

**2009 43<sup>rd</sup> Annual Conference on  
Information Sciences and Systems  
(CISS)**

**Baltimore, MD, USA  
18 – 20 March 2009**

**Pages 1 - 481**

**IEEE Catalog Number: CFP0960A-PRT  
ISBN: 978-1-4244-2733-8**

**CISS 2009**  
**43<sup>rd</sup> Annual Conference on Information Sciences and Systems**  
**TABLE OF CONTENTS**

**Compressive Sampling and Processing I**

**Distributed Compressed Video Sensing.....1**

*Thong T. Do, Yi Chen, Dzung T. Nguyen, Nam Nguyen, Lu Gan and  
Trac D. Tran, The Johns Hopkins University*

**Dynamic Updating of Time Varying Sparse Signal .....3**

*M. Salman Asif and Justin Romberg, Georgia Institute of Technology*

**Analysis and Optimization of Distributed Linear Coding .....9  
of Gaussian Sources**

*Inaki Esnaola and Javier Garcia-Frias, University of Delaware*

**Sharp Upper Bound on Error Probability of Exact .....14  
Sparsity Recovery**

*Kamiar Rahnema Rad, Columbia University*

**Non-Linear Coding for Improved Performance in .....18  
Compressive Sensing**

*Yichuan Hu, Zhongmin Wang, Javier Garcia-Frias and Gonzalo R. Arce,  
University of Delaware*

**Algorithms I**

**Aggregating Disparate Judgments Using a Coherence Penalty.....23**

*Guanchun Wang, Sanjeev Kulkarni, H. Vincent Poor, Princeton University*

**A New Idea for Addressing Multi- objective Combinatorial .....28  
Optimization: Quantum Multi-agent Evolutionary Algorithms**

*D. Zhao and F. Tao, University of Michigan*

**Non-asymmetric Slepian-Wolf Decoding Using Belief Propagation.....32**

*Samuel Cheng, University of Oklahoma-Tulsa*

**Noise Adaptive LDPC Decoding Using Particle Filter.....37**

*Lijuan Cui, Shuang Wang and Samuel Cheng, University of Oklahoma-Tulsa;  
Qiang Wu, Soft Imaging, LLC*

## Detection Estimation Filtering I

**Reducing Computational Complexity of Time Delay Estimation Method .....43**  
**Using Frequency Domain Alignment**

*Ismet Sahin, University of Pittsburgh; Nuri Yilmazer, Texas A&M University - Kingsville*

**Minimum Hellinger Distance Based Classification of Underwater .....47**  
**Acoustic Signals**

*B.E. Bissinger, R.L. Culver and N.K. Bose, Penn State University*

**A Moving Radioactive Source Tracking and Detection System.....50**

*Hui Liu, Yingwei Yao, University of Illinois at Chicago*

**Speech Enhancement Using the Multistage Wiener Filter .....55**

*Michael Tinston and Yariv Ephraim, George Mason University*

**Proportional-type NLMS Algorithm with Gain Allocation Providing .....61**  
**Maximum One-step Conditional PDF for True Weights**

*Kevin T. Wagner, Naval Research Laboratory;*

*Milos I. Doroslovacki, The George Washington University*

## Coding I

**Alphabet Sizes of Auxiliary Random Variables in Canonical .....67**  
**Inner Bounds**

*Soumya Jana, University of Illinois*

**Optimizing Power Allocation in Analog Joint Source-Channel Coding.....72**

*Yichuan Hu and Javier Garcia-Frias, University of Delaware*

**Multilevel Coding and Multistage Decoding for M-ary.....77**  
**Two-Dimensional ISI Channels**

*Jiayi Xiao, Arash Karbaschi, Ali Adibi and Steven W. McLaughlin,*

*Georgia Institute of Technology*

**Reduced Complexity Iterative Equalizers for M-ary 2D ISI Channels .....81**

*Ying Zhu, Benjamin J. Belzer and Krishnamoorthy Sivakumar,*

*Washington State University*

**Asymptotic Analysis of LDGM-Based Quantum Codes .....87**

*Kejing Liu and Javier Garcia-Frias, University of Delaware*

<b>Nested Erasure Codes to Achieve the Singleton Bounds .....</b>	<b>93</b>
<i>Phisan Kaewprapha, Nattakan Puttarak and Jing (Tiffany) Li, Lehigh University</i>	

## **MIMO I**

<b>On the Diversity-Multiplexing Tradeoff of the Gaussian MIMO .....</b>	<b>98</b>
<b>Broadcast Channel</b>	

*Manav Garg, Mahesh K. Varanasi, University of Colorado*

<b>ICI/ISI Aware Beamforming for MIMO- OFDM Wireless System .....</b>	<b>103</b>
---	------------

