

AMC'08

The 10th International Workshop
on Advanced Motion Control

Centro Congressi Santa Chiara, Trento, Italy
March 26th-28th, 2008

Proceedings
Volume 1 of 2

Technical sponsors

Technical co-sponsor

UNIVERSITY
OF TRENTO - Italy

Faculty of Engineering
Department of Mechanical and Structural Engineering

With the support of

TABLE OF CONTENT

VOLUME I

	PAGE
<u>PLENARY SESSIONS</u>	
Realization of Fine Motion Control Based on Disturbance Observer	1
Kiyoshi Ohishi	
Physical Human-Robot Interaction: Dependability, Safety, and Performance	9
Antonio Bicchi, Michele Bavaro, Gianluca Boccadamo, Davide De Carli, Roberto Filippini, Giorgio Grioli, Marco Piccigallo, Giovanni Tonietti, Riccardo Schiavi, Soumen Sen	
Classical Control Revisited: Variations on a Theme	15
William C. Messner	
<u>MOBILE AND WALKING ROBOTS 1</u>	
Tracking Multiple Moving Objects in a Dynamic Environment for Autonomous Navigation	21
Jorge Almeida, Rui Araujo	
SIRUS: A mobile robot for Floating Production Storage and Offloading (FPSO) ship hull inspection	27
Luciano Menegaldo, Melquisedec Santos, Gustavo Ferreira, Rodrigo Siqueira, Lucas Moscato	
Pushing Operation by Two-Wheel Inverted Mobile Manipulator	33
Koji Sasaki, Toshiyuki Murakami	
Movement Control using Zero Dynamics of Two-wheeled Inverted Pendulum Robot	38
Naoya Hatakeyama, Akira Shimada	
Motion coordination control of multiple marine crafts	44
Jawhar Ghommam, Gérard Poisson	

SS7-1 - IMAGE PROCESSING FOR MOTION CONTROL -1

A Method of Single Camera Robocup Humanoid Robot Localization using Cooperation with Walking Control	50
Hideaki Minakata, Yasuo Hayashibara, Kazuhiro Ichizawa, Takehito Horiuchi, Masahiro Fukuta, Shohei Fujita, Hiroshi Kaminaga, Kiyoshi Irie, Hajime Sakamoto	
Abnormality Detection Monitoring System for Elderly People in Sensing and Robotic Support Room	56
Hirokazu Seki, Susumu Tadakuma	
Target Distance Measurement based on Camera Moving Direction Estimated with Optical Flow	62
Masaaki Shibata, Tomohiko Makino, Masahide Ito	
Decoupled rotational motion control for visual walking stabilization	68
Yosuke Asano, Atsuo Kawamura	
Uncalibrated Visual Servo Control with Neural Network	74
Rok Klobucar, Jure Cas, Riko Safaric	

INPUT AND COMMAND SHAPING

A Linear Programming Approach To Design Robust Input Shaping	80
Lieboud Van den Broeck, Goele Pipeleers, Jan De Caigny, Bram Demeulenaere, Jan Swevers, Joris De Schutter	
Polynomial spline input design for LPV motion systems	86
Jan De Caigny, Bram Demeulenaere, Joris De Schutter, Jan Swevers	
Delayed-Reference Anti-Swing Control of Overhead Crane Systems	92
Alberto Trevisani, Dario Richiedei	
Dynamically Optimal Polynomial Splines for Flexible Servo-Systems: Experimental Results	98
Jan De Caigny, Bram Demeulenaere, Joris De Schutter, Jan Swevers	
Generalized Repetitive Control: Better Performance With Less Memory.	104
Goele Pipeleers, Bram Demeulenaere, Joris De Schutter, Jan Swevers	

SENSING IN ADVANCED MOTION CONTROL

System Approach: A paradigm for Robotic Tactile Sensing	110
Ravinder S. Dahiya, Maurizio Valle, Giorgio Metta	
Stability Analysis of an Extremum Seeking Controller for Mode-matching in Vibrating Microgyros	116
Riccardo Antonello, Roberto Oboe	

