

# **2008 51st Midwest Symposium on Circuits and Systems**

**Knoxville, TN  
10-13 August 2008**

**Pages 1-489**

**IEEE Catalog Number:**  
**ISBN 13:**

**CFP08MID-PRT**  
**978-1-4244-2166-4**

# TABLE OF CONTENTS

Scroll to the title and select a **Blue** link to open a paper. After viewing the paper, use the bookmark "Go to Previous Document" to return to the same page in the Table of Contents.

*Acrobat Reader 8 Users:* Need to select View\Go To\Previous Document from the menu bar instead of using the bookmark.

## Session: A1L-A

### Control in Power Electronics

<b>A Novel Digital PWM Controller with Dual-Regulating Mechanism for DC-DC Buck Conversion</b> .....	1
Steve Hung-Lung Tu, <i>Fu Jen Catholic University</i> ; Sheng-Kai Chuang, <i>Fu Jen Catholic University</i> ; Sheng-Fa Hsiao, <i>Fu Jen Catholic University</i>	
<b>Current Feedback Compensation (CFC) Technique for Adaptively Adjusting the Phase Margin in Capacitor-Free LDO Regulators</b> .....	5
Huan-Chien Yang, <i>National Chiao Tung University</i> ; Han-Hsiang Huang, <i>National Chiao Tung University</i> ; Chi-Lin Chen, <i>National Chiao Tung University</i> ; Ming-Hsin Huang, <i>National Chiao Tung University</i> ; Ke-Horng Chen, <i>National Chiao Tung University</i>	
<b>Fast Mode-Switching Technique in Hrrbrid-Mode Operation</b> .....	9
Chi-Lin Chen, <i>National Chiao Tung University</i> ; Wei-Lun Hsieh, <i>National Chiao Tung University</i> ; Han-Hsiang Huang, <i>National Chiao Tung University</i> ; Ke-Horng Chen, <i>National Chiao Tung University</i>	
<b>Implementation of a Control Strategy for Elimination of Voltage Harmonics in Inverters</b> .....	13
Selvajyothi Kamakshy, <i>Indian Institute of Technology Madras</i> ; P.A. Janakiraman, <i>Indian Institute of Technology Madras</i>	

## Session: A1L-B

### Analog Filters – I

<b>Reliability Study of Single-Poly Floating Gates in 0.13 <math>\mu\text{m}</math> CMOS for use in Field Programmable Analog Arrays</b> .....	17
Fabian Henrici, <i>IMTEK, University of Freiburg</i> ; Christian Peters, <i>IMTEK, University of Freiburg</i> ; Joachim Becker, <i>IMTEK, University of Freiburg</i> ; Maurits Ortmanns, <i>IMTEK, University of Freiburg</i> ; Yiannos Manoli, <i>IMTEK, University of Freiburg</i>	
<b>Loop Filter Approximations for PLLs</b> .....	21
A. Carlosena, <i>Universidad Pública de Navarra</i> ; M. Ugarte, <i>Universidad Pública de Navarra</i> ; A.J. López-Martín, <i>Universidad Pública de Navarra</i>	
<b>Lateral Coupling in Silicon Cochlear Models</b> .....	25
Brandon Rumberg, <i>West Virginia University</i> ; Kyle McMillan, <i>West Virginia University</i> ; Charles Rea, <i>West Virginia University</i> ; David W. Graham, <i>West Virginia University</i>	
<b>Nano-Power Switched-Capacitor Bandpass Filters for Medical Implantable Pacemakers and Defibrillators</b> .....	29
Ali E. Zadeh, <i>University of Southern California</i>	

## **Session: A1L-C Data Converters**

<b>Ultra-Low Overhead Signal Acquisition Circuit for Capacitive and Piezoelectric Sensors</b> .....	33
<i>John Liobe, University of Rochester; Zeljko Ignjatovic, University of Rochester; Mark Bocko, University of Rochester</i>	
<b>A Prototype Hardware for Random Demodulation based Compressive Analog-to-Digital Conversion</b> .....	37
<i>Tamer Ragheb, Rice University; Jason N. Laska, Rice University; Hamid Nejati, Rice University; Sami Kirolos, Rice University; Richard G. Baraniuk, Rice University; Yehia Massoud, Rice University</i>	
<b>Pixel-Level Delta-Sigma ADC with Optimized Area and Power for Vertically-Integrated Image Sensors</b> .....	41
<i>Alireza Mahmoodi, University of Alberta; Dileepan Joseph, University of Alberta</i>	
<b>Noise Analysis in Hold Phase for Switched-Capacitor Circuits</b> .....	45
<i>Yingkun Gai, Iowa State University; Randall Geiger, Iowa State University; Degang Chen, Iowa State University</i>	

## **Session: A1L-D MEMS/NEMS**

<b>An Electrowetting based Microgripper</b> .....	49
<i>Abhay Vasudev, University of Akron; Jiang Zhe, University of Akron</i>	
<b>Undersampling Approach for a Capacitive Micromachined Yaw Rate Sensor</b> .....	53
<i>Dayo Oshinubi, Robert Bosch GmbH; Marko Rocznik, Robert Bosch Corporation; Klaus Dostert, University of Karlsruhe</i>	
<b>Amplitude Modulated Micro Coulter Counter for High Throughput Counting of Microparticles</b> .....	57
<i>Ashish V. Jagtiani, University of Akron; Joan Carletta, University of Akron; Jun Hu, University of Akron; Jiang Zhe, University of Akron</i>	
<b>Analytical Model of Carbon Nanotube Field Effect Transistors for NEMS Applications</b> .....	61
<i>Bashirul Polash, University of Texas-Pan American; Hasina F. Huq, University of Texas-Pan American</i>	

## **Session: A1L-E Neural Networks and Fuzzy Logic**

<b>T-S Fuzzy Controller for a Class of Uncertain Nonlinear Systems</b> .....	65
<i>Hugang Han, Prefectural University of Hiroshima; Bo Mo, Beijing Institute of Technology; Fenghui Yao, Tennessee State University</i>	
<b>Implementing a Simple Microcontroller-Based Interval Type-2 Fuzzy Processor</b> .....	69
<i>Jefrey Bulla, Universidad Distrital; Gina Sierra, Universidad Distrital; Miguel Melgarejo, Universidad Distrital</i>	
<b>A Combined Transfer Function and Neural Network Method for Modeling via in Multilayer Circuits</b> .....	73
<i>Xin Zhang, Carleton University; Yazi Cao, Wuhan University; Q.J. Zhang, Carleton University</i>	

<b>An Evolvable Artificial Neural Network Platform for Dynamic Environments .....</b>	<b>77</b>
<i>Saamil G. Merchant, University of Florida; Gregory D. Peterson, University of Tennessee</i>	

**Session: A1L-F  
Physical Design**

<b>Post-CTS Delay Insertion to Fix Timing Violations .....</b>	<b>81</b>
<i>Baris Taskin, Drexel University; Jianchao Lu, Drexel University</i>	

<b>Hypergraph Partitioning Satisfying Dual Constraints on Vertex and Edge Weight .....</b>	<b>85</b>
<i>Changdao Dong, Tsinghua University; Qiang Zhou, Tsinghua University; Yici Cai, Tsinghua University; Xianlong Hong, Tsinghua University</i>	

<b>A Parallel Genetic Algorithm for 3-D Rectilinear Steiner Tree with Bounded Number of Bends .....</b>	<b>89</b>
<i>Hiroshi Totsukawa, Hiroshima Institute of Technology; Hirofumi Senou, Hiroshima Institute of Technology; Michiroh Ohmura, Hiroshima Institute of Technology</i>	

**Session: A2L-A  
Design for Variability and Low Power**

<b>Timing Implications of Fill Metal Generation Methods for System-Level Nano-Scale Designs .....</b>	<b>93</b>
<i>Arthur Nieuwoudt, Rice University; Jamil Kawa, Synopsys, Inc.; Yehia Massoud, Rice University</i>	

<b>Minimizing Minimum Delay Compensations for Timing Variation-Aware Datapath Synthesis .....</b>	<b>97</b>
<i>Keisuke Inoue, Japan Advanced Institute of Science and Technology; Mineo Kaneko, Japan Advanced Institute of Science and Technology; Tsuyoshi Iwagaki, Japan Advanced Institute of Science and Technology</i>	

<b>Sleep Transistor Sizing for Multi-Threshold-Voltage Network using Lagrange SOR Iteration .....</b>	<b>101</b>
<i>Yici Cai, Tsinghua University; Qiang Zhou, Tsinghua University; Le Kang, Tsinghua University; Xianlong Hong, Tsinghua University</i>	

<b>Evaluation of Modern MOSFET Models for Bulk-Driven Applications .....</b>	<b>105</b>
<i>Rui He, Memorial University of Newfoundland; Lihong Zhang, Memorial University of Newfoundland</i>	

