High Performance Computing Systems
and Applications**

HPCS 2008

**9-11 June 2008
Quebec, Canada**

Los Alamitos, California
Washington • Tokyo

22nd International Symposium on High Performance Computing Systems and Applications

HPCS 2008

Welcome Message from the General Chair	viii
Organizing Committee	ix

Plenary Talks

High-Performance Computing Considered Harmful	1
<i>Greg Wilson</i>	
Large-Scale Integrative Modeling of the Human Heart.....	2
<i>Mark Potse and Alain Vinet</i>	
How Do We Simulate Things at the Scale of Molecules and Electrons? An Introduction to the Technology and HPC Aspects of Computational Chemistry	3
<i>Tom Woo</i>	

SESSION 1: Applications to Physics and Chemistry

Efficient Parallel Computing for Laser-Gas Quantum Interaction and Propagation	4
<i>Emmanuel Lorin and André D. Bandrauk</i>	
The Variational Cluster Approximation for Hubbard Models: Practical Implementation	9
<i>David Sénéchal</i>	
MATDCAL: A First Principles Package for Nanoelectronics Modeling	16
<i>Zhanyu Ning and Hong Guo</i>	
Computational Investigation of Protein Chemistry: "S-Nitrosohemoglobin".....	17
<i>Denise M. Koch, Ann M. English, and Gilles H. Peslherbe</i>	
Computational Enzymology: Promises and Challenges	18
<i>Guillaume Lamoureux</i>	

SESSION 2: OSCAR

Building and Refining General Purpose Computing Clusters in an Emerging HPC Oriented Research Environment.....	19
<i>Albert Gazendam</i>	
Stateless Clustering Using OSCAR and PERCEUS	26
<i>Abhishek Kulkarni and Andrew Lumsdaine</i>	
A Scalable Tools Communication Infrastructure.....	33
<i>Darius Buntinas, George Bosilca, Richard L. Graham, Geoffroy Vallée, and Gregory R. Watson</i>	

Proposal for Modifications to the OSCAR Architecture to Address Challenges in Distributed System Management	40
<i>Geoffroy Vallée, Thomas Naughton, and Stephen L. Scott</i>	

Using OSCAR to Win the Cluster Challenge	47
<i>Paul Greidanus and Gordon Willem Klok</i>	

SESSION 3: Grid Computing

Models for Grid Applications and Jobs	52
<i>Tanvire Elahi, Cameron Kiddle, and Rob Simmonds</i>	

Utility Computing and Market-Based Scheduling: Shortcomings for Grid Resources Sharing and the Next Steps.....	59
<i>Nicolas Dubé and Marc Parizeau</i>	

A Framework for Executing Long Running Jobs in Grid Environments.....	69
<i>Nayden Markatchev, Cameron Kiddle, and Rob Simmonds</i>	

SpectroGrid: Providing Simple Secure Remote Access to Scientific Instruments.....	76
<i>André Charbonneau and Victor Terskikh</i>	

SESSION 4: Computational Physics

Computational Astrophysics.....	83
<i>Hugh Couchman</i>	

ATLAS Computing: Dealing with PetaBytes of Data per Year.....	84
<i>Michel Vetterli</i>	

Quantum Chromodynamics on a Space-Time Lattice	85
<i>Howard Trotter</i>	

Simulating Exotic Quantum States of Matter	86
<i>Matthias Troyer</i>	

Simuler la Dynamique des Protéines: Simulating Protein Dynamics	87
<i>Normand Mousseau</i>	

SESSION 5: Systems and Parallelization

Exploiting Data Locality in FFT Using Indirect Swap Network on Cell/B.E.....	88
<i>Meilian Xu, Parimala Thulasiraman, and Ruppa K. Thulasiram</i>	

Improving Communication Progress and Overlap in MPI Rendezvous Protocol over RDMA-enabled Interconnects.....	95
<i>Mohammad J. Rashti and Ahmad Afsahi</i>	

Group-Based Optimization for Parallel Job Scheduling with Scojo-PECT-O	102
<i>Angela C. Sodan, Arun Kanavallil, and Bryan Esbaugh</i>	

Performance Driven Partial Checkpoint/Migrate for LAM-MPI	110
<i>Rajendra Singh and Peter Graham</i>	

Parallel Implementation of a Subsystem-by-Subsystem Solver	117
<i>Yun Guan and Jan Verschelde</i>	

SESSION 6: Applications to Continuous Systems

Combined Functional and Geometrical Decompositions for Multiphysics Problems with Application to Fluid-Structure Interaction.....	124
<i>Amine Ben Haj Ali and Azzeddine Soulaïmani</i>	

Performance Measurements of a Contact Searching Algorithm for Solving Large Deformation Problems	131
<i>É. Chamberland, C. Robitaille, and A. Fortin</i>	

Computing Intensive Simulations in Biofilm Modeling	132
<i>Hermann J. Eberl, Nasim Muhammad, and Rangarajan Sudarsan</i>	

A Computational Study of External Shear Forces in Biofilm Clusters	139
<i>Jiaying Xu, Rangarajan Sudarsan, Gerarda A. Darlington, and Hermann J. Eberl</i>	

Parallel Three-Dimensional Simulation of Ultrasound Imaging	146
<i>Mohammad I. Daoud and James C. Lacefield</i>	

SESSION 7: Applications to Physics and ATLAS

High-Performance Chemodynamical Simulations of Galaxy Formation.....	153
<i>Hugo Martel</i>	

Exploring the High Pressure Phase Diagrams of Light Elements Using Large Scale Molecular Dynamics Simulations	154
<i>Isaac Tambllyn and Stanimir A. Bonev</i>	

High Performance Networks for the ATLAS Tier-1 @ TRIUMF.....	161
<i>Chris Payne, Denice Deatrich, Simon Liu, Steve McDonald, Réda Tafirout, Rodney Walker, Andrew Wong, and Michel Vetterli</i>	

Managing Petabyte-Scale Storage for the ATLAS Tier-1 Centre at TRIUMF	167
<i>Denice Deatrich, Simon Liu, Chris Payne, Réda Tafirout, Rodney Walker, Andrew Wong, and Michel Vetterli</i>	

Grid Infrastructure and Large Scale Production for ATLAS.....	172
<i>Denice Deatrich, Simon Liu, Chris Payne, Réda Tafirout, Rodney Walker, Andrew Wong, and Michel Vetterli</i>	

Author Index.....	177
