TABLE OF CONTENTS

Future Network Architecture - Power Network, Protection, Control and Market Requirements for 2020 1
J. Douglas, N. Roscoe, S. Andrews

Smart Communications in Demand Management 5
R. Mora, D. Mora, A. Lopez, F. Carmona, R. Sanz

Evolution of DSO Control Centre Tool in Order to Maximize the Value of Aggregated Distributed Generation in Smart Grid 9
M. Sebastian, J. Marti, P. Lang

Development of Autonomous Demand Area Power System - Operation and Control for Regulation of System Voltage 13
S. Uemura, H. Kobayashi

Virtual Power Plant Field Experiment Using 10 Micro-CHP Units at Consumer Premises 17
B. Roossien, M. Hommelberg, C. Warmer, K. Kok, J.-W. Turkstra

Maximisation of Intermittent Distributed Generation in Active Networks 21
L.F. Ochoa, C.J. Dent, G.P. Harrison

Asset Management Arguments for Smart Grids 25
M.J.C. Berende, J.G. Slootweg, J. Kuiper, J.C.F.M. Peters

Automation to Maximise Distributed Generation Contribution and Reduce Network Losses 29
K. Bell, G. Quinonez-Varela, G. Burt

An Integrated MV Distributed Generation Connection Planning Tool 33
B. D'Albertanson, D. Hawkins

Optimal Design Policy and Strategic Investment in Distribution Networks with Distributed Generation 37
N. Silva, G. Strbac

Microturbine Based Distributed Generator in Smart Grid Application 41
A.K. Saha, S. Chowdhury, S.P. Chowdhury, P.A. Crossley

Impact of Microgrids Concept on Low Voltage Network Reliability 45
Liang Tao, C. Schwaegerl, N. Herrmann

Universal Application of Synchronous Islanded Operation 56
R. Best, D.J. Morrow, D. Laverty, P. Crossley

Definition of DG Protection Planning Methods for Network Information Systems 60
K. Maki, S. Repo, P. Jarventausta, M. Karenlampi

Safety and Reliability for Smart-, Micro-and Islanded Grids 64
W. Friedl, L. Fickert, E. Schmautzer, C. Obkircher

Inovgrid Project - Distribution Network Evolution As a Decisive Answer to New Electrical Sector Challenges 68
L.V. Cunha, J. Reis, A.J. Pecas

Method and Applications of IEC Common Information Model Standard for Distribution Operations: A Path Towards Smart Grids Development 70
E. Lambert, J. Fremont, C. Bouquet

Self-healing Networks Performance Improvement by Automated Switching Algorithm 74
P.W. Cox

A Roadmap for Developing Real Time Distribution System Simulation Tools for the Smart Grid 78
X. Mamo, M. McGranaghan, R. Dugan, J. Maire, O. Devaux

Integration of Combined Heat and Power Micro Units Into the Low Voltage Network by Using a Grid Oriented Operation Mode 85
M. Pielke, M. Kurrat

Demand Side Management Programs in the Western Sydney Areas 89
Hanzheng Duo, F. Bucca

Application of Energy Storage Systems Minimizing Effects of Fluctuating Feed-in of Photovoltaic Systems 93
G. Barwaldt, M. Kurrat

Regulatory Frameworks for SmartGrid Implementation in Europe and the Next Steps 96
F. Villa

Demand for Wind, Maximising the Value of Wind Power Through Demand Side Management 106
P. Taylor, H.G. Svendsen, C. Barbier, C. Welby

Integration is Key to Smart Grid Management 110
J.R. Roncero

Standard Microsource Interface for a Microgrid 114
P.J. Binduhewa, M. Barnes, A. Renfrew

Supergen FutureNet and FlexNet 118
C. Walton, T. Green, T. Woods

Integrated Modelling of Gas and Electricity Distribution Networks with a High Penetration of Embedded Generation 122
S. Acha, C. Hernandez-Aramburo

Norwegian Electricity Customers' Attitudes Towards Smart Metering 126
E.F. Livgard

Automation Systems to Support Smart Energy Behaviour of Small Customers 130
G. Mauri, D. Moneta, P. Gramatica

