Proceedings of the Fourth International Conference on Autonomous Robots and Agents

James Cook Hotel Grand Chancellor
Wellington, New Zealand
February 10 – 12, 2009

School of Engineering and Advanced Technology,
Massey University, Palmerston North

TABLE OF CONTENTS

Web Navigation Analysis and Simulation using Ant Colony Optimization 1
Ekachai Jinhirunkul, Peraphon Sophatsathit

A New Hybrid Algorithm Based on Collaborative Line Search and Particle Swarm Optimization 7
Xiang Li, Fikret Ercan

Smooth Path Planning with Pedestrian Avoidance for Wheels Robots: Implementation and Evaluation 11
Yumiko Suzuki, Simon Thompson, Kagami Satoshi

ELA+: Goal-oriented Navigation with Obstacle Avoidance for Rescue Robots 17
Haekwan Jeong

Simulation of Swimming Nanorobots in Biological Fluids 23
Rwitajit Majumdar, Jitendra Rathore, Niti Nipun Sharma

Real-time 3-D Robot Vision Employing Novel Color Fringe Projection 27
Liang-Chia Chen, Xuan-Loc Nguyen

Double-agent Convoying Scenario Changeable by an Emergent Trigger 32
Makoto Katoh, Natsuki Imura

2-Dimenional Localization Based on Tilt Photographing of a Single CCD Camera 37
Ming-Yu Cheng, Chen-Chien Hsu

Three-Dimensional Measurement of a Remote Object with a Single CCD Camera 42
Ti-Ho Wang

Space Robot Formation Flying Control 48
Xu Bo

Satellite Selection Algorithm for Combined GPS-Galileo Navigation Receiver 53
Xu Bo

Real-time 3-D Object Recognition by Using Scale Invariant Feature Transform and Stereo Vision 59
Gee-Sern Hsu, Chyi-Yeu Lin, Jia-Shan Wu

Enhancement Approaches of Covering Process for Robot Behaviors 65
Saeed Baneamoon, Rosalina Abd. Salam

Image-Based Detection and Obstacle Avoidance for Mobile Robots 70
Cheng-Chuan Chen, Ming-Chih Lu, Pei-Chun Chang, Cheng-Pei Tsai, Tien-Yu Tang

A Novel Calibration Method for 3D Optoelectronic Motion Tracking System 75
Ming Tsai, Hsin-Cheng Chen, Zong-Han Lyu, Hsui-Yong Lung

Distributed Computations and Control in Multi-Agent Systems 81
Justin Rice, Michel Verhaegen

Planning based on Dynamic Bayesian Network algorithm Using Dynamic Programming and Variable Elimination 87
Gyubok Moon

A Method for Cooperative Robot Actions through Multi-stage Construction of Action Intelligence 93
Masakazu Suzuki, Yuki Igarashi

Unsupervised Approach to Acquire Robot Joint Attention 99
P. Ravindra S. De Silva, Katsunori Tadano, Susantha Herath, Masatake Higashi

Modelling of Hybrid Bio-Mechanical Mechanism for Nanorobotic Propulsion 105
Chhavi Adtani, Adwitya Das, Niti Nipun Sharma

Intelligent Navigation of Unmanned Land Vehicle by using GPS & One ABS Sensor 109
Syed Riaz un Nabi Jafri, Syed Minhaj un Nabi Jafri, Syed Zeeshan Shakeel

Constrained Optimal Control for Wheeled Cars 114
Bing-Min Shiu, Chun-Liang Lin

Autonomous Vehicle Parking Using Artificial Intelligent Approach 120
Chen-Kui Lee, Chun-Liang Lin, Bing-Min Shiu

A Probabilistic Model of Human Motion and Navigation Intent for Mobile Robot Path Planning 126
Simon Thompson

Adaptive Embodied Entrainment Control based on Communication Activity Measurement - A Challenge for A Robotic Introducer Agent - 132
Kenzaburo Miyawaki, Mutsuo Sano

Design of Multi-joint Tracked Robot for Adaptive Uneven Terrain Driving 138
Koh Doo Yeol, Hyun Kyung Hak, Kim Soo Hyun

Exerting Human Control Over Decentralized Robot Swarms 144
Mitchell Potter, Zsolt Kira

A Method of Accelerating Convergence for Genetic Algorithms Evolving Morphological and Control Parameters for a Biomimetic Robot 150
Frank Saunders, John Rieffel, Jason Rife

Autonomous Mobile Robot Self-Localization Based on Environmental Visual Features 156
Fairul Azni Jafar, Yasunori Suzuki, Kazutaka Yokota, Takeshi Matsuoka

