2009 3rd IEEE International Symposium on Theoretical Aspects of Software Engineering

(TASE 2009)

Tianjin, China
29 – 31 July 2009

IEEE Catalog Number: CFP09TAS-PRT
ISBN: 978-1-4244-4880-7

2009 Third IEEE International Symposium on Theoretical Aspects of Software Engineering

Invited Talks

Verification and Performance Analysis for Embedded Systems 3
Kim Guldstrand Larsen

Modular Development of Certified System Software 5
Zhong Shao

Invited Tutorial

Towards Expressive Specification and Efficient Model Checking 9
Jin Song Dong and Jun Sun

Real-Time and Embedded Systems

Improving Responsiveness of Hard Real-Time Embedded Systems 13
Hugh Anderson and Siau-Cheng Khoo

Environmental Simulation of Real-Time Systems with Nested Interrupts 21
Guoqiang Li, Shoji Yuen, and Masakazu Adachi

Semantics for Communicating Actors with Interdependent Real-Time Deadlines 29
István Knoll, Anders P. Ravn, and Arne Skou

An Efficient Algorithm for Finding Empty Space for Reconfigurable Systems 36
Yan Xiao, Zhenhua Duan, and Pengcheng Nie

Semantics

State Visibility and Communication in Unifying Theories of Programming 47
Andrew Butterfield, Paweł Gancarski, and Jim Woodcock
Semantics of Metamodels in UML 55
Lijun Shan and Hong Zhu
Refinement Algebra with Explicit Probabilism 63
T.M. Rabehaja and J.W. Sanders

Model Checking

Environment Abstraction with State Clustering and Parameter Truncating 73
Hong Pan, Yi Lv, and Huimin Lin
Verification of Population Ring Protocols in PAT 81
Yang Liu, Jun Pang, Jun Sun, and Jianhua Zhao
Bounded Model Checking of ACTL Formulae 90
Wei Chen and Wenhui Zhang

Specification and Security

Coarse Grained Retrenchment and the Mondex Denial of Service Attacks 103
Richard Banach
Enforcing Constraints on Life Cycles of Business Artifacts 111
Xiangpeng Zhao, Jianwen Su, Hongli Yang, and Zongyan Qiu
Consistency Checking for LSC Specifications 119
Hai-Feng Guo, Wen Zheng, and Mahadevan Subramaniam
Integrating Specification and Programs for System Modeling and Verification 127
Jun Sun, Yang Liu, Jin Song Dong, and Chunqing Chen

Software Testing I

A Framework and Language Support for Automatic Dynamic Testing of Workflow Management Systems 139
Gwan-Hwan Hwang, Che-Sheng Lin, Li-Te Tsao, Kuei-Huan Chen, and Yan-You Li
Fault-Based Test Case Generation for Component Connectors 147
Bernhard K. Aichernig, Farhad Arbab, Lacramioara Astefanoaei, Frank S. de Boer, Meng Sun, and Jan Rutten
Test Data Generation for Derived Types in C Program 155
Zheng Wang, Xiao Yu, Tao Sun, Geguang Pu, Zuohua Ding, and JueLiang Hu

Software Models

Program Repair as Sound Optimization of Broken Programs 165
Bernd Fischer, Ando Saabas, and Tarmo Uustalu
Modeling Web Applications and Generating Tests: A Combination and Interactions-guided Approach 174
Bo Song and Huaikou Miao

Merging of Use Case Models: Semantic Foundations 182
Stephen Barrett, Daniel Sinnig, Patrice Chalin, and Greg Butler

Verification

Verifying Semistructured Data Normalization Using SWRL 193
Yuan Fang Li, Jing Sun, Gillian Dobbie, Scott Lee, and Hai H. Wang
Verifying Self-stabilizing Population Protocols with Coq 201
Yuxin Deng and Jean-François Monin
The Logical Approach to Low-Level Stack Reasoning 209
Xinyu Jiang, Yu Guo, and Yiyun Chen
Constructing Program Invariants via Solving QBF 217
Shikun Chen, Zhoujun Li, and Mengjun Li

Concurrency

Using Architectural Constraints for Deadlock-Freedom of Component Systems with Multiway Cooperation 225
Moritz Martens and Mila Majster-Cederbaum
Formal Reasoning about Concurrent Assembly Code with Reentrant Locks 233
Ming Fu, Yu Zhang, and Yong Li
Algorithms for Computing Weak Bisimulation Equivalence 241
Weisong Li

