

2007 POWER SYSTEMS CONFERENCE

**ADVANCE METERING, PROTECTION,
CONTROL, COMMUNICATION, AND
DISTRIBUTED RESOURCES**

13th – 16th March, 2007

CLEMSON UNIVERSITY

CLEMSON, SOUTH CAROLINA

Table of Contents

Technical Paper Session 1:

Improving System Reliability via Power System Protection

1. Robert Beresh, George Anders, *Kinectrics*, John Ciufu, *Hydro One*, “Introduction to Basic Fault Tree Analysis for Protective Relaying Applications”1
2. Jim Buff & Kari Zimmerman, *SEL*, “Application of existing Technologies to Reduce Arc-Flash Hazards”8
3. Amando Guzman, Hector Altuv, *SEL*, Ramon Sandoval, *Comision Federal de Electricidad*, “Generator Dynamic Simulation Helps Improving Protection”16
4. Chuck Mozina, *Beckwith Electric*, “Undervoltage Load Shedding”39
5. Manish Patel & Adly Girgis, *Clemson University*, “Effect of System Decomposition on Two-Level State Estimation”55
6. Sam Fulford, Nicholas Seeley, *SEL*, James Rice, *Plumas-Sierra Rural Electric Cooperative*, “Improved Service Reliability for Rural Electric Customers - Innovative Auto Restoration Following Loss of Primary source Interconnection”61

Technical Paper Session 2:

Advancement in Distribution & Transmission System Protection

1. Abhishek Khanna, *POWERGRID*, “Spline function Based Technique for Sensitizing of Ground OverCurrent Relays for Sub-Transmission & distribution Lines”69
2. Daniel Fischer, Stephen Cress, *Kinectrics*, Robert Beresh, *Ontario Hydro*, “Characterization of Distribution System Overcurrents Using Expert Systems” ...78
3. Daqing Hou, *SEL*, “High Impedance Fault Detection”85
4. Michael Thompson, *SEL*, Hank Miller & John Burger, *AEP*, “AEP Experience with Protection of Three Delta/Hex Phase Angle Regulating Transformers”96
5. Juergen Holbach & Micheal Claus, *Siemens Power Transmission & Distribution*, “Precise Fault Locator with Two end Phasor Measurement Transmitted Via Serial Protection Data Interface”106

Technical Paper Session 3:

Advanced Metering

1. Aaron Snyder, Pedro Ramirez, *Itron*, “The Newly Revised ANSI C12.19 & Its Application Across the Utility Enterprise”.....111
2. Aaron Snyder, Garrison Stubber, *Itron*, “The ANSI C12 Protocol Suite Updated & Now with Network Capabilities”116
3. Aaron Snyder, J. Ramirez, *Itron*, “The emerging European Influence on International Metering Type testing”122
4. Howard Self, *Siemens*, & Dan Gacek, *City of Naperville*, “City of Naperville Embraces IEC 61850 Philosophy, A Case Study of Implementation”.....128
5. Ed West, Ken Graves, *Dairyland Power Cooperative*, Dick Martin, *SEL*, “Dairyland Power Installs Multifunction High-End Meters and Expanded Wide Area I/P communications for Metering & Real Time Data Collection”.....134

Technical Paper Session 4:

Advancements in System Protection

1. Vahid Madani, Edward Taylor, Davis Erwin, Anatoliy Meklin, *Pacific Gas & Electric*, Mark Adamiak, *GE Multilin*, “High Speed Control Scheme to Prevent Instability of a Large Multi-Unit Power Plant”.....139
2. Bodgan Kasztenny, *GE Multilin*, Joe Schaefer & Ed Clark, *Florida Power & Light*, “Fundamentals of Adaptive Protection of Large capacitor Banks”151
3. Bodgan Kasztenny, *GE Multilin*, Ian Stevens, *Powerlink Queensland*, “Monitoring Ageing CCVTs (Practical Solutions with Modern Relays to Avoid Catastrophic Failures)”182
4. Alex Apostolov & B. Vandiver, *Omicron Electronics*, “On Standardization of Distance characteristics”.....203
5. Jon Sykes, Kristian Koellner, *SRP*, William Premerlani, *GE Global Research*, Bogdan Kasztenny & Mark Adamiak, *GE Multilin*, “Synchrophasors: A Primer & Practical Applications”.....207
6. Andrey Grobovoy, *Power System Emergency Control Laboratory, Inc.*, Natalia Bondareva, *Siberian Electric Power Research Institute*, Vladimir Stephanov, *ABB Automation & Edsel Atienza*, *SEL*, “International Collaboration in Synchronized Measurement Experiment in Russia”.....233

Technical Paper Session 5:

Advanced Communication, IEC 61850 in Metering & Protection

1. Alex Apostolov & B. Vandiver, *Omicron Electronics*, “Testing Requirements for IEC 61850 Based Devices”.....241
2. Juergen Holbach, Julio Rodriguez, *Siemens*, Craig Wester, Drew Baigent, *GE Multilin*, Lars Frisk, Steven Kunsman, *ABB*, Luc Hossenlopp, *AREVA*, “Status on the First IEC 61850 Based Protection & Control, Multi Vendor Project in United States”246
3. Roy Moxley & Mireck Wronski, *SEL*, “Using Time Error Differential Measurement in Protection Applications”270
4. Stanley Zocholl, *SEL*, “Tutorial: From the Steinmetz Model to the Protection of High Inertia Loads”275
5. Dave Castello, *SEL*, “Lessons Learned Through Commissioning & Analyzing Data From Transformer Differential Installations”283

Technical Paper Session 6:

Renewable Energy

1. Abhishek Khanna, *POWERGRID*, Viresh Dutta, *Center for Energy Studies (IIT)*, “Boost Converter for Solar Photo Volatic Systems with Centralized Storage”309
2. J. Olamei, *Islamic Azad University*, G. Gharehpetian, *Amirkabir University*, T. Niknam, *Shiraz University*, “An Approach Based on Particle Swarm Optimization for Distribution Feeder Reconfiguration Considering Distributed Generators”317
3. Rajiv Verma, Ysni Semesedini, *University of Western Ontario*, Soubhik Auddy, *London Hydro (London, ON, Canada)*, “Mitigation of Subsynchronous Oscillations in a Series Compensated Wind Farm with TSCS”322