A Low-Power Interface for the Readout and Motion-Control of a MEMS Capacitive Sensor	122
Syed Arsalan Jawed, Davide Cattin, Massimo Gottardi, Nicola Massari, Roberto Oboe, Andrea Baschiroto	
A New Angle Determination Method For Resolvers	126
Lazhar Ben-Brahim, Mohieddine Benammar, Mohd Alhamadi, Nasser Al-Emadi, Mohamed Al-Hitmi	
The Problem of Measurement and Control of Speed in the Drive with the Inaccurate Measuring Position Transducer	132
Stefan Brock, Jan Deskur	
Sensor Drift Compensation and Control of a Wheeled Inverted Pendulum Mobile Robot	137
Ryoko Imamura, Toshinobu Takei, Shin'ichi Yuta	
 <u>SS7-2 IMAGE PROCESSING FOR MOTION CONTROL 2</u>	
Manipulator Trajectory Generation for Flexible Object Handling	143
Yuji Nakamura, Hiroshi Igarashi	
Motion Tracking of Crane Hook based on Optical Flow and Orientation Code Matching	149
Satoru Takahashi, Shunichi Kaneko	
Robust Visual Feedback Control of Inverted Pendulum System against Camera Misalignment	153
Kentaro Hirata, Takashi Mizuno	
A Vision System for 2D Real-Time Vector Motion Estimation of a Random-Sized Moving Pattern	159
Marco De Nicola, Alberto Bertaso, Nicola Massari, Massimo Gottardi	
Visual Feedback Control for Endoscopes using Tension Estimation	165
Akira Shimada, Kazuyuki Gotoh	
 <u>ADVANCED MOTION CONTROL</u>	
Position control in switched systems using off-line model predictive control -- experimental verification	170
Yuya Kamide, Tadanao Zanma, Muneaki Ishida	
Torsional Vibration Suppression of a Twin-drive Geared System Using Model-based Control	176
Masahiko Itoh	
Suppression of Vibration due to Transmission Error of Harmonic Drives Using Peak Filter with Acceleration Feedback	182
Cheng-Huei Han, Chun-Chih Wang, Masayoshi Tomizuka	

Sensor-based Controller Tuning of Indirect Drive Trains Chun-Chih Wang, Masayoshi Tomizuka	188
--	------------

Velocity and Disturbance Observer for Non-Model Based Load and Friction Compensation Gianluca Palli, Claudio Melchiorri	194
---	------------

Requirements Documentation of a Controlled Complex Motion System Alessandro De Carli, Stefano Andreozzi, Andrea Fiaschetti	200
--	------------

SS6 1 - HIGH SPEED AND HIGH PRECISION SERVO SYSTEMS

A Study on High-Speed and High-Precision Tracking Control of Large-Scale Stage Using Perfect Tracking Control Method Based on Multirate Feedforward Control Kazuaki Saiki, Atsushi Hara, Koichi Sakata, Hiroshi Fujimoto	206
--	------------

Quadrant Glitch Compensation using Friction Model-Based Feedforward and an Inverse-Model-Based Disturbance Observer Zamberi Jamaludin, Hendrik Van Brussel, Jan Swevers	212
---	------------

Initial Value Compensation Using Additional Input for Semi-Closed Control Systems Noriaki HiroseNagoya Institute of Technology, Makoto IwasakiNagoya Institute of Technology, Motohiro Kawafuku, Hiromu Hirai	218
---	------------

Disturbance Compensation in Inching Motion of Ball Screw-Driven Table System Masafumi Yamamoto, Makoto Iwasaki, Kazuaki Ito, Nobuyuki Matsui	224
--	------------

Robot Joint Friction Compensation Based on a Local Modeling Technique Lotfi Mostefai, Mouloud Denai, Yoichi Hori	229
--	------------

Iterative Tuning of Feedforward Controller with Force Ripple Compensation for Wafer Stage Hoday Stearns, Sandipan Mishra, Masayoshi Tomizuka	234
--	------------

SS5 - NANOSCALE SERVO SYSTEM FOR DISK DRIVE CONTROL

Shock-Response-Spectrum Analysis of Sampled-Data Polynomial for Track-Seeking Control in Hard Disk Drives Takenori Atsumi	240
---	------------

