
Sensor Network Management Through Fitness Function Design In Multi-Objective Optimization.....	1648
<i>Lisa Osadciw, Kalyan Veeramachaneni, Syracuse University</i>	
Optimal Beamforming with Mobile Robots	1652
<i>Laura Koch, Raviraj Adve, Bruce Francis, University of Toronto</i>	

Session: TP8b1 - Multi-User MIMO Communications II

Session Chair: Birsan Sirkeci-Mergen - San Jose State University,

Enhanced SVD-Based Transmit Pre-Processing for Single-User and Multi-User MIMO Wireless Systems with Imperfect CSIT	1659
<i>Amitav Mukherjee, Hyuck Kwon, Wichita State University</i>	
Stream Control for Interfering MIMO Links with Linear MMSE Receivers.....	1664
<i>Sudhanshu Gaur, Mary Ann Ingram, Georgia Institute of Technology</i>	
Coordinated Multi-cell MIMO Systems with Cellular Block Diagonalization.....	1669
<i>Jun Zhang, University of Texas at Austin; Runhua Chen, Texas Instruments Incorporated; Jeffrey Andrews, Robert Heath, University of Texas at Austin</i>	
Orthogonal Multi-beam Techniques for Multi-user Diversity and Multiplexing Gain in Packet-based Wireless Systems	1674
<i>Dong-Chan Oh, Yong-Hwan Lee, Seoul National University</i>	

Throughput and Rate Region for Quasi-Static Multiple Access Channels with Channel Estimation	1679
Errors	
<i>Madhan Jaganathan, Ravi Narasimhan, University of California, Santa Cruz</i>	
Achievable Rate Region for Downlink Beamforming in the Presence of Interference.....	1684
<i>Xiaohu Shang, Biao Chen, Syracuse University</i>	
Decentralized Dynamic Channel Allocation for MIMO systems.....	1689
<i>Peter von Wrycza, Mats Bengtsson, Björn Ottersten, Royal Institute of Technology (KTH)</i>	
Multiple Antenna Interference Cancellation for M-PSK Signals Using the SAGE Algorithm	1694
<i>Romain Henri Joseph Piton, Motorola A/S; Ingmar Land, University of South Australia; Bin Hu, Bernard Henri Fleury, Aalborg University</i>	
Space-Time Channel Shortening Based Spatial Multiplexing Schemes for Multiusers with	1700
Multipath Channels	
<i>Vimal Sharma, Sangarapillai Lambotharan, Loughborough University</i>	
Resource Allocation in Uplink Multi-carrier MIMO systems for Low-complexity Transceivers	1705
<i>Sumanth Jagannathan, Chan Soo Hwang, John Cioffi, Stanford University</i>	

Session: TP8b2 - OFDM and Multicarrier Communications

Session Chair: Jamal Tuqan - University of California at Davis

Universal linear precoding for widely-linear equalization in OFDM systems	1713
<i>Donatella Darsena, Università di Napoli Parthenope; Giacinto Gelli, Francesco Verde, Università di Napoli Federico II</i>	
An Improved Iterative Water-Filling Algorithm for Multi-Cell Interference Mitigation in	1718
Downlink OFDMA Networks	
<i>Luca Venturino, Università degli Studi di Cassino; Narayan Prasad, NEC Labs America; Xiaodong Wang, Columbia University</i>	
ARQ with Subcarrier Assignment for OFDM Systems.....	1723
<i>Chin Keong Ho, Institute for Infocomm Research; Hongming Yang, Eindhoven University of Technology; Ashish Pandharipande, Philips Research Laboratories; Jan W. M. Bergmans, Eindhoven University of Technology</i>	
Iterative Decoding, Offset and Channel Estimation for OFDM using the Unscented Kalman Filter	1728
<i>Taehyuk Kang, Ronald Iltis, University of California, Santa Barbara</i>	
PAPR Reduction in OFDM Systems by Successive Random Sign Negation	1733
<i>Shouxing Qu, Farzaneh Kohandani, Jim Womack, Research In Motion Limited</i>	
Robust Peak-to-Average Ratio Reduction in OFDM with Adaptive Clipping Control	1738
<i>Kitaek Bae, Edward Powers, University of Texas at Austin</i>	
An SDP Approach for PAPR Reduction in OFDM Systems Using Partial Transmit Sequences	1743
<i>Ahmad Rushdi, Chen Meng, Jamal Tuqan, University of California, Davis</i>	
PAPR Reduction in Trigonometric-Based OFDM Systems	1747
<i>Ahmad Rushdi, Jamal Tuqan, University of California, Davis</i>	
Tone Selection for PAR Reduction via Tone Reservation in Uplink OFDMA.....	1752
<i>Brian Krongold, University of Melbourne</i>	
Near ML Detection of Nonlinearly Distorted OFDM Signals.....	1756
<i>Dimitris Papailiopoulos, George Karystinos, Technical University of Crete</i>	

