2008 IEEE Symposium on Advanced Management of Information for Globalized Enterprises

(AMIGE 2008)

Tianjin, China
28 – 29 September 2008

IEEE Catalog Number: CFP08AMI-PRT
ISBN: 978-1-4244-3694-1

Table of Contents

An Evaluation Method for Strategic Decision Making on Group Collaboration under Temporary Constraints 1
Hideyasu Sasaki

Interfirm Business Process Innovation: A Case Study in China 6
Luchuan Liu and Yu Chen

An Analytic Network Process Model for Selecting Vendors in Business Process Outsourcing 11
Lijuan Huang and Xiuwu Liao

Exploring Factors Affecting Trust and Purchase Behavior in Virtual Communities 16
Yaobin Lu, Ling Zhao and Bin Wang

Evaluating the Risks of Fourth-Party Logistics Supply Chain 21
Yan Peng and Yang Zhang

Stochastic Stock Process and Its Option Pricing for a Risk Aversion Stock Market 26
Jun Wang, Juan Wang and Bingli Fan

Modeling and Simulation of Stock Prices by Contact Model and Statistical Analysis 31
Tiansong Wang and Jun Wang

Automated Bidding Strategy using Genetic Algorithm for Online Auctions 36
Hongyan Yu, Chenyan Zhang and Zhongying Liu

A Data-Driven Model for Software Development Risk Analysis Using Bayesian Networks 41
Nan Feng, Minqiang Li, Jing Xie and Deying Fang

Logistics Collaboration Supported by Electronic Logistics Marketplaces 46
Chenyan Zhang, Hongyan Yu and Zhongying Liu

On Dynamic Agility of Inter-Organizational Processes 51
Weizi Li, Huiying Gao, Zhijun Yan and Kecheng Liu

On Knowledge Transfer Performance under Environmental Change 56
Ming Chen and Jianming Zhou

On Determinants of User Acceptance of Internet Banking: A Theoretical Framework and Empirical Study 61
Dong Cheng, Gang Liu and Cheng Qian

A Workflow-Mining-Based Approach to Knowledge Maintenance 66
Ming Li, Lu Liu and Bei Fan

Design of Strategic Budgetary Management System Based on ERP 71
Xun An, Hanrui Bao and Na An

A SOM-Based Framework for Regional Segmentations of Customers 76
Jiahui Mo and Peng Zou

Automated Creation and Realization of Security Federation for Cross-Organizational Business Processes 81
Bernhard Thurm and Ji Hu

Trilateral Game Analysis on Information Sharing among Members in a Virtual Team **86**
Xiuzhen Feng and Yijian Liu

A Hybrid Method for Frequent Itemsets Mining **91**
Fuzan Chen and Minqiang Li

Service-Oriented Sensor Data Query System for Monitoring Milk Storage, Production and Delivery **96**
Wu Li, Guofang Nan and Ting Yang

Quality of Service in Web Services Discovery **101**
Keshan Zhu, Zhenhua Duan and Jianli Wang

A Model Checking Method to Verify BPEL4People Processes **106**
Fenye Bao and Li Zhang

A Composite Benchmark for Online Transaction Processing and Operational Reporting **111**
Anja Bog, Jens Krüger and Jan Schaffner

An Optimal Partner Selection Approach Based on Prospect Theory **116**
Xiaohui Li, Jie Wang and Yang Yu

State Machine Workflow Modeling and Dataflow Analysis **121**
Jia Lu, Yang Yu and Guanxing Li

Combining Advantages - Unified Data Stores in Global Enterprises **126**
Matthieu P. Schapranow, Martin Grund, Jens Krueger, Jan Schaffner and Anja Bog

A Database Engine for Flexible Real-Time Available-to-Promise **131**
Christian Tinnefeld, Jens Krueger, Jan Schaffner and Anja Bog

Operational Reporting Using Navigational SQL **136**
Martin Grund, Jens Krueger, Jan Schaffner, Matthieu Schapranow and Anja Bog

Improving Global Business of Medium-Sized Enterprises by Integrated Processes **141**
Juergen Mueller, Jens Krueger and Alexander Zeier

Shared Table Access Pattern Analysis for Multi-Tenant Applications **146**
Martin Grund, Matthieu Schapranow, Jens Krueger, Jan Schaffner and Anja Bog

Understanding Knowledge Management Performance: A Test of an Integrated Model **151**
Ping-Yu Chu, Chien-Wen Huang and Ling-Tsen Lin

Service-Oriented Decision Support System for Crisis Management in E-Government **156**
Qiongwei Ye, Guangxing Song and Ting Li

Evolution Management of Enterprise Web Services **161**
Vadym Borovskiy and Alexander Zeier

Searching and Finding Concepts in Service-Oriented Enterprise Software **166**
Oleksandr Panchenko and Alexander Zeier

Core Principles of Application Composition for Enterprise Software **171**
Vadym Borovskiy, Oleksandr Panchenko and Alexander Zeier

Three-Tiered E-Waste Recycling Supply Chains Based on Revenue Sharing 176
Zhiduan Xu and Xiaobin Xue

Enhancing Service Site Selection via Joint Learning 181
Junjie Wu, Heng Wang, Le Zhang and Jian Chen