**Session: A2L-B  
Amplifiers and Comparators – I**

<b>Compensation of CMOS Op-Amps using Split-Length Transistors .....</b>	<b>109</b>
<i>Vishal Saxena, University of Texas at Austin; R. Jacob Baker, Boise State University</i>	

<b>A Versatile Chopper-Stabilized Rail-to-Rail Operational Amplifier .....</b>	<b>113</b>
<i>Fuding Ge, Intel Corporation; Bahar Jalali-Farahani, Arizona State University</i>	

<b>A CMOS Linear-in-dB Variable Gain Amplifier for Low Power Read Channel Front-End .....</b>	<b>117</b>
<i>Xiong Liu, University of California, Los Angeles; Alan N. Willson Jr., University of California, Los Angeles</i>	

<b>Adaptive Hysteretic Comparator with Opamp Threshold Level Setting .....</b>	<b>121</b>
<i>Ndubuisi Ekeke, Johns Hopkins University; Ralph Etienne-Cummings, Johns Hopkins University</i>	

## **Session: A2L-C**

### **Digital Video and RNG's**

<b>A 2-Stage Memory Write Scheme for CMOS Pulse-Width-Modulation Digital Pixel Sensors</b> .....	125
<i>Y. Chen, Ryerson University; F. Yuan, Ryerson University; G. Khan, Ryerson University</i>	
<b>A New Wide Dynamic Range CMOS Pulse-Frequency-Modulation Digital Image Sensor with In-Pixel Variable Reference Voltage</b> .....	129
<i>Y. Chen, Ryerson University; F. Yuan, Ryerson University; G. Khan, Ryerson University</i>	
<b>A Performance Metric for Discrete-Time Chaos-Based Truly Random Number Generators</b> .....	133
<i>Ahmed Beirami, Rice University; Hamid Nejati, Rice University; Yehia Massoud, Rice University</i>	

## **Session: A2L-D**

### **RF/Microwave 1**

<b>A Low-Power Differential Common-Gate LNA</b> .....	137
<i>Sherif A. Saleh, IMTEK, University of Freiburg; Maurits Ortmanns, IMTEK, University of Freiburg; Yiannos Manoli, IMTEK, University of Freiburg</i>	
<b>A 100-960MHz CMOS Ultra-Wideband Low Noise Amplifier</b> .....	141
<i>Timothy B. Merkin, University of Texas at Arlington; Ju-Ching Li, University of Texas at Arlington; Sungyong Jung, University of Texas at Arlington; Mingyu Lu, University of Texas at Arlington; Jean Gao, University of Texas at Arlington; Sung Chul Lee, Korea Electronics Technology Institute</i>	
<b>Comparisons of Phase Noise Models of CMOS Ring Oscillators</b> .....	145
<i>Bosco Leung, University of Waterloo</i>	

## **Session: A2L-E**

### **Signal Processing Techniques and Algorithms**

<b>Time-Limited Perturbation Waveform Generation by an Extended Time-Frequency Domain Swapping Algorithm</b> .....	149
<i>Ning Zhou, Pacific Northwest National Laboratory; John W. Pierre, University of Wyoming</i>	
<b>Fault Tolerant Adaptive Filters based on the Walsh-Hadamard Transform</b> .....	153
<i>C. Rhadhakrishnan, Pennsylvania State University; W.K. Jenkins, Pennsylvania State University</i>	
<b>Detection of Involuntary Human Hand Motions using Empirical Mode Decomposition and Hilbert-Huang Transform</b> .....	157
<i>James Z. Zhang, Western Carolina University; Brant T. Price, Western Carolina University; Robert D. Adams, Western Carolina University; Kenneth Burbank, Western Carolina University; Theodore J. Knaga, Western Carolina University</i>	
<b>Wave Digital Simulation of Burgers' Equation using Gear's Method</b> .....	161
<i>Georg Hetmanczyk, Ruhr-University Bochum; Karlheinz Ochs, Ruhr-University Bochum</i>	

## **Session: A2L-F**

### **Reconfigurable Computing**

<b>Design Decisions in the Pipelined Architecture for Quantum Monte Carlo Simulations</b> .....	165
<i>Akila Gothandaraman, University of Tennessee; Gregory D. Peterson, University of Tennessee; Robert J. Hinde, University of Tennessee; Robert J. Harrison, University of Tennessee</i>	
<b>Implementation Methodology for Emerging Reconfigurable Systems</b> .....	169
<i>Phillip M. Martin, Clemson University; Melissa G. Smith, Clemson University; Sadaf Alam, Oak Ridge National Laboratory; Pratul Agarwal, Oak Ridge National Laboratory</i>	
<b>Reducing Power Consumption in FPGAs by Pipelining</b> .....	173
<i>Steve Bard, Cypress Semiconductor Corp.; Nader I. Rafla, Boise State University</i>	
<b>Hardware Accelerated Scalable Parallel Random Number Generators for Monte Carlo Methods</b> .....	177
<i>JunKyu Lee, University of Tennessee; Gregory D. Peterson, University of Tennessee; Robert J. Harrison, University of Tennessee; Robert J. Hinde, University of Tennessee</i>	

## **Session: A3L-A**

### **Integrated Circuits for Low Power Applications**

<b>A New High-Frequency CMOS Full-Wave Rectifier for Backlight Controllers</b> .....	181
<i>Ali E. Zadeh, University of Southern California</i>	
<b>Fully CMOS Integrated Active Rectifier Without Voltage Drop</b> .....	185
<i>C. Peters, IMTEK, University of Freiburg; M. Ortmanns, IMTEK, University of Freiburg; Y. Manoli, IMTEK, University of Freiburg</i>	
<b>High Efficiency, Low-Voltage and Self-Adjusting Charge Pump with Enhanced Impedance Matching</b> .....	189
<i>Dominic Maurath, IMTEK, University of Freiburg; Maurits Ortmanns, IMTEK, University of Freiburg; Yiannos Manoli, IMTEK, University of Freiburg</i>	

## **Session: A3L-B**

### **Circuits for Sense Amplifiers and PLLs**

<b>Analysis of Charge Pump Phase Locked Loop in the Presence of Loop Delay and Deterministic Noise</b> .....	193
<i>Shizhong Mei, Micron Technology Inc.</i>	
<b>A New Adaptation Scheme for Low Noise and Fast Settling Phase Locked Loop</b> .....	197
<i>Julien Roche, Atmel; Wenceslas Rahajandraibe, IM2NP-CNRS; Lahkdar Zad, IM2NP-CNRS; Gaetan Bracmard, Atmel</i>	
<b>Multivariate Calibration on a Low Transistor-Count Sensor Signal Processor</b> .....	201
<i>Xin Cai, Duke University; Martin A. Brooke, Duke University</i>	
<b>An Innovative Ultra Low Voltage Sub-32nm SRAM Voltage Sense Amplifier in DG-SOI Technology</b> .....	205
<i>Pranav Pranav, Vellore Institute of Technology University and Institut Supérieur d'Electronique de Paris; Bastien Giraud, Institut Supérieur d'Electronique de Paris; Amara Amara, Institut Supérieur d'Electronique de Paris</i>	

## **Session: A3L-C**

### **Circuits for Digital Systems**

<b>An Extended Library of Hardware Modules for Genetic Algorithms, with Applications to DNA Sequence Matching</b> .....	209
<i>Harish Ramaswamy, University of Cincinnati; Carla Purdy, University of Cincinnati</i>	

<b>Bus Encoding Schemes using Positive Correlated Switchings in Subbuses: A Comparison</b> .....	213
<i>Srinivasa Vemuru, Ohio Northern University; Ahmed Elkammar, City University of New York; Norman Scheinberg, City University of New York</i>	

<b>A SiGe BiCMOS Instrumentation Channel for Extreme Environment Applications</b> .....	217
<i>C. Ulaganathan, University of Tennessee; N. Nambiar, University of Tennessee; B. Prothro, University of Tennessee; R. Greenwell, University of Tennessee; S. Chen, University of Tennessee; B.J. Blalock, University of Tennessee; C.L. Britton Jr., University of Tennessee; M.N. Ericson, University of Tennessee; J.D. Cressler, Georgia Institute of Technology; H. Hoang, University of Arkansas; R. Broughton, University of Arkansas; K. Cornett, University of Arkansas; G. Fu, University of Arkansas; H.A. Mantooth, University of Arkansas; R.W. Berger, BAE Systems</i>	

## **Session: A3L-D**

### **Architectures for Signal Processing**

<b>An Efficient Architecture of RNS based Wallace Tree Multiplier for DSP Applications</b> .....	221
<i>Partha Pratim Kundu, West Bengal University of Technology; Oishila Bandyopadhyay, West Bengal University of Technology; Amitabha Sinha, West Bengal University of Technology</i>	

<b>An Advanced Recursive Algorithm for Low-Cost Implementation of Matrix Multipliers</b> .....	225
<i>Vijay Sundaram, National Institute of Technology, Tiruchirapalli</i>	