Interactive Customer Interface for Advanced Distribution Management and Electricity Market 134
P. Jarventausta, J. Partanen, S. Karkkainen

User Perception of Demand Side Management 138
V. Thornley, R. Kemsley, C. Barbier, G. Nicholson

ADDRESS - Active Demand for the Smart Grids of the Future 142
R. Belhomme, R.C.R. De Asua, G. Valtorta, A. Paice, F. Bouffard, R. Rooth, A. Losi

Active Network Management of Voltage Leading to Increased Generation and Improved Network Utilisation 146
V. Thornley, J. Hill, P. Lang, D. Reid

National Technology Platform - Smart Grids Austria 150
A. Lugmaier, H. Fechner, W. Pruggler

Impact of the Plus Energy Buildings on the Voltage Profile of the Distribution Networks 152
M. Petit, X. Le Pivert, A. Guiavarch

Settlement Issues for Advanced Metering with Retail Competition 156
D. Hirst

PRIME: Powerline Intelligent Metering Evolution 160
I. Berganza, A. Sendin, J. Arriola

An Italian Facility to Test Distributed Energy Resources Management for SmartGrids 163
S. Scalari, G. Valtorta, R. Giglioli, F. Pilo, R. Caldon, S. Massucco, C.A. Nucci, A. Testa

Locating Faults in Kuwait Distribution Networks 167
W. Al-Hasawi, M. Gilany

On Site Trials of the New SuperTAPP N+ AVC Relay - a Step Towards an Active Network 171
M. Gillie, J. Hiscock, A. Creighton

Modelling of Pseudo-measurements for Distribution System State Estimation 175
E. Manitsas, R. Singh, B. Pal, G. Strbac

Distribution Network As Communication System 179
F. Lobo, A. Cabello, A. Lopez, D. Mora, R. Mora

LVSure Concept for Automation of LV Distribution Networks 183
G. Eastwood, M. Lees, D. Roberts

Feeder Automation Improves Medium Voltage Network Operating Efficiency 187
Y. Chollot, J.-m. Biasse, A. Malot

Advanced Stochastic Analysis of Massive DG Penetration - a Voltage Quality Case Study 191
Liang Tao, M. Mueller, C. Schwaegerl

Integrating Voltage Control and Power Flow Management in AuRA-NMS 195
P. Taylor, Tao Xu, S. McArthur, G. Ault, E. Davidson, M. Dolan, C. Yuen, M. Larsson, D. Botting, D. Roberts, P. Lang

Economical and Technical Viability of Demand Response in the Spanish Power System: the "optiges" Project 199
I. Cobelo, J.E. Rodriguez, M. Boyra, J. Anduaga, A. Castellanos

Distribution Network Design, Management and Regulation 203
J. Deuse, K. Purchala, G. Bourgain

Coordinated Control and Management of Aggregated Distributed Energy Resources for Enhanced Business Case Viability 207
D. Healey, H. Caroline

Key Point for the Future Challenges of the SmartGrids: the Architecture of the Smart T-station 211
J.A. Sanchez, J. Arriola, H. Baroja

ADINE - EU Demonstration Project of Active Distribution Network 215
S. Repo, K. Maki, P. Jarventausta, O. Samuelsson

Deployment of Active Network Management Technologies in the UK and Their Impact on the Planning and Design of Distribution Networks 220
R. MacDonald, G. Ault, R. Currie

A Laboratory Testbed for the Evaluation of Cyber Attacks to Interacting ICT Infrastructures of Power Grid Operators 224
G. Dondossola, F. Garrone, J. Szanto, F. Gennaro

Advanced Fault Management As a Part of Smart Grid Solution 228
D.S. Popovic, E.E. Boskov

Benefits of Using High Efficiency Power Equipment That Reduce Distribution System Losses 232
M. Sacotte, J.-F. Faltermeier, P. Folliot, A. Sacre

Effects of DSTATCOM on Measured Impedance at Source Node of Distribution Feeder 236
A. Kazemi, S. Jamali, H. Shateri

Power System Design: Basis for Efficient Smart Grid Initiatives 240
A. Sensing, A. Bose, W. Wittig