*Xiantao Sun, Leonard J. Cimini and Larry J. Greenstein,  
University of Delaware; Douglas S. Chan, Cisco Systems*

<b>Non-coherent MIMO Radar for Target Estimation: More Antennas .....</b>	<b>108</b>
<b>Means Better Performance</b>	

*Qian He, University of Electronic Science and Technology of China; Rick S. Blum,  
Lehigh University; Alexander M. Haimovich, New Jersey Institute of Technology*

<b>Range and Speed Resolution in Coherent Distributed MIMO Radar .....</b>	<b>114</b>
<b>with Gaussian Pulse Trains</b>	

*M.A. Haleem and A. Haimovich, New Jersey Institute of Technology*

<b>Performance of Dual-Hop MIMO Ultra-Wideband Transmissions: .....</b>	<b>118</b>
<b>Preliminary Results</b>	

*Kiattisak Maichalernnukul, Thomas Kaiser and Feng Zheng, University of Hannover, Germany*

## **Cognitive Radio**

<b>Joint Spatial-Temporal Spectrum Sensing for Cognitive .....</b>	<b>124</b>
<b>Radio Networks</b>	

*Tuan Do and Brian L. Mark, George Mason University*

<b>Attack-Proof Collaborative Spectrum Sensing in Cognitive .....</b>	<b>130</b>
<b>Radio Networks</b>	

*Wenkai Wang and Yan (Lindsay) Sun, University of Rhode Island;  
Husheng Li, University of Tennessee; Zhu Han, University of Houston*

<b>Multiuser Diversity Gain in Cognitive Networks with Distributed .....</b>	<b>135</b>
<b>Spectrum Access</b>	

*Ali Tajer and Xiaodong Wang, Columbia University*

**Rate Optimal and Reduced-Complexity Sequential Sensing Algorithms ..... 141**  
**for Cognitive OFDM Radios**

*Seung-Jun Kim and Georgios B. Giannakis, University of Minnesota*

**Information Theory I**

**Message Transmission and State Estimation Over Gaussian ..... 147**  
**Broadcast Channel**

*Wei Liu and Biao Chen, Syracuse University*

**Secrecy Capacity Region of Gaussian Broadcast Channel ..... 152**

*Ghadamali Bagherikaram, Abolfazl S. Motahari, Amir K. Khandani,  
University of Waterloo*

**The Cognitive Multiple Access Wire-Tap Channel ..... 158**

*Osvaldo Simeone, New Jersey Institute of Technology;  
Aylin Yener, Penn State University*

**An Approximation of the Capacity of a Simple Channel ..... 164**

*Ira S. Moskowitz, Naval Research Laboratory*

**Maximum Sum Rates via Analysis of 2—User Interference ..... 170**  
**Channel Achievable Rates Region**

*Mohamad Charafeddine and Arogyaswami Paulraj, Stanford University*

**Compressive Sampling and Processing II**

**Recovery of Compressible Signals in Unions of Subspaces ..... 175**

*Marco F. Duarte, Chinmay Hegde, Volkan Cevher and  
Richard G. Baraniuk, Rice University*

**Sparse Event Detection in Wireless Sensor Networks Using ..... 181**  
**Compressive Sensing**

*Jia Meng and Zhu Han, University of Houston; Husheng Li, University of Tennessee*

**ExCoV: Expansion-Compression Variance-component Based ..... 186**  
**Sparse- signal Reconstruction from Noisy Measurements**

*Aleksandar Dogandzic and Kun Qiu, Iowa State University*

**UWB Signal Acquisition in Positioning Systems: Bayesian ..... 192**  
**Compressed Sensing with Redundancy**

*Depeng Yang, Husheng Li, Gregory D. Peterson and Aly E. Fathy University of Tennessee*

**Compressed Sensing Based UWB Receiver: Hardware ..... 198**  
**Compressing and FPGA Reconstruction**

*Depeng Yang, Husheng Li, Gregory D. Peterson and Aly Fathy, University of Tennessee*

## **Sensor Networks I**

**A Sufficient Condition for Optimality of Digital versus Analog ..... 202**  
**Relaying in a Sensor Network**

*Chandrashekhara Thejaswi P.S., Douglas Cochran and Junshan Zhang, Arizona State University*

**Multipath Multi-stream Distributed Reliable Video Delivery in ..... 207**  
**Wireless Sensor Networks**

*Saad B. Qaisar and Hayder Radha, Michigan State University*

**On Minimum Cost Coverage in Wireless Sensor Networks ..... 213**

*S. A. R. Zaidi, M. Hafeez, D.C. McLernon, M. Ghogho, University of Leeds;  
M. Hafeez, A Khayam, National University of Science and Technology;  
K. Kim, Ajou University*