<b>Flexible Decoder Architectures for Irregular QC-LDPC Codes</b> .....	229
<i>Tzu-Chieh Kuo, University of California, Los Angeles; Alan N. Willson Jr., University of California, Los Angeles</i>	

<b>A Reusable Distributed Arithmetic Architecture for FIR Filtering</b> .....	233
<i>Haw-Jing Lo, Georgia Institute of Technology; Heejong Yoo, Georgia Institute of Technology; David V. Anderson, Georgia Institute of Technology</i>	

## **Session: A3L-E**

### **Image Processing**

<b>Parallel Structure System Employing PCA and VQ in the Transform Domain for Facial Recognition</b> .....	237
<i>Moataz M. Abdelwahab, University of Central Florida; Wasfy B. Mikhael, University of Central Florida</i>	

<b>Shape Adaptive Three Dimensional Cone Filter Bank</b> .....	241
<i>Santosh Singh, Siemens Information Systems Ltd.; Mehmet Celenk, Ohio University</i>	

<b>Robust Watermarking to Geometric Distortion based on Image Normalization and Texture Classification</b> .....	245
<i>Manuel Cedillo-Hernández, National Polytechnic Institute; Mariko Nakano-Miyatake, National Polytechnic Institute; Hector Perez-Meana, National Polytechnic Institute</i>	

<b>Improved Image Restoration using Wavelet-Based Denoising and Fourier-Based Deconvolution</b> .....	249
S.M. Mahbubur Rahman, <i>Concordia University</i> ; M. Omair Ahmad, <i>Concordia University</i> ; M.N.S. Swamy, <i>Concordia University</i>	

**Session: A3L-F  
SoC and VLSI**

<b>The Design and Simulation Model of an Analog Floating-Gate Computational Element for use in Large-Scale Analog Reconfigurable Systems</b> .....	253
Jordan Gray, <i>Georgia Institute of Technology</i> ; Ryan Robucci, <i>Georgia Institute of Technology</i> ; Paul Hasler, <i>Georgia Institute of Technology</i>	

<b>A 5-Bits Precision CMOS Bandgap Reference with On-Chip Bi-Directional Resistance Trimming</b> .....	257
Ndubuisi Ekekwe, <i>Johns Hopkins University</i> ; Ralph Etienne-Cummings, <i>Johns Hopkins University</i>	

<b>A Low-Power Capacitance Measurement Circuit with High Resolution and High Degree of Linearity</b> .....	261
M.R. Haider, <i>University of Tennessee</i> ; M.R. Mahfouz, <i>University of Tennessee</i> ; S.K. Islam, <i>University of Tennessee</i> ; S.A. Eliza, <i>University of Tennessee</i> ; W. Qu, <i>University of Tennessee</i> ; E. Pritchard, <i>University of Tennessee</i>	

<b>Reliability of Logic Circuits Under Multiple Simultaneous Faults</b> .....	265
Denis Teixeira Franco, <i>Télécom ParisTech</i> ; Maí Correia Vasconcelos, <i>Télécom ParisTech</i> ; Lirida Naviner, <i>Télécom ParisTech</i> ; Jean-François Naviner, <i>Télécom ParisTech</i>	

**Session: A4P-G  
Poster Session 1A**

<b>Two Pseudo-Differential Transmitting Circuits Producing a Constant Common-Mode Current</b> .....	269
Frédéric Broydé, <i>Excem</i> ; Germain Broydé, <i>ENSAM CER d'Angers</i>	

<b>A Subband Adaptive Blind Equalization for MIMO System</b> .....	273
Sang-Wook Sohn, <i>Chungbuk National University</i> ; Hun Choi, <i>Donggeui University</i> ; Hyeon-Deok Bae, <i>Chungbuk National University</i>	

<b>A Hybrid Active Noise Cancelling with Secondary Path Modeling</b> .....	277
Edgar Lopez-Gaudana, <i>Tecnologico de Monterrey</i> ; Pablo Betancourt, <i>Tecnologico de Monterrey</i> ; Enrique Cruz, <i>Tecnologico de Monterrey</i> ; Mariko Nakano-Miyatake, <i>Culhuacan Instituto Politecnico Nacional</i> ; Hector Perez-Meana, <i>Culhuacan Instituto Politecnico Nacional</i>	

<b>Muti-Tone Detection using the Warped Discrete Fourier Transform</b> .....	281
Ohbong Kwon, <i>University of Florida</i> ; Fred Taylor, <i>University of Florida</i>	

<b>A High Frequency Tunable Differential Active Inductor and its Application to Power Dividers</b> .....	285
Chaojiang Li, <i>Clemson University</i> ; Pingshan Wang, <i>Clemson University</i>	

<b>Design Techniques for Power Harvesting of Passive Wireless Microsensors</b> .....	289
Fei Yuan, <i>Ryerson University</i> ; Nima Soltani, <i>Ryerson University</i>	

<b>Instantiation of Higher Order Filters on a Continuous-Time Field-Programmable Analog Array</b> .....	294
<i>Stanis Trendelenburg, IMTEK, University of Freiburg; Daniel De Dorigo, IMTEK, University of Freiburg; Fabian Henrici, IMTEK, University of Freiburg; Joachim Becker, IMTEK, University of Freiburg; Yiannos Manoli, IMTEK, University of Freiburg</i>	

**Session: A4P-H**  
**Poster Session 2A**

<b>A Comparison of Multiplierless Multiple Constant Multiplication using Common Subexpression Elimination Method</b> .....	298
<i>Yasuhiro Takahashi, Gifu University; Toshikazu Sekine, Gifu University; Michio Yokoyama, Yamagata University</i>	

<b>Time Domain Adaptive Processing for Multi-User Crosstalk Cancellation</b> .....	302
<i>Li Youming, Ningbo University; Chen Xianfu, Ningbo University; Hu Guanhua, Ningbo University; Fang Liming, Huawei Technologies Co. Ltd.</i>	

<b>Image Content Authentication System based on Semi-Fragile Watermarking</b> .....	306
<i>Clara Cruz, National Polytechnic Institute of México; Rogelio Reyes, National Polytechnic Institute of México; Mariko Nakano, National Polytechnic Institute of México; Hector Perez, National Polytechnic Institute of México</i>	

<b>Mapping Multiplicity Aspects of Secure Communications Into Efficient Parallel Processing</b> .....	310
<i>Benjamin Arazi, Ben-Gurion University</i>	

<b>Multiple Node Upset Mitigation in TPDICE-Based Pipeline Memory Structures</b> .....	314
<i>Daniel R. Blum, Marvell Semiconductor; José G. Delgado-Frias, Washington State University</i>	

<b>A Synchronous Modular Multiplier with Variable Latency</b> .....	318
<i>Kuan Jen Lin, Fu Jen Catholic University; Yen Hung Lin, Fu Jen Catholic University</i>	

<b>Delay-Insensitive Asynchronous ALU for Cryogenic Temperature Environments</b> .....	322
<i>Brent Hollosi, University of Arkansas; Matthew Barlow, University of Arkansas; Guoyuan Fu, University of Arkansas; Chris Lee, University of Arkansas; Jia Di, University of Arkansas; Scott C. Smith, University of Arkansas; H. Alan Mantooth, University of Arkansas; Marcelo Schupbach, Arkansas Power Electronics International, Inc.</i>	

<b>TMR-Logic-Based LUT for Quickly Wake-Up FPGA</b> .....	326
<i>Daisuke Suzuki, Tohoku University; Tetsuo Endoh, Tohoku University; Takahiro Hanyu, Tohoku University</i>	

**Session: A4P-J**  
**Poster Session 3A**

<b>Improved Adaptive Algorithm for Active Noise Control of Impulsive Noise</b> .....	330
<i>Muhammad Tahir Akhtar, University of Electro-Communications; Wataru Mitsuhashi, University of Electro-Communications</i>	

<b>A Dual-Mode Mean-Shift Algorithm</b> .....	334
<i>Shih-Yu Chiu, National Yunlin University of Science and Technology; Jia-Rui Zhang, National Yunlin University of Science and Technology; Leu-Shing Lan, National Yunlin University of Science and Technology</i>	

