

# **2008 3rd International Symposium on Communications, Control and Signal Processing**

**St. Julian's, Malta  
12-14 March 2008**

**Pages 1-531**

**IEEE Catalog Number:**  
**ISBN 13:**

**CFP08824-PRT**  
**978-1-4244-1687-5**

# Table of Contents

## PS01: Poster session 1

A Low Complexity IEEE 80211e Scheduling Scheme for Efficient Wireless Delivery .....	1
A New Method for Blood Cell Image Segmentation and Counting Based on PCNN and Morphology.....	6
An Edge-Based Segmentation of Prostate Ultrasound Images Using Phase Symmetry .....	10
Discrimination of Intended Movements based on Nonstationary EMG for A Prosthetic Hand Control .....	14
Fuzzy Image Fusion Application in Detecting Coronary Layers in IVUS Pictures.....	20
ARMA Modeling for the Diagnosis of Controlled Epileptic Activity in Young Children .....	25
ERP Qualification Exploiting Waveform, Spectral and Time-Frequency Infomax.....	31
Switching space-time interference cancellation for OFDM systems with unsynchronized cells.....	37
The Phase Invariance Condition for the Ultra-Wideband Voltage Controlled Attenuator .....	43
ANFIS and PCA Capability Assessment for Fault Detection in Unknown Nonlinear Systems .....	47
New Global Blind Equalization with Auto Phase Rotation Correction .....	53
Simulation-Based Validation of Improved BP-Based Decoding Algorithms of LDPC Codes.....	58
Extended Linear Phase Detector Characteristic of a Software PLL .....	62
Exponentially-Modulated Filter Bank Transmultiplexer with Fine-Coarse Adaptive Filtering .....	68
Adaptive Context for Generic Pattern Matching in Ad Hoc Social Networks.....	73
Explicit Solution of a Queue with Nonexhaustive Service Interruptions to Model Multiuser Access Interference .....	79
A Small Tunable Antenna Using Multiple Shorting Posts and Varactor diodes .....	83
Spatial Resolution of 1D Image-Based Barcode Reading: an Information Theoretical Approach.....	87
Substrate Noise Cancellation Circuit Tolerant of Large Digital Circuit.....	93
Clutter Reduction and Detection of Landmine Objects in Ground Penetrating Radar Data Using Likelihood Method.....	98
Evaluation of Medical Image Registration by Some Meta-heuristics.....	107

## SS01: Dirty RF

Comparison of the Sensitivity of OFDM and SC-FDE to CFO, SCO and IQ Imbalance.....	111
RF Impairments in High-rate Wireless Systems - Understanding the Impact of TX/RX-Asymmetry .....	117
Compensation of Frequency-Selective I/Q Imbalances in Space-Time Coded Multi-Antenna OFDM Systems .....	123
Baseband Analysis of Tx Leakage in WCDMA Zero-IF-Receivers.....	129

## SS02: Systems Biology

Application of Model Quality Evaluation to Systems Biology.....	135
Stochastic Analysis of Noisy Gene Expression .....	141
Moment Closure for Biochemical Networks .....	142
Robustness of Minimal Biochemical Oscillators.....	148

## CN01: Control Design Methods

Deadbeat Response is l2 Optimal .....	154
Partial Time Delayed Feedback Control of Chaos in a Hybrid Model of a DC-DC Converter .....	158
Navigation of Autonomous Mobile Robots in Connected Groups.....	162
Representations of Linear Systems .....	168
Multi AGV Path Planning in Unknown Environment Using Fuzzy Inference Systems .....	172
SP01: Adaptive and Non-Adaptive Filtering Implementations and Applications.....	178
Blind Equalization with Recurrent Neural Network Using Natural Gradient.....	178
Distortion Compensation of Nonlinear Systems Based on Indirect Learning Architecture .....	184
The Direct Design of Recursive or IIR Digital Filters.....	188
Set-Membership Subband Adaptive Filters .....	193

