

2009 20th International Zurich Symposium on Electromagnetic Compatibility

**Zurich, Switzerland
12-16 January 2009**

**IEEE Catalog Number: CFP09628-PRT
ISBN: 978-1-4244-3984-3**

TABLE OF CONTENTS

Modeling and Calculation of Electromagnetic Field in the Surroundings of a Large Power Transformer	1
<i>L. Strac, F. Kelemen, D. Zarko</i>	
Design of a Test Vehicle for Nanowire Characterization for Signal Integrity Applications	5
<i>Giulio Antonini, M. Di Clerico, Antonio Orlandi, E. Palange, V. Ricchiuti, M. Passacantando, S. Santucci</i>	
Contribution of Impedance Imperfection of the T-Type ISNs in Measurement Uncertainty of Conducted Disturbances	9
<i>Jan Sroka</i>	
Two Antennas for Differential Mesoband Operation	13
<i>Carl E. Baum</i>	
Multi Band Noise Mitigation in PWR/GND Plane Pairs by Using a 2D EBG Structure with Square Patches and Meander Lines	17
<i>A. Ciccomancini Scogna, Antonio Orlandi</i>	
Efficient Analysis of Electromagnetic Fields Near Lightning Channel by Using SIBC in FDTD	21
<i>Jie Liu, Duo Chen, Jihuan Tian, Yun Xu, Jiansheng Yuan</i>	
Proposition of Tolerance Requirements Adapted for the Calibration of a Reverberation Chamber	25
<i>Christophe Lemoine, Philippe Besnier, M'hamed Drissi</i>	
Proposal of a Novel EMI Diagnostic System Using Independent Component Analysis	29
<i>Masao Masugi, Norihito Hirasawa, Ryuichi Kobayashi, Kimihiro Tajima, Hiroshi Yamane</i>	
Different Strategies for Circuit Characterization of Power Delivery Networks	33
<i>Giulio Antonini, Antonio Orlandi, R.M. Rizzi</i>	
Transient Analysis of Nano-Interconnects	37
<i>Giulio Antonini, Antonio Orlandi, Leo Raimondo, Fabrizio Ruscitti</i>	
Audio Test Setup for EMC Interference Assessment by Listeners	41
<i>Wolfgang Wegst, Jan Waldmann, Achim Enders</i>	
Applications of the Dirichlet-to-Neumann Boundary Operator in Transmission Line Modeling	45
<i>Thomas Demeester, Daniel De Zutter</i>	
Power-Bus Modeling Using 2D-Integral-Equation Formulation	49
<i>Martin Stumpf, Oliver Kroning, Marco Leone</i>	
A Method for Efficient Computation of Time Domain Surface Impedances of a Lossy Half Space	53
<i>Qingsheng Zeng</i>	
Analysis of Air Pressure Reduction Caused by Electrode Speed in Short Gap Electrostatic Discharge (ESD)	57
<i>Fangming Ruan, Dan Shi, Feng Zhou, Yougang Gao, Rongfeng Linghu</i>	
The Excitation of Balanced Transmission Line Modes in Bulk Current Injection Measurements	61
<i>James McLean, Robert Sutton</i>	