<b>On Transition Bandwidth of Constrained Least-Squares Filters</b> .....	338
<i>Jia-Rui Zhang, National Yunlin University of Science and Technology;</i>	
<i>Tzon-Liang Shieh, National Yunlin University of Science and Technology;</i>	
<i>Leu-Shing Lan, National Yunlin University of Science and Technology</i>	
<b>A 6-Gb/s CMOS Imaging Diversity Receiver Front-End Employing Select-Best Method</b> .....	342
<i>Yiling Zhang, Tufts University; Valencia Joyner, Tufts University; Shengling Deng, Rensselaer Polytechnic Institute; Zhaoran Huang, Rensselaer Polytechnic Institute</i>	
<b>A Mixed-Signal Adder based on the Continuous Valued Number System</b> .....	346
<i>Mitra Mirhassani, University of Windsor; Prabhleen Kalkat, University of Windsor</i>	
<b>Optimizing BIST and Repair Logic for Embedded Memories</b> .....	350
<i>Maddumage Karunaratne, University of Pittsburgh at Johnstown;</i>	
<i>Bejoy Oomann, Genesys Testware Inc.</i>	
<b>Enhancing Parallel-Prefix Structures using Carry-Save Notation</b> .....	354
<i>Jun Chen, Oklahoma State University; James E. Stine, Oklahoma State University</i>	
<b>Clock Skew Tolerant Communication Scheme for SoC IP Blocks</b> .....	358
<i>Ray Robert Rydberg III, Washington State University; Jabulani Nyathi, Washington State University; José Delgado-Frias, Washington State University</i>	
<b>Session: B1L-A</b>	
<b>Low Power</b>	
<b>Characterization of Wake-Up Delay Versus Sleep Mode Power Consumption and Sleep/Active Mode Transition Energy Overhead Tradeoffs in MTCMOS Circuits</b> .....	362
<i>Zhiyu Liu, University of Wisconsin, Madison; Volkan Kursun, University of Wisconsin, Madison</i>	
<b>Increased Energy Efficiency and Reliability of Ultra-Low Power Arithmetic</b> .....	366
<i>Harry B. Marr, Georgia Institute of Technology; Jason George, Georgia Institute of Technology;</i>	
<i>David V. Anderson, Georgia Institute of Technology; Paul Hasler, Georgia Institute of Technology</i>	
<b>A 12-Bit Digitally Controlled Oscillator with Low Power Consumption</b> .....	370
<i>Jun Zhao, Northeastern University; Yong-bin Kim, Northeastern University</i>	
<b>Session: B1L-B</b>	
<b>Amplifiers and Comparators – II</b>	
<b>A 0.5V Rail-to-Rail 1.5 <math>\mu</math>W CMOS Amplifier for Micro-Energy Harvesting Applications</b> .....	374
<i>Dominic Maurath, IMTEK, University of Freiburg; Fridolin Michel, IMTEK, University of Freiburg;</i>	
<i>Maurits Ortmanns, IMTEK, University of Freiburg; Yiannos Manoli, IMTEK, University of Freiburg</i>	
<b>A High Efficiency Sigma-Delta based Direct Digital Amplifier</b> .....	378
<i>Chintan Trehan, Texas Instruments Inc.; Kwong S. Chao, Texas Tech University</i>	
<b>A Detailed Analysis of Nonideal Effects on High Precision Bandgap Voltage References</b> .....	382
<i>Jun He, Iowa State University; Randall Geiger, Iowa State University;</i>	
<i>Degang Chen, Iowa State University</i>	

## Session: B1L-C Optics and Photonics

<b>Multi-Optical Configuration using Spreading Beams</b> .....	386
<i>Naoki Yamaguchi, Shizuoka University; Minoru Watanabe, Shizuoka University</i>	
<b>Effect of Channel Impairments on the Performance of Burst-Mode Receivers in Gigabit PON</b> .....	390
<i>Bhavin J. Shastri, McGill University; Noha Kheder, McGill University; David V. Plant, McGill University</i>	
<b>Current-Mode Readout Circuits with Pixel-Level Logarithmic ADC for IR FPA Applications</b> .....	394
<i>Jian Guo, Tufts University; Sameer Sonkusale, Tufts University</i>	
<b>Current-Mode Preamplifier for Response Measurement of Semiconductor Scintillator</b> .....	398
<i>Xiao Yun, Stony Brook University; Milutin Stanácević, Stony Brook University; Vladis Kuzminsky, Stony Brook University; Mikhail Gouzman, Stony Brook University</i>	

## Session: B1L-D RF/Microwave 2

<b>Geometrical Analysis of LC Quadrature Oscillator</b> .....	402
<i>M.E. Heidari, University of California, Los Angeles; A. Mirzaei, University of California, Los Angeles; R. Bagheri, University of California, Los Angeles; S. Chehrazi, University of California, Los Angeles; A.A. Abidi, University of California, Los Angeles</i>	
<b>Analysis of Oscillators Synchronized by Second Harmonic</b> .....	406
<i>Luis Bica Oliveira, TU Lisbon / INESC-ID; I.M. Filanovsky, University of Alberta; Jorge R. Fernandes, TU Lisbon / INESC-ID</i>	
<b>Modeling, Simulation and Implementation of a Passive Mixer in 130nm CMOS Technology and Scaling Issues for Future Technologies</b> .....	410
<i>Krenar Komoni, Tufts University; Sameer Sonkusale, Tufts University</i>	
<b>Three-Port Conversion Scattering Parameters Characterization for Microwave Mixers</b> .....	414
<i>Haibo Cao, Iowa State University; Robert Weber, Iowa State University</i>	

## Session: B1L-E Memory Technologies

<b>A PFET-Access Radiation-Hardened SRAM for Extreme Environments</b> .....	418
<i>Matthew Barlow, University of Arkansas; Guoyuan Fu, University of Arkansas; Brent Hollosi, University of Arkansas; Chris Lee, University of Arkansas; Jia Di, University of Arkansas; H. Alan Mantooh, University of Arkansas; Marcelo Schupbach, Arkansas Power Electronics International Inc.; Richard Berger, BAE Systems</i>	
<b>A 32nm SRAM Design for Low Power and High Stability</b> .....	422
<i>Sheng Lin, Northeastern University; Yong-Bin Kim, Northeastern University; Fabrizio Lombardi, Northeastern University</i>	

<b>Aggressive Leakage Reduction of SRAMs using Error Checking and Correcting (ECC) Techniques</b> .....	426
<i>Afshin Nourivand, Concordia University; Asim J. Al-Khalili, Concordia University; Yvon Savaria, Ecole Polytechnique de Montreal</i>	

**Session: B1L-F  
Systems on Chip**

<b>Image Processing VLSI Architecture based on Data Compression</b> .....	430
<i>Masanori Hariyama, Tohoku University; Hisashi Yoshida, Tohoku University; Michitaka Kameyama, Tohoku University; Yasuhiro Kobayashi, Oyama National College of Technology</i>	

<b>A Test Chip for CPAL Register File Fabricated in Chartered 0.35<math>\mu</math>m CMOS Process</b> .....	434
<i>Jianping Hu, Ningbo University; Binbin Liu, Ningbo University; Xuanyan Hu, Ningbo University; Sheng Zhang, Ningbo University</i>	

<b>An 8192-Point Fast Fourier Transform 3D-IC Case Study</b> .....	438
<i>W. Rhett Davis, North Carolina State University; Ambarish M. Sule, North Carolina State University; Paul D. Franzon, North Carolina State University</i>	

<b>Maze Router based Scheme for Rotary Clock Router</b> .....	442
<i>Vinayak Honkote, Drexel University; Baris Taskin, Drexel University</i>	

**Session: B2L-A  
Low Power Designs**

<b>Mitigating Power-Supply Induced Delay Variations using Self Adjusting Clock Buffers</b> .....	446
<i>Sami Kirolos, Rice University; Yehia Massoud, Rice University; Yehea Ismail, Rice University</i>	

<b>A Low-Power Sensor Read-Out Circuit with FSK Telemetry for Inductively-Powered Implant System</b> .....	450
<i>M.R. Haider, University of Tennessee; S. Mostafa, University of Tennessee; S.K. Islam, University of Tennessee</i>	

<b>A Path Oriented in Time Optimization Flow for Mixed-Static-Dynamic CMOS Logic</b> .....	454
<i>Kumar Yelamarthi, Central Michigan University; Chien-In Henry Chen, Wright State University</i>	

<b>Efficient Power Modeling for On-Chip Global Interconnects</b> .....	458
<i>A.R. Aswatha, Dayananda Sagar College of Engineering; T. Basavaraju, Sri RevenaSiddeswara Institute of Technology, Bangalore; A.B. Kalpana, Bangalore Institute of Technology</i>	

**Session: B2L-B  
Analog Circuits**

<b>A Dynamic-Element-Matching Architecture using Individual Element Error Shaping</b> .....	462
<i>Carsten Noeske, Micronas GmbH; Maurits Ortmanns, IMTEK, University of Freiburg; Yiannos Manoli, IMTEK, University of Freiburg</i>	

<b>Local Biasing and the use of Nullator-Norator Pairs in Analog Circuits Designs</b> .....	466
<i>Reza Hashemian, Northern Illinois University</i>	

<b>Multi-Step Binary-Weighted Capacitive Digital-to-Analog Converter Architecture</b> .....	470
Ritu Raj Singh, <i>University of Toronto</i> ; Roman Genov, <i>University of Toronto</i> ; Ravi Teja Kotamraju, <i>Indian Institute of Technology Kanpur</i> ; Baquer Mazhari, <i>Indian Institute of Technology Kanpur</i>	