## Table of Contents

Algorithm and Architecture for High Speed Merged Arithmetic FIR Filter Generation .....	197
<b>SS03: MIMO Systems</b>	
Distributed MIMO in Multi-Cell Wireless Systems via Finite-Capacity Links.....	203
Secrecy Capacity of the 2-2-1 Gaussian MIMO Wire-tap Channel.....	207
The MIMO Wiretap Channel.....	213
Decentralized Handovers in Cellular Networks with Cognitive Terminals.....	219
Modeling and Estimation of the Direction-Delay Power Spectrum of the Propagation Channel.....	225
<b>SS04: Modelling and control of two-wheeled road vehicles</b>	
Influence of Road Camber on Motorcycle Stability .....	231
The Dynamics of the Accelerating Bicycle .....	237
A Virtual Rider for Motorcycles: An Approach Based on Optimal Control and Maneuver Regulation .....	243
Experimental Testing and Modelling of a Mechanical Motorcycle Steering Compensator .....	249
<b>CM01: Networks and QOS</b>	
Topology Conversion-Two-Hop Virtual Rings Routing-EAC Wavelength Assignment Algorithm for Many-to-Many Multicast Communications in DWDM Networks .....	255
Capacity Dimensioning for Quality of Service Maintenance in UMTS Networks.....	260
Sensor Networks for Vehicle Dynamics Control Systems: A Monitoring Perspective .....	263
Design of Mixed-Element Networks via Modeling .....	269
Adaptive Congestion Control in Networks with Multiple Congested Nodes .....	273
<b>SP02: Signal Processing and Applications I</b>	
Extended Analytical Design of Equiripple Comb FIR Filters .....	282
Frequency-Weighted L2-Sensitivity Minimization for MIMO Linear Discrete-Time Systems Subject to L2-Scaling Constraints .....	288
Neural Network Detection and Decoding of PSK Signals.....	292
Robust Wireless LAN Location Fingerprinting by SVD-Based Noise Reduction .....	295
Compensation of Memoryless Nonlinearities for Active Noise Control Applications.....	299
<b>PS02: Poster session 2</b>	
Reducing Feature Space Dimensions for Image Retrieval.....	305
An Approach to Numeral Recognition based on Improved LDA and Bhattacharyya Distance .....	309
A Multiscale And Multi-Orientation Contrast Enhancement Method For Digital Mammography .....	312
Robust Method of Digital Image Stabilization .....	316
Combination of Multiple Images for Flash Re-Lightning .....	322
Multifont Ottoman Character Recognition Using Support Vector Machine .....	328
Two Adaptive Approaches of Nonlinear System Control .....	334
Robust Watermarking of 3-D Polygonal Models .....	340
The Algorithm for Processing Phase-shift Keyed Signals in the Problem of Time Delay Estimation .....	344
Model Based Defect Detection Problem: Particle Filter Approach .....	348
Learning Algorithms with Boosting for Vector Quantization .....	352
Determination of the Cut-Off Frequency of the Anti-Symmetric Circumferential Waves Using the Time-Varying Autoregressive TVAR .....	357
Spatio-Temporal Adaptive Array for Asynchronous Multiuser MIMO-STBC Transmission.....	362
Noise Reduction Combining Microphones and Piezoelectric Devices.....	368
Effectiveness of Speaker-Dependent Feature Score Pruning in Speaker Verification.....	372
Humanoid Separation of Speech Sources In Reverberant Environments .....	377