A New Calibration Method for an Electric-Field Probe Using TEM Waveguides.....	65
<i>Shinobu Ishigami, Masayuki Hirata</i>	
Crosstalk Cancellation of DDR3 Memory Channel for Over 1600 Mbps Data Rate.....	69
<i>Junwoo Lee, Sungwoo Han, Hyo Seog Ryu, Sang Yeop Kim, Jongho Kang, Kunwoo Park, Joongsik Kih</i>	
Mode-Port-Network Approach to Analyze Power-Line EMC Problems for PLC.....	73
<i>Yoshio Kami, Fengchao Xiao, Kimitoshi Murano</i>	
Numerical Investigation of the Impact of Dielectric Components on Electromagnetic Field Distributions in the Passenger Compartment of a Vehicle.....	77
<i>A.R. Ruddle, H. Zhang, L. Low, J. Rigelsford, R.J. Langley</i>	
A Radiation Model of Three-Phase Induction Machines.....	81
<i>Francesco Della Torre, Adriano P. Morando</i>	
A Distributed-Constants Model of Three-Phase Induction Drives for Conducted Emission Studies	85
<i>Francesco Della Torre, Sonia Leva, Adriano P. Morando</i>	
Simplification Method for the Assessment of the EM Response of a Complex Cable Harness.....	89
<i>J.-P. Parmantier, I. Junqua, Solange Bertuol, F. Issac, S. Guillet, S. Houhou, R. Perraud</i>	
Fast Assessment of Antenna-PCB Coupling in Mobile Devices: A Macromodeling Approach.....	93
<i>S. Grivet-Talocia, M. Bandinu, Flavio G. Canavero, I. Kelandar, P. Kotiranta</i>	
Field Uniformity Investigation of Reverberation Chamber at Calibration Stage.....	97
<i>Bo Zhang, Wei Li, Xiaopeng Li, Zhiyong Yuan, Jinliang He, Rong Zeng</i>	
Susceptibility of PMOS Transistors Under High RF Excitations at Source Pin	101
<i>Ognjen Jovic, Uwe Sturmer, Wolfgang Wilkening, Adrijan Baric, Christian Maier</i>	
Identification of Overhead Lines Using Measurements of the Electric Field Strength.....	105
<i>C. Henze, H. Bauer</i>	
Induced Noise in a Telephone Circuit: A Monte Carlo Approach.....	109
<i>Giovanni Lucca</i>	
Evaluation Method of Anisotropic Absorber Panel at Microwave Frequencies	113
<i>Shinnichiro Yamamoto, Yoshiaki Takae, Kennichi Hatakeyama</i>	
Isolation Effect Between DC supply Voltage Signal Lines in Wireless LAN Module	117
<i>Jong In Ryu, Dongsu Kim, Jun Chul Kim</i>	
Influence of Automotive Harnesses on Conducted Emissions.....	121
<i>Heinz Rebholz, Stefan Tenbohlen</i>	
Conductive EMI Noise Measurement for Switched Reluctance Drive.....	125
<i>Hao Chen, Linguo Cheng, Xiaohui Qiu, Yang Zhao</i>	
Effect of a Cochlear Implant on the SAR Distribution of the Head Exposed to 2.4 GHz.....	129
<i>Marta Parazzini, Federica Sibella, Paolo Ravazzani</i>	
Modelling Approaches Taking into Account the Vehicle's Environment in the Development of Embedded RF Receivers	133
<i>Raed El-Makhour, Francois de Daran, Frederic Lafon, M'hamed Drissi, Erwan Fourn</i>	
Signal Integrity Ensured Through Impedance Characterization of Advanced High-Speed Design.....	137
<i>Alexandre Amedeo, Cyrille Gautier, Francois Costa, Laurent Bernard</i>	