**Using Field Data to Design a Sensor Network..... 219**

*Salma Kalantari Khandani, University of Kerman; Mehdi Kalantari,  
University of Maryland*

**Sensor Network Localization via Boundary Projections ..... 224**

*Jing Wang and Phillip A. Regalia, Catholic University of America*

**On Localizing the Source of Random Signals Using Sensor Networks ..... 230**

*Ashok Sundaresan, Pramod K. Varshney, Syracuse University;  
Nageswara S.V. Rao, Oak Ridge National Laboratory*

## **Wireless Communications I**

**Throughput Scaling Laws for Dual-radio Random Wireless Networks..... 235**

*Jinjing Jiang, Washington University in St. Louis; John Z. Yu, Noosphere  
Communications, Inc.; Cong Shen, University of California, Los Angeles*

**Modeling, Estimating and Predicting the Packet-level Bit Error Rate.....241**  
**Process in IEEE 802.15.4 LR-WPANs Using Hidden Markov Models**  
*Muhammad U. Ilyas and Hayder Radha, Michigan State University*

**A Composite Cyclodespreader and Semiblind Beamformer for WCDMA.....247**  
*Sheng-Luen Wei and John J. Shynk, University of California*

**Seamless Realtime Traffic Handover Policy for IEEE 802.16m Mobile WiMAX.....252**  
*Sachin Lal Shrestha and Song Chong, EECS, Korea Advanced Institute of Science  
and Technology; Nah-Oak Song, Mobile Media Platform Center, KAIST*

**Distributed Linear Combination Estimators for Localization Based on.....258**  
**Received Signal Strength in Wireless Networks**  
*Wei-Yu Chen and Scott L. Miller, Texas A&M University*

## **Information Security**

**Coping with Training Contamination in Unsupervised Distributional .....264**  
**Anomaly Detection**  
*Nash Borges and Gerard G.L. Meyer, The Johns Hopkins University*

**Performance Comparison of Two Sequential Change Detection .....270**  
**Algorithms on Detection of In-band Wormholes**  
*Shanshan Zheng, Tao Jiang and John S. Baras, University of Maryland*

**Using Adaptive Lossless Compression to Characterize Network Traffic .....276**  
*Karyn Benson and Lisa M. Marvel, U.S. Army Research Laboratory*

**Anonymous Networking with Localized Eavesdroppers:.....278**  
**A Game-Theoretic Approach**  
*Parvathinathan Venkitasubramaniam and Lang Tong, Cornell University*

**A Study on the Feasibility of Low Probability of Intercept Sonar .....284**  
*J. Daniel Park, David J. Miller, John F. Doherty, Pennsylvania State University;  
Stephen C. Thompson, Pennsylvania State University Applied Research Laboratory*

**Generating Nested Sets by Leveraging “Carry-along Sort” Algorithm .....290**  
*Prabhakaran Sethuraman, and Lakshmi Rajamani, Osmania University*

## Information Theory II

**A New Universal Random-Coding Bound for Average Probability Error Exponent for Multiple-Access Channels** .....295

*Ali Nazari, Achilleas Anastasopoulos and S. Sandeep Pradhan, Univ. of Michigan*

**Separation Principle of Opportunistic Spectrum Access in Unslotted Primary Systems** ..... 301

*Pouya Tehrani, Qing Zhao, University of California, Davis*

**Generalized Degrees of Freedom of the Symmetric Gaussian Interference Channel with Partial Unidirectional Transmitter Cooperation** ..... 307

*Hossein Bagheri, Abolfazl S. Motahari, and Amir K. Khandani, University of Waterloo*

**Achievable Rate Regions of Cognitive Radio Channels with a Confidential Message** .....313

*Lan Zhang, National University of Singapore; Yan Xin, NEC Laboratories America, Inc.; Ying-Chang Liang Institute for Infocomm Research, Singapore; Xiaodong Wang, Columbia University*

**A New Outer Bound for the Gaussian Interference Channel with Confidential Messages** ..... 318

*Xiang He and Aylin Yener, Pennsylvania State University*

## Communications and Networks

**On Two-way Relaying with Quantized CSIT** .....324

*Tung T. Kim and H. Vincent Poor, Princeton University*

**Layered Randomized Cooperative Multicast for Lossy Data: A Superposition Approach** ..... 330

*Ozgu Alay, Xin Pan, Elza Erkip and Yao Wang, Polytechnic Institute of NYU*

**Multiple Transmitter Localization via Interference Subtraction** ..... 336

*J.E. Almodovar and J.K. Nelson, George Mason University*

**Measurement Clustering Criteria for Localization of Multiple Transmitters** ..... 341

*Ahmed O. Nasif and Brian L. Mark, George Mason University*

**On the Achievable Rate of Fading Dirty Paper Channel with Imperfect CSIT** ..... 346

*Chinmay S.Vaze and Mahesh K. Varanasi, University of Colorado*

**Successive Relaying for the Half-Duplex Parallel Relay Channel ..... 352**  
*Seyed Saeed Changiz Resaei, Shahab Oveis Gharan, and Amir K. Khandani, University of Waterloo*