## Table of Contents

An Adaptive Maximum Log-Likelihood Approach to Voice Activity Detection .....	383
Dynamic Rate Allocation with Variable Quantization in Multi-Sensor Wyner-Ziv Video Coding Systems .....	388
<b>SS05: Filter banks for flexible and spectrally agile signal processing for future wireless communications</b>	
Sensitivity of Multi-User Filter-Bank Multicarrier Systems to Synchronization Errors.....	393
URANUS: Flexible Parameterized Baseband Transceiver Architecture Based on Filter Banks.....	399
OFDM/OQAM: An Appropriate Modulation Scheme for an Optimal use of the Spectrum .....	405
Practical Issues in Frequency Domain Synchronization for Filter Bank Based Multicarrier Transmission .....	411
<b>CN02: Control System Modeling and Identification</b>	
A Comparative Study of Non-Linear System Models .....	417
Modeling Interconnected Systems.....	421
Parametric Identification of Plants with Multiple Delays and Internal Feedbacks using Genetic Algorithm.....	425
Reduced Volterra Model of Non Linear MIMO Systems with Decoupled Outputs.....	430
Adaptive Nonlinear System Identification using Comprehensive Learning PSO.....	434
The Use of Redundancy to Evaluate the Manufacturing System Total Robustness: A Quality Approach.....	440
<b>CM02: Wireless Sensor Networks</b>	
Smart Configurable Wireless Sensors and Actuators for Industrial Monitoring and Control.....	447
Average Load Distance (ALD) Communication Mode for Wireless Sensor Networks .....	449
Source Correlation, Transmit Diversity, and Channel Coding in Wireless Sensor Networks .....	455
Markov Chain-Based Performance Evaluation of IEEE 802154 Multihop Wireless Sensor Networks.....	461
Increasing Wireless Sensor Network Lifetime through the Application of SOM Neural Networks .....	467
Zigbee Wireless Sensor Networks with Data Fusion.....	472
<b>SP03: Image Processing I</b>	
Pith Detection on CT-Cross-Section Images of Logs: An Experimental Comparison .....	478
Restoration of Semi-Transparent Blotches in Damaged Texts, Manuscripts, and Images through Localized, Logarithmic Image Enhancement.....	484
Variational Phasor Mean Field Model for Object Recognition .....	490
Total-Variation Approach and Wavelet Shrinkage for Color-Image Denoising with Inter-Channel Cross-Correlations .....	494
Home Video Structuring with a Two-Layer Shot Clustering Approach.....	500
Constant Time Neighbor Finding in Quadrees: An Experimental Result.....	505
<b>PS03: Poster session 3</b>	
Radiation by Slotted Elliptic Antenna Coated by Lossy and Lossless Multi-Dielectrics Metamaterials.....	511
Control Relevant Identification for Controlling a Continuous-Stream Bioreactor with Unknown Dynamics .....	515
Algebraic and Quantum Theoretical Approach to Coding on Wiretap Channels.....	520
Reduced Reference Watermark-Based Image Transmission Quality Metric.....	526
Training Sequence Optimization For Frequency Selective Channels With MAP Equalization .....	532
Component-Based Face Detection Method for Various Types of Occluded Faces .....	538
Color Image Copyright Ownership Protection Based on a Multi-Spectral Selective Pixel-Wise Watermarking Technique .....	544
Models of Multiple Inference in Statistical Fluctuation for Image Restoration.....	550
Line Tracking Algorithm for Scribbled Drawings.....	554
Triangulated, Connected Sets for Building Detection from Irregularly Spaced LiDAR .....	560
Automatic Intensity-Pair Distribution for Image Contrast Enhancement.....	566

## Table of Contents

A New Approach In Super Resolution Based On An Adaptive Regularization Parameter .....	572
Parallel Implementation of Morphological Processing on Cell/BE with OpenCV Interface.....	578
Novel DC Offset Cancellation in Direct Conversion Receivers .....	584
On the Weibull Distribution with Arbitrary Correlation.....	588
Using robust features with multi-class SVMs to classify noisy sounds.....	594
A New Single Tone Detection Algorithm.....	600
The Binary Vector Quantization.....	604
Empirical Mode Decomposition and Some Operators to Estimate Instantaneous Frequency: A Comparative Study .....	608
On Convergence of the Mean Shift Algorithm .....	614
Kautz-Based Adaptive Control.....	619
Face Recognition Based on Face Partitions Using Common Vector Approach .....	624
<b>SS06: Digital Signal Processing for Smart Multimedia Systems</b>	
Fast Inter-Frame Mode Decision for H264 Using Bayesian Formula and Motion Status .....	629
Modeling of 3-D DCT Coefficients for Fast Video Encoding.....	634
Video Image Enhancement Scheme for High Resolution Consumer Devices.....	639
Joining Explicit FMO, FEC Coding, and Adaptive Interleaving Depth for H264 Wireless Video Transmission6.....	45
A New Auto-Focus Method based on Focal Window Searching and Tracking Approach for Digital Camera.....	650
<b>SS07: Network systems: estimation</b>	
State Estimation with a Remote Sensor Under Limited Communication Rate.....	654
Challenging Aspects in Consensus Protocols for Networks .....	660
Reputation Management in Distributed Systems.....	666
Kalman Filter Estimation of the Contention Dynamics in Error-Prone IEEE 80211 networks.....	671
Sensor Fusion and Estimation Strategies for Data Traffic Reduction in Rooted Wireless Sensor Networks .....	677
<b>CN03: Nonlinear Control and Applications</b>	
Nonlinear Observer-Based Control of Unstable Wells.....	683
A Nonlinear Approach with Gain Schedule Control Adaptation for a Complete-Model Diesel-Engine Diagnosis.....	689
Inverse Fuzzy Model Control With Online Adaptation via Big Bang-Big Crunch Optimization .....	697
New SISO and MISO Adaptive Nonlinear Predictive Controllers Based on Self-Organizing RBF Neural Networks.....	703
Applications for Nonlinear Processes Using a Predictive Control .....	709
<b>SP04: Biomedical Signal and Image Processing I</b>	
Color Wavelet Cross Co-Occurrence Matrices for Endoscopy Image Classification.....	715
Wavelet Transform Use for Feature Extraction and EEG Signal Segments Classification .....	719
The Photon Average Trajectory Method for One-step Diffuse Optical Tomography: Algebraic Reconstruction and Postprocessing.....	723
Facial EMG Contamination in EEG Signals: Characteristics and Effects of Spatial Filtering .....	729
Oropharyngeal Dysphagia Identification Using Wavelets and Optimum Path Forest.....	735
<b>SS08: Advanced Communication Techniques</b>	
On Encoding and Rate Adaptation for MIMO_NC .....	741
Uplink OFDMA without Cyclic Prefix: An Interference Cancellation Approach.....	747
Linear Detection in Iterative Joint Multiuser Decoding .....	753
Filter Banks and OFDM-OQAM for High Throughput Wireless LAN.....	758
<b>SS09: Sparsity in Signal and Image Processing</b>	
Sparse Non-Negative Solution of a Linear System of Equations is Unique .....	762