Development of a Low EMI Micro-Controller Package for Automobile Applications	141
<i>Yuichi Mabuchi, Atsushi Nakamura, Aya Ohmae, Takanori Uno, Koji Ichikawa, Hiroshi Mizuno</i>	
Cavities' Identification Algorithm for Power Integrity Analysis of Complex Boards	145
<i>S. Cicerone, Antonio Orlandi, B. Archambeault, S. Connor, J. Fan, J.L. Drewniak</i>	
Analysis of SAR and Current Density in Human Tissue Surrounding an Energy Transmitting Coil for a Wireless Capsule Endoscope	149
<i>Kenji Shiba, Naoya Higaki</i>	
Coupling on Cables in an Electrically Large Cavity: A Theoretical Approach	153
<i>I. Junqua, J.-P. Parmantier, P. Degauque</i>	
The Malfunction and Immunity Limit of Information Technology Equipment Under HPEM Environments	157
<i>Hidenori Sekiguchi, Shinji Seto, Ikuya Minematsu</i>	
Research on Calculation Method of Ion Flow Field Under Multi-Circuit HVDC Transmission Lines	161
<i>Wei Li, Bo Zhang, Jinliang He, Rong Zeng, Shuiming Chen</i>	
Including Stripline Connections into Network Parameter Based Via Models for Fast Simulation of Interconnects	165
<i>Renato Rimolo-Donadio, Heinz-Dietrich Bruns, Christian Schuster</i>	
Substrate Batch Effect in GaAs MESFET Under Ultra-Short Pulses	169
<i>A.M. Bobreshov, I.S. Korovchenko, V.A. Stepkin, G.K. Uskov</i>	
Assessment of Equivalent Noise Source Approach for EMI Simulations of Boost Converter	173
<i>Vuttipon Tarateeraseth, I.A. Maio, Flavio G. Canavero</i>	
EMC-Influences on Digital Broadcasting Services in Vehicular Environments	177
<i>Niels Koch</i>	
Electric-Field Vector Measurement with Fiber-Mounted Electro-Optic Probe	181
<i>Hiro Yoshi Togo, Shoji Mochizuki, Naoya Kukutsu, Tadao Nagatsuma</i>	
Discussions About Automotive Application of the "Equivalent Cable Bundle Method" in the High Frequency Domain	185
<i>Guillaume Andrieu, Solange Bertuol, Xavier Bunlon, J.-P. Parmantier, Alain Reineix</i>	
Interactions Between Vias and the PCB Power-Bus	189
<i>Gerd Heinrich, Stefan Dickmann</i>	
Study on the Characteristics of S₂₁ and EMI on a Shifted Electromagnetic Band Gap (EBG) Structure	193
<i>Shigeo Nara</i>	
Monitoring of Static Magnetic Field and Variable Electromagnetic Fields in a Large Magnetic Fusion Plasma Experimental Facility	197
<i>T. Uda, M. Tanaka, T. Kawano, Y. Kamimura, J. Wang, Osamu Fujiwara</i>	
Induction Characteristics of a Solar Cell on the Ground Plane from Radiated Electromagnetic Disturbances	201
<i>Mariko Tomisawa, Masamitsu Tokuda</i>	
Characterization of On-Chip Interconnections and Capacitive Coupling Effect on CMOS Operational Amplifier	205
<i>Yujeong Shim, Junso Pak, Andrew Kim, Jounggho Kim</i>	
Test Device for Radiated Immunity Tests	209
<i>Ralf Heinrich, Holger Streitwolf, Lothar Dallwitz, Uwe Karsten</i>	