**Session: B2L-C  
Modulators**

<b>A UHF Continuous-Time Current-Mode Band-Pass Delta Sigma Modulator based on Active Inductor</b> .....	474
Qiuning Chen, <i>Dalhousie University</i> ; Kamal El-Sankary, <i>Dalhousie University</i> ; Ezz El-Masry, <i>Dalhousie University</i>	

<b>Two Novel Cascade <math>\Sigma\Delta</math> Modulators for Broadband Low-Voltage A/D Conversion</b> .....	478
Alonso Morgado, <i>Instituto de Microelectrónica de Sevilla - IMSE-CNM /CSIC/Universidad de Sevilla</i> ; Rocío del Río, <i>Instituto de Microelectrónica de Sevilla - IMSE-CNM /CSIC/Universidad de Sevilla</i> ; Jose M. de la Rosa, <i>Instituto de Microelectrónica de Sevilla - IMSE-CNM /CSIC/Universidad de Sevilla</i>	

<b>A Low-Voltage Flexible Cascade <math>\Sigma\Delta</math> Modulator for Beyond-3G Wireless Telecom</b> .....	482
Alonso Morgado, <i>Instituto de Microelectrónica de Sevilla - IMSE-CNM /CSIC/Universidad de Sevilla</i> ; Rocío del Río, <i>Instituto de Microelectrónica de Sevilla - IMSE-CNM /CSIC/Universidad de Sevilla</i> ; Jose M. de la Rosa, <i>Instituto de Microelectrónica de Sevilla - IMSE-CNM /CSIC/Universidad de Sevilla</i>	

<b>Complex Bandpass <math>\Delta\Sigma\Delta</math> Modulator with Noise-coupled Architecture</b> .....	486
Hao San, <i>Gunma University</i> ; Haruo Kobayashi, <i>Gunma University</i>	

**Session: B2L-D  
Signals and Timing**

<b>Signal Integrity Characterization and Modelling of a PCI/PCI-X 66/133 MHz Bus</b> .....	490
Mohammad S. Sharawi, <i>Philadelphia University</i>	

<b>Inter-Signal Timing Skew Compensation of Parallel Links with Current-Mode Incremental Signaling</b> .....	494
An Hu, <i>Ryerson University</i> ; Fei Yuan, <i>Ryerson University</i>	

<b>High Performance CMOS Driver-Receiver Pair using Low-Swing Signaling for Low Power On-Chip Interconnects</b> .....	499
José C. García, <i>University of Las Palmas de Gran Canaria</i> ; Juan A. Montiel-Nelson, <i>University of Las Palmas de Gran Canaria</i> ; Saeid Nooshabadi, <i>Gwangju Institute of Science and Technology</i>	

<b>Ultra-Low Power Delay-Insensitive Circuit Design</b> .....	503
Andrew D. Bailey, <i>University of Arkansas</i> ; Jia Di, <i>University of Arkansas</i> ; Scott C. Smith, <i>University of Arkansas</i> ; H. Alan Mantooth, <i>University of Arkansas</i>	

## **Session: B2L-E**

### **Arithmetic**

<b>A Timing-Driven Synthesis Approach of a Fast Four-Stage Hybrid Adder in Sum-of-Products .....</b>	<b>507</b>
<i>Sabyasachi Das, University of Colorado; Sunil P. Khatri, Texas A&amp;M University</i>	

<b>A Steady-State Add-on to the Algorithm for Implicit Numerical Integration .....</b>	<b>511</b>
<i>Josef Dobeš, Czech Technical University in Prague</i>	

<b>VLSI Implementation of a Novel Algorithm for Binary-negabinary Code Conversion .....</b>	<b>515</b>
<i>Ritu Bajpai, George Washington University; Mona Zaghloul, George Washington University; S.K. Balasubramanian, Banaras Hindu University</i>	

<b>A Floating-Point Fused Add-Subtract Unit .....</b>	<b>519</b>
<i>Hani Saleh, Intel Corporation; Earl E. Swartzlander Jr., University of Texas at Austin</i>	

## **Session: B2L-F**

### **Embedded System Design Methods**

<b>Using State Machines to Model and Manage Requirements Changes and Specification Changes .....</b>	<b>523</b>
<i>Lan Lin, University of Tennessee; Jason M. Carter, University of Tennessee; Jesse H. Poore, University of Tennessee</i>	

<b>Precise Exception Handling in Discontinuous Control Flow Scenarios for Area-Constrained Systems .....</b>	<b>527</b>
<i>Young Hoon Kang, University of Southern California; Jeff Draper, University of Southern California</i>	

<b>CAN Bus Embedded System for Lighting Network Applications .....</b>	<b>531</b>
<i>Javier Diaz, Instituto Tecnológico de Celaya; Elias Rodriguez, Instituto Tecnológico de Celaya; Luis Hurtado, Instituto Tecnológico de Celaya; Hugo Cacique, Instituto Tecnológico de Celaya; Nimrod Vazquez, Instituto Tecnológico de Celaya; Agustin Ramirez, Instituto Tecnológico de Celaya</i>	

## **Session: B3L-A**

### **Power Electronics**

<b>A High Voltage CCD Sensor Control Chip for the Large Synoptic Survey Telescope (LSST) .....</b>	<b>535</b>
<i>Zuoliang Ning, University of Tennessee; Benjamin J. Blalock, University of Tennessee; M. Nance Ericson, Oak Ridge National Laboratory; John Oliver, Harvard University; Richard Van Berg, University of Pennsylvania; Paul O'Connor, Brookhaven National Laboratory; Charles L. Britton Jr., Oak Ridge National Laboratory, University of Tennessee</i>	

<b>Hybrid Multilevel Inverter with Single DC Source .....</b>	<b>538</b>
<i>Haiwen Liu, University of Tennessee; Leon M. Tolbert, University of Tennessee, Oak Ridge National Laboratory; Burak Ozpineci, Oak Ridge National Laboratory; Zhong Du, Parker-Hannifin Corp</i>	

<b>Accurate and Practical Loop-Gain Prediction Method for Buck Converters .....</b>	<b>542</b>
<i>Ying Cheng, Micrel Inc.</i>	

## Session: B3L-B Analog Filters – II

<b>A Fast-Response Low-Dropout Regulator based on Power-Efficient Low-Voltage Buffer</b> .....	546
<i>Liang-guo Shen, Peking University; Zu-Shu Yan, Beijing Microelectronics Technology Institute; Xing Zhang, Peking University; Yuan-Fu Zhao, Beijing Microelectronics Technology Institute; Ming Gao, Wuhan Wumei Panva Gas Co., Ltd.</i>	
<b>Synthesis and Active Realization of a Three-Phase Complex Coefficient Filter using Gyrators</b> .....	550
<i>Kazuhiro Shouno, University of Tsukuba; Yukio Ishibashi, University of Tsukuba</i>	
<b>Harmonic Distortion Analysis via Perturbation Methods</b> .....	554
<i>K. Odame, Georgia Institute of Technology; P.E. Hasler, Georgia Institute of Technology</i>	
<b>Central Frequency Tuning Considerations for Gm-C Resonators in GaAs Technology</b> .....	558
<i>Emilie Avignon, Supélec; Sylvie Guessab, Supélec; Richard Kielbasa, Supélec</i>	

## Session: B3L-C Novel Techniques and Technologies

<b>Temperature-Adaptive Dynamic Voltage Scaling for High Temperature Energy Efficiency in Subthreshold Memory Banks</b> .....	562
<i>Ranjith Kumar, University of Wisconsin, Madison; Volkan Kursun, University of Wisconsin, Madison</i>	
<b>Emerging Carbon Nanotube Electronic Circuits, Modeling and Performance</b> .....	566
<i>Y. Xu, Louisiana State University; A. Srivastava, Louisiana State University; J.M. Marulanda, Louisiana State University</i>	
<b>A New Approach to the Design, Fabrication, and Testing of Chalcogenide-Based Multi-State Phase-Change Nonvolatile Memory</b> .....	570
<i>H.K. Ande, Boise State University; P. Busa, Boise State University; M. Balasubramanian, Boise State University; K.A. Campbell, Boise State University; R.J. Baker, Boise State University</i>	
<b>Low Depth Carry Look Ahead Circuits using Rail-to-Rail Capacitive Threshold Logic</b> .....	574
<i>Sri Raga Sudha Garimella, Intel Corporation; Annajirao Garimella, New Mexico State University; Lalitha Mohana Kalyani-Garimella, Intel Corporation; Jaime Ramirez-Angulo, New Mexico State University</i>	