Session: TP8b3 - Estimation, Synchronization, and Equalization

Session Chair: P. P. Vaidyanathan - California Institute of Technology

A Semi-Blind Pilot-Assisted Channel Estimation Algorithm in OFDM Systems	1763
<i>Borching Su, P. P. Vaidyanathan, California Institute of Technology</i>	
Efficient Clock Synchronization in Wireless Sensor Networks	1768
<i>Qasim Chaudhari, Yi Zhou, Erchin Serpedin, Texas A&M University</i>	
Pulse-coupled distributed PLLs in heterogeneous wireless networks	1770
<i>Oswaldo Simeone, New Jersey Institute of Technology; Gesualdo Scutari, University of Rome</i>	
Cramer-Rao Bounds and Performance Analysis of a Low-Complexity Algorithm for Burst Mode	1776
Synchronization	
<i>Jake Gunther, Todd Moon, Utah State University</i>	
Time-Slotted Round-Trip Carrier Synchronization.....	1781
<i>Ipek Ozil, Donald Brown, Worcester Polytechnic Institute</i>	

Joint Estimation of Carrier Frequency Offset and I/Q Imbalance for Direct Conversion OFDM System with Constrained Preambles	1786
<i>Jonghun Park, Yusung Lee, Hyuncheol Park, Information and Communications University</i>	
Preamble-based Symbol Timing Estimation for Wireless OFDM Systems	1791
<i>Manik Gadhiok, Joseph R. Cavallaro, Rice University</i>	
Iterative B-spline Estimator Using Superimposed Training in Doubly-Selective Fading Channels.....	1795
<i>Junruo Zhang, Yuriy V. Zakharov, University of York</i>	
Session: WA1a - Source Localization and Imaging	
Session Chair: Yimin Zhang - Villanova University	
DOA Estimation for UWB Time Hopping Impulse Radio Multiple Access System.....	1803
<i>Joni Polili Lie, Nanyang Technological University; Chong Meng Samson See, DSO National Laboratories; Boon Poh Ng, Nanyang Technological University</i>	
Some new techniques of localization of spatially distributed sources.....	1807
<i>Yide Wang, Ahmed Zoubir, IREENA/Polytech''Nantes</i>	
Time Reversal Synthetic Aperture Radar Imaging in Multipath	1812
<i>Yuanwei Jin, José M. F. Moura, Carnegie Mellon University; Michael T. Mulford, Raytheon Corporation; Nicholas O''Donoughue, Carnegie Mellon University; Alphonso A. Samuel, Raytheon Corporation</i>	
A Novel Approach for Multiple Moving Target Localization Using Dual-Frequency Radars and Time-Frequency Distributions	1817
<i>Yimin Zhang, Moeness Amin, Fauzia Ahmad, Villanova University</i>	
Session: WA1b - Adaptive Radar Signal Processing	
Session Chair: Braham Himed - Signal Labs, USA	
A Modulation Based Approach to Wideband-STAP.....	1825
<i>Ke Yong Li, C & P Technologies, Inc.; Unnikrishna Pillai, Polytechnic University; Peter Zulch, Michael Callahan, Air Force Research Laboratory</i>	
Knowledge-Aided Space-Time Adaptive Processing.....	1830
<i>Xumin Zhu, Jian Li, University of Florida; Petre Stoica, Uppsala University; Joseph Guerci, SAIC</i>	
Multi-Channel Fast Parametric Algorithms and Performance for Adaptive Radar.....	1835
<i>Larry Marple, Oregon State University; Phil (Cpt.) Corbell, Muralidhar Rangaswamy, Air Force Research Laboratory</i>	
Doppler resilience, Reed-Müller codes and Complementary Waveforms	1839
<i>Sofia Suvorova, University of Melbourne; Stephen Howard, Defence Science and Technology Organization; Bill Moran, University of Melbourne; Robert Calderbank, Ali Pezeshki, Princeton University</i>	
A Notion of Diversity Order in Distributed Radar Networks.....	1844
<i>Rani Daher, Raviraj Adve, University of Toronto; Michael Wicks, Air Force Research Laboratory</i>	
Session: WA2a - New Optical Techniques for Cancer Detection and Therapy	
Session Chair: Brian Helmke	
Estimation of Cell Statistics on a Cell Manifold for High Content Screening with Automated Cell Segmentation	1851
<i>Saurav Basu, Scott T. Acton, University of Virginia</i>	
High Resolution Optical Tracking to Identify Adhesive Events in Vitro.....	1856
<i>Brian Schmidt, Christopher Paschall, William Guilford, Michael Lawrence, University of Virginia</i>	
Novel FRET-Based Radiosensitization Using Quantum Dot-Photosensitizer Conjugates	1861
<i>Wensha Yang, Paul Read, Jun Mi, James Larner, Stan Benedict, Ke Sheng, Brian Helmke, University of Virginia</i>	
Session: WA2b - Signal Processing Techniques in Advanced MR Imaging	
Session Chair: Wm. Scott Hoge	
Fast Regularized Parallel Imaging in an MR Image-Guided Therapy Application.....	1869
<i>W. Scott Hoge, Renxin Chu, Ferenc Jolesz, Brigham and Women''s Hospital; Eigil Samset, University of Oslo</i>	