Chip Level Techniques for EMI Reduction in LCD Panels	213
<i>Min-woo Kim, Do-wan Kim, Bon-sung Koo, Yong-bum Kim, On-sik Choi, Nam-deog Kim</i>	
Development of Thin Electromagnetic Wave Absorption Wall Using Patch Elements	217
<i>Yoshinobu Okano</i>	
Vascular Structure Model for Improved Numerical Simulation of Heat Transfer in Human Tissue.....	221
<i>Mikheil Prishvin, Liana Manukyan, Revaz Zaridze</i>	
ESD Field Coupling Study in Relation with PCB GND and Metal Chassis.....	225
<i>Jong-sung Lee, David Pommerenke, Jae-Deok Lim, Byong-Su Seol</i>	
ESD Current Spread Measurement Using Mesh Structure	229
<i>Jae-Deok Lim, David Pommerenke, Jong-sung Lee, Byong-Su Seol</i>	
Efficient Electrically Small Wide Band Planar Antenna for SAR Reduction	233
<i>Jung-han Kim, Hong-min Lee</i>	
Measurements of the Induced Power in a Shape Shifting Transmission Line According to Immunity Tests in Reverberation and Semi Anechoic Chamber	237
<i>Martin Obholz, Dirk Peier</i>	
Effect of Electromagnetic Polarization on Whole-Body Average SAR in Infant Model for Far-Field Exposures.....	241
<i>Akimasa Hirata, Naoki Ito, Osamu Fujiwara</i>	
Analytical & Numerical Calculations of S-Parameters in Multilayer DPS-DNG Junctions	245
<i>Sibel Cimen, Gonca Cakir, Levent Sevgi</i>	
Radiation and Disturbance Mitigation in PLC Networks	249
<i>Patrick Favre, Cedric Candolfi, Pascal Krahenbuehl</i>	
MoM and PEEC Method to Reach a Complete Equivalent Circuit of a Static Converter.....	253
<i>Vincent Ardon, Jeremie Aime, Olivier Chadebec, Edith Clavel, Enrico Vialardi</i>	
Electric and Magnetic Field Distribution Inside High and Very High Voltage Substations	257
<i>Calin Munteanu, Gheorghe Visan, Ioan T. Pop, Vasile Topa, Emil Merdan, Adina Racasan</i>	
Measurements and Simulation of Common Mode Conducted Noise Emissions in Adjustable-Speed AC Drive Systems.....	261
<i>C. Jettanassen, Francois Costa, C. Vollaire, B. Revol, F. Morel</i>	
Influence of DVB-H Network Deployment on Total RF Exposure.....	265
<i>David Plets, Leen Verloock, Wout Joseph, Luc Martens</i>	
Corona Charged Subnanosecond Impulse Generator	269
<i>N. Mora, F. Vega, F. Roman, N. Pena, F. Rachidi</i>	
A Behavioral Simulation and Analysis Method for Communication System	273
<i>Wenqing Chen, Donglin Su, Xiaomu He, Yan Liu</i>	
A Low Cost Solution for the Realisation of Finite Planar Frequency Selective Shields	277
<i>Riccardo Stefanelli, Daniele Trincherro, Marco Di Giovanni</i>	
Measurement of Spread-Spectrum Radio Signals by Means of Wideband Field Probes.....	281
<i>Daniele Trincherro, Federico Longobardi, Riccardo Stefanelli, Benedetta Fiorelli, Laura Anglesio, Alberto Benedetto, Stefano Trincherro, Giovanni d'Amore, Michele Borsero, Giuseppe Vizio</i>	
Electromagnetic Resonances in Complex Structures: Case of a Vehicle	285
<i>Serge Tapigue, Marco Klingler, Philippe Besnier</i>	
Influence of the IEC 61967 Test Board on IC Electromagnetic Emissions.....	289
<i>Yamarita Villavicencio, Francesco Musolino, Franco Fiori, Davide Pandini</i>	

Printed Atmospheric Spark Gaps as ESD-Protection	293
<i>Morten Soerensen</i>	
Analysis of Stochastic Resonances in Electromagnetic Couplings to Transmission Lines	297
<i>O.O. Sy, M.C. van Beurden, B.L. Michiels</i>	
Influences of CUT on the VSWR of GTEM Cell	301
<i>Xiang Zhou, Quan-xing Jiang, Hong-qi Jiang</i>	
Susceptibility of a Sigma-Delta Converter to EMI	305
<i>Domenico Musumeci, Franco Fiori</i>	
Simulation of Corrugated Coaxial Cables Using the Meshless Radial Point Interpolation Time-Domain Method	309
<i>Christoph Bocklin, Thomas Kaufmann, Johannes Hoffmann, Christophe Fumeaux, Rudiger Vahldieck</i>	
Lightning-Transmission Line Current Transient TLM Numerical Simulation	313
<i>Marcos A.F. Mattos</i>	
Reducing the Electromagnetic Emissions of Smart Power System-on-Chips by Design	317
<i>Franco Fiori</i>	
LCL and Common Mode Current at the Outlet Do Not Tell the Common Mode Current Generated at the Remote Unbalanced Element on the Power-Line	321
<i>Masahiro Kitagawa</i>	
Electromagnetic Emission of Pulsed Plasma Thrusters	325
<i>Andrey Plokhikh, Nikolay Antropov, Nikolay Vazhenin, Garri Popov, Gennady Shishkin, Galina Soganova</i>	
Characteristics of EMD Source Caused by Valves in +-800-kV UHVDC Converter Station	329
<i>Jie Zhao, Zhanqing Yu, Jinliang He, Rong Zeng, Hong Rao, Xiaolin Li, Ying Huang</i>	
Chip-Package Co-Modeling & Verification of Noise Coupling & Generation in CMOS DC/DC Buck Converter	333
<i>Taigon Song, Jiseong Kim, Junso Pak, Joungho Kim</i>	
A Combined Stencil-Adjustable Time-Domain/FETD Method for Electrically-Large EMC Structures	337
<i>Nikolaos Kantartzis, Christos Antonopoulos, Theodoros Tsiboukis</i>	
Improving the Performances of a Reverberation Chamber: A Real Case	341
<i>Mario Poci, Ivan Dotto, Domenico Festa, Garth D'Abreu</i>	
An Improved Model for Prediction of the Dynamics of Lightning Channel Corona Sheath	345
<i>Grzegorz Maslowski, Vladimir A. Rakov, Jovan Cvetic, Megumu Miki</i>	
Worst Case Evaluation of Magnetic Field in the Vicinity of Electric Power Substations	349
<i>Gerhard Braunlich, Reinhold Braunlich</i>	
Design of 1000-kV Ultra-High Voltage AC Corona Test Cage in China	353
<i>Jian Tang, Jinliang He, Yingjian Yang, Xiong Wu, Shaoshi Ma</i>	
A Recurrent Neural Networks Based Modeling Approach for Internal Circuits of Electronic Devices	357
<i>Aimin Zhang, Hang Zhang, Hong Li, Degui Chen</i>	
Measurement of Radiated Electromagnetic Field Intensity Due to Micro Gap Discharge as Low Voltage ESD	361
<i>Ken Kawamata, Shigeki Minegishi, Osamu Fujiwara</i>	
Conducted Interference Immunity Test to High-Speed Power Line Communication System	365
<i>Satoshi Hosoya, Masamitsu Tokuda, Takashi Matsuo</i>	

