

2008 10th International Conference on Probabilistic Methods Applied to Power Systems

(PMAPS)

**Rincon, Puerto Rico, USA
25 – 29 May 2008**

**IEEE Catalog Number: CFP08826-PRT
ISBN: 978-1-934325-21-6**

TABLE OF CONTENTS

BETTER ACCOUNTING FOR FORECASTING UNCERTAINTY IN DECISION MAKING RELATED TO WIND GENERATION

Multivariate Time Series Models Applied to the Assessment of Energy Storage in Power Systems	1
<i>Bernd Klöckl</i>	
Modeling of Spatial Dependence in Wind Power Forecast Uncertainty	9
<i>George Papaefthymiou, Pierre Pinson</i>	
Benefits of Stochastic Scheduling for Power Systems with Significant Installed Wind Power	18
<i>Aidan Tuohy, Peter Meibom, Eleanor Denny, Mark O'Malley</i>	
Simulation of Trading Arrangements Impact on Wind Power Imbalance Costs	25
<i>Mikael Amelin</i>	
A Spot-Risk-Based Approach for Addressing Problems of Decision-Making under Uncertainty	32
<i>Luís M. Costa, Jérémie Juban, Franck Bourry, George Kariniotakis</i>	

TRANSMISSION I

Cross-Entropy Based Rare-Event Simulation for the Identification of Dangerous Events in Power Systems	41
<i>Florence Belmudes, Damien Ernst, Louis Wehenkel</i>	
Combined Adequacy and Static Security Considerations in Transmission System Reinforcement	48
<i>Wijarn Wangdee, Roy Billinton</i>	
Dynamic Security Risk Assessment and Optimization of Power Transmission System	56
<i>Dongtao Wang, Yixin Yu</i>	
Electric Power System Multiple Contingencies Analysis Using the Rough Set Theory	62
<i>C. I. Faustino Agreira, C. M. Machado Ferreira, F. P. Maciel Barbosa</i>	

DISTRIBUTION I

Risk Analysis of Distribution Systems Using Value at Risk Methodology	67
<i>Andrej Schreiner, Gerd Balzer, Armin Precht</i>	
Application of Bayesian Networks in Distribution System Risk Management	75
<i>K. Sand, M. D. Catrinu, G. H. Kjølle, S. Bonnoit, J. Aupied</i>	
Risk Based Decision for Reinvestments in Distribution Systems	83
<i>M. K. Istad, D. E. Nordgård, O. Gjerde, M. D. Catrinu, A. Nybø, B. E. Birkeland</i>	
Review of the Risk Management at a Distribution System Operator	90
<i>Carl Johan Wallnerström, Jörgen Hasselström, Per Bengtsson, Lina Bertling</i>	

WIND I

Probabilistic Forecasting of Wind Power at the Minute Time-Scale with Markov-Switching Autoregressive Models	98
<i>Pierre Pinson, Henrik Madsen</i>	
Wind Power Forecasting with Entropy-Based Criteria Algorithms	106
<i>Ricardo Bessa, Vladimiro Miranda, João Gama</i>	
The Effect of Markov Chain State Size for Synthetic Wind Speed Generation	113
<i>F. O. Hocaoglu, O. N. Gerek, M. Kurban</i>	
Optimal Wind Power Location on Transmission Systems - A Probabilistic Load Flow Approach	117
<i>D. J. Burke, M. J. O'Malley</i>	

GENERATION PLANNING

Probabilistic Power Generation Expansion Planning in a Competitive Electricity Market	125
<i>Adelino J. C. Pereira, João Tomé Saraiva</i>	
Unit Availability Considerations in Composite System Generation Planning	132
<i>Panida Jirutitijaroen, Chanan Singh</i>	
Reliability Analysis of Generating Capacity of Mexico's National Interconnected Power System	137
<i>Luis Conde-López, Guillermo Gutiérrez-Alcaraz</i>	
Applying Load Factors to the Mean-Variance Analysis for Fuel Diversification	143
<i>Suriya Ruangpattana, Douglas J. Gotham, Kumar Muthuraman, Paul V. Preckel, Ronald L. Rardin</i>	

