

31st IEEE Software Engineering Workshop

SEW-31 2007

Proceedings

6-8 March 2007
Columbia, MD, USA

Los Alamitos, California
Washington • Tokyo

31st IEEE Software Engineering Workshop

SEW-31 2007

Table of Contents

Message from the Chair	viii
Program Committee	ix

Development Methods, Issues and Patterns

Determining the Applicability of Agile Practices to Mission and Life-Critical Systems	3
<i>Ahmed Sidky and James Arthur</i>	
Mapping CMMI Project Management Process Areas to SCRUM Practices.....	13
<i>Ana Sofia C. Marçal, Bruno Celso C. de Freitas, Felipe S. Furtado Soares, and Arnaldo D. Belchior</i>	
A Framework for Flexible and Executable Usability Patterns Standards	23
<i>Scott Henninger</i>	

Requirements

Aspect-Oriented Requirements Modeling.....	35
<i>Jingjun Zhang, Furong Li, and Yang Zhang</i>	
Mise en Scene: Converting Scenarios to CSP Traces in Support of Requirements-Based Programming	41
<i>J. Carter and W. B. Gardner</i>	

Architectural Issues

Using Model Checking to Validate Style-Specific Architectural Refactoring Patterns.....	53
<i>Zoë Stephenson and John McDermid</i>	
Research on Aspect Connectors for Software Architecture Adaptation	63
<i>Jingjun Zhang, Hui Li, and Furong Li</i>	
Transformational Approaches to Model Driven Architecture - A Review	67
<i>Chunying Zhao and Kang Zhang</i>	
An Inconsistency Free Formalization of B/S Architecture	75
<i>Qin Li, Huibiao Zhu, and Jifeng He</i>	

Testing and Estimation

An Alternative Method Employing Uses Cases for Early Effort Estimation.....	89
<i>Gabriela Robiolo and Ricardo Orosco</i>	
The EMISQ Method - Expert Based Evaluation of Internal Software Quality.....	99
<i>R. Plösch, H. Gruber, A. Hentschel, Ch. Körner, G. Pomberger, S. Schiffer, S. Schiffer, M. Saff, and S. Storck</i>	
Testing Patterns	109
<i>Neelam Soundarajan, Jason O. Hallstrom, Adem Delibas, and Guoqiang Shu</i>	

Formal Aspects

A Reference Net Based Formalization of Concurrent Cognitive Decision Making.....	121
<i>Johann Duscher and Amine El Malki</i>	
Algebraic Approach to Operational Semantics and Observation-Oriented Semantics for a Timed Shared-Variable Language with Probability.....	131
<i>Huibiao Zhu, Jifeng He, and Jonathan P. Bowen</i>	
A Refinement Based Framework for Computing Loop Behavior.....	144
<i>Ali Mili</i>	
Looking into Compensable Transactions.....	154
<i>Jing Li, Huibiao Zhu, Geguang Pu, and Jifeng He</i>	

Software Safety, Quality, and Reliability

A New Way to Predict Software Reliability with Parameter Evaluation: Shuttle Applications	167
<i>Norman F. Schneidewind</i>	
A Software Safety Risk Taxonomy for Use in Retrospective Safety Cases.....	179
<i>Janice Hill</i>	

Tools

The SAVE Tool and Process Applied to Ground Software Development at JHU/APL: An Experience Report on Technology Infusion.....	187
<i>William C. Stratton, Deane E. Sibol, Mikael Lindvall, and Patricia Costa</i>	
A Formal Model for the Building of State Machines: A Lightweight Approach.....	194
<i>Fernando Valles Barajas</i>	
Abstracting Pointers for a Verifying Compiler	204
<i>Gregory Kulczycki, Heather Keown, Murali Sitaraman, and Bruce W. Weide</i>	
LTL Guided Planning: Revisiting Automatic Tool Composition in ETI.....	214
<i>Tiziana Margaria and Bernhard Steffen</i>	

Modeling and Verification Issues

An AOP-based Performance Evaluation Framework for UML Models.....	227
<i>Dong Kwan Kim and Shawn Bohner</i>	
An Operational Approach to BPEL-like Programming	236
<i>Huibiao Zhu, Jifeng He, Geguang Pu, and Jing Li</i>	
Verification in the Light and Large: Large-Scale Verification for Fast-Moving Open Source C Projects	246
<i>Peter T. Breuer and Simon Pickin</i>	
Modeling and Verifying Web Services Choreography Using Process Algebra.....	256
<i>Jing Li, Jifeng He, Huibiao Zhu, and Geguang Pu</i>	

Distributed, Grid and Real-Time Systems

A Generative Approach to Building a Framework for Hard Real-Time Applications.....	269
<i>Irfan Hamid, BechirZalila, Elie Najm, and Jérôme Hugues</i>	
A Layered Java Application Framework for Supplying Mathematical Computing Power to the Distributed Environment.....	279
<i>Weidong Liao and Benjamin J. Koonse</i>	
Virtualization the Enabler for the Autonomic Business Grid.....	284
<i>Shukri Wakid and Roy Sterritt</i>	
Architecting Network-Centric Software Systems: A Style-Based Beginning	290
<i>Amine Chigani, Jamed D. Arthur, and Shawn Bohner</i>	
ASSL - Autonomic System Specification Language	300
<i>Emil Vassev and Joey Paquet</i>	
Author Index.....	310