Robotic Automation System for Steel Beam Assembly in Building Construction 162
Baeksuk Chu

Odometry Correction with Localization Based on Landmarkless Magnetic Map for Navigation System of Indoor Mobile Robot 168
Sam Ann Rahok, Ozaki Koichi

A Semi-Autonomous Walk-Chair 174
Raymond Jarvis

Closed form Dynamic Model of the PUMA 560 Robot Arm 179
Alirzea Izadbakhsh, Mohammad Fateh

Fast Vertical-Pose-Invariant Face Recognition Module for Intelligent Robot Guard 185
Chian C. Ho

Fixed Point Relational Fuzzy Clustering 190
Roelof Brouwer

Algorithm for Swarm Robot Flocking Behavior 196
Xiang Li, Fikret Ercan

Error Compensation of GPS using Sensor Fusion in Intelligent Vehicle 201
Byeong-Mook Chung

An Experimental Iterative Learning Strategy for a Biped Performing Semi-Active Walking 207
Ting-Ying Wu, Ting-Jen Yeh

Development of an Amphibious Robotic Propulsor Based on Electroactive Polymers 213
Laos Hirano, Luiz Martins-Filho, Ricardo Duarte, J. Fernando de Paiva

CSE+: Path Planning amid Circles 219
Sven Ronnback, Simon Westerberg, Kalle Prorok

Visualization of Clusters in Very Large Rectangular Dissimilarity Data 225
Laurence Park, Jim Bezdek, Christopher Leckie

On the Implementation of a Robotic SWARM Testbed 231
Xiaolei Hou, Changbin Yu

Cooperative Multi-agent Mapping and Exploration in Webots 237
Adele Scott, Changbin Yu

Modified GA-based Optimizer for Multi-objective Product Family Design 243
Yoke-San Wong

Height Measuring System via Slant Photography 249
Ming-Chih Lu, Wei-Yen Wabg, Jen-Chi Cheng, Cheng-Pei Tsai, Yin-Yu Lu

Programmable Logical Circuit Architecture for Edge Detection in Color Images 255
Shyang-Lih Chang, Chung-Ju Yeh, Shen Cherng, Sei-Wang Chen

Optical Linear Scales of Image Area Measurement Transformation System 261
Chin-Tun Chuang, Ming-Chih Lu, Min-Hsiang Huang, Chih Hung Chuang, Yin-Yu Lu

A Simple and Accurate Method for Lens Calibration 266
Claire Flemmer, Rory Flemmer

An Automated Gravimetric & PWM based Fluid Dispensing System with GA Parameter Fine Tuning 270
Edwin Sim, Johnny Koh, Sieh Kiong Tiong, BoonKar Yap

Semi-Passive Dynamic Walking for Humanoid Robot Using Controllable Spring Stiffness on the Ankle Joint 275
Aiman Omer, Reza Ghorbani, Hun-ok Lim, Atsuo Takanishi

Development of a Low Cost Optical Tilt Sensor 280
Amir Abul_Al_Aish, Mahfoozur Rehman

Swarm Robots Task Allocation Based on Response Threshold Model 284
Yang Yongming, Changjiu Zhou, Yantao Tian

Distributed Optimal Control Based on Internal Average Kinetic Energy for Multi-robot System 290
Mao Yang, Yantao Tian, Xianghua Yin

Drivable Road Region Detection based on Homography Estimation with Road Appearance and Driving State Models 296
Chunzhao Guo, Seiichi Mita

Finite-time Robust Trajectory Tracking Control for the Underactuated Biped Robot Based on Poincare-like-Alter-Cell-to-Cell Mapping Method 302
Limei Liu, Yantao Tian, Zhen Sui, Xiaoliang Huang

Market-based Approach for Multi-Team Robot Cooperation 308
Cheng Siong Lim

Two Legged Robot Design, Simulation and Realization 314
Niravkumar Patel

Bisection Method for Evaluation of Attraction Region of Passive Dynamic Walking 318
Peijie Zhang, Yantao Tian, Zhenze Liu

Stable Neural Control of a Flexible-Joint Manipulator Subjected to Sinusoidal Disturbance 324
Chris Macnab

A Modular Robot Climbing on Pipe-like Structures 330
Jorg Mampel, Kurt Gerlach, Cornelius Schilling, Hartmut Witte

An Integrated Approach for Automatic Farm Monitoring System 335
Ibrahim Al-Bahadly, Michael Lusby

Control and Measurement Device for Under Water Tidal Flow Power Generation 341
Ibrahim Al-Bahadly

Cognitive Map Approach for Mobility Path Optimization using Multiple Objectives Genetic Algorithm 347
Prajindra Sankar Krishnan, Sieh Kiong Tiong, Johnny Koh

