

2009 IEEE Information Theory Workshop on Networking and Information Theory

(ITW)

**Volos, Greece
10 – 12 June 2009**

IEEE Catalog Number: CFP09IFO-PRT
ISBN: 978-1-4244-4535-6

TABLE OF CONTENTS

NETWORKS AND SECURITY

ON OBLIVIOUS TRANSFER CAPACITY	1
<i>Rudolph Ahlswede, Bielefeld University, Germany; Imre Csiszár, Hungarian Academy of Sciences, Hungary</i>	
MULTITERMINAL SECRECY GENERATION	4
<i>Imre Csiszár, Renyi Institute of Mathematics, Hungary; Prakash Narayan, University of Maryland, United States</i>	

CAPACITY OF WIRELESS NETWORKS

A DETERMINISTIC APPROACH TO WIRELESS NETWORK ERROR CORRECTION	5
<i>Soheil Mohajer, Suhas N. Diggavi, Ecole Polytechnique Fédérale de Lausanne, Switzerland</i>	

INFORMATION THEORY AND STATISTICS IN NETWORKING

CLUSTERING PHENOMENA IN MESSAGE-PASSING SCHEMES	10
<i>Sekhar Tatikonda, Yale University, United States</i>	
HARNESSING BURSTY INTERFERENCE	13
<i>Nilesh Khude, Vinod M. Prabhakaran, Pramod Viswanath, University of Illinois at Urbana-Champaign, United States</i>	
TESTING GOODNESS-OF-FIT VIA RATE DISTORTION	17
<i>Peter Harremoës, CWI, Netherlands</i>	

CHANNEL CODING 1

CODING EFFICIENCY AND RELIABILITY IN PROBE-BASED STORAGE DEVICES	22
<i>Maria Varsamou, Theodore Antonakopoulos, University of Patras, Greece</i>	
CONSTRUCTING OPTIMAL WHOLE-BIT RECYCLING CODES	27
<i>Danny Dubé, Vincent Beaudoin, Université Laval, Canada</i>	
ON THE RANDOM CODING EXPONENT OF NONLINEAR GAUSSIAN CHANNELS	32
<i>Kostis Xenoulis, Nicholas Kalouptsidis, National and Kapodistrian University of Athens, Greece</i>	
SECURE BITS THROUGH QUEUES	37
<i>Brian Dunn, Matthieu Bloch, J. Nicholas Laneman, University of Notre Dame, United States</i>	

RELAY/ROUTING 1

INSTANTANEOUS FORWARDING STRATEGIES FOR RELAY CHANNELS WITH KNOWN INTERFERENCE	42
<i>Majid Nasiri Khormuji, Mikael Skoglund, Royal Institute of Technology, Sweden</i>	
RELAYING SIMULTANEOUS MULTICAST MESSAGES	47
<i>Deniz Gündüz, Princeton University, United States; Osvaldo Simeone, New Jersey Institute of Technology, United States; Andrea Goldsmith, Stanford University, United States; H. Vincent Poor, Princeton University, United States; Shlomo Shamai (Shitz), Technion, Israel</i>	
MULTIRELAY CHANNEL WITH NON-ERGODIC LINK FAILURES	52
<i>Osvaldo Simeone, New Jersey Institute of Technology, United States; Oren Somekh, Princeton University, United States; Elza Erkip, Polytechnic Institute of NYU, United States; H. Vincent Poor, Princeton University, United States; Shlomo Shamai (Shitz), Technion, Israel</i>	

CAPACITY REGION OF THE DETERMINISTIC MULTI-PAIR BI-DIRECTIONAL RELAY NETWORK	57
<i>A. Salman Avestimehr, M. Amin Khajehnejad, California Institute of Technology, United States; Aydin Sezgin, University of California, Irvine, United States; Babak Hassibi, California Institute of Technology, United States</i>	

