

2008 Forum on Specification, Verification and Design Languages

**Stuttgart, Germany
23-25 September 2008**

IEEE Catalog Number:
ISBN 13:

CFP0826E-PRT
978-1-4244-2264-7

Table of Contents

Generating MARTE Allocation Models From Activity Threads	1
<i>Andreas W. Liehr, Heike S. Rolfs, Klaus J. Buchenrieder and Ulrich Nageldinger</i>	
Comprehensive Platform and Component Modeling of Heterogeneous Interconnected Systems	7
<i>Jochen Zimmermann, Joachim Gerlach, Florian Schaefer and Ulrich Nageldinger</i>	
Using Systemc for an Extended MATLAB/Simulink Verification Flow.....	13
<i>Kai Hylla, Jan-Hendrik Oetjens and Wolfgang Nebel</i>	
Enabling Automated Code Transformation and Variable Tracing	19
<i>C. Kerstan, N. Bannow and W. Rosenstiel</i>	
Modelling Program-State Machines in Systemctm.....	25
<i>Kim Grüttner and Wolfgang Nebel</i>	
Symbolic Quasi-Static Scheduling of Actor-Oriented Systemc Models	31
<i>Jens Gladigau, Christian Haubelt, and Jürgen Teich</i>	
Extending Systemc Clocks to Model Soc	37
<i>Thierry Grellier</i>	
Connecting Systemc-AMS Models with OSCI TLM 2.0 Models Using Temporal Decoupling	43
<i>Markus Damm, Christoph Grimm, Jan Haase and Andreas Herrholz</i>	
Efficient Modelling and Simulation of Embedded Software Multi-Tasking Using Systemc and OSSS.....	49
<i>Philipp A. Hartmann, Henning Kleen, Philipp Reinkemeier and Wolfgang Nebel</i>	
Towards a Common HW/SW Interface-Centric and Component-Oriented Specification and Design Methodology	55
<i>Grégory Gailliard, Hugues Balp, Christophe Jouvray and François Verdier</i>	
A Latency, Preemption and Data Transfer Accurate Adaptive Transaction Level Model for Efficient Simulation of Pipelined Buses.....	61
<i>Rauf Salimi-Khaligh and Martin Radetzki</i>	
Application - Platform Performance Modeling and Evaluation.....	67
<i>Jari Kreku, Mika Hoppari, Tuomo Kestilä, Yang Qu, Juha-Pekka Soininen and Kari Tiensyrjä</i>	
A Systemc-Based Framework for Modeling and Simulation of Networked Embedded Systems *	73
<i>F. Fummi, D. Quaglia and F. Stefanni</i>	
A SYSTEMC Language Extension for High-Level Reconfiguration Modelling.....	79
<i>Andreas Raabe and Armin Felke</i>	
Specification of Adaptive HW/SW Systems in Systemc	85
<i>Fernando Herrera, Eugenio Villar and Philipp A. Hartmann</i>	
Towards Compilation of Streaming Programs Into FPGA Hardware.....	91
<i>Franjo Plavec, Zvonko Vranesic and Stephen Brown</i>	
Methodologies for High-Level Modelling and Evaluation in The Automotive Domain	97
<i>S. Hoelldampf, D. Zaum, M. Olbrich, E. Barke, I. Neumann and S. Schmidt</i>	
Designing Highly Parameterized Hardware Using Xhdl	102
<i>Miguel Angel Sánchez, Pedro Echeverría, Francisco Mansilla and Marisa López-Vallejo</i>	
Formal Transformation of a KPN Specification to a GALS Implementation.....	108
<i>Bijoy A. Jose, Sandeep K. Shukla and Deepak A. Mathaikutty</i>	
A Sigma-Delta Bandpass ADC Modelling in Superconducting RSFQ Technology with VHDL-AMS.....	114
<i>Rachid Guelaz, Patricia Desgreys and Patrick Loumeau</i>	
VHDL-AMS Implementation of a Numerical Ballistic CNT Model for Logic Circuit Simulation	118
<i>Dafeng Zhou, Tom J Kazmierski and Bashir M Al-Hashimi</i>	