Design and Development of an Automated Band Wrapper Robot for Grapevine Pest Control 353
Todd Lee, Scott Hudson, Jen-Yuan (James) Chang

Lane Detection System Based on Software and Hardware Codesign 358
Ming-Jer Jeng

Vision Based Game Controller Interface 363
Amal Punchihewa, Chandratilak Liyanage

Feature Correspondence Finding with Vertical Cylinder and Epipolar Geometry for Indoor Environments 369
Yu Fu, Tien-Ruey Hsiang, Sheng-Luen Chung

Recognition of Lawn Information for Mowing Robots 375
Kensuke Tsubata, Keiji Suzuki, Ei-ichi Osawa, Sadayoshi Mikami

Behavior Based Water Depth Estimation for Diver Type Small Humanoid Robot 381
Hitoe Oya, Keiji Suzuki

Enhancement of Infrared-based Image Identification System for Security Robots by Image Decomposition 387
Khairul Hamimah Abas

Control of Inverted Pendulum System Using a Neural Extended Kalman Filter 392
Adrian Lyons, Andrew Gerry, Stephen Stubberud, Kathleen Kramer

Representation of the Perceived Environment and Acquisition of Behavior Rule for Multi-Agent Systems by Q-Learning 398
Mengchun Xie

Feedback Error Learning Control for Underactuated Acrobat Robot with Radial Basis Function Based FIR Filter 403
Norsinnira Zainul Azlan

Measurement Accuracy on Indoor Positioning System Using Spread Spectrum Ultrasonic Waves 409
Akimasa Suzuki

Static Hand Sign Recognition using Linear Projection Methods 413
Ye Chow Kuang, Nuwan Gamage, Rini Akmeliawati

Spacecraft Attitude Estimation with the Aid of Locally Linear Neurofuzzy Models and Multi Sensor Data Fusion Approaches 418
Masoud Mirmomeni, Karim Rahmani, Caro Lucas

An Improved View-Based Navigation by Adjustable Position Resolution 424
Yoshinobu Hagiwara

Distance Measurement Based on Pixel Variation of CCD Images 428
Ke-Wei Chin, Chen-Chien Hsu

Cell Image Recognition and Visual Servo Control for Automated Cell Injection 434
Ali Ghanbari, Wenhui Wang, Christopher Hann, Geoff Chase, XiaoQi Chen

A Four Step Design Procedure for an Improved Fuzzy Crane Control 439
Akbar Assa, Abolghasem Raie, Anahid Attar Kashani, Siavash Gorji, Mahyar Naraghi

False Alarm Demand: A New Metric for Measuring Robot Performance in Human Robot Teams 444
Mohan Rajesh Elara, Sardha Wijesoma, Acosta Calderon Carlos Antonio, Changjiu Zhou

Automatic Meal Planning Using Artificial Intelligence Algorithms in Computer Aided Diabetes Therapy 450
Jaroslaw Bulka, Andrzej Izworski, Joanna Koleszynska, Jerzy Lis, Ireneusz Wochlik

Modeling and Control of Dynamic Yoyo with Pulling Back Motion 455
Shingo Kojima

Integrated Relative Navigation using a Low Cost INS/Vision Sensor for a Autonomous Aerial Vehicle 459
S Sung, Sukchang Yun

Novel Encoding and Fiducial Techniques for Visual Positioning Beacons 464
Andrew Finlay, Aladin Zayegh

Trajectory Optimization by Cooperative Maneuver with Different Types of Sensors 470
Wonsuk Lee, Hyochoong Bang

Landing Posture Control via Trajectory Planning for a Generalized Twin-body System 476
Yi-Ling Yang, Paul C.-P. Chao, Cheng-Kuo Sung

A Mathematical Model for Mapping EMG Signal to Joint Torque for the Human Elbow Joint using Non-linear Regression 482
Khalil Ullah, Jung Kim

Emotional Control of Inverted Pendulum System, a Soft Switching from Imitative to Emotional Learning 488
Mehrsan Javan Roshtkhari, Arash Arami, Caro Lucas

Position Probability Grids for Mobile Robots Obtained by Convolution 494
Felix Hackbarth

Development of the Dexterous Manipulator and the Force Sensor for Minimally Invasive Surgery 500
Jungju Lee, Hoseok Song

Pedestrian Inertial Navigation with Gait Phase Detection Assisted Zero Velocity Updating 505
Young Soo Suh, Sangkyung Park

Path Tracking Control for Underactuated AUVs Based on Resolved Motion Acceleration Control 511
YoungShik Kim, Jihong Lee