INFORMATION/COMPUTATION/STATISTICS

STATISTICAL SVMS FOR ROBUST DETECTION, SUPERVISED LEARNING, AND UNIVERSAL CLASSIFICATION	62
<i>Dayu Huang, Jayakrishnan Unnikrishnan, Sean Meyn, Venugopal Veeravalli, University of Illinois at Urbana-Champaign, United States; Amit Surana, United Technologies Research Center, United States</i>	
ESTIMATING THE RESIDUAL WAITING TIME FOR BINARY STATIONARY TIME SERIES	67
<i>Gusztav Morvai, MTA-BME Stochastics Research Group, Hungary; Benjamin Weiss, Hebrew University of Jerusalem, Israel</i>	
AN MSE-TUNABLE LINEAR ESTIMATOR WITH CONDITIONAL DOMINANCE OVER LEAST-SQUARES ESTIMATION	71
<i>Vinay Uday Prabhu, Dimitris Toumpakaris, University of Patras, Greece</i>	
DISTRIBUTED COMPUTATION OF SYMMETRIC FUNCTIONS WITH BINARY INPUTS	76
<i>Nikhil Karamchandani, Rathinakumar Appuswamy, Massimo Franceschetti, University of California, San Diego, United States</i>	

CHANNEL CODING 2

LIMITED FEEDBACK FOR MULTICARRIER BLOCK FADING CHANNELS: A RATE DISTORTION APPROACH	81
<i>Manish Agarwal, Dongning Guo, Michael L. Honig, Northwestern University, United States</i>	
ON LDPC CODES OVER SYMMETRIC CHANNELS	86
<i>Hamid Saeedi, Hossein Pishro-Nik, University of Massachusetts Amherst, United States</i>	
EFFICIENT ITERATIVE SPHERE DETECTORS BASED ON THE SCHNORR-EUCHNER ENUMERATION	91
<i>Michael Samuel, University of California, Los Angeles, United States; Michael Fitz, Northrup Grumman, United States</i>	

SHANNON THEORY

ON MINIMIZATION OF MULTIVARIATE ENTROPY FUNCTIONALS	96
<i>Imre Csiszar, A. Renyi Institute of Mathematics, Hungarian Academy of Sciences, Hungary; Frantisek Matu, Academy of Sciences of the Czech Republic, Czech Republic</i>	
A SIMPLE MEMORYLESS PROOF OF THE CAPACITY OF THE EXPONENTIAL SERVER TIMING CHANNEL	101
<i>Todd P. Coleman, University of Illinois, United States</i>	
A MODEL FOR PRICING DATA BUNDLES BASED ON MINIMAX RISKS FOR ESTIMATION OF A LOCATION PARAMETER	106
<i>Mokshay Madiman, Andrew Barron, Yale University, United States; Abram Kagan, Tinghui Yu, University of Maryland, United States</i>	

COMMUNICATIONS NETWORKS 1

A CROSS-LAYER VIEW OF WIRELESS MULTICASTING UNDER UNCERTAINTY	110
<i>Anna Pantelidou, Anthony Ephremides, University of Maryland, College Park, United States</i>	

CROSS LAYER OPTIMIZATION OF STATIC LIGHTPATH DEMANDS IN TRANSPARENT WDM OPTICAL NETWORKS	115
<i>Kostas Christodoulopoulos, Konstantinos Manousakis, Emmanouel Varvarigos, University of Patras and Research Academic Computer Technology Institute, Greece</i>	
FINITE-STATE BROADCAST CHANNELS WITH FEEDBACK AND RECEIVER COOPERATION	120
<i>Ron Dabora, Ben-Gurion University, Israel; Andrea Goldsmith, Stanford University, United States</i>	