## **Signal Processing I**

**Design of Pointwise-in-Frequency Paraunitary Filter Banks ..... 358**  
*Peter G. Vouras and Trac D. Tran, The Johns Hopkins University*

**Theoretical Analysis of Correlation-based Quality Measures for Weighted ..... 363**  
**Averaging Image Fusion**  
*Chuanming Wei and Rick S. Blum, Lehigh University*

**Automated Characterization of Amoeboid Motility ..... 369**  
*Yuan Xiong and Pablo A. Iglesias, The Johns Hopkins University*

**Some Autocorrelation Properties of Phase-Coded Waveforms..... 371**  
*Dmitry Chebanov, LaGuardia Community College of the City University of New York*

**Recursive Filtering and Smoothing for Discrete Index Gaussian..... 377**  
**Reciprocal Processes**  
*Divyanshu Vats and Jose M.F. Moura, Carnegie Mellon University*

## **Wireless Communications II**

**Downlink Power Control in Co-Channel Macrocell Femtocell Overlay ..... 383**  
*Xiangfang Li, Rutgers University; Lijun Qian, Prairie View A&M University; Deepak Kataria, HCL America*

**Delay Analysis of Maximum Weight Scheduling in Wireless ..... 389**  
**Ad Hoc Networks**  
*Long Bao Le, Krishna Jagannathan and Eytan Modiano, Massachusetts Institute of Technology*

**Integrating Retransmission Diversity with Real-Time Scheduling over ..... 395**  
**Wireless Links**  
*Irena Li, Xin Wang, Hanqi Zhuang and Salvatore D. Morgera, Florida Atlantic University*

**On Spectrum Sharing in Narrowband Cellular Wireless Networks ..... 400**  
*Ashraf Al Daoud and Murat Alanyali, Boston University*

## Coding II

- Extrinsic Tree Decoding ..... 406**  
*Eric Psota and Lance C. Perez, University of Nebraska-Lincoln*
- An Efficient Decoding Algorithm for Concatenated RS-Convolutional Codes ..... 411**  
*Yueqian Li and Masoud Salehi, Northeastern University*
- Optimal Content Delivery with Network Coding ..... 414**  
*Derek Leong and Tracey Ho, California Institute of Technology; Rebecca Cathey, BAE Systems*
- Combining Iterative SOVA and Log-MAP Algorithms for Turbo Decoding ..... 420**  
*Jinhong Wu and Branimir R. Vojcic, The George Washington University*
- Performance Evaluation: Priority Transmission Using Network Coding with ..... 424**  
**Multi-generation Mixing**  
*Mohammed Halloush and Hayder Radha, Michigan State University*
- A Case Study of: Sender Transmission Reliability and Complexity Using ..... 430**  
**Network Coding with Multi-generation Mixing**  
*Mohammed Halloush and Hayder Radha, Michigan State University*

## Detection Estimation Filtering II

- Preliminary Results in Comparing the Expected and Observed Fisher ..... 436**  
**Information for Maximum Likelihood Estimates**  
*Xumeng Cao, The Johns Hopkins University; James C. Spall,  
The Johns Hopkins University, Applied Physics Lab*
- Maximum Likelihood Detection with Intermittent Observations ..... 442**  
*Ashraf Tantawy, Xenofon Koutsoukos and Gautam Biswas, Vanderbilt University*
- Iteratively Re-weighted Least Squares for Sparse Signal Reconstruction ..... 448**  
**from Noisy Measurements**  
*Rafael E. Carrillo and Kenneth E. Barner, University of Delaware*
- Pruning Sparse Signal Models Using Interference ..... 454**  
*Bob L. Sturm, John J. Shynk and Dae Hong Kim, University of California*
- Real-Time Pulse Arrival Detection in the Presence of White Gaussian Noise ..... 459**  
*Arash Komae, University of Maryland, College Park*