The Role of IT in Sustainable Competitive Advantage of Global Retailing Companies 186
Haiquan Chen, Jin Ji and Xiangke Kong

Modeling the Relationship between IT Capability, Uncertainty and Organizational Performance: An Empirical Study 191
Jun Wu and Ruixue Li

Integrated Evaluation of Listed Companies by Factor Analysis for Symbolic Data 196
Jun-Peng Guo, Feng Gao, Wen-Hua Li and Sa Gao

A Cross-Country Comparison on Supplier Performance Measurement System in Manufacturing Industry 200
Xiaomei Li, Zhaofang Mao and Ershi Qi

Construction and Formalization of Enterprise Isomorphic Layer Structure for Ontology Building 204
Mingxin Gan

Nonlinear Characteristics of Socio-Economic System During Economic Transition 209
Zhiwen Zhu, Hongli Wang and Jia Xu

Implementing Best Practices in ERP for Small & Medium Enterprises 214
Rashmi Jha, M. N. Hoda and A. K. Saini

An Empirical Research on Taobao: Seller Reputation's Impact on Auction Price Premium 219
Jia Zhao and Jinghua Huang

Towards Ranking the Importance of Patents 224
Xiaoyun He, Feng Zhang and Nabil Adam

Impact of Intellectual Property Protection on Foreign Direct Investment of Southern Firms 229
Yanlin Sun and Canhua Kang

The Theme-Mine in Query Expansion 234
Peng Chang and Hui Ma

Managing Tacit Knowledge in Multinational Companies: An Integrated Model of Knowledge Creation Spiral and Knowledge Fermenting 239
Yajun Liu, Jinsheng He, Deyong Xiong and Zhaohui Zeng

A Unified Model of B2B E-Marketplace Adoption: Integrating the Transactional and Relational Perspectives 244
Yan Li, Weiquan Wang, Yan Zhu and Jian Chen

Integrating Workflow and Forum via Event Management 249
Shaokun Fan, Daning Hu and J. Leon Zhao

Adapting the Right Infection Functions for Virus Propagation in Computer Networks 254
Hua Yuan, Junjie Wu and Guoqing Chen

HiPEC: A Hybrid P2P Model for Electronic Commerce 259
Guiyi Wei, Mande Xie and Guanglan Zhou

Strategic Alignment Methods Based on Demands Classification of Information Technology 264
Yiming Xiang, Xiaobo Wu and Baoliang Hu

An Evolving Information System Based on Data Mining Knowledge to Support Customer Relationship Management 269
Ming Ren, Zuoliang Chen, Chuanlan Liu and Guoqing Chen

The Architecture Design of J2EE-Based Distributed Cooperative CAD Platform 274
Runliang Dou, Xuan Wei and Hui Zheng

An Extended IT Adoption Model and Two Empirical Studies in Chinese Cultural Contexts 279
Nan Zhang, Xunhua Guo and Guoqing Chen

On Reuse of Source Code Components in Modernizing Enterprise Systems 284
Noyan Ilk, J. Leon Zhao and Paul Hofmann

A Three-Phased Technology Transfer Model: Lessons from Software Technology Transfer from Japan to Korea 289
Toshihiko Yamakami and Hiroyuki Suzuki

Enterprise Application Integration Based on Global Workflow Technologies 292
Baosen Yang and Lu Liu

On Software Requirement Metrics Based on Six-Sigma 295
Li Li, Shuguang He and Er-Shi Qi

Reliability Analysis Based on Stochastic Model of Business Cycle 298
Hongchen Han, Hongli Wang, Jia Xu and Zhiwen Zhu

A Novel Approach to Discovering Patterns of Global Customer Retention 301
Jie Lin and Xu Xu

An RFID Application Model For Surgery Patient Identification 304
B. H. Jeong, C. Y. Cheng, V. Prabhu and B. J. Yu

Graph-Based Analysis of Multi-Modal Communication Behavior in Global Organizations 307
Matthias Uflacker and Alexander Zeier

Forecasting Agricultural Production via Generalized Regression Neural Network 310
Miaoguang Jin and Chaochong Jin

Multi-Response Robust Optimization Using Desirability Function 313
Jing Wang, Zhen He, Jin-Ho Oh and Sung-Hyun Park

Quality Assurance of Mass Customization: A State-of-The-Art Review 316
Fangfang Zhao, Zhen He and Du Wu

Collaborative Knowledge Creation in Construction Supply Chain Based on Emergence Theory 319
Shaoyan Wu

Knowledge Recommendation Based on Social Network Theory.....322
Bei Fan, Lu Liu, Ming Li and Yin Wu

Active Alarm Processing in a Nuclear Power Plant.....325
Gwi-Sook Jang, Jong-Yong Keum, Je-Yun Park and Young-Kuk Kim

Improved TOPSIS Methods for Multi-Response Optimization 328
Ying Wang and Zhen He

On Evaluation of Investment Decision of MIS Projects.....331
Dongbing Huang and Hong Gao

Impact of M-Commerce on Business Models 334
Xiaobo Wu, Qi Chen and Jingjing Guo

On Outsourcing and Offshoring in Community Source 337
Manlu Liu and J. Leon Zhao