## Table of Contents

Some Recovery Conditions for Basis Learning by L1-Minimization.....	768
Faster and Greedier: Algorithms for Sparse Reconstruction of Large Datasets .....	774
Dictionary Learning Based Dimensionality Reduction for Classification.....	780
An Adaptive Orthogonal Sparsifying Transform for Speech Signals.....	786
<b>CM03: Digital Communications I</b>	
Signal-to-Noise Ratio Requirements for Wireless Relay Networks .....	791
BER Performance of Cooperative Systems in the Presence of Multipath Propagation .....	795
PAPR Analysis in Wavelet Packet Modulation .....	799
Performance Analysis of Type II Hybrid ARQ with Low-Density Parity-Check Codes .....	804
Semi-Blind Turbo Decoding in Impulsive Noise Channels.....	810
<b>SP05: Speech and Audio</b>	
Incomplete Spectrogram Reconstruction with Kalman Filter for Noise Robust Speech Recognition.....	814
Optimized Linear Discriminant Analysis for Extracting Robust Speech Features .....	819
Combinational Methods for Improvement of Packet-Loss Recovery in Distributed Speech Recognition .....	825
A Reproducing Kernel Hilbert Space Approach for Speech Enhancement.....	831
Missing Feature Reconstruction with Multivariate Laplace Distribution (MLD) for Noise Robust Phoneme Recognition.....	836
<b>PS04: Poster session 4</b>	
Root-Raised Cosine Filter Influences on PAPR Distribution of Single Carrier Signals.....	841
Optimizing KQML for Usage in Power Distribution Network Simulator.....	846
The Three States Functions: Foundations and Complexity .....	850
Multi-Hop Asynchronous Cooperative Diversity: Performance analysis.....	857
Bandpass Sampling of Multiple Single Sideband RF Signals .....	863
Image Compression through Optimization of Linear Mapping of Parametrically Generated Features.....	867
Modifying Weber Fraction Law to Postprocessing and Edge Detection Applications.....	871
An Improved Image Demodulation Algorithm Based On Teager-Kaiser Operator .....	876
Wavelets and Moments for Obstacle Classification .....	882
An Adaptive Deblocking Algorithm For Low Bit-Rate Video.....	888
A Weighted Least-Squares Approach for B-Spline Shape Representation .....	894
Saturation Throughput of IEEE 80211 Using Carrier Sense Mechanism in Backoff Intervals.....	899
Polynomial Estimation of Time-varying Multipath Gains with ICI Mitigation in OFDM Systems.....	905
PAR Reduction for OFDM Signal Based on Deep Clipping.....	911
Blind Symbol Timing Estimation for OFDM/OQAM Systems.....	917
An Accurate and Low Complex Channel Estimator for OFDM WiMAX.....	922
Efficient Adaptive Algorithm for Modeling a Speech Signal.....	927
Joint Azimuth, Elevation and Time of Arrival Estimation of 3-D Point Sources.....	931
New Video Synthesis Based on Flocking Behavior Simulation.....	936
Blind Carrier-Frequency Offset Estimation for Pulse Shaping OFDM/OQAM Systems.....	942
<b>SS10: System Theory and Control Problems of the Future</b>	
Control Problems in Quantum Mechanics .....	948
The Use of Dwell-Time Switching to Maintain a Formation with Only Range Sensing on Autonomous Agents.....	954
Optimal Node Placement in Wireless Networks.....	960
Control Paradigms for Quantum Engineering .....	966
Constrained Coalitional Games and Networks of Autonomous Agents .....	972