## Microsystems and VLSI

- Bandpass Filter Implementations for a Photonic Integrated Circuit.....465**  
*Yujia Wang, Prakash Natarajan, and John J. Shynk, University of California*
- Information Transmission Using a Generalized Chopper Amplifier: .....469**  
**Comparison of Modulation Schemes**  
*Nicole Nelson and Pamela Abshire, University of Maryland, College Park*
- Efficient Diagnosis of Scan Chains with Single Stuck-at Faults.....474**  
*Hsin-Chou Chi, His-Che Tseng, and Chih- Ling Yang, National Dong Hwa University*
- Simulation of a Single Ping Ultrasonic Bearing Estimation Design Using.....478**  
**Spatiotemporal Filtering**  
*Garrick Orchard and Ralph Etienne-Cummings, The Johns Hopkins University;*  
*Jamal Molin, University of Maryland, Baltimore County*
- Analytical Methods for the Design and Optimization of .....482**  
**Chip-Multiprocessor Architectures**  
*Andrew Cassidy and Andreas Andreou, The Johns Hopkins University*

## MIMO II

- Power Minimization of Multiaccess MIMO Systems with Rate Constraint and .....488**  
**Finite-Rate Feedback**  
*An Liu, Haige Xiang and Wu Luo, Peking University; Li Ping, City University of Hong Kong;*  
*Youjian Liu, University of Colorado*
- An Asymptotic Analysis of the MIMO Broadcast Channel Under .....494**  
**Linear Filtering**  
*Raphael Hunger and Michael Joham, Technische Universitat Munchen, Germany*
- Recursive Least-Squares Doubly-Selective MIMO Channel Estimation .....500**  
**Using Exponential Basis Models**  
*Hyosung Kim and Jitendra K. Tugnait, Auburn University*
- Mode Selection Between Antenna Grouping and Beamforming for MIMO .....506**  
**Communication Systems**  
*Kyungchul Kim, Kyungjun Ko, and Jungwoo Lee, Seoul National University*

**Resource Allocation for MIMO Orthogonal Relay Channels with ..... 512**  
**Finite-Rate Feedback**

*Jun Xiao and Youjian Liu, University of Colorado at Boulder; Wen Gao, Thomson, Inc.*

**Information Theory III**

**A Novel Lattice Reduction Aided Linear Precoding Scheme ..... 518**

*Wei Zhang and Xiaoli Ma, Georgia Institute of Technology*

**Near-capacity Performance Soft Output Sphere Decoding Based on ..... 524**  
**Short List Detection and Metrics Combining**

*Jinhong Wu and Branimir R. Vojcic, The George Washington University*

**The Cognitive Z Channel ..... 528**

*Yi Cao and Biao Chen, Syracuse University*

**Hybrid ARQ for Turbo Coded Modulation with Mixed Combining ..... 533**

*Guosen Yue, NEC Laboratories America, Inc.; Xiaodong Wang, Columbia University*

**Throughput Analysis of Type-I HARQ Strategies in Two-Way Relay ..... 539**  
**Channels**

*Fabio Iannello and Osvaldo Simeone, New Jersey Institute of Technology*

**OFDM**

**Digital Baseband Compensation of Joint TX/RX Frequency-Dependent ..... 545**  
**I/Q Imbalance in Mobile MIMO-OFDM Transceivers**

*Balachander Narasimhan, Sudharsan Narayanan, Naofal Al-Dhahir, Hlaing Minn, University of Texas at Dallas*

**Baseband Estimation and Compensation of Joint TX/RX I/Q Imbalance in ..... 551**  
**SC-FDE Transceivers**

*Sudharsan Narayanan, Balachander Narasimhan and Naofal Al-Dhahir, University of Texas at Dallas*

**Design of Efficient Receivers for DFT-S-OFDMA Systems ..... 557**

*Meilong Jiang and Narayan Prasad, NEC Labs America, Inc.; Xiaodong Wang, Columbia University*

**Wireless Device Identification in MIMO Channels..... 563**

*Ming-Wei Liu and John F. Doherty, Pennsylvania State University*

**Cooperative Sensing of Primary Users in Cognitive Radio Networks.....568**  
**Based on Message Passing**

*Jing Lei, Roy Yates, Predrag Spasojevic and Larry Greenstein, Rutgers University*

## **Wireless Communications III**

**Impact of Secondary MAC Cooperation on Spectrum Sharing in.....574**  
**Cognitive Radio Networks**

*Tariq Elkourdi and Osvaldo Simeone, New Jersey Institute of Technology*

**Joint Channel and Power Allocation Based on User Satisfaction for .....579**  
**Cognitive Radio**

*Qi Cheng and Bhargav Kollimarla, Oklahoma State University*

**Design of the Cognitive Radio with Partial Channel State Information .....585**  
**at the Transmitter**

*Pin-Hsun Lin, Shih-Chun Lin, and Hsuan- Jung Su, National Taiwan University*

**Secondary User Friendly TDMA Scheduling for Primary Users in .....593**  
**Cognitive Radio Networks**

*Hang Su and Xi Zhang, Texas A&M University*

**Dynamic Spatial Spectrum Access with Opportunistic Orthogonalization .....600**

*Cong Shen, University of California; Michael P. Fitz, Northrop Grumman Corp.*

**Optimal Power Allocation for Achieving Perfect Secrecy Capacity in.....606**  
**MIMO Wire-Tap Channels**

*Jia Liu, Y. Thomas Hou and Hanif D. Sherali, Virginia Polytechnic Institute and State University*

