# 2008 IEEE International Conference on Dependable Systems & Networks with FTCS & DCC

## Anchorage, AK
## 24-27 June 2008

IEEE

**IEEE Catalog Number:** CFP08048-PRT
**ISBN 13:** 978-1-4244-2397-2

# Table of Contents

**Coverage of a Microarchitecture-Level Fault Check Regimen in a Superscalar Processor** ..... 1
*Vimal Reddy and Eric Rotenberg*
**Analysis and Solutions to Issue Queue Process Variation** ..... 11
*Niranjan Soundararajan Aditya Yanamandra Chrysostomos Nicopoulos and N. Vijaykrishnan*
**Trace-Based Microarchitecture-Level Diagnosis of Permanent Hardware Faults** ..... 22
*Man-Lap Li, Pradeep Ramachandran, Swarup K. Sahoo, Sarita V. Adve, Vikram S. Adve and Yuanyuan Zhou*
**A Study of Cognitive Resilience in a JPEG Compressor** ..... 32
*Damian Nowroth and Bernd Becker*
**Scheduling Algorithms for Unpredictably Heterogeneous CMP Architectures** ..... 42
*Jonathan A. Winter and David H. Albonesi*
**Automated Duplicate Detection for Bug Tracking Systems** ..... 52
*Nicholas Jalbert and Westley Weimer*
**Validation of Hardware Error Recovery Mechanisms for the SPARC64 V Microprocessor** ..... 62
*Hisashige Ando, Ryuji Kan, Yoshiharu Tosaka, Keiji Takahisa and Kichiji Hatanaka*
**Using Likely Program Invariants to Detect Hardware Errors** ..... 70
*Swarup Kumar Sahoo, Man-Lap Li, Pradeep Ramachandran, Sarita V.Adve, Vikram S. Adve and Yuanyuan Zhou*
**Detouring: Translating Software to Circumvent Hard Faults in Simple Cores** ..... 80
*Albert Meixner and Daniel J. Sorin*
**Towards Assessing the Security of DBMS Configurations** ..... 90
*Marco Vieira and Marco Vieira*
**Experiences With Formal Specification of Fault-Tolerant File Systems** ..... 96
*Roxana Geambasu, Andrew Birrell and John MacCormick*
**Using An Assurance Case to Support Independent Assessment of the Transition to a New GPS Ground Control System** ..... 102
*Elisabeth A. Nguyen, William S. Greenwell and Myron J. Hecht*
**Silent Data Corruption - Myth or Reality?** ..... 108
*Cristian Constantinescu*
**End-System Tools for Enhancing Email Reliability** ..... 110
*Tim Moors and Patrick Chu*
**Tempest: Towards Early Identification of Failure-Prone Binaries** ..... 116
*Thirumalesh Bhat and Nachiappan Nagappan*
**Statistical Fault Injection** ..... 122
*Pradeep Ramachandran, Prabhakar Kudva, Jeffrey Kellington, John Schumann and Pia Sanda*
**An Accurate Flip-Flop Selection Technique for Reducing Logic SER** ..... 128
*Eric L. Hill, Mikko H. Lipasti and Kewal K. Saluja*
**Combined Circuit and Microarchitecture Techniques for Effective Soft Error Robustness in SMT Processors** ..... 137
*Xin Fu, Tao Li and José Fortes*
**Reliability of Flat XOR-Based Erasure Codes On Heterogeneous Devices** ..... 147
*Kevin M. Greenan, Ethan L. Miller and Jay J. Wylie*
**Conferr: a Tool for Assessing Resilience to Human Configuration Errors** ..... 157
*Lorenzo Keller, Prasang Upadhyaya and George Candea*
**Enhanced Server Fault-Tolerance for Improved User Experience** ..... 167
*Manish Marwah and Christof Fetzer*
**Towards An Understanding of Anti-Virtualization and Anti-Debugging Behavior in Modern Malware** ..... 177
*Xu Chen¤ Jon Andersen, Z. Morley Mao, Michael Bailey and Jose Nazario+*
**Security Through Redundant Data Diversity** ..... 187
*Anh Nguyen-Tuong, David Evans, John C. Knight, Benjamin Cox and Jack W. Davidson*
**Byzantine Replication Under Attack** ..... 197
*Yair Amir, Brian Coan, Jonathan Kirsch and John Lane*
**A Robust and Lightweight Stable Leader Election Service for Dynamic Systems** ..... 207
*Nicolas Schiper and Sam Toueg*
**A Fast Restart Mechanism for Checkpoint/Recovery Protocols in Networked Environments** ..... 217
*Yawei Li and Zhiling Lan*
**Tempest: Soft State Replication in the Service Tier** ..... 227
*Tudor Marian, Mahesh Balakrishnan, Ken Birman and Robbert van Renesse*