Further Validation of Spark-Resistance Formula Applied for Human ESD	369
<i>Yoshinori Taka, Osamu Fujiwara</i>	
Study of RF Microdosimetry for the Inner Organs of the Head, Using the Korean High-Resolution Model	373
<i>Taehong Kim, Junhurk Oh, Jeongki Pack</i>	
Semi-Analytical Approach to Assess EM Constraints on Cylinder-Like Systems	377
<i>I. Junqua, J.-P. Parmantier</i>	
Numerical Evaluation of Absorber Reflectivity in an Artificial Waveguide	381
<i>Hugo Pues, Yoeri Arien, Frank Demming-Janssen, Jan Dauwen</i>	
Narrowband Interference Characteristics of High-Speed Power Line Communication Based on Wavelet-OFDM	385
<i>Kenichi Nakagawa, Satoshi Hosoya, Masamitsu Tokuda, Yuji Igata</i>	
Susceptibility of Network Components to Pulsed Medium Power Microwave Fields	389
<i>Ch. Braun, P. Clemens, H.U. Schmidt, M. Suhrke, A. Taenzer</i>	
Radiation Characteristic of Mono-Conical Antenna for Wideband Electromagnetic Field Generation	393
<i>Shingo Inoue, Hideki Abe, Masamitsu Tokuda, Shinobu Ishigami</i>	
Vertical Electromagnetic Bandgap Structure for Noise Suppression in Single-Ended and Differential Signaling on a Multi-Layer Backplane Board	397
<i>Chulsoon Hwang, Jongbae Park, Jaemin Kim, Kyoungchoul Koo, Joungho Kim</i>	
Scattering Analysis of a Wind Farm	401
<i>Alejandro Calo Casanova, Miguel Calvo Ramon, Leandro de Haro y Ariet, Pedro Blanco-Gonzalez</i>	
Determination of General Public Exposure to WiMAX Base Stations	405
<i>Christian Bornkessel, Markus Schubert, Matthias Wuschek</i>	
Total Radiated Power Measurements of WiFi Devices Using a Compact Reverberation Chamber	409
<i>Vikass Monebhurrun, Thierry Letertre</i>	
Method of Evaluating Electromagnetic-Interference Characteristics of Wireless LANs by Narrowing Frequency Bandwidth of Desired Waves	413
<i>Hiroshi Koyama, Masamitsu Tokuda, Noboru Fujita</i>	
Assessment of the Immunity of Unshielded Multi-Core Integrated Circuits to Near-Field Injection	417
<i>Ali Alaeldine, Thomas Ordas, Richard Perdriau, Philippe Maurine, Mohamed Ramdani, Lionel Torres, M'hamed Drissi</i>	
Array of Antennas Design for the Source Stirring Technique	421
<i>Graziano Cerri, Christian De Sanctis, Valter Mariani Primiani, Carlo Monteverde, Paola Russo</i>	
A Radiated Emission Model Compatible to a Commercial Electromagnetic Simulation Tool	425
<i>P. Fernandez Lopez, A. Ramanujan, Y. Vives Gilabert, C. Arcambal, A. Louis, B. Mazari</i>	
Diffusion of Wireless Communication Technologies and Technological Lock-In	429
<i>Nicolas Rohner, Roman Boutellier</i>	
Proposal of a Specific Test Methodology to Assess the Radiated Immunity Behavior of a Data Transmission from Beacon to Train	433
<i>Y. Balghiti, B. Meyniel, J. Orion, F. Maumy, E. Francois, Philippe Besnier, M'hamed Drissi</i>	
Occurrence of GPS Phase Fluctuations in Northern and Southern Hemisphere	437
<i>I. Shagimuratov, A. Krankowski, I. Efishov, I. Zakharenkova, N. Tepenitsyna</i>	