## Session: B3L-D RF/Microwave 3

<b>A 15pJ/Pulse All-Digital UWB Pulse Generator with Pulse Tuning Capability</b> .....	578
<i>Chul Kim, University of New South Wales; Torsten Lehmann, University of New South Wales; Saeid Nooshabadi, Gwangju Institute of Science and Technology</i>	
<b>Towards Fully Integrated High Temperature Wireless Sensors using GaN-Based HEMT Devices</b> .....	582
<i>Mohammad Aminul Huque, University of Tennessee; Syed Kamrul Islam, University of Tennessee; Phani Teja Kuruganti, Oak Ridge National Laboratory</i>	

<b>Pseudo-Differential Links using a Wide Return Conductor and a Floating Termination Circuit</b> .....	586
<i>Frédéric Broydé, Excem; Evelyne Clavelier, Excem</i>	
<b>60Gb/s Low Jitter 4:1 Mux and 1:4 DeMux</b> .....	590
<i>Yifei Luo, University of New Hampshire; Gang Chen, University of New Hampshire; Kuan Zhou, University of New Hampshire</i>	

**Session: B3L-E**  
**Alternate Computing Technologies**

<b>Optical Hybrid Processing Utilizing Photonic Crystals Incorporating Biological Materials</b> .....	594
<i>Scott Masturzo, University of Cincinnati; Howard Jackson, University of Cincinnati; Joseph Boyd, University of Cincinnati; Robert Ewing, Air Force Research Laboratory; Hoda Abdel-Aty-Zohdy, Air Force Research Laboratory; Jan Yarrison-Rice, Miami University</i>	

<b>Toward DNA-Based Security Circuitry: First Step – Random Number Generation</b> .....	597
<i>Christy M. Bogard, University of Louisville; Benjamin Arazi, Ben-Gurion University; Eric C. Rouchka, University of Louisville</i>	

<b>Fractional-Order Signal Processing using a Polymer-Electrolyte Transistor</b> .....	601
<i>Robert L. Ewing, U.S. Air Force Research Laboratory; Hoda S. Abdel-Aty-Zohdy, Oakland University; Michael C. Hollenbeck, U.S. Air Force Research Laboratory, University of Utah; Kenneth S. Stevens, University of Utah</i>	

**Session: B3L-F**  
**Verification**

<b>Statistical Timing Analysis of Nonzero Clock Skew Circuits</b> .....	605
<i>Shannon Kurtas, Drexel University; Baris Taskin, Drexel University</i>	

<b>Handshaking Expansion as Action Refinement</b> .....	609
<i>Xiuli Sun, Portland State University, Chinese Academy of Sciences; Jinzhao Wu, Beijing Jiaotong University, School of Optoelectronic Information University of Electronic Science and Technology; Xiaoyu Song, Portland State University</i>	

<b>Automatic Generation of Chu Space Model Expressions for Verification</b> .....	613
<i>Lubomir Ivanov, Iona College</i>	

<b>Trapped Charge Characterization and Removal on Floating-Gate Transistors</b> .....	617
<i>B.P. Degnan, Georgia Institute of Technology; P. Hasler, Georgia Institute of Technology; Christopher M. Twigg, Binghamton University</i>	

**Session: B4P-G**  
**Poster Session 1B**

<b>A Realizable Modified Tent Map for True Random Number Generation</b> .....	621
<i>Hamid Nejati, Rice University; Ahmed Beirami, Rice University; Yehia Massoud, Rice University</i>	

<b>CMOS Current-Mode Active Transformer Sigma-Delta Modulators</b> .....	625
<i>A. Tang, Ryerson University; F. Yuan, Ryerson University; E. Law, Ryerson University</i>	

<b>A Novel 10GHz CMOS Inductive Buffered Transimpedance Amplifier Stage for Optical Transceivers</b> .....	629
<i>Nazmul Ula, Loyola Marymount University; S.M. Rezaul Hasan, Massey University</i>	
<b>A Digital Pseudo Background Correction Method in Pipelined ADCs</b> .....	634
<i>A. Jalili, Isfahan University of Technology; S.M. Sayedi, Isfahan University of Technology</i>	
<b>On the Effective Sampling Time of Regenerative Comparators</b> .....	638
<i>Thomas W. Matthews, California State University, Sacramento</i>	
<b>Sigma Delta Modulators with Modified Hybrid Integrators</b> .....	642
<i>Shankar Thirunakkarasu, Arizona State University; Abul Bashar M. Ishtek Hossain, Arizona State University; Bahar Jalali Farahani, Arizona State University</i>	
<b>A CT MASH <math>\Sigma\Delta</math> Modulator with Adaptive Digital Tuning for Analog Circuit Imperfections</b> .....	646
<i>Jipeng Wang, Arizona State University; Bahar Jalali Farahani, Arizona State University</i>	
<b>SiGe BiCMOS 12-Bit 8-Channel Low Power Wilkinson ADC</b> .....	650
<i>N. Nambiar, University of Tennessee; C. Ulaganathan, University of Tennessee; S. Chen, University of Tennessee; M. Hale, University of Tennessee; A. Antonacci, University of Tennessee; B.J. Blalock, University of Tennessee; C.L. Britton, Oak Ridge National Laboratory, University of Tennessee; M.N. Ericson, University of Tennessee</i>	
<b>Session: B4P-H</b>	
<b>Poster Session 2B</b>	
<b>Interface Circuit for Capacitive Microaccelerometer</b> .....	654
<i>Minjie Liu, Tsinghua University; Gang Zhang, Tsinghua University; Jingxin Dong, Tsinghua University; Changde Zhao, Tsinghua University</i>	
<b>Current Biased Pseudo-Resistor for Implantable Neural Signal Recording Applications</b> .....	658
<i>Sitong Yuan, Oklahoma State University; Louis G. Johnson, Oklahoma State University; Cheng C. Liu, Oklahoma State University; Chris Hutchens, Oklahoma State University; Robert L. Rennaker, University of Oklahoma</i>	
<b>A Reconfigurable Systolic Array SoC Design for Multicarrier Wireless Applications</b> .....	662
<i>H. Ho, Communications Research Centre; V. Szwarc, Communications Research Centre; T. Kwasniewski, Carleton University</i>	
<b>A New Wafer Treatment Cell for Control of Solution based Thin Film Processing for Applications in Microelectronics</b> .....	666
<i>Mark A. Patterson, University of Dayton; Guru Subramanyam, University of Dayton; Patrick Wheat, State of Alaska EPA</i>	
<b>Mixed-Domain Simulation of Electrophoretic DNA Separation for CMOS IC Design</b> .....	670
<i>Heather A. Wake, Duke University; Martin A. Brooke, Duke University</i>	
<b>Joint Coding for RLC Coupling-Aware On-Chip Buses</b> .....	674
<i>Md. Sajjad Rahaman, University of Illinois at Chicago; Masud H. Chowdhury, University of Illinois at Chicago</i>	

<b>A General Adaptive Charge-Balancing Stimulator</b> .....	678
<i>Jingzhen Hu, North Carolina State University; Christal Gordon, North Carolina State University</i>	
<b>RF-Front End for Wireless Powered Neural Applications</b> .....	682
<i>Srinivasan Venkataraman, Oklahoma State University; Chris Hutchens, Oklahoma State University; Robert L. Rennaker II, University of Oklahoma</i>	
<b>Biased AC Electroosmosis Micropump for Water Management in PEM Fuel Cells</b> .....	686
<i>Nazmul Islam, Northern Arizona University; Jie Wu, University of Tennessee</i>	
<b>Session: B4P-J</b>	
<b>Poster Session 3B</b>	
<b>Switched-Capacitor Multiply-by-Two Amplifier for High-Resolution Pipelined A/D Converter</b> .....	690
<i>Chi-Chang Lu, National Formosa University; Wei-Xiang Tung, National Formosa University</i>	
<b>New CMOS Realization of the Differential Difference Operational Floating Amplifier with Wide Input Voltage Range</b> .....	694
<i>Eman A. Azab, German University in Cairo; Soliman A. Mahmoud, German University in Cairo</i>	
<b>Achieving Rail-to-Rail Input Operation using Level-Shift Multiplexing Technique for All CMOS Op-Amps</b> .....	698
<i>Yasutaka Haga, University of Westminster; Izzet Kale, University of Westminster</i>	
<b>A Low-Power Field-Programmable VLSI based on a Fine-Grained Power-Gating Scheme</b> .....	702
<i>Masanori Hariyama, Tohoku University; Shota Ishihara, Tohoku University; Michitaka Kameyama, Tohoku University</i>	
<b>Sawtooth Generator using Two Triangular Waves</b> .....	706
<i>Nobukazu Takai, Gunma University; Yukihiro Fujimura, Gunma University</i>	
<b>Session: B5P-G</b>	
<b>Poster Session 1C</b>	
<b>Wide Range CMOS Differential Voltage Current Conveyor and its Applications</b> .....	710
<i>Soliman A. Mahmoud, German University in Cairo</i>	
<b>RTL Dynamic Power Optimization for FPGAs</b> .....	714
<i>David Howland, University of Massachusetts; Russell Tessier, University of Massachusetts</i>	
<b>SOI MOSFET as Potential Replacement of Mechanical Relays in Electrical Systems</b> .....	718
<i>Abbas A. Fardoun, United Arab Emirates University; Mona Hassan, United Arab Emirates University; Heba Mohammed, United Arab Emirates University; Jalal Jomaah, IMEP/INPG</i>	
<b>A Low-Ripple Charge Pump with Continuous Pumping Current Control</b> .....	722
<i>Chi-Hao Wu, National Taiwan University; Chern-Lin Chen, National Taiwan University</i>	
<b>An Ultracapacitor Model Derived using Time-Dependent Current Profiles</b> .....	726
<i>Yang Wang, University of Akron; Joan E. Carletta, University of Akron; Tom T. Hartley, University of Akron; Robert J. Veillette, University of Akron</i>	