**AGIS: Towards Automatic Generation of Infection Signatures** ..... **237**
*Zhuowei Liy, XiaoFeng Wangy, Zhenkai Liangx and Michael K. Reiter*
**Convicting Exploitable Software Vulnerabilities: An Efficient Input Provenance Based Approach** ..... **247**
*Zhiqiang Lin, Xiangyu Zhang and Dongyan Xu*
**Mapping Software Faults With Web Security Vulnerabilities** ..... **257**
*José Fonseca and Marco Vieira*
**A Fault-Tolerant Directory-Based Cache Coherence Protocol for CMP Architectures** ..... **267**
*Ricardo Fernandez-Pascual, Jose M. Garcia, Manuel E. Acacio and Jose Duato*
**Probabilistic Quorum Systems in Wireless Ad Hoc Networks** ..... **277**
*Roy Friedman, Gabriel Kliot and Chen Avin*
**Bar Primer** ..... **287**
*Allen Clement, Harry Li, Jeff Napper, Jean-Philippe Martin, Lorenzo Alvis and Mike Dahlin*
**Improving Dependability of Network Configuration Through Policy Classification** ..... **297**
*Sihyung Lee, Tina Wong and Hyong S. Kim*
**Traffic Grooming in WDM Mesh Networks With Guaranteed Survivability** ..... **307**
*A. Bari, Q. Rahman, a Jaekel, and S. Bandyopadhyay*
**Implementation and Evaluation of a Distributed and Cooperative Load-Balancing Mechanism for Dependable Volunteer Computing** ..... **316**
*Yoshitomo Murata, Tsutomu Inaba, Hiroyuki Takizawa and Hiroaki Kobayashi*
**An Integrated Approach to Resource Pool Management: Policies, Efficiency and Quality Metrics** ..... **326**
*Daniel Gmach, Jerry Rolia, Ludmila Cherkasova, Guillaume Belrose, Tom Turicchi and Alfons Kemper.*
**Scheduling for Performance and Availability in Systems With Temporal Dependent Workloads** ..... **336**
*Ningfang Mi, Giuliano Casale, and Evgenia Smirni*
**Hot-Spot Prediction and Alleviation in Distributed Stream Processing Applications** ..... **346**
*Thomas Repantis and Vana Kalogeraki*
**On Localization Attacks to Internet Threat Monitors: An Information-Theoretic Framework** ..... **356**
*Wei Yu, Nan Zhang, Xinwen Fu, Riccardo Bettati, and Wei Zhao*
**Automatic Security Assessment of Critical Cyber-Infrastructures** ..... **366**
*Zahid Anwar, Ravinder Shankesi and Roy. H. Campbell*
**Evaluating Email's Feasibility for Botnet Command and Control** ..... **376**
*Kapil Singh, Abhinav Srivastava, Jonathon Giffin and Wenke Lee*
**Scaling File Systems to Support Petascale Clusters: a Dependability Analysis to Support Informed Design Choices** ..... **386**
*Shravan Gaonkar, Eric Rozier, Anthony Tong, and William H. Sanders*
**WS-DREAM: a Distributed Reliability Assessment Mechanism for Web Services** ..... **392**
*Zibin Zheng and Michael R. Lyu*
**A Log Mining Approach to Failure Analysis of Enterprise Telephony Systems** ..... **398**
*Chinghway Lim, Navjot Singh and Shalini Yajnik*
**Integration and Evaluation of Multi-Instance** ..... **404**
*Paolo Romano and Francesco Quaglia*
**Toward An Understanding of the Processing Delay of Peer-To-Peer Relay Nodes** ..... **410**
*Kuan-Ta Chen and Jing-Kai Lou*
**TCP Covert Timing Channels: Design and Detection** ..... **420**
*Xiapu Luo, EdmondW. W. Chan and Rocky K. C. Chang*
**A Smart Triggering Scheme to Reduce Service Interruption During Heterogeneous Handovers** ..... **430**
*Huaiyu Liu , Christian Maciocco, Vijay Kesavan and Andy Low*
**On Representing Knowledge in the Dependability Domain: a Panel Discussion** ..... **440**
*Algirdas Avizienis*
**Evaluating Availability Under Quasi-Heavy-Tailed Repair Times** ..... **442**
*Sei Kato and Takayuki Osogami*
**Anomaly? Application Change? or Workload Change?** ..... **452**
*Ludmila Cherkasova, Kivanc Ozonat, Ningfang Mi Julie Symons and Evgenia Smirni*
**Survivability Quantification of Communication Services** ..... **462**
*Poul E. Heegaard and Kishor S. Trivedi*
**Symplfied: Symbolic Program-Level Fault Injection and Error Detection Framework** ..... **472**
*Karthik Pattabiraman, Nithin Nakka, Zbigniew Kalbarczyk, and Ravishankar Iyer*

**A Characterization of Instruction-Level Error Derating and Its Implications for Error Detection** ..... **482**
*Jeffrey J. Cook and Craig Zilles*
**Enhancing Data Availability in Disk Drives Through Background Activities** ..... **492**
*Ningfang Mi, Alma Riska, Evgenia Smirni and Erik Riedel*
**Analyzing the Effects of Disk-Pointer Corruption** ..... **502**
*Lakshmi N. Bairavasundaram, Meenali Rungta, Nitin Agrawal, Andrea C. Arpaci-Dusseau, Remzi H. Arpaci-Dusseau, and Michael M. Swift*
**Architectural Dependability Evaluation With Arcade** ..... **512**
*H. Boudali, P. Crouzen, B. R. Haverkort, M. Kuntz and M.I.A. Stoelinga*
**An Information-Theoretic Approach to Detecting Performance Anomalies and Changes for Large-Scale Distributedweb Services** ..... **522**
*Kivanc Ozonat*
**A Recurrence-Relation-Based Reward Model for Performability Evaluation of Embedded Systems** ..... **532**
*Ann T. Tai, Kam S. Tso and William H. Sanders*
**International Workshop On Resilience Assessment and Dependability Benchmarking (RADB 2008)** ..... **542**
*Andrea Bondavalli, Istvan Majzik and Aad van Moorsel*
**Workshop on Compiler and Architectural Techniques for Application Re-liability and Security (CATARS )** ..... **544**
*Karthik Pattabiraman, Shuo Chen and Zbigniew Kalbarczyk*
**Second Workshop On Dependable and Secure Nanocomputing** ..... **546**
*Jean Arlat, Cristian Constantinescu, Ravishankar K. Iyer and Michael Nicolaïdis*
**Workshop On Architecting Dependable Systems (WADS 2008)** ..... **548**
*Rogério de Lemos, Jean-Charles Fabre and Cristina Gacek*