## **Energy Awareness in Sensor Networks**

**Energy-Aware Time Synchronization in Sensor Networks:.....612**  
**a Two-Clock Approach**

*Longbi Lin, Morgan Stanley and Ness B. Shroff, Ohio State University*

**Optimal Quantization in Energy- Constrained Sensor Networks.....613**  
**Under Imperfect Transmission**

*Li Zhang, Tao Cui, Tracey Ho, California Institute of Technology; Xian-Da Zhang, Tsinghua University*

**Decentralized Sensor Selection Based on Sensor Observations for ..... 618**  
**Energy Efficient Hypothesis Testing**

*Rick S. Blum and Zhemin Xu, Lehigh University; Brian M. Sadler,  
Army Research Laboratory*

**An Energy Efficient Iterative Method for Source Localization in ..... 623**  
**Wireless Sensor Networks**

*Engin Masazade and Mehmet Keskinöz, Sabanci University; Ruixin Niu  
and Pramod K. Varshney, Syracuse University*

**Energy Efficient Video Compression for Wireless Sensor Networks ..... 629**

*Junaid Jameel Ahmad, Hassan Aqeel Khan and Syed Ali Khayam,  
National University of Sciences and Technology, Pakistan*

**Sleeping Policy Cost Analysis for Sensor Nodes Collecting Heterogeneous Data ..... 635**

*Zhen Zhao, Anbu Elanchezian and Jaudelice C. de Oliveira, Drexel University*

**Cooperative Communication**

**An Experimental Framework for the Evaluation of Cooperative Diversity ..... 641**

*Glenn J. Bradford and J. Nicholas Laneman, University of Notre Dame*

**SER Performance Analysis and Optimal Relay Location of Cooperative ..... 646**  
**Communications with Distributed Alamouti Code**

*Wei Lin, Gang Wu, Lei Zhang and Shaoqian Li, University of Electronic  
Science and Technology of China*

**Upper and Lower Bound on Signal-to- Noise Ratio Gains for Cooperative ..... 652**  
**Relay Networks**

*Tobias Renk, Universitat Karlsruhe and Stanford University;  
Friedrich K. Jondral, Stanford University*

**Constellation Design for Cooperative Communication ..... 657**

*Seyed Ali Ahmadzadeh, Seyed Abolfazl Motahari, and Amir K. Khandani,  
University of Waterloo*

**Low-Complexity Cooperation with Correlated Sources: ..... 663**  
**Diversity Order Analysis**

*Nariman Farsad and Andrew W. Eckford, York University*

**Partial Detection for Multiple Antenna Cooperation ..... 669**

*Kiarash Amiri and Joseph R. Cavallaro, Rice University*

**Cooperative Spectrum Sensing in Cognitive Radio Networks Under .....675**  
**Gaussian Fusion Channels**  
*Gang Xiong and Shalinee Kishore, Lehigh University*

## **Sensing**

**A Color Detection Glove with Haptic Feedback for the Visually Disabled ..... 681**  
*Helen N. Schwerdt and Ralph Etienne- Cummings, The Johns Hopkins University;*  
*Jonathan Tapson, Univ. of Cape Town*

**Category Classification with ROIs Using Object Detector ..... 687**  
*Yasuhiro Ito, Kazuki Saruta, Yuki Terata and Kazutoki Takeda,*  
*Akita Prefectural University, Japan*

**On a Statistical Analysis Model of Mid-IR Gas Sensing Systems ..... 688**  
*Albert Kir and Joel M. Morris, University of Maryland, Baltimore County*

**Reconstruction of Three Dimensional Spatial Clusters Using ..... 689**  
**Monocular Camera**  
*Kai Zhou, Michael Zillich and Markus Vincze, Vienna University of Technology*

**Noise Analysis and Comparison of Analog and Digital Readout ..... 695**  
**Integrated Circuits for Infrared Focal Plane Arrays**  
*Andreas Andreou, Charbel Rizk and Philippe O. Pouliquen, The Johns Hopkins University*

## **Networks**

**Load-Aware Bidirectional Pipeline Construction for ..... 701**  
**Terabit IP Forwarding**  
*Yun Zhu and Weirong Jiang, University of Southern California*