<b>A Performance Driven Probabilistic Resource Allocation Algorithm for Analog Routers</b> .....	730
<i>Changxu Du, Tsinghua University; Yici Cai, Tsinghua University; Xianlong Hong, Tsinghua University</i>	
<b>Voltage Mode All-Pass Filter with a Single Current Differencing Buffered Amplifier</b> .....	734
<i>Bilgin Metin, Bogazici University; Oguzhan Cicekoglu, Bogazici University; Kirat Pal, Indian Institute of Technology</i>	
<b>Session: B5P-H</b>	
<b>Poster Session 2C</b>	
<b>A 5.2GHz CMOS Fractional-N Frequency Synthesizer with a MASH Delta-Sigma Modulator</b> .....	738
<i>Chin-Ying Chen, Fortune Institute of Technology; Jyh-Jier Ho, National Taiwan Ocean University; Wan-Rone Liou, National Taipei University; Robert Y. Hsiao, University of Illinois Urbana-Champaign</i>	
<b>Application of Artificial Neural Networks for Electromagnetic Modeling and Computational Electromagnetics</b> .....	743
<i>Shan Wan, Carleton University; Lei Zhang, Carleton University; Qijun Zhang, Carleton University</i>	
<b>A Hardware-Aware Process for the Design of Low-Power Pulse-Shaping Filters</b> .....	747
<i>Casey J. Bakula, University of Akron; Joan E. Carletta, University of Akron</i>	
<b>Threshold Direct Synthesis Structure for Digital Delta-Sigma Modulators</b> .....	751
<i>Yu Song, University of Rochester; Zeljko Ignjatovic, University of Rochester</i>	
<b>An Autotransformer Impedance Transformation Technique for Efficient Power Harvesting of Passive Transponders and Wireless Microsensors</b> .....	755
<i>Nima Soltani, Ryerson University; Fei Yuan, Ryerson University</i>	
<b>Particle Swarm Optimization with an Improved Exploration-Exploitation Balance</b> .....	759
<i>Mounir Ben Ghalia, University of Texas-Pan American</i>	
<b>Session: B5P-J</b>	
<b>Poster Session 3C</b>	
<b>A Novel Low-Power and High-Performance Dual-Loop DLL with Linear Delay Element</b> .....	763
<i>M. Gharib, Iran University of Science &amp; Technology; A. Abrishamifar, Iran University of Science &amp; Technology</i>	
<b>The Implementations of Adiabatic Flip-Flops and Sequential Circuits with Power-Gating Schemes</b> .....	767
<i>Weiqliang Zhang, Ningbo University; Dong Zhou, Ningbo University; Xuanyan Hu, Ningbo University; Jianping Hu, Ningbo University</i>	
<b>A Novel High Write Speed, Low Power, Read-SNM-Free 6T SRAM Cell</b> .....	771
<i>Abhijit Sil, University of Louisiana at Lafayette; Soumik Ghosh, University of Louisiana at Lafayette; Neeharika Gogineni, University of Louisiana at Lafayette; Magdy Bayoumi, University of Louisiana at Lafayette</i>	

<b>Optimum Organization of SRAM-Based Memory for Leakage Power Reduction</b> .....	775
<i>Adel Hussein, University of Texas at San Antonio; Hani Saleh, University of Texas at Austin; Baker Mohammad, University of Texas at Austin; E. John, University of Texas at San Antonio</i>	
<b>A Technique for Low Power Dynamic Circuit Design in 32nm Double-Gate FinFET Technology</b> .....	779
<i>Young Bok Kim, Northeastern University; Yong-Bin Kim, Northeastern University; Fabrizio Lombardi, Northeastern University</i>	
<b>On Estimation of Static Power-Performance in TCAM</b> .....	783
<i>Dhireesha Kudithipudi, Rochester Institute of Technology; Eugene John, University of Texas at San Antonio</i>	

**Session: C1L-A**  
**Signal Processing Algorithms**

<b>Optimized Scheme for Power-of-Two Coefficient Approximation for Low Power Decimation Filters in Sigma Delta ADCs</b> .....	787
<i>Ahmed Shahein, IMTEK, University of Freiburg; Markus Becker, IMTEK, University of Freiburg; Niklas Lotze, IMTEK, University of Freiburg; Maurits Ortmanns, IMTEK, University of Freiburg; Yiannos Manoli, IMTEK, University of Freiburg</i>	
<b>Residue Number System Operands to Decimal Conversion for 3-Moduli Sets</b> .....	791
<i>Kazeem Alagbe Gbolagade, Delft University of Technology, University for Development Studies at Navrongo; Sorin Dan Cotofana, Delft University of Technology</i>	
<b>An Operator-Based Approach to the Unfolding Transformation</b> .....	795
<i>Marvi Teixeira, Polytechnic University of Puerto Rico</i>	
<b>Computationally Efficient Updating of a Weighted Welch Periodogram for Nonstationary Signals</b> .....	799
<i>Francis K. Tuffner, University of Wyoming; John W. Pierre, University of Wyoming; Robert F. Kubichek, University of Wyoming</i>	

**Session: C1L-B**  
**Amplifiers and Comparators – III**

<b>Stability Analysis of an Amplifier with Negative Impedance Compensation</b> .....	803
<i>Ruiheng Wu, University of Greenwich; Chen Wang, Imperial College London</i>	
<b>Using Positive Feedback to Overcome gmro Limitations in Scaled CMOS Amplifier Design</b> .....	807
<i>Mark Pude, Rochester Institute of Technology; P.R. Mukund, Rochester Institute of Technology; Prashant Singh, LSI Corporation; Jeff Burleson, LSI Corporation</i>	
<b>A Microwave Doherty Amplifier with Programmable Bias Control</b> .....	811
<i>Manfred Berroth, Universitaet Stuttgart; Jan Willeke, Universitaet Stuttgart; Ingo Dettmann, Rohde &amp; Schwarz</i>	
<b>Low Voltage Current-Mode Digitally Controlled VGA based on Digitally Programmable Current Conveyors</b> .....	814
<i>Soliman A. Mahmoud, German University in Cairo</i>	

## Session: C1L-C Biosystems

<b>A Carbon Nanotube Implementation of Temporal and Spatial Dendritic Computations</b> .....	818
<i>Alice C. Parker, University of Southern California; Jonathan Joshi, University of Southern California; Chih-Chieh Hsu, University of Southern California; Nav Aman Deep Singh, University of Southern California</i>	
<b>A Low-Power Low-Data-Rate Neural Recording System with Adaptive Spike Detection</b> .....	822
<i>Donghwi Kim, Stony Brook University; Milutin Stanačević, Stony Brook University; Ridha Kamoua, Stony Brook University; Zachary Mainen, Cold Spring Harbor Laboratory</i>	
<b>CMOS Charge-Metering Microstimulator for Implantable Prosthetic Device</b> .....	826
<i>Xiang Fang, University of Southern California; Jack Wills, University of Southern California; John Granacki, University of Southern California; Jeff LaCoss, University of Southern California; John Choma, University of Southern California</i>	
<b>Bio-Inspired Oscillating Media Supporting Spiral Waves Patterns</b> .....	830
<i>Fernando Corinto, Politecnico di Torino; Valentina Lanza, Politecnico di Torino; Michele Bonnin, Politecnico di Torino; Marco Gilli, Politecnico di Torino</i>	

## Session: C1L-D RF/Microwave 4

<b>Electrostatic Capacitance Extraction for Carbon Nanotube Interconnects</b> .....	834
<i>Vidur Parkash, Michigan Technological University; Ashok K. Goel, Michigan Technological University</i>	
<b>Passive RFID Transponder with Power-Aware Encryption</b> .....	838
<i>Meng-Lin Hsia, National Chung Cheng University; Oscar T.-C. Chen, National Chung Cheng University</i>	
<b>Adaptable Digital Delta-Sigma Modulator for Multiband Frequency Synthesizer</b> .....	842
<i>Yu Song, University of Rochester; Eric C. Moule, University of Rochester; Zeljko Ignjatovic, University of Rochester</i>	
<b>A Dual Slope based Pulse Position Modulation Circuit for Sub-GHz IR-UWB Systems</b> .....	846
<i>Varun Shenoy, University of Texas at Arlington; Prasanna Kalkura, University of Texas at Arlington; Sungyong Jung, University of Texas at Arlington; Mingyu Lu, University of Texas at Arlington; Jean Gao, University of Texas at Arlington; Sung Chul Lee, Korea Electronics Technology Institute</i>	