## Table of Contents

Kolmogorov-Sinai Causality in Chaotically Intertwined Dynamics: A Heart Rate Variability Case Study .....	980
<b>CM04: Mobile and Wireless Communications</b>	
Simple and Reliable Low Power Image Communication based on DPCM and Multiple Refinements Through Feedback .....	986
Non-Optimal Receiver for Space Time Spreading Across a Time Hopping over Ultra Wideband PPM.....	990
Comparison of Cooperative Schemes using Joint Channel Coding and High-order Modulation.....	994
Resilient Transmission of H264/AVC video sequences using Probabilistic Neural Networks .....	999
On MIMO for UTRA LTE .....	1004
On MIMO With Successive Interference Cancellation Applied to UTRA LTE.....	1009
<b>SP06: Video and Multimedia Signal Processing</b>	
An Improved Huber-MAP Post Filtering Method for DCT-based Compressed Video Sequences .....	1014
Video Segmentation and Key Frame Extraction with Parametric Model.....	1020
A Spatial Domain Steganographic Scheme for Reducing Embedding Noise.....	1024
Complete Video Quality Preserving Data Hiding with Reversible Functionality .....	1029
A Scalable Video Scrambling Method in MPEG Compressed Domain .....	1035
Improved Video Coding with Residual Prediction for Extended Spatial Scalability .....	1041
<b>SP07: DSP for Communications</b>	
Robust Multi-Channel Crosstalk Resistant Noise Cancellation Based on SAD Structure and LMMN Algorithm .....	1047
A Reduced Complexity Equalizer for OQPSK.....	1053
Combined K-best Sphere Decoder Based on the Channel Matrix Condition Number .....	1058
Recursive Levenberg-Marquardt Per-Tone Equalisation for Discrete Multitone Systems .....	1062
Finite Word Length Analysis of the EBA-DFE.....	1067
On Design of CIC Decimation Filter with Improved Response .....	1072
<b>PS05: Poster session 5</b>	
A Fast Method For Image Noise Estimation Using Laplacian Operator and Adaptive Edge Detection .....	1077
CSFNN Optimization of Signature Recognition Problem for a Special VLSI NN Chip.....	1082
Teager-Kaiser Energy Bilevel Thresholding .....	1086
Setup Considerations for Calibration of a Stereovision System for Long Range Obstacle Detection.....	1091
Man-In-The-Middle Attacks on Bluetooth: a Comparative Analysis, a Novel Attack, and Countermeasures.....	1096
An X-Band SiGe Low-Noise Amplifier with High Gain and Low Noise Figure .....	1103
Problems in PLD Implementation of All-digital DLL.....	1107
Prototype Filter Design for Arbitrary Delay Exponentially-Modulated Filter Bank .....	1111
Adaptive Subband Notch Filter for Multiple RFI Sources Detection.....	1115
On-line Bayesian Cramer-Rao Bound for Oversampled Dynamical Phase Offset Estimation.....	1120
Evaluation of the SVM-Based Adaptive Beamforming Technique in Mismatch and No-Mismatch Scenarios.....	1127
Taking Advantage of Pronunciation Variation in Unit Selection Speech Synthesis for Polish .....	1133
A blind audio watermarking scheme based on Neural Network and Psychoacoustic Model with Error correcting code in Wavelet Domain.....	1138
A Playback Attack Detector for Speaker Verification Systems.....	1144
Speech Assistive Technology to Improve the Interaction of Dysarthric Speakers with Machines.....	1150
Speech Signal Noise Reduction by EMD .....	1155
Incorporating Formant Cues into Distributed Speech Recognition Systems .....	1159
Time-Delay Radial Basis Functions in Silicon for Phoneme Recognition .....	1163
On Complex Domain Decision Feedback Equalizer Based on Bell-Sejnowski Neuron .....	1167