Joint Estimation of Coil Sensitivity and Image in Parallel Magnetic Resonance Imaging	1874
<i>Leslie Ying, Jinhua Sheng, University of Wisconsin-Milwaukee</i>	
A Bayesian Framework For The Reconstruction of Accelerated MRI Using Graph Cuts.....	1879
<i>Ashish Raj, University of California, San Francisco; Gurmeet Singh, Ramin Zabih, Cornell University</i>	
Reconstruction of MRI Data Using Sparse Matrix Inverses	1884
<i>Alexey Samsonov, Walter Block, Aaron Field, University of Wisconsin</i>	

Session: WA3a - Wireless Optical Communications

Session Chair: Maité Brandt-Pearce - University of Virginia, USA

Relay-Assisted Free-Space Optical Communication.....	1891
<i>Majid Safari, Murat Uysal, University of Waterloo</i>	
Adaptive Optical Wireless OFDM System with Controlled Asymmetric Clipping.....	1896
<i>Jelena Grubor, Volker Jungnickel, Klaus-Dieter Langer, Fraunhofer Institute for Telecommunications - Heinrich-Hertz-Institut</i>	
LDPC-Coded Optical Communication over the Atmospheric Turbulence Channel.....	1903
<i>Ivan Djordjevic, University of Arizona</i>	

Session: WA3b - Iterative Receiver Processing in Communication Systems

Session Chair: Luc Vandendorpe - Université Catholique de Louvain, Belgium

Iterative carrier synchronization techniques in transmission systems protected by a powerful error-correcting code	1913
<i>Nele Noels, Marc Moeneclaey, Ghent University</i>	
Gradient Decoding Revisited	1918
<i>Phillip Regalia, Catholic University of America</i>	
Predictions on turbo-decoding performance for adaptive channel coding	1923
<i>Harold H. Sneessens, Xavier Jaspar, Cédric Herzet, Luc Vandendorpe, Université catholique de Louvain</i>	

Session: WA4 - Feedback in MIMO Systems

Session Chairs: Kiran Mukkavilli - Qualcomm and Ashutosh Sabharwal - Rice University