GENERATION SCHEDULING – LOAD FORECASTING

Applying Stochastic Programming to the Unit Commitment Problem	151
<i>Pablo A. Ruiz, C. Russ Philbrick, Eugene Zak, Kwok W. Cheung, Peter W. Sauer</i>	
Unit Commitment Scheduling by Using the Autoregressive and Artificial Neural Network Models Based Short-Term Load Forecasting	157
<i>M. Kurban, U. Basaran Filik</i>	
Modeling of the Load Duration Curve Using the Asymmetric Generalized Gaussian Distribution: Case of the Tunisian Power System	162
<i>Ould Mohamed M. Mohamed, M. Jaïdane-Saidane, J. Souïssi</i>	
Spinning Contingency Reserve Valuation in Systems with Non-Identical Generators	168
<i>Pablo A. Ruiz, Peter W. Sauer</i>	

AGEING MODEL

Verification of Markov Models of Ageing Power Equipment	176
<i>Jaroslav Sugier, George J. Anders</i>	
Strategies to Refurbish or Maintain Control Command System of Substation of Electrical Network	182
<i>P. Carer, C. Briend</i>	
Circuit-Breaker Estimation with the Aid of Ageing Models	190
<i>Leyla Asgariéh, Gerd Balzer, Armin J. Gaul</i>	
Weather Impact on Components Reliability: A Model for MV Electrical Networks	196
<i>P. Carer, C. Briend</i>	

TRANSMISSION II

Tabu Search Applied to Transmission Expansion Planning Considering Losses and Interruption Costs	203
<i>Armando M. Leite da Silva, Luiz A. da Fonseca Manso, Leonidas C. de Resende, Leandro S. Rezende</i>	
Risk-Based Transmission Expansion	210
<i>Yuan Li, James. D. McCalley, Sarah Ryan</i>	
On Operational Risk Assessment in Transmission Systems - Weather Impact and Illustrative Example	218
<i>Math H. J. Bollen, Lars Wallin, Trond Ohnstad, Lina Bertling</i>	
Transmission Loss Allocation Using Normalized Loss Weight Factors	224
<i>S. N. Keshmiri, M. Ehsan</i>	

DISTRIBUTION II

Multiobjective Maintenance Policy for a Distribution System an Application Study	229
<i>P. Hilber, L. Bertling</i>	
Estimation of Sojourn Time Distribution Parameters Based on Expert Opinion and Condition Monitoring Data	235
<i>T. M. Welte, A. O. Eggen</i>	
A Stochastic Weather Dependent Reliability Model for Distribution Systems	243
<i>Karin Alvehag, Lennart Söder</i>	
Renewal Planning of Aged Distribution Networks	251
<i>Emilio Ghiani, Fabrizio Pilo, Gianni Celli, Susanna Mocci</i>	

WIND II

Management of Energy Storage Coordinated with Wind Power under Electricity Market Conditions	259
<i>Luís M. Costa, Franck Bourry, Jérémie Juban, George Kariniotakis</i>	
Reliability Cost/Worth Associated With Wind Energy and Energy Storage Utilization in Electric Power Systems	267
<i>B. Bagen, R. Billinton</i>	
An Alternative Method for Estimating Wind-Power Capacity Credit based on Reliability Evaluation Using Intelligent Search	274
<i>Lingfeng Wang, Chanan Singh</i>	

DISTRIBUTED GENERATION

Reliability-Based Stand-Alone Photovoltaic System Sizing Design - A Case Study	280
<i>Hai Feng Ge, Liqin Ni, Sohrab Asgarpour</i>	
Risk-Based Model for Cogeneration Resource Planning	288
<i>Enrico Carpaneto, Gianfranco Chicco, Pierluigi Mancarella, Angela Russo</i>	
Considering a Customer Dissatisfaction Index in the Reliability of Distribution Networks with Distributed Energy Resources	294
<i>Yongtao Yang, Math H. J. Bollen</i>	