# Table of Contents

## **SS11: Recent developments in OFDM systems**

Space-Time-Coded OFDM-Transmission with Spatial Interpolation in the Presence of Severe Doppler Spread .....	1173
A Novel Phase Based SNR Estimation Method for Constant Modulus Constellations.....	1179
MIMO-OFDM on a Flexible Laboratory Radio System.....	1184
On SNR Degradation in OFDM Systems with Aliasing and a Frequency Offset.....	1188

## **SS12: Bioinformatics and System Biology** .....

Effective Annotation of Noncoding RNA Families Using Profile Context-Sensitive HMMs.....	1193
Finding Common Aberrations in Array CGH Data .....	1199
Common Trend Extraction from Sets of Genomic Signals .....	1205
Universal models with Memory for Genomic Sequence Analysis .....	1211
Classification Techniques for Recurrent DNA Copy Number Data .....	1218

Molecular Genetic Analysis of Nucleotide Polymorphisms Associated with Rifampin and Isoniazid Resistance in Human Isolates of Mycobacterium tuberculosis.....	1222
---	------

## **CN04: Control Applications** .....

Self-Organized Learning Model for Behavior Emergence and its Application to Mobile Robot.....	1226
EIV-Based Fault Diagnosis in a Light Sport Aircraft.....	1232
Distributed Motor Control System With Transmission Time Delay .....	1236
Real Time Prediction of Time Delays in a Networked Control System .....	1242
Neuro-Adaptive Dynamic Control for Mobile Robots: Experimental Validation .....	1246

## **SP08: Image Processing II**

A Novel Wavelet Thresholding Method for Adaptive Image Denoising .....	1252
Computational Colour Constancy by using Two Learning Machines: Contributions to Neural Networks and Ridge Regression for Illuminant Estimation.....	1257
Parameter Optimization of an Embedded Watermark Using a Genetic Algorithm .....	1263
Night Vision Enhancement Using Wigner Distribution .....	1268
Block Truncation Coding by Using Genetic Algorithm .....	1273

## **SS13: Audio Signal Processing I**

Stereo to Wave-Field Synthesis Music Up-mixing: An Objective and Subjective Evaluation.....	1279
Audio Signal Decomposition for Pitch and Time Scaling .....	1285
Modified Phase Vocoder Scheme for Dynamic Frequency Warping .....	1291
A Refined Physical Model of the Clarinet using a Variable Air Jet Height.....	1297
Digital Sound Synthesis of String Vibrations with Physical and Psychoacoustic Models .....	1302

## **SS14: Mobile Terminal Localisation**

NLOS Mobile Terminal Position and Speed Estimation .....	1308
Conformal Transformation for Efficient Root-TOA Estimation .....	1314
New Asymptotic Results on Two Fundamental Approaches to Mobile Terminal Location .....	1320
The Application of Database Correlation Methods for Location Detection in GSM Networks .....	1324

## **CM05: Digital Communications II**

Performance Evaluation of Quasi-Cyclic LDPC Codes for IEEE80211n Based MIMO-OFDM Systems .....	1330
The Effect of Clock Jitter on the Performance of Bandpass ?? ADCs.....	1334
Pulse Shape Modulation for UWB Communication: Performance with Channel Estimation Error.....	1339
Supervised Equalisation of Non Linear Numerical Communication Channels .....	1345
A Flexible Method to Approximate Marcum Q-Function Based on Geometric Way of Thinking .....	1351