Performance Analysis of Finite Rate Feedback MISO Systems in the Presence of Estimation Errors and Delay	1931
<i>Yogananda Isukapalli, Bhaskar Rao, University of California, San Diego</i>	
Capacity Theorems for Channels with Designable Feedback	1936
<i>Youjian Liu, University of Colorado, Boulder</i>	
Two-Way Fading Channels: Training Protocol and Diversity-Multiplexing Performance.....	1941
<i>Christopher Steger, Ashutosh Sabharwal, Rice University</i>	
Design and Analysis of Two-Way Limited Feedback Beamforming Systems	1946
<i>Chun Kin Au-Yeung, David Love, Purdue University</i>	
Rate and Power Adaptation Over Slow Fading Channels With Noisy Quantized Feedback.....	1951
<i>Siavash Ekbatani, Farzad Etemadi, Hamid Jafarkhani, University of California, Irvine</i>	
Optimized CSI Feedback for Robust THP Design	1956
<i>Paula Castro, University of A Coruna; Michael Joham, TU Munich; Luis Castedo, University of A Coruna; Wolfgang Utschick, TU Munich</i>	
A Fair Score-Based Scheduler for Spatial Transmission Mode Selection	1961
<i>Malte Schellmann, Technical University of Berlin; Lars Thiele, Volker Jungnickel, Fraunhofer Institute for Telecommunications - Heinrich-Hertz-Institut; Thomas Haustein, Nokia Siemens Networks</i>	

Session: WA5a - Programmable and Reconfigurable Architectures

Session Chair: Joseph Cavallaro - Rice University

FPGA Realization of Peak-to-Average Power Ratio Reduction Techniques for OFDM Wireless Systems	1969
<i>Chris Dick, Helen Tarn, Xilinx Inc.</i>	
Scalable Architecture of MIMO Multi-carrier CDMA System on Programmable Logic	1976
<i>Yuanbin Guo, Nokia Siemens Networks; Joseph Cavallaro, Rice University</i>	

Design Space Exploration for Real-Time Reconfigurable Computing	1981
<i>Martin Holzer, Bastian Knerr, Markus Rupp, Vienna University of Technology</i>	
Matrix Decomposition Architecture for MIMO Systems: Design and Implementation Trade-offs	1986
<i>Christoph Studer, Patrick Blösch, Peter Friedli, Andreas Burg, ETH Zurich</i>	
Radio Testbeds Using BEE2.....	1991
<i>Susan Mellers, Brian Richards, University of California, Berkeley; Hayden Kwok-Hay So, University of Hong Kong; Shridhar Mubaraq Mishra, P. A. Subrahmanyam, U. C. Berkeley; Robert W. Brodersen, University of California, Berkeley</i>	

Session: WA5b - SOC Architectures

Session Chair: Neil Burgess - Icera Semiconductor

Architecture for a Non-Copyable Disk (NCdisk) Using a Secret-Protection (SP) SoC Solution	1999
<i>Michael Wang, Ruby Lee, Princeton University</i>	
Programmable SOC processor for video object recognition and tracking applications.	2004
<i>Maheshwa Kumarasamy, Roger Woods, Paul Miller, Queen's University Belfast</i>	
A Fault-Tolerant Complex FIR Filter for SoC Communication Technologies	2009
<i>Ian Steiner, Graham Jullien, ATIPS Laboratories</i>	

Session: WA6a - Radar Signal Processing

Session Chair: Michael Wicks - Air Force Research Laboratory

RF TOMOGRAPHY WITH APPLICATION TO GROUND PENETRATING RADAR.....	2017
<i>Michael Wicks, Air Force Research Laboratory</i>	
Knowledge-Aided, Physics-Based Signal Processing For Next-Generation Radar	2023
<i>William L. Melvin, Gregory Showman, Georgia Tech Research Institute</i>	
Auxiliary-Vector RADAR on MCARM Data	2028
<i>Dimitris Pados, State University of New York at Buffalo; George Karystinos, Technical University of Crete; Stella Batalama, State University of New York at Buffalo; John Matyjas, Air Force Research Laboratory, IFGC</i>	
A Net Track Solution to Pose-Angular Tracking of Maneuvering Targets in Clutter with HRR	2033
<i>Chun Yang, Sigtem Technology, Inc.; Erik Blasch, Air Force Research Laboratory; Wendy Garber, Riohard Mitchell, ATK Mission Research</i>	
Waveform Diversity for Different Multistatic Radar Configurations	2038
<i>I. Bradaric, G. T. Capraro, Capraro Technologies, Inc.; M. C. Wicks, USAF Research Laboratory</i>	

