of Technology

Proceedings of

International Conference on
Dependability of Computer Systems

DepCoS - RELCOMEX 2008

Szklarska Poręba, Poland

26 - 28 June, 2008

Third International Conference on Dependability of Computer Systems DepCoS-RELCOMEX 2008

DepCoS-RELCOMEX 2008

Table of Contents

Preface
Program Committee
Organizing Committee
Reviewers

Section 1: Modelling

Using UML(VR) for Supporting the Automated Test Data Generation	3
<i>Dariusz Dymek and Leszek Kotulski</i>	
Estimation of System Workload Time Characteristic Using UML Timing Diagrams	9
<i>Dariusz Dymek and Leszek Kotulski</i>	
Vulnerability Modelling for the Analysis of Network Attacks	15
<i>Paolo Maggi, Davide Pozza, and Riccardo Sisto</i>	
Fuzzy Strategies in Modeling Effects of Technological Implementations	23
<i>Henryk Piech</i>	
Soundness Conditions for Cryptographic Algorithms and Parameters Abstractions in Formal Security Protocol Models	31
<i>Alfredo Pironti and Riccardo Sisto</i>	
XML Schema Based Faultset Definition to Improve Faults Injection Tools Interoperability	39
<i>Antonio da Silva, José F. Martínez, Lourdes López, Ana B. García, and Vicente Hernández</i>	
A Language for Failure Patterns and Application in Safety Analysis	47
<i>Ian Wolforth, Martin Walker, and Yiannis Papadopoulos</i>	
Decision Diagrams for Reliability Analysis of Multi-State System	55
<i>Elena Zaitseva and Vitaly Levashenko</i>	

Section 2: Methodology and Tools

Method of Matrix Writing Constructing of Topological Structure of Computer Network	65
<i>Leonid Abrosimov, Sergey Kalashnikov, and Matip Essounga Lazare</i>	
Dependability Aspects of e-Learning Systems	73
<i>Ali Al-Dahoud, Tomasz Walkowiak, and Marek Woda</i>	
A Hardware-in-the-Loop Simulation Environment for Real-Time Systems Development and Architecture Evaluation	80
<i>Vasily V. Balashov, Anatoly G. Bakhmurov, Maxim V. Chistolinov, Ruslan L. Smeliansky, Dmitry Yu. Volkanov, and Nikita V. Youshchenko</i>	
Fault Tolerant Algorithm for Functional and Data Flow Parallel Programs Performance on Clusters	87
<i>S.E. Bazhanov, S.V. Bogdanets, and V.P. Kutepov</i>	
Standards Conformity Framework in Comparison with Contemporary Methods Supporting Standards Application	95
<i>Lukasz Cyra and Janusz Górski</i>	
An Approach to Evaluation of Arguments in Trust Cases	103
<i>Lukasz Cyra and Janusz Górski</i>	
A True Random Number Generator with Built-in Attack Detection	111
<i>Bernhard Fechner and Andre Osterloh</i>	
Conjugated Graph Grammars as a Mean to Assure Consistency of Systems of Conjugated Graphs	119
<i>Leszek Kotulski and Lukasz Fryz</i>	
Semi-Markov Availability Modeling of a Redundant System with Partial and Full Rejuvenation Actions	127
<i>Vasilis P. Koutras and Agapios N. Platis</i>	
Dependable SoPC-Based On-board Ice Protection System: From Research Project to Implementation	135
<i>Yuliya Prokhorova, Vyacheslav Kharchenko, Sergey Ostroumov, Stanislav Yatsenko, Mykola Sidorenko, and Boris Ostroumov</i>	
Verification and Implementation of Dependable Controllers	143
<i>Krzysztof Sacha</i>	
Safety Strategies of Scheduling and Resource Co-allocation in Distributed Computing	152
<i>Victor V. Toporkov and Alexey Tselishchev</i>	

Section 3: Dependability of Computer Networks

Detection of Roles of Actors in Social Networks Using the Properties of Actors' Neighborhood Structure	163
<i>Radoslaw Brendel and Henryk Krawczyk</i>	
Automatic Temporal Evaluation of the Accessibility of the World Wide Web and Its Standards Conformance	171
<i>Hugo Dworak</i>	
Non-Centralized Key Pre-Distribution in Computer Networks	179
<i>Alexander Frolov and Igor Shchurov</i>	
Complex Network Cluster Reliability Evolution	189
<i>Vyacheslav Klimanov and Artem Yermakov</i>	
Protection System against Overload and Distributed Denial of Service Attacks	195
<i>Ervin Tóth, Zoltán Hornák, and Gergely Tóth</i>	
Misuse-Based Intrusion Detection Using Bayesian Networks	203
<i>Wojciech Tylman</i>	
Anomaly-Based Intrusion Detection Using Bayesian Networks	211
<i>Wojciech Tylman</i>	
A Performance Management System for Telecommunication Network Using AI Techniques	219
<i>Shaoyan Zhang, Rui Zhang, and Jianmin Jiang</i>	
Designing Fault Tolerant Networks Topologies Based on Greedy Algorithm	227
<i>Deng Zili, Yu Nenghai, and Li Zheng</i>	

