

Proceedings

Eighth IEEE International Working Conference on Source Code Analysis and Manipulation

28-29 September 2008 • Beijing, China

Sponsored by

Los Alamitos, California
Washington • Tokyo

Proceedings

Table of Contents

Message from the Chairs	viii
Organizing Committee	ix
Steering Committee	x
Program Committee	xi
Additional Reviewers	xii

Keynote

90% Perspiration: Engineering Static Analysis Techniques for Industrial Applications.....	3
<i>Paul Anderson</i>	

Program Analysis I

Some Assembly Required—Program Analysis of Embedded System Code.....	15
<i>Ansgar Fehnker, Ralf Huuck, Felix Rauch, and Sean Seefried</i>	
User-Input Dependence Analysis via Graph Reachability	25
<i>Bernhard Scholz, Chenyi Zhang, and Cristina Cifuentes</i>	
TBCppA: A Tracer Approach for Automatic Accurate Analysis of C Preprocessor's Behaviors.....	35
<i>Katsuhiko Gondow, Hayato Kawashima, and Takashi Imaizumi</i>	

Empirical Study I

An Empirical Study of Function Overloading in C++	47
<i>Cheng Wang and Daqing Hou</i>	
Is Cloned Code More Stable than Non-cloned Code?	57
<i>Jens Krinke</i>	
Exploiting the Correspondence between Micro Patterns and Class Names.....	67
<i>Jeremy Singer and Chris Kirkham</i>	

Program Analysis II

On the Use of Data Flow Analysis in Static Profiling	79
<i>Cathal Boogerd and Leon Moonen</i>	
The Semantics of Abstract Program Slicing.....	89
<i>Damiano Zanardini</i>	

Empirical Study II

The Evolution and Decay of Statically Detected Source Code Vulnerabilities	101
<i>Massimiliano Di Penta, Luigi Cerulo, and Lerina Aversano</i>	
From Indentation Shapes to Code Structures.....	111
<i>Abram Hindle, Michael W. Godfrey, and Richard C. Holt</i>	
Evaluating Key Statements Analysis.....	121
<i>David Binkley, Nicolas Gold, Mark Harman, Zheng Li, and Kiarash Mahdavi</i>	

Pointer Analysis

Fast and Precise Points-to Analysis.....	133
<i>Jonas Lundberg, Tobias Gutzmann, and Welf Löwe</i>	
Aspect-Aware Points-to Analysis.....	143
<i>Qiang Sun and Jianjun Zhao</i>	
Automatic Determination of May/Must Set Usage in Data-Flow Analysis.....	153
<i>Andrew Stone, Michelle Strout, and Shweta Behere</i>	

Defect Detection

Automated Detection of Code Vulnerabilities Based on Program Analysis and Model Checking.....	165
<i>Lei Wang, Qiang Zhang, and PengChao Zhao</i>	
Analysis and Transformations for Efficient Query-Based Debugging	174
<i>Michael Gorbovitski, K. Tuncay Tekle, Tom Rothamel, Scott D. Stoller, and Yanhong A. Liu</i>	

Change Impact Graphs: Determining the Impact of Prior Code Changes	184
<i>Daniel M. German, Gregorio Robles, and Ahmed E. Hassan</i>	

Reengineering

Using Program Transformations to Add Structure to a Legacy Data Model.....	197
<i>Mariano Ceccato, Thomas Roy Dean, and Paolo Tonella</i>	

Type Highlighting: A Client-Driven Visual Approach for Class Hierarchies Reengineering.....	207
<i>Petru Florin Mihancea</i>	

Automated Migration of List Based JSP Web Pages to AJAX	217
<i>Jason Chu and Thomas Dean</i>	

Code Manipulation

Beyond Annotations: A Proposal for Extensible Java (XJ).....	229
<i>Tony Clark, Paul Sammut, and James Willans</i>	

Modular Decompilation of Low-Level Code by Partial Evaluation.....	239
<i>Miguel Gómez-Zamalloa, Elvira Albert, and Germán Puebla</i>	

Constructing Subtle Faults Using Higher Order Mutation Testing	249
<i>Yue Jia and Mark Harman</i>	

Tool Demonstrations

Rejuvenate Pointcut: A Tool for Pointcut Expression Recovery in Evolving Aspect-Oriented Software	261
<i>Raffi T. Khatchadourian and Awais Rashid</i>	

Parfait—A Scalable Bug Checker for C Code.....	263
<i>Cristina Cifuentes</i>	

COORDINSPECTOR: A Tool for Extracting Coordination Data from Legacy Code	265
<i>Nuno F. Rodrigues and Luis S. Barbosa</i>	

Precise Analysis of Java Programs Using JOANA.....	267
<i>Dennis Giffhorn and Christian Hammer</i>	

DTS—A Software Defects Testing System.....	269
<i>Zhao Hong Yang, Yun Zhan Gong, Qing Xiao, and Ya Wen Wang</i>	

Author Index	271