Table of Contents

Systemc-AMS Modeling of an Electromechanical Harvester of Vibration Energy	123
<i>Ken Caluwaerts and Dimitri Galayko</i>	
Integrated Requirement Evaluation of Non-Functional System-On-Chip Properties	129
<i>Alexander Viehl, Björn Sander, Oliver Bringmann and Wolfgang Rosenstiel,</i>	
A Requirements-Driven Simulation Framework for Communication Infrastructures Design	135
<i>Alessandro Meroni, Vincenzo Rana, Marco Domenico Santambrogio and Francesco Bruschi</i>	
VEST - an Intelligent Tool for Timing Socs Verification Using UML Timing Diagrams	142
<i>Andrzej Pulka and Adam Milik</i>	
Modeling of Custom-Designed Arithmetic Components for ABL Normalization	148
<i>Evgeny Pavlenko, Markus Wedler, Dominik Stoffel, Wolfgang Kunz, Oliver Wienand and Evgeny Karibaev</i>	
Contradiction Analysis for Constraint-Based Random Simulation	154
<i>Daniel Große, Robert Wille, Robert Siegmund and Rolf Drechsler</i>	
The Performance of Combining Multiway Decision Graphs and HOL Theorem Prover.....	160
<i>Sa'ed Abed, Otmane Ait Mohamed and Ghiath Al Sammane</i>	
A Contract-Based Formalism for The Specification of Heterogeneous Systems.....	166
<i>Luca Benvenuti,, Alberto Ferrari, Leonardo Mangeruca, Emanuele Mazzi,, Roberto Passerone, and Christos Sofronis</i>	
Synthesizing Software Defined Radio Components From Rosetta.....	172
<i>G. Kimmell, E. Komp, G. Minden, J. Evans and P. Alexander</i>	
Event-Triggered Vs. Time-Triggered Communications with UML MARTE.....	178
<i>Frédéric Mallet, Robert de Simone and Laurent Rioux</i>	
MARTE-Based Design of a Multimedia Application and Formal Analysis	184
<i>Adolf Abdallah, Abdoulaye Gamati' and Jean-Luc Dekeyser</i>	
UML 2.0 Interactions with OCL/RT Constraints.....	191
<i>Daniel Calegari Garc'ia, Mar'ia Victoria Cengarle and Nora Szasz</i>	
Refining Power Consumption Estimations in The Component Based AADL Design Flow.....	197
<i>Eric SENN, Johann LAURENT, Emmanuel JUIN, and Jean-Philippe DIGUET</i>	
Model Driven Hardware Design: One Step Forward to Cope with The Aerospace Industry Needs	203
<i>Pascal Pampagnin, Pierre Moreau, Rémy Maurice and David Guihal</i>	
UML Pro Le for Modeling Product Observation.....	209
<i>Mathias Funk, Piet van der Putten and Henk Corporaal</i>	
Scenario-Based Validation of Embedded Systems.....	215
<i>A. Gargantini, E. Riccobene, P. Scandurra and A. Carioni</i>	
A Model Driven Development Approach for Implementing Reactive Systems in Hardware.....	221
<i>Zhonglei Wang, Andreas Herkersdorf, Stefano Merenda and Michael Tautschnig</i>	
Model-Based Design Space Exploration for RTES with Sysml and MARTE.....	227
<i>Marcello Mura, Luis Gabriel Murillo and Mauro Prevostini</i>	
Automotive System Design with Specification and Verification of Uncertainties.....	233
<i>Christoph Grimm and Manfred Dietrich</i>	
System Behaviour Capture: From UML to Systemc	235
<i>Joaquín Pérez, Juan F. Sevillano, Santiago Urcelayeta and Igone Vélez</i>	
A Platform for Requirement Based Formal Specification	237
<i>Uwe Pross, Erik Markert, Jan Langer, Andreas Richter, Chris Drechsler and Ulrich Heinkel</i>	
Using C# Attributes to Describe Hardware Artefacts Within Kiwi.....	239
<i>David Greaves and Satnam Singh</i>	

Table of Contents

Telecommunication Application Modelling with Multi Writer Multi Reader Channels: a Case Study	241
<i>Etienne Faure</i>	
Specscribe Analog - a Specification Tool Extension for Heterogeneous Systems	243
<i>Erik Markert, Uwe Proß and Ulrich Heinkel</i>	
Statistical Modeling with Systemc-AMS for Automotive Systems	245
<i>Thomas Markwirth, Joachim Haase and Karsten Einwich</i>	
Comparison of ASCET and UML - Preparations for an Abstract Software Architecture	247
<i>D. Ahrens, A. Pfeiffer and T. Bertram</i>	
The Autosun Verification Environment	249
<i>Christoph, Klaus Gravogl, Florian Schupfer and Ingmar Neumann</i>	
RTL Generation of Channel Architecture Templates for a Template-Based Soc Design Flow	251
<i>Jinhyun Cho, , Soonwoo Choi, and SooIk-Chae</i>	
Formal Specification of Delta Mins for MPSOC in The ACL2 Logic	253
<i>Maïssa Elleuch, Yassine Aydi and Mohamed Abid</i>	
TLM-Based Verification of a Combined Switching Networks-On-Chip Router	255
<i>Mohamed M. Sabry, M. Watheq El-Kharashi, Hassan Shehata Bedor, and Ashraf Salem</i>