## **SP09: Biomedical Signal and Image Processing II**

## Table of Contents

Functional Transforms in MR Image Segmentation .....	1357
A Method for Extracting Subspace of Deterministic Sources from EEG Data .....	1361
Intelligent Artificial Ants based Feature Extraction from Wavelet Packet Coefficients for Biomedical Signal Classification .....	1366
A Computer-Aided System for the Detection of Prostate Cancer Based on Magnetic Resonance Image Analysis .....	1372
Study Of Non-Synchronized EMG Epochs Using A Simple Synchronizing Mechanism In Time Domain.....	1378
<b>PS06: Poster session 6</b>	
A Low-Cost Adaptive Algorithm for Blind Equalization without Channel Order Estimation .....	1384
Predicting Void Wave Instability in Gas-Lifted Wells .....	1389
Optimal Solution for the Fixed Margin Problem in Digital Subscriber Lines .....	1395
Random Partial Update Sum-Squared Autocorrelation Minimization Algorithm for Channel Shortening (RPUSAM) .....	1400
A Three Phase to Three Phase Bidirectional Power Matrix Converter.....	1404
Digital Watermarking: Spreading Code versus Channel Coding.....	1409
The Effect of Unknown Non-flat Interference Power Spectral Density in OFDMA Cellular System .....	1413
Performance of an Interference Canceller for P-MP Satellite Networks with Nonlinear TWTA.....	1419
H <sub>∞</sub> Integral Control of a Buck-Boost dc-dc Converter .....	1425
Electrical Energy Demand Prediction Using Artificial Neural Networks and Support Vector Regression.....	1431
Influence of Systematic Errors on a Sine Wave Frequency Estimation by Means of Interpolated DFT Method.....	1436
A Step-Gain Optimization Method by the Background Experimental Scheme for An ANC SRS.....	1440
On the Detection of Transient Signals using Cross-B-Energy Operator.....	1445
On Improving the PPM Algorithm .....	1450
Wyner Ziv Codec Design for Surveillance System using Adaptive Puncturing rate.....	1454
DVB-MHP iTV to Blu-ray System Information Transcoding.....	1460
Design of H264/AVC Entropy Decoder without Internal ROM/RAM Memories .....	1464
Flux Position Estimation Using Current Derivatives for the Sensorless Control of AC Machines .....	1468
<b>SS15: Audio Signal Processing II</b>	
Usage of the Fourier Transform as an Invertible Extension to the Radon Transform with Application to Wave Front Extraction .....	1474
Efficient Massive Multichannel Active Noise Control using Wave-Domain Adaptive Filtering .....	1480
Reproduction of a Plane-Wave Sound Field using Planar and Linear Arrays of Loudspeakers.....	1486
Room Acoustic Analysis: Complementing 2D Measurements by 3D Simulations .....	1492
Diffusing Boundaries in the Digital Waveguide Mesh and their Effect on Reverberation Time.....	1498
Virtual Room Acoustics using Finite Difference Methods How to Model and Analyse Frequency-Dependent Boundaries? .....	1504
<b>SP10: Image Processing III</b>	
Efficient Utilization of Bandwidth in JSCC for Wireless Communication .....	1510
Image Enhancement in the 2D DCT Domain Using a Band-adaptive Contrast Modification.....	1516
Compression for Visual Pattern Recognition.....	1520
Automatic Registration Method For Frontal 3D Face .....	1524
Real-Time Hand Postures Recognition using Low Computational Complexity Artificial Neural Networks and Support Vector Machines .....	1530
A SURE Approach for Image Deconvolution in an Orthonormal Wavelet Basis .....	1536
<b>SP11: Signal Processing and Applications II</b>	
Fusion of ECG Sources for Human Identification.....	1542

## Table of Contents

A New Approach for Identifying Noisy Input-Output FIR Models.....	1548
Power-Efficient Dynamic Quantization for Multisensor HMM State Estimation over Fading Channels .....	1553
"Soft" Acoustic Event Detectors for Limited Resources Platforms .....	1559
Configurable K-best MIMO Detector Architecture.....	1565
Interleaved Optimization-Quantization of Reflection Coefficients: OQ-Levinson-Durbin and OQ-Burg Algorithms .....	1570
<b>CM06: Communications Receivers</b>	
PLL Based Coherent Detector for Beacon Receivers Using DSP Techniques .....	1576
Maximum Likelihood Semi-Blind Equalization of Doubly Selective Channels .....	1580
Interference Aware MMSE Equalization for MIMO TxAA.....	1585
Decoding with a-Priori Information: Analysis and Codes' Design Criteria .....	1590
Reduced Complexity and Improved Performance Receiver for Downlink MIMO MC-CDMA Systems.....	1596
