

Proceedings

16th Annual IEEE Symposium on High-Performance Interconnects

*Stanford, California
August 26-28, 2008*

Sponsored by
IEEE Computer Society
Technical Committee on Microprocessors and Microcomputers

Los Alamitos, California
Washington • Tokyo

Table of Contents

16th Annual IEEE Symposium on High-Performance Interconnects

HOTI 2008

Welcome from the General Chair.....	viii
Welcome from the Program Co-Chairs.....	x
HotI-16 Committees.....	xii
Technical Program Committee.....	xiii
Keynotes.....	xiv
Tutorials.....	xvii
Panels.....	xx

Session 1: On-Chip Interconnects

A High-Speed Optical Multi-Drop Bus for Computer Interconnections.....	3
<i>Michael Tan, Paul Rosenberg, Jong Souk Yeo, Moray McLaren, Sagi Mathai, Terry Morris, Joseph Straznicky, Norman P. Jouppi, Huei Pei Kuo, Shih-Yuan Wang, Scott Lerner, Pavel Kornilovich, Neal Meyer, Robert Bicknell, Charles Otis, and Len Seals</i>	
NoC with Near-Ideal Express Virtual Channels Using Global-Line Communication.....	11
<i>Tushar Krishna, Amit Kumar, Patrick Chiang, Mattan Erez, and Li-Shiuan Peh</i>	
Building Manycore Processor-to-DRAM Networks with Monolithic Silicon Photonics.....	21
<i>Christopher Batten, Ajay Joshi, Jason Orcutt, Anatoly Khilo, Benjamin Moss, Charles Holzwarth, Miloš Popović, Hanqing Li, Henry Smith, Judy Hoyt, Franz Kärtner, Rajeev Ram, Vladimir Stojanović, and Krste Asanović</i>	
Design Exploration of Optical Interconnection Networks for Chip Multiprocessors.....	31
<i>Michele Petracca, Benjamin G. Lee, Keren Bergman, and Luca P. Carloni</i>	

Session 2: Memory Subsystem Interconnects

Coherency Hub Design for Multi-Node Victoria Falls Server Systems	43
<i>John Feehrer, Paul Rotker, Milton Shih, Paul Gingras, Peter Yakutis, Stephen Phillips, John Heath, and Sebastian Turullols</i>	
Low Power Passive Equalizer Design for Computer Memory Links	51
<i>Ling Zhang, Wenjian Yu, Yulei Zhang, Renshen Wang, Alina Deutsch, George A. Katopis, Daniel M. Dreps, James Buckwalter, Ernest Kuh, and Chung-Kuan Cheng</i>	
OCDIMM: Scaling the DRAM Memory Wall Using WDM Based Optical Interconnects	57
<i>Amit Hadke, Tony Benavides, S.J. Ben Yoo, Rajeevan Amirtharajah, and Venkatesh Akella</i>	

Session 3: Routing and Performance Evaluation

Backlog-Aware Crossbar Schedulers: A New Algorithm and its Efficient Hardware Implementation	67
<i>Nikos Chrysos and Giorgos Dimitrakopoulos</i>	
High-Speed, Short-Latency Multipath Ethernet Transport for Interconnections	75
<i>Nobuyuki Enomoto, Hideyuki Shimonishi, Junichi Higuchi, Takashi Yoshikawa, and Atsushi Iwata</i>	
Performance Analysis and Evaluation of PCIe 2.0 and Quad-Data Rate InfiniBand	85
<i>Matthew J. Koop, Wei Huang, Karthik Gopalakrishnan, and Dhableswar K. Panda</i>	
Evaluation of an Integrated PCI Express IO Expansion and Clustering Fabric	93
<i>Venkata Krishnan</i>	

Session 4: Network Processing

An Efficient Hardware-Based Multi-Hash Scheme for High Speed IP Lookup	103
<i>Socrates Demetriades, Michel Hanna, Sangyeun Cho, and Rami Melhem</i>	
Constraint Repetition Inspection for Regular Expression on FPGA	111
<i>Miad Faezipour and Mehrdad Nourani</i>	
Network Processing on an SPE Core in Cell Broadband Engine	119
<i>Yuji Kawamura, Takeshi Yamazaki, Hiroshi Kyusojin, Tatsuya Ishiwata, and Kazuyoshi Horie</i>	

Session 5: Industry Talks I

Telecentric Optics for Free-Space Optical Link	131
<i>Huei Pei Kuo, Robert Walmsley, Lennie Kiyama, Michael Tan, and Shih-Yuan Wang</i>	
A Network Fabric for Scalable Multiprocessor Systems	137
<i>Nitin Godiwala, Jud Leonard, and Matthew Reilly</i>	
HPP Switch: A Novel High Performance Switch for HPC	145
<i>Dawei Wang, Zheng Cao, Xinchun Liu, and Ninghui Sun</i>	

Session 6: Industry Talks II

QsNetIII, an Adaptively Routed Network for High Performance Computing	157
<i>Duncan Roweth and Trevor Jones</i>	
Adaptive Routing Strategies for Modern High Performance Networks	165
<i>Patrick Geoffray and Torsten Hoefler</i>	

Industry Leaders Forum: Optical Interconnects

Optical Interconnects for Present and Future High-Performance Computing Systems	175
<i>Ashok V. Krishnamoorthy, Jon Lexau, Xuezheng Zheng, John E. Cunningham, Ron Ho, and Ola Torudbakken</i>	
Optical Interconnects in Next Generation Data Centers: An End to End View	178
<i>Madeleine Glick</i>	
A Nanophotonic Interconnect for High-Performance Many-Core Computation	182
<i>R.G. Beausoleil, J. Ahn, N. Binkert, A. Davis, D. Fattal, M. Fiorentino, N.P. Jouppi, M. McLaren, C.M. Santori, R.S. Schreiber, S.M. Spillane, D. Vantrease, and Q. Xu</i>	
Leveraging Optical Interconnects in Future Supercomputers and Servers	190
<i>Jeffrey A. Kash</i>	
Author Index	195