Reradiation Interference Computation Model of High Voltage Transmission Line to the Shortwave Radio Direction Finding Station	441
<i>Xiao-wu Zhang, Jian Tang, Huan-guo Zhang, Xing-fa Liu</i>	
Setup for Measuring the Derating of SMD Components Under ESD Stress	445
<i>Franz Streibl, Stefan Tenbohlen, Jorg Hartmann, Eric Dudenhoeffler</i>	
Hybrid MoM Scheme with Incorporation of Equivalent Glass Antenna Model in Application to Automotive EMC Problems	449
<i>Faik Bogdanov, David Karkashadze, Roman Jobava, Anna Gheonjian, Ekaterina Yavolovskaya, Natalia Bondarenko</i>	
Modeling of Frequency Dependent Losses of Transmission Lines with VHDL-AMS in Time Domain	453
<i>Kerstin Siebert, Harald Gunther, Stephan Frei, Wolfgang Mickisch</i>	
Mutual Inductance of Capacitor Low-Pass Filters	457
<i>Thomas Fischer, Christian Kneuer, Manfred Albach, Goran Schubert</i>	
Modelling of Electromagnetic Immunity of Integrated Circuits by Artificial Neural Networks	461
<i>Vladimir Ceperic, Adrijan Baric</i>	
Electric and Magnetic Fields Predicted by Lightning Return Stroke Electromagnetic Models	465
<i>Yoshihiro Baba, Vladimir A. Rakov</i>	
Augmented Models of High-Frequency Transformers for SMPS	469
<i>I.A. Maio, P. Savi, I.S. Stievano, Flavio G. Canavero</i>	
Verification of Feed-Through Configurations by Means of Simple Test Apparatus on Component Level	473
<i>Thomas Schmid, Michael Wollitzer, Lauri Halme, Bernhard Mund</i>	
Comparing Cable Discharge Events to IEC 61000-4-2 or ISO 10605 Discharges	477
<i>Bastian Arndt, Friedrich zur Nieden, Rainer Pohmerer, Johannes Edenhofer, Stephan Frei</i>	
Modeling of Electrical Igniters of Vehicle Occupant Restraint Systems for EMC Simulations	481
<i>U. Hilger, L. Lei, Stephan Frei, M. Rudolph</i>	
Detecting the Number of EMI Sources Based on Higher Order Statistics.....	485
<i>Zhenfei Song, Donglin Su, Shuguo Xie</i>	
Scalable Equivalent Circuit Modelling of the EM Field Coupling to Microstrips in the TEM Cell.....	489
<i>Filip Vanhee, Johan Catrysse, Renaud Gillon, Georges Gielen</i>