## Session: C1L-E Digital Filters

<b>Two-Dimensional State-Space Digital Filters with Minimum Frequency-Weighted I2-Sensitivity Under I2-Scaling Constraints</b> .....	850
<i>Takao Hinamoto, Hiroshima University; Toru Oumi, Hiroshima University; Osemekhian I. Omoifo, Hiroshima University; Wu-Sheng Lu, University of Victoria</i>	
<b>Complex FIR Block Adaptive Digital Filtering Algorithm with Independent Adaptation of Real and Imaginary Filter Parameters</b> .....	854
<i>Wasfy B. Mikhael, University of Central Florida; Raghuram Ranganathan, University of Central Florida</i>	

<b>Tracking Characteristics of an Adaptive IIR Notch Filter for Sinusoidal Frequency Variation</b> .....	858
<i>Aloys Mvuma, University of Dar es Salaam; Shotaro Nishimura, Shimane University; Takao Hinamoto, Hiroshima University</i>	

<b>Sliding DFT based Ultrasonic Ranger</b> .....	862
<i>Sumathi Parasuraman, Indian Institute of Technology Madras; P.A. Janakiraman, Indian Institute of Technology Madras</i>	

**Session: C1L-F**  
**VLSI Architectures**

<b>Investigating the Impact of Carbon Nanotube-Based Driver Transistors on the Performance of Single-Walled Carbon Nanotube Interconnect</b> .....	866
<i>Tamer Ragheb, Rice University; Arthur Nieuwoudt, Rice University; Yehia Massoud, Rice University</i>	

<b>An Efficient VLSI Implementation for the 1D Convolutional Discrete Wavelet Transform</b> .....	870
<i>Ramsey Hourani, North Carolina State University; Ishita Dalal, North Carolina State University; W. Rhett Davis, North Carolina State University; Christopher Doss, North Carolina A&amp;T State University; Winser Alexander, North Carolina State University</i>	

<b>Parasitic Charge Movement in Floating-Gate Array Programming</b> .....	874
<i>Jordan D. Gray, Georgia Institute of Technology; Paul E. Hasler, Georgia Institute of Technology</i>	

<b>Design of VLSI Sorting Accelerator Architecture</b> .....	878
<i>Yun-Nan Chang, National Sun Yat-sen University; Chien-Jung Fu, National Sun Yat-sen University</i>	

**Session: C2L-A**  
**Configurable Systems**

<b>Optimization at Runtime on a Nanoprocessor Architecture</b> .....	882
<i>Justin Teller, Ohio State University; Füsün Özgüner, Ohio State University; Robert Ewing, U.S. Air Force Research Laboratory</i>	

<b>A Programmable FPGA Implementation of a Multi-Coded BOC(m, n) Signal Generator for Navigation Systems</b> .....	886
<i>Mohammad S. Sharawi, Philadelphia University; Daniel N. Aloï, Oakland University</i>	

<b>Configurable Hardware Design for Frequency-Diverse Target Detection</b> .....	890
<i>Joshua Weber, Illinois Institute of Technology; Erdal Oruklu, Illinois Institute of Technology; Jafar Saniie, Illinois Institute of Technology</i>	

<b>A Backpropagation Neural Network Design using Adder-Only Arithmetic</b> .....	894
<i>Vicente Mahoney, University of Tennessee; Itamar Elhanany, University of Tennessee</i>	

**Session: C2L-B**  
**Clocks and Oscillators**

<b>A New Current-Integrating Bang-Bang Phase Detector for Clock and Data Recovery</b> .....	898
<i>Fei Yuan, Ryerson University</i>	

<b>On the Feasibility of Bandwidth Tuning in Cascaded Non-Autonomous Chaotic Oscillators</b> .....	902
<i>Hamid Nejati, Rice University; Tamer Ragheb, Rice University; Yehia Massoud, Rice University</i>	
<b>Loop Phase Corrections in Oscillator Feedback Networks</b> .....	906
<i>A.M. Dighe, Yeshwantrao Chavan College of Engineering; P.K. Dakhole, Yeshwantrao Chavan College of Engineering; P.T. Karule, Yeshwantrao Chavan College of Engineering</i>	
<b>Spatial Scanning-Probe Array System for Silicon-on-Insulator Integrated Circuits</b> .....	910
<i>Wen-Ren Yang, Changhua University of Education</i>	
<b>Session: C2L-C</b>	
<b>High Speed Data Converters</b>	
<b>Fast Nonlinear Deterministic Calibration of Pipelined A/D Converters</b> .....	914
<i>Takashi Oshima, Hitachi Ltd.; Tomomi Takahashi, Hitachi Ltd.; Taizo Yamawaki, Hitachi Ltd.; Cheonguyen Tsang, University of California, Berkeley; Dusan Stepanovic, University of California, Berkeley; Borivoje Nikolic, University of California, Berkeley</i>	
<b>A Simplified Calibration Technique for Pipelined ADCs using Reference Tapering</b> .....	918
<i>David Flowers, California State University, Sacramento; Kenneth Dyer, Akros Silicon; Darshinee Patel, California State University, Sacramento; Pritesh Shah, California State University, Sacramento; Tapan Shah, California State University, Sacramento; Perry Heedley, California State University, Sacramento; Thomas Matthews, California State University, Sacramento</i>	
<b>Linearity Analysis on a Series-Split Capacitor Array for High-Speed SAR ADCs</b> .....	922
<i>Yan Zhu, University of Macau; U-Fat Chio, University of Macau; He-Gong Wei, University of Macau; Sai-Weng Sin, University of Macau; Seng-Pan U, University of Macau; R.P. Martins, University of Macau</i>	
<b>Session: C2L-D</b>	
<b>Managing Noise</b>	
<b>Sampling Rate Selection for Real-Time De-Noising Systems</b> .....	926
<i>Sami Khorbotly, Ohio Northern University; Joan E. Carletta, University of Akron</i>	
<b>A New Method to Thermally Manage an Electronic Control Unit While Reducing Radiated Emissions</b> .....	930
<i>Imad Sharaa, Visteon; Daniel N. Aloï, Oakland University</i>	
<b>A Correlation Domain Algorithm for Autoregressive System Identification from Noisy Observations</b> .....	934
<i>S.A. Fattah, Concordia University; W.-P. Zhu, Concordia University; M.O. Ahmad, Concordia University</i>	
<b>A Temporal Matching Method for Pitch Determination from Noisy Speech Signals</b> .....	938
<i>C. Shahnaz, Concordia University; W.-P. Zhu, Concordia University; M.O. Ahmad, Concordia University</i>	

## **Session: C2L-E**

### **Digital Signal Processing**

<b>A Mixed-Tone RLS Algorithm with Orthogonal Projection for Per-Tone DMT Equalisation</b> .....	942
<i>Suchada Sitjongsataporn, Mahanakorn University of Technology; Peerapol Yuvapoositanon, Mahanakorn University of Technology</i>	
<b>Click Modulation: an Off-Line Implementation</b> .....	946
<i>Leandro Stefanazzi, Universidad Nacional del Sur; Eduardo Paolini, Universidad Nacional del Sur; Alejandro Oliva, Universidad Nacional del Sur</i>	
<b>Amplitude-Division Parallel LMS Estimator</b> .....	950
<i>Tetsuya Shimamura, Saitama University; Shingo Oikawa, Saitama University; Yusuke Tsuda, Saitama University</i>	

## **Session: C2L-F**

### **VLSI Arithmetic**

<b>Floating-Point Division and Square Root Implementation using a Taylor-Series Expansion Algorithm with Reduced Look-Up Tables</b> .....	954
<i>Taek-Jun Kwon, University of Southern California / Information Sciences Information; Jeff Draper, University of Southern California / Information Sciences Institute</i>	
<b>A Novel Pre-Truncated Fixed-Width Digital Squarer</b> .....	958
<i>Ashkan Ashrafi, San Diego State University; Sudheep Thota, San Diego State University</i>	
<b>Decimal Partial Product Generation Architectures</b> .....	962
<i>Ivan D. Castellanos, Oklahoma State University; James E. Stine, Oklahoma State University</i>	
<b>Single Newton-Raphson Iteration for Integer-Rounded Divider for Lattice Reduction Algorithms</b> .....	966
<i>Brian Gestner, Georgia Institute of Technology; David V. Anderson, Georgia Institute of Technology</i>