NETWORK CODING

TOWARDS SECURE MULTIRESOLUTION NETWORK CODING	125
<i>Luísa Lima, Faculdade de Ciências da Universidade do Porto, Portugal; João Barros, Faculdade de Engenharia da Universidade do Porto, Portugal; Muriel Médard, Massachusetts Institute of Technology, United States; Alberto Toledo, Telefonica Research, Spain</i>	
ON THE CAPACITY OF MULTISOURCE NON-COHERENT NETWORK CODING	130
<i>Soheil Mohajer, Mahdi Jafari Siavoshani, Suhas N. Diggavi, Christina Fragouli, Ecole Polytechnique Fédérale de Lausanne, Switzerland</i>	
QUEUEING PERFORMANCE UNDER NETWORK CODING	135
<i>Omer H. Abdelrahman, Erol Gelenbe, Imperial College London, United Kingdom</i>	

NETWORK GAME THEORY

INFORMATION THEORY MEETS GAME THEORY ON THE INTERFERENCE CHANNEL	140
<i>Randall A. Berry, Northwestern University, United States; David N. C. Tse, University of California, Berkeley, United States</i>	
COMPARING MULTILATERAL AND BILATERAL EXCHANGE MODELS FOR CONTENT DISTRIBUTION	145
<i>Christina Aperjis, Michael J. Freedman, Ramesh Johari, Stanford University, United States</i>	
A GAME THEORETIC APPROACH TO NETWORK CODING	147
<i>Jason R. Marden, Michelle Effros, California Institute of Technology, United States</i>	

CODING AND INFORMATION THEORY IN LIFE SCIENCES

ANTHROPIC CORRECTION OF INFORMATION ESTIMATES	152
<i>Michael C. Gastpar, University of California, Berkeley, United States; Patrick R. Gill, Cornell University, United States; Frédéric E. Theunissen, University of California, Berkeley, United States</i>	
ON MODELING GENE REGULATORY NETWORKS USING MARKOV RANDOM FIELDS	156
<i>Narayana Santhanam, University of Hawaii Manoa, United States; Janis Dingel, Munich University of Technology, Germany; Olgiça Milenkovic, University of Illinois at Urbana-Champaign, United States</i>	

SOURCE CODING 1

CODING FOR NOISY QUADRATIC-GAUSSIAN WYNER-ZIV PROBLEM : A SUCCESSIVE QUANTIZATION APPROACH	161
<i>Song-Jheng Lin, National Taiwan University, Taiwan; Shih-Chun Lin, National Tsing Hua University, Taiwan; Kai-Sheng Chen, Hsuan-Jung Su, National Taiwan University, Taiwan</i>	
BINARY ERASURE MULTIPLE DESCRIPTIONS: AVERAGE-CASE DISTORTION	166
<i>Ebad Ahmed, Aaron B. Wagner, Cornell University, United States</i>	
DISTORTION-RATE FUNCTIONS FOR QUANTIZED COMPRESSIVE SENSING	171
<i>Wei Dai, Hoa Vinh Pham, Olgiça Milenkovic, University of Illinois at Urbana-Champaign, United States</i>	

RATE-DISTORTION OPTIMIZED NETWORK COMMUNICATION USING GENERAL MDC	176
<i>Mingkai Shao, Sorina Dumitrescu, Xiaolin Wu, McMaster University, Canada</i>	

RELAY/ROUTING 2

OPTIMAL AMPLIFY AND FORWARD STRATEGY FOR TWO-WAY RELAY CHANNEL WITH MULTIPLE RELAYS	181
<i>Rahul Vaze, Robert W. Heath, Jr., University of Texas at Austin, United States</i>	
ANALYSIS OF CONTENTION-BASED RELAY SELECTION MECHANISMS IN AUTONOMOUS MULTI-HOP NETWORKS	186
<i>Carlos Morais de Lima, Giuseppe Abreu, University of Oulu, Finland</i>	
ON THE CAPACITY OF THE ERASURE MULTIPLE RELAY CHANNEL	191
<i>Srinath Puducher, Thomas E. Fuja, University of Notre Dame, United States</i>	
MUTUAL INFORMATION OF AMPLIFY-AND-FORWARD DSTBCS OVER THE RANDOM SET RELAY CHANNEL	196
<i>Qiang Xue, Giuseppe Abreu, University of Oulu, Finland; Behnaam Aazhang, Rice University, United States</i>	