Robust Feed Forward Tracking Control System for using Zero Phase Low-pass Filter Yasuharu Yoshida, Kiyoshi Ohishi, Toshimasa Miyazaki, Daiichi Koide, Haruki Tokumaru	248
---	------------

A Disturbance Observer Approach to Detecting and Rejecting Narrow-Band Disturbances in Hard Disk Drives Qixing Zheng, Masayoshi Tomizuka	254
--	------------

Robust H_{∞} Compensation for External Vibration on Hard Disk Drives in Mobile Applications	260
--	------------

Chunling Du, S. S. Ge, Fan Hong, Jingliang Zhang, F. L. Lewis

A Study on Multirate Sampled-Data Control for Hard Disk Drives	266
---	------------

Jun Ishikawa

Comparison of Rolling Friction Behavior in HDDs	272
--	------------

Motohiro Kawafuku, Atsushi Ohta, Makoto Iwasaki, Hiromu Hirai

SS2-1 - BIPED ROBOTS

An Approach of Motion Compensation for Biped Walking Robots with Structural Deformation	278
--	------------

Naoki Oda, Hiroshi Nakane

Trajectory Generation of Biped Robots Using Linear Pendulum Mode with Virtual Supporting Point	284
---	------------

Maki Shibuya, Tomoya Sato, Kouhei Ohnishi

ZMP Disturbance Observer for Walking Stabilization of Biped Robot	290
--	------------

Tomoya Sato, Kouhei Ohnishi

Yaw Moment Compensation of Biped Fast Walking Using 3D Inverted Pendulum	296
---	------------

Takahiro Hirabayashi, Atsuo Kawamura, Zhu Chi

Two Legged Jumping Simulation and Experiment on Biped Robot MARI-3	301
---	------------

Takuro Maeda, Atsuo Kawamura, Barkan Ugurlu

Motion Control of Environmental Adaptation for a Biped Robot	306
---	------------

Eijiro Ohashi, Tomoya Sato, Kouhei Ohnishi

SS4 - NETWORK CONTROL SYSTEMS AND TELE-OPERATION

Implementation of internet based telemicromanipulation with delay compensation	312
---	------------

Preeda Chantanakajornfung, Hwang Gil Gueng, Hideki Hashimoto

Acceleration Consensus for Networked Motion Control of Telerobots	318
--	------------

Ugur Tumerdem, Kouhei Ohnishi

L2 Stable Four-Channel Control Architecture for Bilateral Teleoperation with Time Delay	324
--	------------

Daisuke Yashiro, Kouhei Ohnishi

A Novel Structure of Time Delayed Control Systems with Communication Disturbance Observer	330
--	------------

Kenji Natori, Roberto Oboe, Kouhei Ohnishi

Wireless Network Based Identification and Control with Variable Time Delay 336
Yutaka Uchimura

A network based virtual lab for motion control applications 342
Orazio Mirabella, Michele Brischetto, Antonino Rauceo

SS2 2 - ADAPTIVE ROBOT MOTION TO VARIOUS ENVIRONMENTS

Environmental Interaction of Two wheeled Mobile Manipulator by using Reaction Torque Observer 348
Pradeep Kumara Wijesekara Abeygunawardhana, Toshiyuki Murakami

An Analysis of Force Control Based on Momentum 354
Sho Sakaino, Kouhei Ohnishi

Development of a High Thrust Linear Actuator with High Backdrivability 360
Yasutaka Fujimoto, Tsutomu Kominami

Whole-Body Force Sensation by Robot with Outer Shell 365
Toshiaki Tsuji, Yasuyoshi Kaneko, Shigeru Abe

O3: An Optimal and Opportunistic Path Planner (with Obstacle Avoidance) using Voronoi Polygons 371
David M. Coleman, Joseph T. Wunderlich

VOLUME II

ACTUATORS AND POWER SYSTEMS 1

Four-Quadrant Bi-Directional Drive System Based On Pwm Dc-Dc Converter 377
Boris Axelrod, Yefim Berkovich, Adrian Ioinovici

A Predictive Optimal Torque Control of Synchronous Reluctance Motor Drive 382
Gianluca Gatto, Ignazio Marongiu, Alessandro Serpi, Aldo Perfetto

Evaluation of Driving Performance of Piezoelectric Actuator with Current Pulse 387
Katsushi Furutani, Atsushi Furuta