Control of Multiple Distributed Generators for Intentional Islanding 241
Chui Fen Ten, P.A. Crossley

Current Development and Future Plan for Smart Distribution Grid in Korea 245
Seonghcul Kwon, Juyong Kim, Ilkeun Song, Yongwoo Park

Dynamic Thermal Rating for Increasing Network Capacity and Delaying Network Reinforcements 249
D. Roberts, P. Taylor, A. Michiorri

The Control of a STATCOM with Supercapacitor Energy Storage for Improved Power Quality 253
P. Srithorn, M. Sumner, Liangzhong Yao, R. Parashar

Description and Benefits of a Situation Awareness Tool Based on a Distribution State Estimator and Adapted to Smart Grids 257
M. Sebastian, O. Devaux, O. Huet

Asynchronous Interconnection of a Microgrid 261
M. Barnes, P. Binduhewa

Assessing the Value of Active Constrained Connection Managers for Distribution Networks 265
S. Jupe, P. Taylor, C. Berry

Cost-efficient Integration of Distributed Generation Into Medium Voltage Networks by Optimized Network Planning 269
A. Berg, S. Krahl, T. Paulun

DONG Energy - Towards the Intelligent Utility Network 273
P. Vinter

FACTS for Voltage Control and Power Quality Improvement in Distribution Grids 277
R. Grunbaum

Substation Automation 281
P. Johansen

Demonstration Study on Centralized Voltage Control System for Distribution Line with Sudden Voltage Fluctuations 285
H. Hatta, H. Kobayashi

Voltage and Current THD in Microgrid with Different DG Unit and Load Configurations 289
H. Laaksonen, K. Kauhaniemi

Microgrid Configuration for Major Network Events 293
T. Kato, Y. Suzuoki, T. Funabashi, L. Cipcigan, P. Taylor

A New Formulation IPCA Based Method for Branch-current Estimation in Distribution Networks 297
A.A. Yaghoti, M.P. Moghaddam, M.R. Haghifam, V.J. Majd

Maximum Penetration Level of Distributed Generation Without Violating Voltage Limits 304
J. Morren, S.W.H. de Haan

Intelligent Self-describing Power Grids 308
A. Schroder, T. Dreyer, B. Schowe-Von Der Brelie, A. Schnettler

Digital Model of a Distribution Management System for the Optimal Operation of Active Distribution Systems 312
F. Pilo, G. Pisano, G.G. Soma

Smart Grid - Enabling Electricity Networks of the Future TODAY 317
A.J. Arriola, F. Casali

Potential of Power Electronics in Electricity Distribution Systems 318
J. Lassila, T. Kaipia, V. Voutilainen, K. Koivuranta, J. Haakana, J. Partanen

Voltage and Frequency Control for Island Operated Induction Generators 322
J. Bjornstedt, O. Samuelsson

Formulation of Pricing Mechanism for Microgrid Energy 326
A. Sinha, R. Lahiri, S. Byabortta, S. Chowdhury, S. Chowdhury, P. Crussley

Implementation of Interactivity Across a Resilient Microgrid for Power Supply and Exchange with an Active Distribution Network 330
Peng Li, P. Degobert, B. Robyns, B. Francois

Virtual Synchronous Machines (VSG'S) for Frequency Stabilisation in Future Grids with a Significant Share of Decentralized Generation 334
K. Visscher, S.W.H. De Haan

Power Electronics in Smartgrids - Impact on Power System Reliability 338
T. Kaipia, P. Peltoniemi, J. Lassila, P. Salonen, J. Partanen

Reliability Study of a Micro Grid System with Optimal Sizing and Placement of DER 342
A.K. Basu, A. Bhattacharya, S.P. Chowdhury, S. Chowdhury, P.A. Crossley

Operation and Control of DG Based Power Island in Smart Grid Environment 346
S.P. Chowdhury, S. Chowdhury, C.F. Ten, P.A. Crossley

Towards a Framework for Modelling Active Networks 351
R.A.F. Currie, I.D. Broadfoot, G.W. Ault, J.R. McDonald
