

2008 IEEE International Symposium on Computer-Aided Control System Design

**San Antonio, TX
3-5 September 2008**

IEEE Catalog Number:
ISBN 13:

CFP08CAC-PRT
978-1-4244-2221-0

Table of Contents

On Behavior of Root Loci of Uniform and Circulant Multivariable Control Systems.....	1
<i>Oleg N. Gasparyan, Ali Eydgahi</i>	
An Extension of the Faddeev's Algorithms.....	7
<i>Ky M. Vu</i>	
Parametric uncertainty modeling for LFT model realization.....	13
<i>Yew Chai Paw, Gary J. Balas</i>	
On the Formal Characterization of Reduced-Order Flat Outputs over an Ore Algebra	19
<i>Vincent Morio, Franck Cazaurang, Ali Zolghadri</i>	
Subspace Identification of Multivariable LPV Systems: A Novel approach	27
<i>Jan-Willem van Wingerden, Michel Verhaegen</i>	
Model-Driven Design of Industrial Control Systems.....	33
<i>Marga Marcos, Elisabet Estevez</i>	
Comparing the Accuracy of Backward Differentiation Formulas for Solving Lyapunov Differential Equations.....	39
<i>Chiu H. Choi</i>	
Nonparametric Methods for the Identification of Linear Parameter Varying Systems.....	45
<i>Kenneth Hsu, Tyrone L. Vincent, Kameshwar Poolla</i>	
A Parallel Schur Method for Solving Continuous-Time Algebraic Riccati Equations.....	51
<i>Robert Granat, Bo Kagstrom, Daniel Kressner</i>	
Design of H1-Suboptimal Multirate Controllers.....	57
<i>Anton Hofer, Martin Horn</i>	
MIMOptMPC: A MATLAB Toolbox for Off-Line Robustification of Multivariable MPC	63
<i>Cristina Nicoleta Stoica, Pedro Rodriguez-Ayerbe, Didier Dumur</i>	
Closed- versus Open-Loop Active Vibration Control in the Presence of Finite Precision Arithmetic.....	69
<i>Martina Maggio, Alberto Leva, Luigi Piroddi</i>	
On Some Approaches to the Autotuning of Cascade Controls	75
<i>Alberto Leva, Alberto Marinelli</i>	
Towards the Exhaustive Verification of Real-Time Aspects in Controller Implementation	81
<i>Carlo Alberto Furia, Marco Mazzucchelli, Paola Spoletini, Mara Tanelli</i>	
COSMAD: Identification and Diagnosis for Mechanical Structures with Scilab	87
<i>Maurice Goursat, Laurent Mevel</i>	
Introduction to AWAST : The Anti-Windup Analysis and Synthesis Toolbox.....	93
<i>Jean-Marc Biannic, C. Roos</i>	
Model Quality Estimation in Systems with Time-Varying Time-Delay Uncertainty	99
<i>Soheil Salehpour, Andreas Johansson</i>	
A Randomized Cutting Plane Scheme for Convex Optimization	105
<i>Fabrizio Dabbene</i>	
A Desktop Environment for Assessment of Fault Diagnosis Based Fault Tolerant Flight Control Laws	111
<i>Simon Hecker, Andras Varga, Gertjan Looye</i>	
Numerical and Symbolic State Space Realizations of Linear Systems with Algebraic Loops	117
<i>Masanobu Koga, Satoru Anan, Kentaro Yano</i>	
Nonparametric Decoupling of MIMO Systems.....	123
<i>Luca Bascetta, Alberto Leva</i>	

Table of Contents

Dynamic Programming Applied to UAV Way Point Path Planning in Wind	129
<i>Alan L. Jennings, Raul Ordonez, Nicola Ceccarelli</i>	
LPV/LFT Modelling and Identification: Overview, Synergies and a Case Study	135
<i>Francesco Casella, Marco Lovera</i>	
Descriptor Systems Toolbox : A Mathematica-Based Package for Descriptor Systems	141
<i>Antonis Vardulakis, Nikos Karampetakis, Efsthios Antoniou, Stavros Vologiannidis</i>	
Application of an Adaptive Takagi-Sugeno Fuzzy Identification Approach for Interaction Analysis of MIMO Nonlinear Systems	147
<i>Somayeh GHaribshaiyan, Karim Salahshoor</i>	
Experimental Evaluation of New SLICOT Solvers for Linear Matrix Equations Based on the Matrix Sign Function	153
<i>Vasile Sima, Peter Benner</i>	
Comparison of some Gramian based interaction measures	159
<i>Bjorn Halvarsson</i>	
Autotuning of PI+p Controllers	165
<i>Alberto Leva</i>	
Discrete Game Abstraction for Fault Tolerant Control Synthesis	171
<i>Jacob Deleuran Grunnet, Thomas Bak, Jan Dimon Bendtsen, Jesper Abildgaard Larsen</i>	
Ontologies As Knowledge Representation Structures for CACSD Software	177
<i>Carmen Benavides, Isaias Garcia, Hector Alaiz, Javier Alfonso, Carlos Redondo, Angel Alonso</i>	
Bit Accurate Roundoff Noise Analysis of Fixed-Point Linear Controllers	183
<i>Thibault Hilaire, Daniel Menard, Olivier Sentieys</i>	
Combinatorial Hybrid Systems	189
<i>Jesper Abildgaard Larsen, Rafal Wisniewski, Jacob Deleuran Grunnet</i>	
Frequency-Domain Robust Performance Condition for Plant and Controller Uncertainty in SISO LTI Systems	195
<i>Vahid Raissi Dehkordi, Benoit Boulet</i>	
LFT Modelling for the Analysis of Relative Motion Controllers in Eccentric Orbits	201
<i>Andres Marcos, Luis F. Penin, Emanuele Di Sotto</i>	
Memory-Efficient Krylov Subspace Techniques for Solving Large-Scale Lyapunov Equations	207
<i>Daniel Kressner</i>	
A Numerical Algorithm for Reconstruction of Continuous-Time Linear Models with Pure Integrators from Their Discrete-Time Equivalents	213
<i>Zaher Kassas, Greg Morrow</i>	
A New Approach to the Dynamic RGA Analysis of Uncertain Systems	219
<i>Miguel Castano Arranz, Wolfgang Birk</i>	
LFT Modelling of the 2-DOF Longitudinal Nonlinear Aircraft Behaviour	225
<i>Carsten Doll, Caroline Berard, Andreas Knauf, Jean-Marc Biannic</i>