An Optimal Current Vector Control for Synchronous Reluctance Motors Incorporating Field Weakening 393
Kaveh Malekian, Mohammad Reza Sharif, Jafar Milimonfared

New Rotor-Position Estimation Technique for Sensorless Switched Reluctance Motor 399
Eveline Bassily

SS3 1 -ACQUISITION AND RECOGNITION OF HUMAN MOTION

Adaptive Assist for Mobile Vehicle Operation on Human Perception	405
Hiroshi Igarashi	
Identification of human operation using data clustering and its application to automated system	411
Hayato Sato, Tadanao Zanma, Muneaki Ishida	
Improvement of Steering Feel of Electric Power Steering System with Variable Gear Transmission System using Decoupling Control	417
Yoshifumi Morita, Kentaro Torii, Norio Tsuchida, Makoto Iwasaki, Hiroyuki Ukai, Nobuyuki Matsui, Jiro Hayashi, Noriyuki Ido, Hiroshi Ishikawa	
An Estimation Method of Muscular Tensions using Functional Effective Muscle Strength	423
Yosuke Hashimoto, Satoshi Komada, Junji Hirai	
A Method for Motion Extraction and Guide Based on Haptic Information Relationship	428
Shoyo Hyodo, Kouhei Ohnishi	
Acquisition and Visualization of Personal Characteristics by Haptograph	434
Seiichiro Katsura, Yuki Yokokura, Kiyoshi Ohishi	

APPLICATIONS OF FUZZY AND NEURAL CONTROL

An improved adaptive neural network compensation of pivot nonlinearity in hard disk drives	440
Fan Hong, Chunling Du	
Neural Network Based Control of Micro-Manipulator	444
Jure Cas, Rok Klobucar, Riko Safaric	
Motion Control of a Mobile Pendulum System Using Neural Network	450
Jin S Noh, Geun H. Lee, Seul Jung	
Trajectory Decentralized Fuzzy Control of Multiple UAVs	455
Francesco Maria Raimondi, Maurizio Melluso	
A Genetic Based Fuzzy Logic Controller for Direct Torque Controlled IPMSM Drives Over Wide Speed Range	462
Kaveh Malekian, Jafar Milimonfared, Babak Abdi	

MOBILE AND WALKING ROBOTS 2

Obstacle avoidance control for a human-operated mobile robot	468
Naoki Uchiyama, Tatsuhiro Hashimoto, Shigenori Sano, Shoji Takagi	

A 4WD Omnidirectional Wheelchair with a Chair Tilting Mechanism for Enhancing Step Climbing Capability	474
Masayoshi Wada	

Point-Contact Type Foot with Springs and Posture Control for Biped Walking on Rough Terrain	480
Shigenori Sano, Moyuru Yamada, Naoki Uchiyama, Shoji Takagi	

Study on How to Make a Decision From Multiple Walking Trajectories	486
Joon-Yong Lee, Jeong-Jung Kim, Ju-Jang Lee	

SS3 2 - MOTION CONTROL FOR POWER-ASSIST

Generalized Discussion on Design of Force-sensor-less Power Assist Control	492
Sehoon Oh, Yoichi Hori	

New Control Method for Power-assisted Wheelchair Based on Upper Extremity Movement Using Surface Myoelectric Signal	498
Yuusuke Oonishi, Sehoon Oh, Yoichi Hori	

Power Assist Control by Repulsive Compliance Control of Electric Wheelchair	504
Tsuyoshi Shibata, Toshiyuki Murakami	

Novel Regenerative Braking Control of Electric Power Assisted Wheelchair for Optimal Velocity Driving on Downhill Road	510
Hirokazu Seki, Kenji Ishihara, Susumu Tadakuma	

Driving Trajectory Generation of Electric Powered Wheelchair Using Spline Curve	516
Yoshimasa Teruya, Hirokazu Seki, Susumu Tadakuma	

Variable power assist control of twin direct-drive motor system based on human stiffness estimation	520
Chowarit Mitsantisuk, Seiichiro Katsura, Kiyoshi Ohishi	