COMMUNICATIONS NETWORKS 2

DOWLINK SCHEDULING USING COMPRESSED SENSING	201
<i>Sibi Raj Bhaskaran, University of Melbourne, Australia; Linda Davis, Alex Grant, University of South Australia, Australia; Stephen Hanly, Paul Tune, University of Melbourne, Australia</i>	
APPROXIMATELY OPTIMAL UTILITY MAXIMIZATION	206
<i>Angelia Nedic, University of Illinois at Urbana-Champaign, United States; Vijay B. Subramanian, National University of Ireland Maynooth, Ireland</i>	
A MECHANISM FOR PRICING SERVICE GUARANTEES	211
<i>Bruce Hajek, University of Illinois at Urbana-Champaign, United States; Sichao Yang, Qualcomm Flarion Technologies, United States</i>	

MIMO WIRELESS COMMUNICATIONS

A CHANNEL-ENHANCEMENT APPROACH TO THE SECRECY CAPACITY OF THE MULTIANTELLA WIRETAP CHANNEL	216
<i>Tie Liu, Texas A&M University, United States; Shlomo Shamai (Shitz), Technion, Israel</i>	
THREE-USER MIMO MACS WITH COOPERATION	221
<i>Michèle A. Wigger, ETH Zurich, Switzerland; Gerhard Kramer, University of Southern California, United States</i>	
OPTIMIZED TRAINING AND FEEDBACK FOR MIMO DOWLINK CHANNELS	226
<i>Mari Kobayashi, SUPELEC, France; Nihar Jindal, University of Minnesota, United States; Giuseppe Caire, University of Southern California, United States</i>	

APPROACHING THE RATE DISTORTION FUNCTION

AN ITERATIVE SCHEME FOR NEAR OPTIMAL AND UNIVERSAL LOSSY COMPRESSION	231
<i>Shirin Jalali, Andrea Montanari, Stanford University, United States; Tsachy Weissman, Stanford University, United States / Technion, Israel</i>	
EFFICIENT RANDOM CODEBOOKS AND DATABASES FOR LOSSY COMPRESSION IN NEAR-LINEAR TIME	236
<i>Ioannis Kontoyiannis, Christos Gioran, Athens University of Economics and Business, Greece</i>	

STATISTICAL INFERENCE FOR LARGE DATA SETS

SPARSE MARKOV SOURCE ESTIMATION VIA TRANSFORMED LASSO	241
<i>Teemu Roos, Helsinki Institute for Information Technology, Finland; Bin Yu, University of California, Berkeley, United States</i>	
HIGH DIMENSIONAL PRINCIPAL COMPONENT ANALYSIS WITH	246
CONTAMINATED DATA	
<i>Huan Xu, McGill University, Canada / University of Texas at Austin, United States; Constantine Caramanis, University of Texas at Austin, United States; Shie Mannor, McGill University, Canada / Technion, Israel</i>	
RECENT RESULTS ON PATTERN MAXIMUM LIKELIHOOD.....	251
<i>Jayadev Acharya, Alon Orlitsky, Shengjun Pan, University of California, San Diego, United States</i>	

SOURCE CODING 2

QUANTIZATION SPLITTING FOR SYMMETRIC K-CHANNEL MULTIPLE	256
DESCRIPTIONS	
<i>Chao Tian, AT&T Labs - Research, United States; Jun Chen, McMaster University, Canada</i>	
AND-OR TREE ANALYSIS OF DISTRIBUTED LT CODES	261
<i>Dino Sejdinovic, Robert Piechocki, Angela Doufexi, University of Bristol, United Kingdom</i>	
PROBLEMS WE CAN SOLVE WITH A HELPER	266
<i>Haim Permuter, Ben-Gurion University, Israel; Yossef Steinberg, Technion, Israel; Tsachy Weissman, Stanford University, United States / Technion, Israel</i>	