**Scheduling Weighted Packets with Deadlines Over a ..... 707**  
**Fading Channel**  
*Fei Li and Zhi Zhang, George Mason University*

**Stability Analysis for Communication of Voice Terminals with ..... 713**  
**Packet Reservation Multiple Access Protocol with**  
**High Propagation Delays Using State Estimation**  
*Amirali Sharifi and Eyad H. Abed, University of Maryland, College Park*

**On Optimal Scheduling for Time-Division Systems with Quality of Service Constraints .....719**

*A. Balasubramanian and Scott L. Miller, Texas A&M University*

**Can API-RCP Achieve Max-Min Fair Bandwidth Allocation in a Multi- Bottleneck Network? .....723**

*Yang Hong and Oliver W.W. Yang, University of Ottawa*

**Peer-to-Peer File Sharing Game Using Correlated Equilibrium .....729**

*Beibei Wang and K.J. Ray Liu, University of Maryland, College Park;  
Zhu Han, University of Houston*

**A Simple Model for the Window Size Evolution of TCP Coupled with MAC and PHY Layers .....735**

*George Papageorgiou and John S. Baras, University of Maryland, College Park*

## **Algorithms II**

**On Monte Carlo Methods for Estimating the Fisher Information Matrix in Difficult Problems .....741**

*James C. Spall, The Johns Hopkins University Applied Physics Laboratory*

**$LL_p$  Metric Based Robust Clustering .....747**

*Jinglun Gao, Rafael E. Carrillo and Kenneth E. Barner, University of Delaware*

**Practical Compressed Sensing with Log-of-Prime Projections .....751**

*Abdolreza Abdolhosseini Moghadam and Hayder Radha,  
Michigan State University*

**Random Tree Optimization for the Construction of the Most Parsimonious Phylogenetic Trees .....757**

*Fulu Li and Andrew Lippman, Massachusetts Institute of Technology*

**Conferencing on Trees .....763**

*Ali Jalali, David J. Love and Sujay Sanghavi, Purdue University;  
Bertrand M. Hochwald, Beceem Communications*

## Signal Processing II

**A Recursive Matrix Approach to Spectral Transformation .....769  
for Digital Filters**

*Thomas J. Goodman, Lockheed Martin Systems; Maurice F. Aburdene, Bucknell University*

**Resolving More Sources with Multi-Frequency Coarrays in .....772  
High-Resolution Direction-of-Arrival Estimation**

*Jeannie L. Moulton and Saleem A. Kassam, University of Pennsylvania*

**Fetal Heart Rate Estimation by Fitting Half-wave Rectified Cosine .....778  
Functions to Power Spectra of Fetal ECG Waveforms**

*Ismet Sahin, University of Pittsburgh; Nuri Yilmazer, Texas A&M University*

**Asymptotic Performance Loss in Bayesian Hypothesis Testing under .....782  
Data Quantization**

*Soumya Jana, University of Illinois*

**On the Use of Sample Detectors in Large Distributed Detection Systems .....787**

*Benedito J.B. Fonseca, Jr., Motorola Applied Research and Technology Center;  
John A. Gubner, University of Wisconsin-Madison*

**On Unequal Error Protection with Low Density Parity Check Codes in .....793  
Scalable Video Coding**

*Yong Liu and Aidong Men, Beijing Univ. of Posts and Telecommunications;  
Saad B. Qaisar and Hayder Radha, Michigan State University*

## Sensor Networks II

**A New Scheme for Energy-efficient Estimation in a Sensor Network .....799**

*Xun Chen and Rick Blum, Lehigh University; Brian M. Sadler,  
Army Research Laboratory*

**LDPC-like Belief Propagation Algorithm for Consensus Building .....805  
in Wireless Sensor Networks**

*Mutaz Shukair and Kamesh Namuduri, University of North Texas*

**Energy-Efficient Modulation Design for Reliable Communication in .....811  
Wireless Networks**

*Qing Chen and Mustafa Cenk Gursoy, University of Nebraska-Lincoln*

**Finding Optimal Trajectory Points for TDOA/FDOA.....817**  
**Geo-Location Sensors**

*Ran Ren, Mark L. Fowler and N. Eva Wu, State University of New York Binghamton*

**Non-Uniform Deployment of Nodes in Clustered Wireless .....823**  
**Sensor Networks**

*David J. Dorsey and Moshe Kam, Drexel University*

**Distributed Detection of Jamming and Defense in .....829**  
**Wireless Sensor Networks**

*Ying Lin, State University of New York; Mingyan Li, Boeing Phantom Works*

## **Information Theory and Biology**

**Molecular Recognition as an Information Channel: The Role .....835**  
**of Conformational Changes**

*Yonatan Savir and Tsvi Tlusty, The Weizmann Institute of Science*

**The Physical Language of Molecular Codes: A Rate-distortion .....841**  
**Approach to the Evolution and Emergence of Biological Codes**