POWER SYSTEM RELIABILITY

Aleatory and Epistemic Uncertainty Considerations in Power System Reliability Evaluation	302
<i>Roy Billinton, Dange Huang</i>	
Artificial Neural Networks Applied to Reliability and Well-Being Assessment of Composite Power Systems	310
<i>Armando M. Leite da Silva, Leonidas C. de Resende, Luiz A. da Fonseca Manso, V. Miranda</i>	
Assessment of Transmission System Component Criticality in the De-Regulated Electricity Market	316
<i>G. A. Hamoud</i>	

FAILURE PROBABILITY

Failure Probabilities of Existing Overhead Shield Wires	324
<i>Ibrahim Hathout, Linda Vu</i>	
Prediction of Circuit Breaker Time-to-Failure Considering Generation Capacity Growth	331
<i>Q. Binh Dam, A. P. Sakis Meliopoulos</i>	
Probabilistic Assessment of Generator Failure Using the Analytic Hierarchy Process (AHP)	339
<i>N. Amyot, C. Hudon, M. Bélec, L. Lamarre, N. D. Nguyen</i>	
Statistical Analysis of Partial Discharge Patterns and Knowledge Extraction in MV Cable Systems	344
<i>S. Mousavi Gargari, P. A. A. F. Wouters, P. C. J. M. van der Wielen, E. F. Steennis</i>	

TRANSFORMER RELIABILITY

Validation of Reliability Forecasting for Power Transformers	349
<i>Arjan van Schijndel, Jos M. Wetzer, Peter A. A. F. Wouters</i>	
Monte Carlo Simulation to Assess the Optimum Number of Distribution Spare Transformers	353
<i>João Guilherme de C. Costa, Armando M. Leite da Silva</i>	
Modelling Technique for Power Transformer Replacement Waves	359
<i>Arjan van Schijndel, Jos M. Wetzer, Peter A. A. F. Wouters</i>	
Use of Mobile Unit Transformers in High Voltage Load Stations	364
<i>G. A. Hamoud</i>	

ELECTRICITY MARKETS

Reliability Pricing Using Contingent Contracts	372
<i>Gerald B. Sheblé, Gregory Bingham</i>	
Reliability Improvement of Restructured Power Systems with Diversified Demand Side Load Shift	378
<i>L. Goel, Qiuwei Wu, Peng Wang</i>	
The Value of Technical Information in the Unbundled Electric Market	386
<i>G. Gutiérrez-Alcaraz, Gerald B. Sheblé</i>	

OPTIMAL ALLOCATION OF POWER EQUIPMENT

A Probabilistic Approach for Optimal Capacitor Allocation in Three-Phase Unbalanced Distribution Systems	391
<i>G. Carpinelli, C. Noce, D. Proto, A. Russo, P. Varilone</i>	
A Multi-Objective Approach for the Optimal Distributed Generation Allocation with Environmental Constraints	397
<i>G. Celli, S. Mocci, F. Pilo, G. G. Soma</i>	
Optimal Location of Measurement Devices in Active Distribution Networks	405
<i>Carlo Muscas, Fabrizio Pilo, Giuditta Pisano, Sara Sulis</i>	

PROTECTION

Analysis and Design of Overload Protections for HV Lines with a Probabilistic Approach	413
<i>Juliano S. A. Carneiro, Luca Ferrarini</i>	
Fault Location in Radial Power Systems based on Statistical Analysis	419
<i>J. Mora-Flórez, N. Estrada-Cardona, S. Pérez-Londoño</i>	
Reliability Analysis of Power System Based on Generalized Stochastic Petri Nets	425
<i>Juliano S. A. Carneiro, Luca Ferrarini</i>	

UNCERTAINTY ANALYSIS – SAGS

Uncertainty Analysis of Power System Components Based on Stochastic Response Surfaces	431
<i>C. Bastiaensen, W. Deprez, E. Haesen, J. Driesen, R. Belmans</i>	
Uncertainty Analysis for a Large-Scale Transient Simulation of a Notional All-Electric Ship Pulse Load Charging Scenario	439
<i>J. Langston, J. Taylor, F. Hover, J. Simpson, M. Steurer, T. Baldwin</i>	
Validation of Voltage Sags Short Term Measurements Based on Predicted Stochastic Simulation	447
<i>Thiago Clé de Oliveira, José Maria de Carvalho Filho, Roberto Chouhy Leborgne, José Policarpo Gonçalves de Abreu</i>	