TELEROBOTICS

Tactile Sensation Improvement of a Bilateral Forceps Robot with a Switching Virtual Model	526
A. M. Harsha S. Abeykoon, Kouhei Ohnishi	

Transmission of Force Sensation by Micro-Macro Bilateral Control with Scaling of Control Gains	532
Shigeru Susa, Tomoyuki Shimono, Takayoshi Takei, Kouji Atsuta, Naoki Shimojima, Soji Ozawa, Yasuhide Morikawa, Kouhei Ohnishi	

Improvement of Operability for Multilateral Control System Under Constant Time Delay	538
Akira Yamaguchi, Kouhei Ohnishi	

Function Based Control for Bilateral Systems in Tele-Micromanipulation	544
Meltem Elitas, Shahzad Khan, A. Ozcan Nergiz, Asif Sabanovic	
Challenges of Robustness/Transparency of Scaled Bilateral Teleoperation Systems	550
Tahar Slama, Moussa Boukhnifer, Didier Aubry, Antoine Ferreira, Frédéric Kratz	
Experiments Results on Robustness Effects of a New Prefilter in Generalized Predictive Control: Application to Bilateral Teleoperation Systems	556
Tahar Slama, Alberto Trevisani, Didier Aubry, Roberto Oboe	

SS6-2 - HIGH SPEED AND HIGH PRECISION SERVO SYSTEMS

Modeling and Position Control of a Joint Prototype of DEXARM	562
Gianantonio Magnani, Paolo Rocco, Andrea Rusconi	
Nanoscale Servo Control of Contact-mode AFM with Surface Topography Learning Observer	568
Hiroshi Fujimoto, Takashi Oshima	
Nanoscale Servo Control Using Low Precision Sensors	574
Mitsuo Hirata, Takahiro Kidokoro	
Agile and Robust Attitude Control System for VSOP-2 Satellite ``ASTRO-G''	578
Tsutomu Nakamura, Nobutaka Bando, Sin-ichiro Sakai, Hirobumi Saito	
Design And On-Orbit Evaluation Of Magnetic Attitude Control System For The ``Reimei'' Microsatellite	584
Shin-ichiro Sakai, Yosuke Fukushima, Hirobumi Saito	
Control System of New Micro-gravity Experimental System ``BOV'' from High Altitude Balloon	590
Nobutaka Bando, Shin-ichiro Sakai, Shujiro Sawai, Tatsuaki Hashimoto	

SS3 3 - REAL-WORLD HAPTICS

An Experimental Validation of Flexible Actuator with Torque Wire for Haptic Motion	595
Tatsuya Kobayashi, Yujiro Soeda, Shoyo Hyodo, Kouhei Ohnishi	
Haptic Endoscopic Surgery Robot Utilizing FPGA	601
Hiroiyuki Tanaka, Kouhei Ohnishi, Hiroaki Nishi, Toshikazu Kawai, Yasuhide Morikawa, Soji Ozawa, Toshiharu Furukawa	
A Design Method of Autonomous Hazard Avoidance Controller with Selected Ratio in Bilateral Teleoperation	607
Keiichi Taguchi, Shoyo Hyodo, Kouhei Ohnishi	

Motion Copying System Based on Real-World Haptics	613
Yuki Yokokura, Seiichiro Katsura, Kiyoshi Ohishi	
A Method for the Dynamical Estimation of Environmental Impedance by Bilateral Control	619
Takayoshi Takei, Tomoyuki Shimono, Kouhei Ohnishi	
Extraction of Combined Environmental Information by Bilateral Control based on DFT Modal Control	625
Tomoyuki Shimono, Kouhei Ohnishi	

ROBOTICS 1

Control of Nonholonomic Robotic Load	631
Peter Cafuta, Boris Curk	
Optimal Link Design of a Six Degree of Freedom Micro Parallel Robot Based on Workspace Analysis	637
Sergiu-Dan Stan, Vistrian Maties, Radu Balan, Calin Rusu, Sorin Besoiu	
Comparison of fast frequency estimation methods for trajectory planning tuning	643
Jean-Yves Dieulot, Frédéric Colas, Pierre-Jean Barre, Mohamed Firas Feki	
Discrete-Time Robust Adaptive Control for Robotic Manipulators	649
Shoji Takagi, Naoki Uchiyama, Shigenori Sano	
Trajectory tracking control of a 6-degree-of-freedom robot arm using nonlinear optimization	655
Ferenc Lombai, Gabor Szederkenyi	