Software Testing II

Interpreting a Successful Testing Process: Risk and Actual Coverage 251
Mariëlle Stoelinga and Mark Timmer
Automated Test Case Generation Based on Coverage Analysis 259
Tim A. Majchrzak and Herbert Kuchen
Exploring Topological Structure of Boolean Expressions for Test Data Selection 267
Lian Yu, Wei Zhao, Xiangdong Fan, and Jun Zhu
On Testing 1-Safe Petri Nets 275
Guy-Vincent Jourdan and Gregor V. Bochmann

Poster Papers

Verifying the Implementation of an Operating System Scheduler 285
Moritz Kleine, Björn Bartels, Thomas Göthel, and Sabine Glesner
A Tool for Estimating Memory Usage 287
Shengyi Wang and Zongyan Qiu
A Framework for Dependency Evaluation of the Agent Oriented Methodologies Work Flows 289
Tannaz Alinaghi, Camellia Ghoroghi, Ahmad Saborui, and Reza Basseda

Spontaneous Detection of Infinite Loops and Livelocks in Dynamic Testing of Concurrent Programs 291
Che-Sheng Lin and Gwan-Hwan Hwang
Specifying and Verifying PLC Systems with TLA+ 293
Hehua Zhang, Stephan Merz, and Ming Gu
Domain Hierarchies: A Basic Theoretical Framework for Integrating Software Domains 295
Pierre Kelsen and Qin Ma
Improve Semantic Web Services Discovery through Similarity Search in Metric Space 297
Minghui Wu, Fanwei Zhu, Jia Lv, Tao Jiang, and Jing Ying
Parameterized Bisimulation Infinite Evolution Mechanism 299
Yanfang Ma, Min Zhang, and Yixiang Chen
Modeling MapReduce with CSP 301
Wen Su, Fan Yang, Huibiao Zhu, and Qin Li
Formal Specification and Experiments of an Expressive Human-Computer Ensemble System with Rehearsal 303
Tetsuya Mizutani, Tatsuo Suzuki, Masayuki Shio, and Yasuwo Ikeda
Towards Automated Software Verification Using Model Checking Techniques 305
Somayeh Asadollahi, Vahid Rafe, Reza Rafeh, and Adel T. Rahmani
Data Structure Shape Inference and Verification for OO Programs 307
Rhys Owen and Hugh Anderson
DUMS: A Dynamical Updatable Monitoring System for Desktop PCs Used for Distributed Computing 309
Jinwei Wang, Huazhi Sun, and Jianping Fan
Formal Representation and Analysis of a Near Miss Accident in N Sigma-labeled Calculus 311
Tetsuya Mizutani, Shigeru Igarashi, Yasuwo Ikeda, and Masayuki Shio
Representing Aspects in Design 313
Saqib Iqbal and Gary Allen
G-BLAST: BLAST Manager in an Heterogeneous Distributed Environment 315
Dong-Wook Kim, Tae-Sung Jung, Dae-Won Kim, Seong-Hyeuk Nam, Hyuk-Ryul Kwon, Sang-Haeng Choi, Hyung-Dae Koh, Han-Suk Choi, and Hong-Seog Park
Probabilistic Coordination Language for Component Dynamic Composition 317
Dehui Du and Ling Yin
Modeling Fault Tolerant Services in Service-Oriented Architecture 319
Farzaneh Mahdian, Vahid Rafe, Reza Rafeh, and Adel T. Rahmani
Heap Memory Requirements Analysis via Separation Logic 321
Guanhua He and Chenguang Luo
Automated Verification Using Unified Control Flows 323
Cristian Gherghina and Cristina David

MARS: Metamodel Recovery from Multi-tiered Models Using Grammar Inference 325
Qichao Liu, Faizan Javed, Marjan Mernik, Barrett R. Bryant, Jeff Gray, Alan Sprague, and Dejan Hrnčič
Formal Approaches to Deadlock Analysis in Competitions of Shared Web Resources 327
Jieqi Ding, Han Zhu, Huibiao Zhu, and Qin Li
Measuring the Survivability of Object-Oriented Software 329
Jueliang Hu, Zuohua Ding, Jing Liu, and Ling Yin