*Tsvi Tlusty, The Weizmann Institute of Science*

**Ab Initio Exon Definition Using an Information Theory-based Approach.....847**

*Peter Rogan, University of Western Ontario*

**Molecular Informatics: Hydrogen-Bonding, Error-Coding and .....853**  
**Genetic Replication**

*Donall A. MacDonaill, Trinity College*

**Simulating Molecular Motor Uni-cast Information Rate for .....859**  
**Molecular Communication**

*Michael J. Moore, Akihiro Enomoto, Shun Watanabe and Tatsuya Suda,  
University of California, Irvine; Kazuhiro Oiwa, National Institute of Information and  
Communications Technology and University of Hyogo*

**The Emergence of Biological Coding Theory as a Mathematical .....865**  
**Framework for Modeling, Monitoring and Modulating Biomolecular Systems**

*Elebeoba May, Sandia National Laboratories*

## Signal Processing III

- Simple Deterministically Constructible RIP Matrices with Sublinear .....870**  
**Fourier Sampling Requirement**  
*M.A. Iwen, University of Minnesota*
- On Properties of the Widely Linear MSE Filter and Its LMS .....876**  
**Implementation**  
*Tulay Adali, Hualiang Li and Ronald Aloysius, University of Maryland, Baltimore County*
- Iterative (Turbo) Equalization for Doubly-Selective Channels Using .....882**  
**Exponential Basis Expansion Models**  
*Hyosung Kim and Jitendra K. Tugnait, Auburn University*
- Raised Cosine Interpolation for Empirical Mode Decomposition .....888**  
*Arnab Roy and John F. Doherty, Pennsylvania State University*
- Empirical Evaluation of Two Deterministic Sparse Fourier Transforms .....893**  
*M. A. Iwen, University of Minnesota*

## Communication Systems

- Performance Analysis of IR-UWB 1-bit Digital Receivers.....897**  
*Weilin Gong, Huarui Yin and Quan Fu University of Science and  
Technology of China; Lei Ke, Iowa State University*
- High Bit Rate Ultrasonic Communication Through Metal Channels .....902**  
*Richard Primerano, Moshe Kam and Kapil Dandekar, Drexel University*
- Shallow Underwater Communication with Passive Phase Conjugation .....907**  
**and Iterative Demodulation and Decoding**  
*Christopher Keeser, Cypress Semiconductor; Benjamin J. Belzer and  
Thomas R. Fischer, Washington State University*
- Correlations in Underwater Acoustic Particle Velocity and .....913**  
**Pressure Channels**  
*H. Guo and A. Abdi, New Jersey Institute of Technology;  
A.Song and M. Bradiey, University of Delaware*

**On the Gaussian Approximation and Margin Measurements in .....919**  
**Optical Amplifier Systems**

*Q. Zhang, M.I. Hayee, A. Miner, R. Kapadia, C. Tavva, R. Bajracharya and H.-W. Huang, Minnesota State University; C. Ma, University of California San Diego; M. Howieson and A. Rahman, Thin Film Technology Corp.*

**Computation Step-Size Study in Digital Post-Compensation of Fiber Optic .....925**  
**Communication Systems**

*Q. Zhang, , M.I. Hayee, C. Tavva, H.-W. Huang, R. Nair and M. Khaliq, Minnesota State University; C.R. Menyuk, University of Maryland Baltimore County*

**Wireless Networks and Communications**

**Low-Complexity Index Assignments for Secure Quantization .....930**

*Joao Almeida, Gerhard Maierbacher and Joao Barros, Faculdade de Engenharia da Universidade do Porto*

**A Cross-layer Approach to Enhance the Security of Wireless Networks .....935**  
**Based on MIMO**

*Hong Wen and Guang Gong, University of Waterloo*

**Many-to-One Simultaneous Communications in Distributed Wireless .....940**  
**Networks**

*Jun Pen and Jose Sanchez, University of Texas – Pan American; Ying Zhao, South Texas College*

**Practical Cooperative Coding for Half-Duplex Relay Channels .....945**

*Noah Jacobsen, Alcatel-Lucent*

**2-Sector Interference Channel Communication for Sum Rates and .....951**  
**Minimum Rate Maximization**

*Mohamad Charafeddine and Arogyaswami Paulraj, Stanford University*

**Transmission Scheduling in Capture-Based Wireless Networks .....957**

*Gam D. Nguyen and Sastry Kompella, Naval Research Laboratory; Jeffrey E. Wieselthier, Wieselthier Research; Anthony Ephremides, University of Maryland, College Park*