Section 4: Software Security and Reliability

Dependability Evaluation of Service-oriented Information System Using Computer Simulation and Post-processing Results	237
<i>Lukasz Bagrij, Katarzyna Michalska, and Marek Woda</i>	
Software Architecture Behavior Meta-model for Real-Time Systems	245
<i>Ammar Bessam and Mohamed Tahar Kimour</i>	
Aspects in the Maintenance of Compiled Programs	253
<i>Ilona Bluemke and Konrad Billewicz</i>	
Tool-Supported Advanced Mutation Approach for Verification of C# Programs	261
<i>Anna Derezinska and Anna Szustek</i>	
Constraint & Test Verification in Parallel Database Systems	269
<i>Feras Hanandeh</i>	
Evaluation of SOA Security Metrics Using Attack Graphs	277
<i>Jan Magott and Marek Woda</i>	
Comprehensive Planning Platform Framework for Managing Service-Oriented Information Systems	285
<i>Marek Woda and Lukasz Bagrij</i>	

Performance Analysis of Component-Based Systems	293
<i>Wlodek Zuberek and Ilona Bluemke</i>	
Dependability Analysis of SOA Systems	301
<i>Michał Żyła and Dariusz Caban</i>	

Section 5: Hardware Design for Dependable Systems

Applying F(I)MEA-technique for SCADA-Based Industrial Control Systems	
Dependability Assessment and Ensuring	309
<i>Eugene Babeshko, Vyacheslav Kharchenko, and Anatoliy Gorbenko</i>	
The Complexity of Fault-Tolerant Adder Structures	316
<i>Janusz Biernat</i>	
Problems of Parallel Realization of Algorithms Calculation of Electronic	
Structure of Large Molecules	324
<i>Andrey Chernetsov and Olga Shamayeva</i>	
SeReCon: A Trusted Environment for SoPC Design	332
<i>Krzysztof Kepa, Fearghal Morgan, Krzysztof Kościuszkiewicz, and Tomasz Surmacz</i>	
Scalable Diversity-Oriented Decisions and Technologies for Dependable	
SoPC-Based Safety-Critical Computer Systems and Infrastructures	339
<i>Vyacheslav Kharchenko, Siora Alexandr, Vladimir Sklyar, and Viktor Tokarev</i>	
Organization of AES Cryptographic Unit for Low Cost FPGA Implementation	347
<i>Lukasz Krukowski and Jarosław Sugier</i>	
ElGamal Signature Scheme Immune to Fault Analysis	355
<i>Maciej Nikodem</i>	

Section 6: Applications

A Resilient SIL 2 Driver Machine Interface for Train Control Systems	365
<i>Andrea Ceccarelli, Istvan Majzik, Danilo Iovino, Fausto Caneschi, Gergely Pinter, and Andrea Bondavalli</i>	
Methodology of the Wireless Networks Planning in Mesh Topology	375
<i>Grzegorz Debita and Kamil Staniec</i>	
An Intelligent Maritime Workplace using IT technologies	383
<i>Dimitrios Gourgoulis and Charalambos Yakinthos</i>	
An Approach to Consistent Displaying of Virtual Reality Moving Objects	390
<i>Vasily Y. Kharitonov</i>	
Data Exploration Methods for Transport System Dependability Analysis	398
<i>Henryk Maciejewski and Tomasz Lipnicki</i>	
Autonomy and Cooperation as Factors of Dependability in Wireless Sensor	
Network	406
<i>Jan Nikodem</i>	
On Opportunity of Application of Modular Arithmetic for Accuracy	
Improvement in Positioning of Virtual Reality Moving Objects	414
<i>Dmitry Orlov</i>	

Quality of Telematic Services in Transport	422
<i>Mirosław Siergiejczyk</i>	
Availability of Discrete Transport System Simulated by SSF Tool	430
<i>Tomasz Walkowiak and Jacek Mazurkiewicz</i>	

Author Index