NETWORK CODING 1

MENGER'S PATHS WITH MINIMUM MERGINGS	271
<i>Guangyue Han, University of Hong Kong, Hong Kong SAR of China</i>	
ANALOG NETWORK CODING MAPPINGS IN GAUSSIAN	276
MULTIPLE-ACCESS TWO-HOP CHANNELS	
<i>Sha Yao, Mikael Skoglund, Royal Institute of Technology, Sweden</i>	
UNIVERSAL WEAKLY SECURE NETWORK CODING.....	281
<i>Danilo Silva, Frank R. Kschischang, University of Toronto, Canada</i>	

COGNITIVE RADIO NETWORKS

STABILITY ANALYSIS FOR COGNITIVE RADIO WITH COOPERATIVE	286
ENHANCEMENTS	
<i>Ioannis Krikidis, University of Edinburgh, United Kingdom; J. Nicholas Laneman, University of Notre Dame, United States; John Thomson, Steve McLaughlin, University of Edinburgh, United Kingdom</i>	
THREE-USER COGNITIVE CHANNELS WITH CUMULATIVE MESSAGE	291
SHARING: AN ACHIEVABLE RATE REGION	
<i>Kyatsandra G. Nagananda, Chandra R. Murthy, Indian Institute of Science, India</i>	
RATE REGION AND POWER CONSIDERATIONS IN A SIMPLE 2X2	296
INTERFERENCE CHANNEL	
<i>Emmanouil Spanakis, Apostolos Traganitis, Foundation for Research and Technology-Hellas (FORTH), Greece; Anthony Ephremides, University of Maryland, College Park, United States</i>	

CHANNEL CAPACITY

CAPACITY BOUNDS FOR THE GAUSSIAN INTERFERENCE CHANNEL	301
WITH TRANSMITTER COOPERATION	
<i>Ravi Tandon, University of Maryland, College Park, United States; Sennur Ulukus, University of Maryland, United States</i>	

DISTRIBUTION OF MIMO MUTUAL INFORMATION: A LARGE	306
DEVIATIONS APPROACH	

Pavlos Kazakopoulos, Panayotis Mertikopoulos, Aris L. Moustakas, University of Athens, Greece; Giuseppe Caire, University of Southern California, United States

APPROXIMATE CAPACITY OF THE SYMMETRIC HALF-DUPLEX GAUSSIAN	311
BUTTERFLY NETWORK	

Amir Avestimehr, Tracey Ho, California Institute of Technology, United States

NETWORK CODING 2

M-USER COOPERATIVE WIRELESS COMMUNICATIONS BASED ON	316
NONBINARY NETWORK CODES	

Ming Xiao, Mikael Skoglund, Royal Institute of Technology, Sweden

RECIPROCITY IN LINEAR DETERMINISTIC NETWORKS UNDER	321
LINEAR CODING	

Adnan Raja, Vinod M. Prabhakaran, Pramod Viswanath, University of Illinois at Urbana-Champaign, United States

ON A THEORY OF NETWORK EQUIVALENCE	326
------------------------------------	-----

Ralf Koetter, Technical University of Munich, Germany; Michelle Effros, California Institute of Technology, United States; Muriel Médard, Massachusetts Institute of Technology, United States

INTERFERENCE NETWORKS

CAPACITY OF DETERMINISTIC Z-CHAIN RELAY-INTERFERENCE	331
NETWORK	

Soheil Mohajer, Suhas N. Diggavi, Christina Fragouli, Ecole Polytechnique Fédérale de Lausanne, Switzerland; David N. C. Tse, University of California, Berkeley, United States

K-USER INTERFERENCE CHANNELS: ACHIEVABLE SECRECY RATE AND	336
DEGREES OF FREEDOM	

He Xiang, Aylin Yener, Pennsylvania State University, United States

PARTIAL COGNITIVE RELAY CHANNELS	341
----------------------------------	-----

Masih Nilchian, Vahid Aref, Mohammad Reza Aref, Sharif University of Technology, Iran
