

2008 8th International Conference on Application of Concurrency to System Design

**Xian, China
23-27 June 2008**

**IEEE Catalog Number:
ISBN 13:**

**CFP08148-PRT
978-1-4244-1838-1**

Contents

Time Elastic Digital Systems and Petri Nets Mike Kishinevsky, Jordi Cortadella	1
Avoiding Irreducible CSC Conflicts by Internal Communication Mark Schaefer, Walter Vogler, Dominic Wist, Ralf Wollowski	3
Using Edge-triggering in the Asynchronous Synthesis of Write-after-read Operations Navid Toosizadeh, Safwat Zaky	13
A Design Method for 1-out-of-4 Encoded Low-Power Self-Timed Circuits using Standard Cell Libraries Masashi Imai, Takashi Nanya	21
Dynamic Critical-Path Based on Fit Degree Scheduling for Reconfigurable Multi-FPGAs Yan Xiao, Zhenhua Duan	27
PicNIc - Pi-calculus Non-Interference checker Silvia Crafa, Marino Miculan, Matteo Mio, Carla Piazza, Sabina Rossi	33
Closed Loop State Space Analysis and Simulation for Cognitive Systems Hendrik Oberheid, Dennis Gamrad, Dirk Söffker	39
BAM: BioAmbient Machine Vinod A. Muganthan, Andrew Phillips, Maria Grazia Vigliotti	45
A Behavioral Synthesis Method for Asynchronous Circuits with Bundled-data Implementation Naohiro Hamada, Yuuki Shiga, Hiroshi Saito, Tomohiro Yoneda, Chris Myers, Takashi Nanya	50
An Effective Approach for Model Checking SystemC Designs Razieh Behjati, Hamideh Sabouri, Niloofar Razavi, Marjan Sirjani	56
Process Algebraic Verification of SystemC Codes Hossein Hojjat, Mohammadreza Mousavi, Marjan Sirjani	62
Modular Construction of Finite and Complete Prefixes of Petri Net Unfoldings Agnes Madalinski, Eric Fabre	68
Performing Causality Analysis by Bounded Model Checking Klaus Schneider, Jens Brandt	78
Modular Construction of the Symbolic Observation Graph Kais Klai, Laure Petrucci	88

Time-Bounded Model Checking of Infinite-State Continuous-Time Markov Chains Lijun Zhang, Holger Hermanns, E. Moritz Hahn, Björn Wachter	98
Symbolic Model Checking of Hierarchical UML State Machines Jori Dubrovin, Tommi Junttila	108
Asynchronous Pipeline Controller Based on Early Acknowledgement Protocol Chammika Mannakkara, Tomohiro Yoneda	118
Verification of Conditional Partial Order Graphs Andrey Mokhov, Alex Yakovlev	128
Modeling and Verifying Asynchronous Communication Mechanisms using Coloured Petri Nets Kyller Gorgõio, Fei Xia	138
A Method for Latency/bandwidth Guarantees in Network-on-Chip Shijun Lin, Li Su, Haibo Su, Guofei Zhou, Depeng Jin, Lieguang Zeng	148
Removing Causality Cycle of Synchronous Programs with Sequential Data-flow Recursion Tieqiang Mo, Peng Hao	154
QoS-Driven Service Selection and Composition Sun Meng, Farhad Arbab	160
Synthesis of Petri Nets from Infinite Partial Languages Robin Bergenthum, Jörg Desel, Robert Lorenz, Sebastian Mauser	170
Discrete Real-Time and Stochastic-Time Process Algebra for Performance Analysis of Distributed Systems Jasen Markovski, E.P. de Vink	180
On the Interplay Between Fault Handling and Request-Response Service Invocations Claudio Guidi, Ivan Lanese, Fabrizio Montesi, Gianluigi Zavattaro	190
An Admission Control System for QoS Provision on a Best-effort GALS Interconnect Shufan Yang, Steve B. Furber, Yebin Shi, Luis A. Plana	199
Dynamic Semantics of OWL-s in CSP-OZ Ping Gong, Keqing He, Jian Wang, Zaiwen Feng	207