Session: WA6b - Signal Processing in Cognitive Radio Networks

Session Chair: Stella Batalama - State University of New York at Buffalo

Throughput Enhancing Cooperative Spectrum Sensing Strategies for Cognitive Radios.....	2045
<i>Kyounghwan Lee, Aylin Yener, Pennsylvania State University</i>	
Training Sequence Design for Wireless Collaborative Communication Systems in	2050
<i>Frequency-Selective Fading</i>	
<i>Peter Parker, Patrick Mitran, Harvard University; Daniel Bliss, MIT Lincoln Laboratory; Vahid Tarokh, Harvard University</i>	
Cognitive Medium Access in WLAN Bands: A Real-Time Testbed	2058
<i>Stefan Geirhofer, John Z. Sun, Lang Tong, Cornell University; Brian M. Sadler, Army Research Laboratory</i>	
Distributed spatio-temporal spectrum sensing: An experimental study	2063
<i>Chandrasekharan Raman, WINLAB, Rutgers University; Janani Kalyanam, University of Wisconsin-Madison; Ivan Seskar, Narayan Mandayam, WINLAB, Rutgers University</i>	
Distributed and Collaborative Primary Signal Feature Estimation for Cognitive Radios under	2068
<i>Communication Constraints</i>	
<i>Zhenlei Shen, Yan Li, Shaline Kishore, Lehigh University; Aylin Yener, Pennsylvania State University</i>	

Session: WA7a - Speech and Audio Coding

Session Chair: Andreas Spanias - Arizona State University

- Entropy-Constrained High-Resolution Lattice Vector Quantization Using a Perceptually Relevant2075
Distortion Measure
Richard Heusdens, Delft University of Technology; W. Bastiaan Kleijn, Royal Institute of Technology (KTH); Alexey Ozerov, KTH
- A Reduced Rate Ultra Low Delay Audio Coder using Multistage Vector Quantization2080
T.V. Sreenivas, Indian Institute of Science; Stefan Wabnik, Gerald Schuller, Fraunhofer IDMT
- Perceptual Audio Coding - A History and Timeline2085
James Johnston, Microsoft Corporation
- Packet Loss Concealment for Predictive Speech Coding Based on Extrapolation of Speech2088
Waveform
Juin-Hwey Chen, Broadcom Corporation

Session: WA7b - Wavelet and Filter Bank Methods for Image and Video Processing

Session Chair: Bryan Usevitch - University of Texas, El Paso

- Directional Filter Banks for Wavelet Decomposition of Images Based on the Radon Transform.....2095
Ricardo von Borries, Cristiano Jacques Miosso, Cristhian Potes, University of Texas at El Paso
- Two-Channel, Separable, Complex, Biorthogonal, Perfect Reconstruction Filter Banks.....2100
Bryan Usevitch, University of Texas at El Paso
- Equivalence of symmetric pre-extension and lifting step extension in the JPEG 2000 standard.....2105
Christopher Brislawn, Los Alamos National Lab
- Curvature Scale Space Application to Distorted Object Recognition and Classification2110
Natan Jacobson, Truong Nguyen, University of California, San Diego; Frank Crosby, Naval Surface Warfare Center - Panama City

Session: WA8a1 - Wireless Networks

Session Chair: Sennur Ulukus - University of Maryland

- Cooperative Beamforming and Power Control.....2117
Sharon Betz, Princeton University; Athina Petropulu, Drexel University; H. Vincent Poor, Princeton University
- A Reliability Study of RFID Technology in a Fading Channel.....2124
Weilian Su, Kyle M Beilke, Tri T. Ha, Naval Postgraduate School
- Closed Form Throughput of a Slotted ALOHA Network Using LMMSE Receiver2128
Hemabh Shekhar, Mary Ann Ingram, ArrayComm

Session: WA8a2 - Sensor Networks

Session Chair: Roy Yates - Rutgers University

- Distributed Estimation with Channel Estimation Error over Orthogonal Fading Channels.....2135
Habib Senol, Kadir Has University; Cihan Tepedelenlioglu, Arizona State University
- Asymptotic Analysis of Distributed Estimation over Fading Multiple Access Channels2140
Cihan Tepedelenlioglu, Mahesh Banavar, Andreas Spanias, Arizona State University
- MULTI-HOP PROGRESSIVE DECENTRALIZED ESTIMATION OF DETERMINISTIC2145
VECTOR IN WIRELESS SENSOR NETWORKS
Yi Huang, Yingbo Hua, University of California, Riverside
- Hypothesis Testing and Iterative WLS Minimization for WSN Localization under LOS/NLOS2150
Conditions
Giuseppe Destino, Davide Macagano, Giuseppe Abreu, University of Oulu
- Power Efficient Distributed Estimation in a Bandlimited Wireless Sensor Network2156
Thakshila Wimalajeewa, Sudharman K. Jayaweera, University of New Mexico