Effects of Camera Calibration Errors on RLS Trajectory Estimation of a Spinning Flying Object 516
Rafael Herrejon, Shingo Kagami, Koichi Hashimoto

Path Control of Dexterous Robotic Hand Using Genetic Algorithm 520
Albert Fong, Johnny Koh, Phing Chen Chai, Loo Chu Kiong, Sieh Kiong Tiong

Using AI Approach to Solve a Supplier-buyer Deteriorating Inventory Model Under Price Decrease 525
Muh-Lin Tsai, Jonas Chao-pen Yu

Control Method for a Robot Based on the Adaptive Attractor Selection Model 531
Ippei Fukuyori

Multi-Objective Multi-Robot Surveillance 537
Francesco Delle Fave, Vittorio Ziparo, Stefano Canu, Daniele Nardi, Luca Iocchi

Application of a Communication Interface between Agents and the Low Level Control 543
Munir Merdan, Wilfried Lepuschitz, Ingo Hegny, Gottfried Koppensteiner

Neural-Adaptive Control of Robotic Manipulators Using a Supervisory Inertia Matrix 549
Dean Richert, Chris Macnab

Universal Autonomous Robot Navigation Using Quasi Optimal Path Generation 555
Aron Laszka, Annamaria Varkonyi-Koczy, Gabor Pek, Peter Varlaki

A System Architecture for Intelligent Building Guide Robot PHOPE 561
SeungSub Oh, Young-Ho Choi, SungYong Yun, Bongjin Jun, Choengjae Lee, Hyukjoon Jang, Jaiyoon Song, Jeong-Gwan Kang, Choi Won-Seok, Su-Yong An

Generalised Object Recognition 567
Rory Flemmer, Huub Bakker

Data Mining for Generalised Object Recognition 573
Huub Bakker, Rory Flemmer

How Taxel-based Displaying Devices Can Help Blind People to Navigate Safely 579
Ryad Chellali

New Variable Focal Liquid Lens System Using Antagonistic Type SMA Actuator 585
Hyung-Min Son, Yun-Jung Lee

To Add With Caution - Decreasing a Swarm Robotics' Efficiency by Imprudently Enhancing the Robots' Capabilities 589
Yaniv Altshuler, Alfred Bruckstein, Israel Wagner

Feature-based Object Recognition 595
John Howarth, Huub Bakker, Rory Flemmer

Swarm Ant Robotics for a Dynamic Cleaning Problem - Analytic Lower Bounds and Impossibility Results 600
Yaniv Altshuler, Alfred Bruckstein, Israel Wagner, Vladimir Yanovski

Interaural Time Difference Estimation Using Cross-power Spectrum Phase with Zero-crossings 606
Byoung-gi Lee, Jongsuk Choi, Munsang Kim

Localization of a High-speed Mobile Robot using Global Features 611
Seung-Keun Cho, Jang-Myung Lee, MunGyu Choi, Tae Kyung Yang

Swarm Ant Robotics for a Dynamic Cleaning Problem - Upper Bounds 616
Yaniv Altshuler, Alfred Bruckstein, Israel Wagner, Vladimir Yanovski

Usage of Different Levels of Functional Information in Multiple Robot Operation 622
Hiroshi Furukawa

Optimisation of the Gas-Exchange System of Combustion Engines by Genetic Algorithm 627
Colin Rose, Stephen Marsland, Donald Law

Viewing Comics on Robots 633
Hang-Bong Kang, Myung-Ho Ju

Development of an Autonomous Kiwifruit Picking Robot 639
Alistair Scarfe, Rory Flemmer, Huub Bakker, Claire Flemmer

Stream Processing of Moment Invariants for Real-time Classifiers 644
Christopher Messom

A Review of Artificial Intelligence 650
Emma Brunette, Rory Flemmer, Claire Flemmer

Adaptive Game AI for Gomoku 658
Kay Chen Tan

Local Wheeled Mobile Robot Navigation with Monocular Data 664
LLuis Pacheco, Ningsu Luo, Xavier Cufi, Javier Cobos

Cluster Position Control of Brownian Movement Factors using Boundary Push Method 670
Chiyen Kim, Min Cheol Lee

Tracking Performance of a Foveated Vision System 675
Donald Bailey, Christos-Savvas Bouganis

Underwater Short Range Free Space Optical Communication for a Robotic Swarm 681
Fikret Ercan

A Scheme for an Embodied Artificial Intelligence 685
Rory Flemmer

Robotics Competitions in Engineering Education 694
Moi Tin Chew, Serge Demidenko, Christopher Messom, Gourab Sen Gupta

Author Index