SSI - MOTION CONTROL METHODS FOR UNKNOWN OR PERTURBED OBJECTS

Motion Control Strategy of Industrial Robot for Vibration Suppression and Little Positioning Phase Error	661
Hisashi Kataoka, Kiyoshi Ohishi, Toshimasa Miyazaki, Seiichiro Katsura, Hisashi Takuma	
Reduced-order Weight Design for H_∞ Loop Shaping Method under Open-loop Magnitude Constraints	667
Shu Katayama, Kazuhiro Yubai, Junji Hirai	
On-line Parameter Tuning of Disturbance Compensation in Precision Positioning	672
Kazuaki Ito, Nobuyoshi Takigawa, Masafumi Yamamoto, Makoto Iwasaki, Nobuyuki Matsui	

Practical Compensation for Reaction Force with Specific Frequency in Shaking Tables	677
Kenta Seki, Makoto Iwasaki, Motohiro Kawafuku, Hiromu Hirai, Kazuki Yasuda	
Direct Design of Switching Control System by SVR-based VRFT -Application to Vertical-type One-link Arm-	683
Shota Yabui, Kazuhiro Yubai, Junji Hirai	
An Approach to Estimate Velocity for Acceleration Control	687
Noriko Iiyama, Toshiaki Tsuji, Kouhei Ohnishi	

ACTUATORS AND POWER SYSTEMS 2

Flexible Synchronized Control of Dual Inverter-Fed Traction Drive during Overmodulation	693
Valentin Oleschuk, Radu Bojoi, Giovanni Griva, Francesco Profumo	
Position Learning Control for Current-Fed Permanent Magnet Step Motors with Uncertainties	699
Riccardo Marino, Patrizio Tomei, Cristiano Maria Verrelli	
Methods of Voltage Synchronization in Multiphase Power Conversion Systems	704
Valentin Oleschuk, Giovanni Griva, Francesco Profumo, Alberto Tenconi	
High Precision VSS Motion Control of Servo Drives	710
Karel Jezernik	
Direct Torque Controlled PWM Inverter Fed PMSM Drive For Public Transport	716
Marian Kazmierkowski, Dariusz Swierczynski, Pawel Wojcik, Michal Janaszek	

ROBOTICS 2

Preisach Model of Nonlinear Transmission at Low Velocities in Robot Joints	721
Michael Ruderman, Frank Hoffmann, Torsten Bertram	
Time-Energy Optimal Path Tracking for Robots: a Numerically Efficient Optimization Approach	727
Diederik Verscheure, Bram Demeulenaere, Jan Swevers, Joris De Schutter, Moritz Diehl	
The cooperative control system of the robot finger using Shape Memory Alloys and Electrical Motors	733
Mina Terauchi, Kouta Zenba, Akira Shimada	
A device for simulating hand grips	738
Benedetto Allotta, Valentina Colla, Gianluca Bioli, Luigi Giori	

AUTOMOTIVE

Intelligent neuro-fuzzy dynamic path following for car-like vehicle	744
Francesco Maria Raimondi, Ludovico Salvatore Ciancimino	
Rolling Stability Control of In-wheel Electric Vehicle Based on Two-Degree-of-Freedom Control	751
Kiyotaka Kawashima, Toshiyuki Uchida, Yoichi Hori	
Electric Tilting 3-Wheel Vehicle for a Sustainable Urban Mobility	757
Manuele Bertoluzzo, Giuseppe Buja, Vittore Cossalter, Alberto Doria, Diego Mazzaro	
Development of a Reduced Size Unmanned Car	763
Enrico Bertolazzi, Francesco Biral, Paolo Bosetti, Mariolino De Cecco, Roberto Oboe, Fabrizio Zendri	
Modelling, Control and Design of heavy duty suspension systems	771
Francesco Biral, Matteo Grott, Roberto Oboe, Claudio Maffei, Eugenio Vincenti	
A Method of Road Condition Estimation and Feedback Utilizing Haptic Pedal	777
Jun Aoki, Toshiyuki Murakami