Session: WA8a3 - Radar and Array Signal Processing

Session Chair: Olivier Besson - ENSICA, France

- Multibeam Amplitude Comparison Problems for MIMO Radar's Angle Measurement2163
Qian He, Zishu He, Huiyong Li, University of Electronic Science and Technology of China

Waveform Design for MIMO Radar with Space-Time Constraints	2168
<i>Benjamin Friedlander, University of California, Santa Cruz</i>	
Robust Phase-Only Nulling for Adaptive and Non-adaptive Phased Arrays	2173
<i>Donald Day, Johns Hopkins University</i>	
Matched detector and estimator with signature uncertainty.	2177
<i>Jean Jacques Fuchs, IRISA / Univ. de Rennes 1</i>	
Derivation and analysis of an adaptive detector with enhanced mismatched signals rejection	2182
capabilities <i>Francesco Bandiera, Università del Salento; Olivier Besson, ISAE; Danilo Orlando, Giuseppe Ricci, Università del Salento</i>	
Morphological Component Analysis and STAP Filters	2187
<i>Hedley Morris, Monica De Pass, Claremont Graduate University</i>	
Wavefront Adaptive Raymode Processing for Over-the-Horizon HF Radar Clutter Mitigation	2191
<i>Oguz Kazanci, Igal Bilik, Jeffrey Krolik, Duke University</i>	
Effect of Bandwidth on Wideband-STAP Performance.....	2195
<i>Unnikrishna Pillai, Polytechnic University; Ke Yong Li, C & P Technologies, Inc.; Joseph Guerci, Guerci Consulting</i>	
Comparison of Radar-Based Human Detection Techniques	2199
<i>Sevgi Zubeyde Gurbuz, William L. Melvin, Douglas B. Williams, Georgia Institute of Technology</i>	
Time Reversal Transmission in MIMO Radar.....	2204
<i>Yuanwei Jin, José M. F. Moura, Nicholas O'Donoghue, Carnegie Mellon University</i>	
Coherent Change Detection Statistics for Multiple Polarization SAR Images.....	2209
<i>Rajesh Sharma, Northrop Grumman Corporation</i>	
Cramér-Rao Bound and Maximum Likelihood Estimation of Covariance Matrices with	2213
Non-Homogeneous Snapshots <i>Olivier Besson, Stéphanie Bidon, ISAE; Jean-Yves Tourneret, IRIT/ENSEEIH</i>	
A Closed Form Expression for the Number of Costas Arrays of Arbitrary Order	2218
<i>Bill Correll, Jr., General Dynamics</i>	
Compressive Sensing for GPR Imaging	2223
<i>Ali Cafer Gurbuz, James H. McClellan, Waymond R. Scott, Georgia Institute of Technology</i>	
A Graph-Theoretic Approach for Constraining Floor Plan Estimation from Radar Measurements	2228
<i>Jeffrey Krolik, Granger Hickman, Duke University</i>	
Decentralized Collaborative Uplink Beamforming With Robustness Against Channel Mismatches	2235
<i>Amr El-Keyi, Benoit Champagne, McGill University</i>	
Semi-Blind Adaptive Beamforming for Cyclostationary Signals: A Kalman Filtering Approach	2239
<i>Amr El-Keyi, Benoit Champagne, McGill University</i>	
A Novel Constrained Adaptive Algorithm Using the Conjugate Gradient Method for Smart	2243
Antennas <i>Lei Wang, Rodrigo de Lamare, University of York</i>	
On the Detection of Footsteps Based on Acoustic and Seismic Sensing	2248
<i>Satish Iyengar, Pramod Varshney, Syracuse University; Thyagaraju Damarla, US Army Research Laboratory</i>	
Signatures of Walking Humans from Passive and Active Acoustic Data using Time-Varying	2253
Vector Autoregressions <i>Melanie Rudoy, Charles Rohrs, Jingdong Chen, Massachusetts Institute of Technology</i>	
Session: OT1 - Other	
Detecting Specular Propagation Paths in the Presence of Distributed Scattering in Angle and	2259
Delay Domains <i>Cássio B. Ribeiro, Nokia Institute of Technology; Andreas Richter, Visa Koivunen, Helsinki University of Technology</i>