TRANSMISSION III

High Voltage Transmission Equipment Forced Outage Statistics Including Different Fault Types	455
<i>A. A. Chowdhury, D. O. Koval</i>	
Application of Probabilistic Method for Switchyard Types Selection in Transmission Networks	463
<i>Y. Merkurjevs, Z. Krishans, I. Oleinikova, A. Mutule</i>	
Use of Phase Shifting Transformers for Minimising Congestion Risk	468
<i>J. Verboomen, G. Papaefthymiou, W. L. Kling, L. van der Sluis</i>	
Low Discrepancy Sequences Based Optimization Algorithm for Tuning PSSs	474
<i>A. A. Alabduljabbar, J. V. Milanovic, E. M. Al-Eid</i>	

DISTRIBUTION III

Evaluation of Low-Voltage Network Systems Reliability Using Probabilistic Methods	483
<i>D. Y. Wang, Y. Ten-Ami, E. Chebli</i>	

Reliability Evaluation of Distribution Networks Considering Optimization Models in the Restoration Process	489
<i>A. Coelho, A. B. Rodrigues, R. B. Prada, M. G. Silva</i>	

Economical Evaluation of Telecontrolled Switches in MV Distribution System Using the Costs of Penalty Payments	496
<i>V. Detrich, P. Skala, Z. Spacek, V. Blazek</i>	

Direct and Indirect Measurement of Residential and Commercial CIC: Preliminary findings from South African Surveys	502
<i>R. Herman, C. T. Gaunt</i>	

WIND III

A Markovian Approach to Size a Hybrid Wind-Diesel Stand Alone System	509
<i>V. Carpentiero, R. Langella, T. Manco, A. Testa</i>	

Probabilistic Computation of Wind Farm Power Generation Based on Wind Turbine Dynamic Modeling	517
<i>Herman Bayem, Yannick Phulpin, Philippe Dessante, Julien Bect</i>	

Reliability Issues of Offshore Wind Farm Topology	523
<i>Xu Liu, Syed Islam</i>	

POWER SYSTEM PLANNING

A Joint Deterministic - Probabilistic Approach To Bulk System Reliability Assessment	528
<i>Roy Billinton, Huiling Bao, Rajesh Karki</i>	

Determination of Adequacy Reliability Criteria in Korea	536
<i>Jeongje Park, Sanghun Jeong, Jaeseok Choi, Yongbum Yun, Junmin Cha, Yongtae Yoon</i>	

Probabilistic Criterion for Expansion and Operation Planning	543
<i>João Marcos Lima, Marcus Th. Schilling, Elizete M. Lourenço</i>	

Probabilistic Reliability Evaluation of Korea Power System in Planning Mode	550
<i>Sangheon Jeong, Jeongje Park, Jaeseok Choi, Junmin Cha, Yongtae Yoon, Hongseok Choi, Donghun Jeon</i>	

TRANSMISSION – HVDC

Introduction to HVDC Technology for Reliable Electrical Power Systems	554
<i>Johan Sotr�us, Lina Bertling</i>	

Probabilistic Reliability Planning at British Columbia Transmission Corporation: Method and Project Case	562
<i>W. Li, P. Choudhury, J. H. Gurney</i>	

Availability Assessment of the HVDC Converter Transformer System	569
<i>R. Leelaraji, J. Sotr�us, G. Olguin, L. Bertling</i>	

MAINTENANCE

Application of Evolutionary and Hybrid Algorithms to Optimize Investments Strategies in Large Power Plants	577
<i>Bartosz Sakowicz, George J. Anders, Marek Kaminski, Andrzej Napieralski</i>	

A Risk-Based Decision Approach for Maintenance Scheduling Strategies for Transmission System Equipment	584
<i>Satish Natti, Mladen Kezunovic</i>	

Markov Processes with Fuzzy Parameters - A Case Study590
Haifeng Ge, Sohrab Asgarpoor
