

2009 ICSE Workshop on Software Engineering in Health Care

(SEHC)

**Vancouver, British Columbia, Canada
18 – 19 May 2009**

**IEEE Catalog Number: CFP0932G-PRT
ISBN: 978-1-4244-3739-9**

Health Information Systems Architecture

- 1 **Metadata-Driven Software for Clinical Trials**
(Charles Crichton, Jim Davies, Jeremy Gibbons, Steve Harris, Andrew Tsui, James Brenton)
- 12 **An Interactive Strategic Information Management Plan to Integrate Strategic and Tactical Information Management in Hospitals**
(Ulrike Mueller, Lutz Issler, Gert Funkat, Alfred Winter)
-

Research Preview

- 20 **Software Engineering for Health Education and Care Delivery Systems: The Smart Condo Project**
(Eleni Stroulia, David Chodos, Nicholas M. Boers, Jianzhao Huang, Pawel Gburzynski, Ioanis Nikolaidis)
- 29 **Using Sensors and Labeled Graphs to Detect the Space Confusion's Problem of Patients Suffering from Alzheimer's Disease**
(Ali Larab, Rémi Bastide, Bernard Rigaud)
- 34 **A Structural Model for Quality Requirements Regarding Electronic Health Records — State of the Art and First Concepts**
(Alexander Hoerbst, Elske Ammenwerth)
-

Security and Risk

- 42 **Mining and Analysing Security Goal Models in Health Information Systems**
(Jens H. Weber-Jahnke, Adeniyi Onabajo)
- 53 **Risk Identification by Physicians and Developers — Differences Investigated in a Controlled Experiment**
(Christin Lindholm, Martin Höst)

Utilizing Empirical Data

- 62 **Query-Based Requirements Engineering for Health Care Information Systems:
Examples and Prospects**
(Øystein Nytrø, Inger Dybdahl Sørby, Peter Karpati)
- 73 **Simulating Patient Flow Through an Emergency Department Using Process-Driven
Discrete Event Simulation**
*(Mohammed S. Raunak, Leon J. Osterweil, Alexander Wise, Lori A. Clarke,
Philip L. Henneman)*
